But we need to do more, Mr. Speaker. The Community Renewal Employment Act, of which I am a cosponsor, will provide a shot in the arm to efforts to create meaningful short-term unemployment to the chronically jobless. H.R. 1036 will target funds toward those areas with higher than average employment rates, and will provide jobs to individuals with a demonstrated inability to secure unsubsidized employment. This is not a makework bill. The jobs created will directly benefit communities, since eligible activities will include road repair, water systems repair, mass transit system development, and health care and emergency shelter programs.

Mr. Speaker, America's unemployed do not want handouts. They want jobs. And H.R. 1036 is a vital step in the right direction. I urge my colleagues to vote for passage.

LET'S HEAR IT FOR CHARLES LICHENSTEIN

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, let me offer my personal praise of the U.S. Representative to the U.N., Charles M. Lichenstein. I appreciate the frank comments he made about the United Nations yesterday when he told the Soviets that if their delegate, or any other member, wished to propose that the United Nations get out of the United States, that the United States would put no impediment in their way.

Since the Korean war, the United Nations has had a spotty record in preventing or controlling the outbreak of wars around the globe. U.N. spending alone has risen over 80 percent in 5 years. This has meant a rise in the U.S. contribution from $99 million in 1977 to over $171 million in 1983.

Mr. Lichenstein's comments reflect the frustration of myself and many Americans when we think of the U.N.'s costs, its lack of effectiveness, and its basic orientation. With this in mind, I say to the United Nations, shape up or ship out.

Ambassador Lichenstein, I am sure that many Members of Congress agree with what you said and many of us would be happy to join you at the dock to wave a "fond farewell."

RELOCATING THE U.N.

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, by now, we have all grown quite used to the preposterous charges that the Soviet Union has leveled against America in an attempt to cover up their despicable downing of Korean flight 007. But there is one charge that deserves an answer—the charge that America has failed to fulfill our obligations as host country for the United Nations.

For once, Mr. Speaker, I agree with the Russians. I join with Charles Lichenstein, one of our Representatives to the United Nations, in extending a cordial invitation to Ambassador Gromyko and his Third World colleagues, clones and stooges, to relocate the United Nation someplace that better reflects their customs, and their craven political style. Afghanistan, perhaps.

As hosts for the United Nations, the American taxpayer will shell out $389 million next year. That is a lot of money to pay to be alternately harangued, insulted and double-crossed by some of the rudest guests since the Redcoats put their boots up on Dolly Madison's furniture.

EULOGY TO VICTIMS OF KAL 007

(Mr. PHILIP M. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHILIP M. CRANE. Mr. Speaker, the entire world has echoed with shock and outrage in the wake of the shooting down by the Soviets of a civilian plane carrying defenseless men, women, and children. By this action the Soviets have once more shown

themselves to be contemptuous of not only international law, but of all standards of civilized behavior. The Soviet disregard for human life and human rights displayed yet again in this incident has been made manifest for all the world to see.

This horrifying tragedy claimed the lives of 269 people, including a distinguished Member of this Congress, and it must not be forgotten.

Today I am inaugurating a series of 269 1-minute speeches which will memorialize each of the individuals whose lives were snuffed out in the barbarous attack, and which will call on the Soviets—in the name of simple justice—to partially rectify the wrong that has been done by giving life and freedom to one of thousands of Soviet subjects—each as innocent as the KAL-007 flight victims—currently occupying Soviet prisons, hard-labor camps, and psychiatric hospitals.

So today, Mr. Speaker, I would like to begin by eulogizing our fallen colleague, the Honorable Larry McDonald, who was unceasing in his efforts to bring into the light of day the hidden machinations of the Soviets throughout the world. He had the courage of his convictions, the willingness to speak out, any time and any where, in order to raise the consciousness of all his fellow Americans regarding Soviet actions and the dangers posed by the Communist threat throughout the world.

Mr. Speaker, we realize, of course, that there is nothing we or the Soviets can do to bring back the lives of the KAL-007 victims. However, we can, we must, and we will ask the Soviets to give new life and freedom to others as a reparation for this heinous crime against humanity. Specifically, we call upon the Soviet Union, in reparation for the life of Larry McDonald, to release another man of conscience; a champion of freedom and justice, Andrei Sakharov.

HELP THE POULTRY INDUSTRY: SUPPORT H.R. 3231

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, President Carter's 1980 grain embargo of the Soviet Union is regularly decried because of its deleterious impact upon the grain producers of America. We forget, however, that the grain embargo hurt more than just the grain producers of our Nation.

According to the Poultry and Egg Institute of America, the last Soviet embargo cost poultry producers an order for 65,000 metric tons of chicken. They received no compensation for their losses.

When the United States imposed controls on the export of soybeans due to domestic shortage considerations in the early 1970's, the Japanese responded by encouraging the development of Brazil as a major producer of soybeans. Increased chicken production in Brazil naturally followed. According to the president of the Poultry and Egg Institute of America, "a major cause of our losing export markets is Brazil's practice of subsidizing poultry," another offshoot of our ill-considered and ineffectual export controls.

This year, Congress will have an opportunity to review the laws which allow the imposition of export controls upon agricultural commodities and all other goods and technologies. When H.R. 3231, the Export Administration Amendments Act of 1983 comes to the floor in the coming weeks, I hope that all Members will review it closely and give their strong support to its necessary reforms to our Nation's export control policies.

COAL SLURRY PIPELINE RED HERRINGS

(Mr. SHUSTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHUSTER. Mr. Speaker, after so many years of debate on the coal slurry issue it was disappointing to read in the Washington Post this morning the wornout, discredited claim that this issue has gone to Congress because it is impossible to build a pipeline very far without having to cross a railroad right-of-way and the railroads generally refuse to allow it.

For the umteenth time, Mr. Speaker, let us say once again that those of us who oppose this special interest legislation has said we will support legislation giving coal slurry lines limited, limited right of Federal eminent domain over railroad tracks. But when we have offered this time and time again it has been declined, proving, exposing that this issue of not being able to cross railroad tracks is the only issue is simply a red herring.

This is an enormously complex issue that goes far beyond that simple red herring. Given the awesome power of Federal eminent domain to private coal slurry lines is anticompetitive and should be defeated.

COMPENSATION FOR VICTIMS OF KAL 007

(Mr. NIELSON of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NIELSON of Utah. Mr. Speaker, each of us has risen to his or her feet in the memory of our respected colleague, Larry McDonald; the premature ending of his life represents a tragic waste. I knew him, I respected him, and I will miss him deeply. As much as I have been personally touched by his death, I cannot help but think about the 268 others aboard that Korean airliner: Those innocent people whose lives were ended suddenly and without reason 35,000 feet above the cold cruelty of a vast ocean. I think of the 8-month-old boy on his way to see his father for the first time; the young businesswoman on her way to her first job; the young father of two who had turned down the chance to catch an earlier flight so he could spend a few extra hours with his loved ones.

Because of the inhumane disregard of the Soviet Government, all of these were brutally murdered in a devastating missile blast. For Larry McDonald, and for the 268 others, I pray we will have the courage to stand firm, and take whatever steps are needed to get adequate recompense.

□ 1240

OUR MARINES SHOULD BE ABLE TO PROTECT THEMSELVES IN LEBANON

(Mr. LEWIS of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEWIS of Florida. Mr Speaker, I would have preferred the establishment of a multinational, peacekeeping force under the auspices of the United Nations in Lebanon. But since it appears the decision for us to maintain a presence there is inevitable, it is important that we make our resolve in Lebanon crystal clear to all nations.

Since that commitment cannot be successful if tied to a capricious timetable, we should not bind ourselves to time constraints if the purpose of our mission in Lebanon is to keep the peace or to be a forthright symbol of legitimacy for the Lebanese Government.

And while our marines remain in Lebanon they should have the absolute freedom to defend themselves.

Their presence there is not to fight but if their positions are fired upon then our marines should use any means to protect and defend their positions and their lives with utmost dispatch.

THE CHADHA RESPONSE BILL FOR FEDERAL REGULATIONS

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr Speaker, today, I am being joined by a group of my Republican leadership colleagues in the House in introducing the "Regulatory Oversight and Control Act of 1983" as a response to the recent Supreme

Court decisions holding the legislative veto device unconstitutional.

Our bill offers a four-pronged approach to retaining congressional control over the Federal regulation-making process. First, the bill calls for internal agency regulatory improvements, including cost-benefit analyses for major rules and their alternatives, a requirement that agencies choose the most cost-effective alternative unless another is mandated by law, and a sunset date of not more than 10 years for all major rules, including existing major rules.

Second, our legislation requires submission of most rules of general applicability to the Congress for a 90-day period. Major rules must be approved by the enactment of a joint resolution, while other rules could be disapproved by enactment of a joint resolution. In both instances, this meets the Chadha requirement of Presidential involvement in the process.

Third, our bill amends House rules to provide for a more rational and accountable oversight process. And finally, we permit the offering of limitation amendments to appropriations bills during the initial amendment stage for those regulations for which a resolution of disapproval has not been considered by the House or has not been enacted during the specified review period.

Mr Speaker, I invite my colleagues to join as cosponsors in this effort to retain congressional control over the lawmaking authority we delegate to the regulatory bureaucrats.

JOBS NEEDED NOW

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GONZALEZ. Mr. Speaker, since 1980, unemployment has increased by leaps and bounds—today, the number of unemployed is 50 percent greater than it was then. And that is not all; the number of people forced into part-time work has also increased, by almost 50 percent. And that is not all; the real wages of American workers are not improving at all. Yet a great economic recovery is being trumpeted. Where is that recovery, when long-term unemployment is twice as high today as it was 2½ years ago?

Millions of American—at least 11 million—are looking for work and not finding it.

There is a great and burgeoning need for jobs, and jobs now.

That is why we need a jobs bill. That is why the House must enact H.R. 1036, the Community Renewal Employment Act. It is not all that is needed, but it is at least a step in the right direction.

Through this bill, communities will be able to make urgently needed repairs and investments in their basic capital structures—schools, roads, parks, and all manner of other public facilities. We have hundreds of billions of dollars' worth of needed public works.

These are investments that must be made, cannot be avoided.

We have millions of people desperate for work.

What could make more sense than to put people who need jobs to work on jobs that need to be done? With all the need we have for improving this Nation's wornout, worn-down public facilities, why not get the job done? Nothing could be more sensible or practical than the Community Renewal Employment Act, and I urge my colleagues to support it.

If we can afford to spend better than $9 billion a year on military space ventures, surely we can afford to spend one-third that amount to put safe streets under our cars, to put sound walls in our schools, and to make our communities decent places in which to live.

WHY, I ASK, ARE WE THERE?

(Mr. PAUL asked and was given permission to address the House for 1 minute.)

Mr. PAUL. Mr. Speaker, the parents of marines killed and wounded in Lebanon are asking: Why are we there? What is our goal? Where is the enthusiasm for the mission? What is our role?

Americans will support, and fight and rally together when the objectives are clear. They will grow discontented and divided if our goals are vague and untenable.

Now is the time to decide what the purpose for our Middle East involvement is. If we wait a day longer, we will become deeply mired in a conflict from which we cannot escape.

It has been said that we are a peacekeeping force and yet there is less peace now than when we went into Lebanon. We did not go in to fight and yet we fire our weapons daily to protect our marines. But if our marines were not there, there would be no reason to participate in the killing—nor have our own marines killed and wounded.

Last year, we rescind the PLO at great risk and expense. Today, those same PLO members are firing at our marines.

Some have said that our marines feel good about their mission in Lebanon. But Alexander Ortega, in his last letter home before being killed, said: "I never knew how much I love America. I want to come home." Soon after he wrote that letter, he came home—in a box. And for what?

No—there is no peace, yet we are told there is no war. If there is no war, then victory can never be the goal.

It makes no sense. It is time we admit it and come home before a lot more marines come home as Alexander Ortega did.

It would be a serious mistake for Congress to give approval for our troops to occupy Lebanon for an additional 18 months. Our involvement in Lebanon serves to escalate the war, jeopardizes our national security, and detracts from our ability to provide for a true defense of America. It is time to come home.

PERMISSION FOR TASK FORCE ON SOCIAL SECURITY AND WOMEN OF SELECT COMMITTEE ON AGING TO SIT ON THURSDAY MORNING, SEPTEMBER 22, 1983

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the Task Force on Social Security and Women of the Select Committee on Aging be permitted to sit on Thursday morning, September 22.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken today after debate has been concluded on all motions to suspend the rules.

DELAYING PAY CUT FOR CIVIL SERVICE

Mr. FORD of Michigan. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3871) to amend the Omnibus Budget Reconciliation Act of 1982 to provide that the figure used in determining hourly rates of pay for Federal employees not be changed before the comparability adjustment in the rates of pay for such employees has been made for fiscal year 1984.

The clerk read as follows:

H.R. 3871

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 310(b) of the Omnibus Budget Reconciliation Act of 1982 is amended by adding at the end thereof the following new paragraph:

"(4) Notwithstanding any other provision of this subsection, paragraph (1) shall not be effective with respect to pay periods beginning before the effective date of any increase under section 5305 of title 5, United

States Code, in the rates of pay under the General Schedule and the rates of pay under the other statutory pay systems for fiscal year 1984.".

SEC. 2. The amendment made by this Act shall be effective as of October 1, 1983.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Michigan (Mr. FORD) will be recognized for 20 minutes, and the gentleman from California (Mr. DANNEMEYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the sole purpose of H.R. 3871 is to delay the effective date of section 310(b) of the Omnibus Budget Reconciliation Act of 1982 until the effective date of the next Federal employee pay increase.

This bill is supported by a majority of the members of the Committee on Post Office and Civil Service, by numerous other Members of the House, and by the administration. Unless it is enacted prior to October 1, hundreds of thousands of Federal employees will suffer an unintended and unexpected pay cut this October.

Section 310(b) was one of several provisions reluctantly accepted by the House conferees on the 1982 budget reconciliation bill. These provisions, which adversely affect Federal employees and retirees, were necessary to achieve the spending cuts required by the reconciliation instructions. Section 310(b), for example, was estimated to save $120 million in fiscal year 1984. I should point out that although the House finally approved the conference report—it was rejected the first time it was considered—I and a majority of the members of the Committee on Post Office and Civil Service voted against it.

Section 310(b) requires a bookkeeping change in the way pay is computed for general schedule—white collar—and most other annual rate Federal employees. In order to compute paychecks for these employees their annual salaries must be converted into hourly rates. Currently, this is done by dividing the annual salary by 2,080 hours, number of house in 52 weeks of 40 hours each. In fact, however, each year there is a fraction of a week more than 52 weeks which means employees are being paid a little more than their stated annual rate in most calendar years. To save money, the Reconciliation Act requires that for fiscal years 1984 and 1985 the more mathematically accurate divisor of 2,087 hours should be used to compute hourly rates.

According to the Office of Personnel Management, use of the new divisor will mean pay cuts of $3.20 to $8.80 per pay period for affected employees. To minimize the impact on employees, the Reconciliation Act provides the new computation method will take effect with the pay periods beginning on or after October 1. This coincides with the traditional effective date for the annual Federal pay comparability adjustments. Thus, although the new divisor means a slight pay reduction, the comparability adjustment which was expected to take effect at the same time would more than compensate for it, and employees' take-home pay would still increase.

The President has now formally proposed delaying the pay adjustment until next January and capping it at 3.5 percent. Congress may or may not go along with the President's plan. It earlier endorsed a 4-percent increase. But in the meantime affected employees will suffer a pay cut in a few days as a result of the President's plan to delay the annual pay adjustment.

This bill will avoid an October pay cut. Specifically, it provides that the new computation method will not take effect until the pay comparability adjustment also takes effect. Thus the reduction required by the new computation method will be more than offset by the pay comparability adjustment.

I urge my colleagues to support this bill out of fairness to Federal employees who will be unintentionally damaged if we fail to act.

Mr. DANNEMEYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill, H.R. 3871. As a cosponsor of this bill, I join the distinguished chairman of our committee, the gentleman from Michigan, and the distinguished ranking minority member, the gentleman from Missouri, in urging swift approval of this legislation. It is only fair that a salary computation change take place when a pay hike is enacted as originally intended in the 1982 Reconciliation Act.

As Members know, this change was made in order that the biweekly paychecks of Federal white-collar workers more accurately reflect the actual year.

But let it be clear where this change originated. It did not start with Ronald Reagan. It did not start with Donald Devine. It started in 1981 with a letter from the Chair of the Compensation and Employee Benefits Subcommttee to the General Accounting Office.

This change results in savings of $120 million per year. This means a one-third of 1-percent cut in the biweekly paychecks of Federal employees.

It should be noted that since H.R. 3871 amends the 1982 Reconciliation Act, the workyear change lasts only 21 months, if a pay hike is approved for January 1984. It is my view that this computation change which the Congress approved last year should be made permanent.

With respect to pay, this House has some large unfinished business and that is approving legislative savings through the reconciliation process. I regret to say that our committee came up $567 million short by approving an October 1 pay hike when the full House called for an effective date of January 1. The committee could not even bring itself to vote against a pay hike for Members of Congress. I trust that we can move swiftly on that needed legislation as well.

Again, I commend the chairman of our committee for his action in bringing H.R. 3871 to the House floor and urge swift passage of this legislation.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, I rise in support of the bill.

Mr. Speaker, the new pay computation formula contained in last year's Budget Act is a slap in the face to all Federal workers. Under the new formula, Government employees will suffer a reduction in their pay averaging $3.20 per pay period, and ranging up to $8.80 per pay period for high paid employees.

While this reduction is considered by some in the Congress to be a relatively small amount, it is still a reduction in take home pay and will have an adverse effect on the morale of employees at all levels. This pay formula was initiated by the Congress and in my opinion, should be repealed by the Congress.

For several years now, Federal employees have received limited cost-of-living increases, have experienced significant reductions in health benefits, and have been required to contribute to the medicare trust fund. At a time when a 21-percent pay increase is necessary to reach comparable levels in the private sector, it is unconscionable to permit any further reductions in pay or benefits.

I commend the House Post Office and Civil Service Committee for moving forward with H.R. 3871. This bill has the support of the administration and corrects a serious inequity that we must address now. I urge my colleagues in the House to support this measure.

Mr. FORD of Michigan. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, much as I would like to claim credit for things that I do which are right, I think the gentleman needs to be a little corrected.

The result of this cut was a result of the Reagan Omnibus Reconciliation

Act, no study. As a matter of fact, when GAO did a study related to this issue, they asked the chair of the committee to put forth a formal request so they could release the study. So it was not really a formal thing that we initiated. It was a result of a vote on the Omnibus Reconciliation Act of 1982. No study can produce a vote. And I did not support that Reconciliation Act, I am proud to say.

Mr. Speaker, make no mistake about it, this is an important bill for our Federal employees. And, naturally, this pay cut has upset many of our workers. Even though the amounts appear to be small, they are not small when it comes to the individuals who make a relatively small salary.

Federal employees see it as another slap in the face from the White House. And over the past several years various administrations, especially this one, has criticized and admonished the Federal employees for being the source of many of our problems, which is of course not true.

In addition, this cut comes on top of other reductions, for pay reductions for Federal employees. You cannot do too much more to an employee than offer them, as this administration has done, no pay raise, offer to gut their retirement plan, and to ask them to pay up to 55 percent more for their health plan and get an equivalent amount of a decrease in benefits.

So they have just clobbered them every time they have turned around.

And in today's Washington Post—and if the gentleman had not blamed me for this particular cut of Federal employees, I would not be going into this detail, but since the gentleman raised it, I feel we have to put forward the facts—it relates that the administration—we do not know if it is true or not, but at least it is on the front page of today's paper—plans to increase the cost to Federal employees for their health benefits up to 25 percent more.

And, in addition to all of this, Federal employees, by all studies that are verified, lag behind the private sector in comparable salaries some 21 percent.

So hundreds of thousands of Federal employees view this problem as another setback.

I would like to commend my chairman for coming forward with a solution that I know he worked out with the Senate side that at least will delay this further cut for Federal employees.

Now, Mr. Speaker, in my judgment, Federal employees deserve the consideration of this body and the American people. The productivity of Federal workers has increased an average of 1.5 percent per year between 1967 and 1981, almost double that of the national average and certainly higher than in other countries.

Federal employees are not asking to be treated any better than any other employee, they only want to be treated equally. They should not be considered second-class citizens or be forced to bear an unfair burden of Government cutbacks.

Simply put: Federal employees should be afforded the same types and levels of benefits they could receive from any other employer.

And this is the least we can do today to pass H.R. 3871. I certainly support it. I ask my colleagues to do so. And I am glad that for a change there is a bipartisan support for assisting the Federal employees not to take still another cutback in their benefits.

Mr. DANNEMEYER. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I would be happy to yield now to the gentleman from California.

Mr. DANNEMEYER. I thank the gentlewoman for yielding.

After listening to the gentlewoman's comments, I have to ask a question.

Is the gentlewoman supporting this legislation?

Ms. OAKAR. Absolutely supporting it.

Mr. DANNEMEYER. I had to ask that question.

Ms. OAKAR. But I did not support the Omnibus Reconciliation Act of 1982 that had this legislation in it.

Mr. DANNEMEYER. And I have another question. Did the gentlewoman write on March 10, 1981 to the General Accounting Office requesting what this concept would do in terms of its impact on the Federal budget?

Ms. OAKAR. That is right. After the GAO, who had already done the study, asked me to write formally so that they could release their findings, I did do that. But as the gentleman knows I did not initiate it. Nonetheless, even if I had, the fact of it is the study does not produce the action. The action was by a vote on the Omnibus Reconciliation Act.

□ 1300

I know the other side of the aisle would like to blame the Democrats, for a change, for various kinds of cuts in Federal employees. The fact is that we have always tried to protect Federal employees. We believe this is the greatest country in the world, and one of the reasons it is is because we have the greatest Government which is run, by and large, by Federal employees.

So I would be happy to have the gentleman join me. I am glad he is a cosponsor of this legislation. I think H.R. 3871 is important. I am delighted that the gentleman is a cosponsor, as I am, in joining our Chair's leadership to protect, for a change, the health and welfare of our Federal employees.

Mr. DANNEMEYER. Mr. Speaker, I thank my colleague.

Mr. Speaker, I yield 2 minutes to the gentleman from Utah (Mr. NIELSON).

Mr. NIELSON of Utah. Mr. Speaker, I would like to commend the gentleman from Michigan (Mr. FORD), the gentlewoman from Ohio (Ms. OAKAR) and the gentleman from California (Mr. DANNEMEYER) for this essential legislation. I think it is very good to delay this so that it comes at the same time the salaries are adjusted in January, rather than have the accounting change. In addition to the hardship on the civil servants involved, it also involves a good deal of accounting and computer changes, as well.

So I commend you for doing that, and I wholeheartedly support it.

Mr. DANNEMEYER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FORD of Michigan. Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. HOYER).

Mr. HOYER. Mr. Speaker, I would like to take this opportunity to congratulate the chairman of the Post Office and Civil Service Committee as well as the ranking minority member of the committee for their timely movement of this legislation. If it were not for their deliberate efforts to prevent this impending pay cut on October 1, I am certain you would find an increasingly demoralized and frustrated Federal work force on the next pay day.

There is little rationale for this pay cut in the first place. It is the result of the budget reconciliation instructions of fiscal year 1983 that forced the authorizing committee to make savings where there was no room for savings. Federal pay is a constant overhead affected by pay raises and the number of employees onboard. Similarly, Federal retirement is also essentially an entitlement account. Thus, the authorizing committees responding to reconciliation instructions were faced with very difficult demands that they somehow reduce the overhead costs of this Government. But you cannot reduce overhead, especially in the personnel area without some negative effects. The result, in this case, was a nickle and dime approach—but the only approach the authorizing committee could take. If this legislation is not enacted, the next pay day will bring a pay cut.

As my colleagues know, the past years have been difficult ones for the Federal employees. A recent report by the President's Advisory Committee on Federal Pay indicates that Federal pay falls an average of 21.5 percent behind private sector pay. A report commissioned by the House Post Office and Civil Service Committee indicates that 2 years ago the value of the Federal employee health benefit plan was 21 percent less than the

health plans available to private sector employees and 18 percent less than that available to State government employees. With last year's premium increases and benefit reductions and this year's impending 18 to 25 percent increase in premiums, the health insurance gap between the private sector and that offered by the Federal Government will increase even more dramatically.

With good reason, then, civil servants feel betrayed, undermined, and unappreciated. Despite the relatively small size of the pay cut scheduled to take effect on October 1, the impact on employee morale will be large and negative.

I am pleased to see that this legislation has broad bipartisan support and that Congress is refusing to nickel and dime to death the men and women who make this Government run and run well. Again, I congratulate the gentleman from Michigan for his efforts on this legislation and urge the unanimous support of my colleagues for this bill.

Mr. FORD of Michigan. Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. BARNES).

Mr. BARNES. Mr. Speaker, I will be very brief. I came to the floor simply to salute the leadership of the chairman and the chairwoman of the subcommittee on this issue.

Just this morning the front page of the Washington Post reports that there is going to be yet another attack on Federal workers, and that is another huge increase in the premiums for health benefits for Federal employees and another huge reduction in the benefits that Federal employees receive. To tackle Federal employees with all of these attacks at the same time has simply, as was just said so correctly by my friend from Maryland, totally demoralized our work force.

What we are doing here today is a very small step, but it is an important one. I am delighted that we have the leadership of the members of the committee on this question, that they are moving this forward, and I urge strong support from our colleagues on both sides of the aisle.

Mr. BLILEY. Mr. Speaker, I rise today to support H.R. 3871 delaying pay reductions for salaried Federal employees past October 1 of this year. I commend the Committee on Post Office and Civil Service for bringing this legislation to the House floor in a timely fashion.

H.R. 3871 is a simple, well-reasoned response to a problem not anticipated when Congress passed the fiscal year 1983 Budget Reconciliation Act last year.

As we know, salaried Federal employees are currently paid on the basis of a 2,080-hour work-year, although they often work several hours longer than that, up to 2,096 hours in some years.

Because last year's reconciliation bill changes the annual hours worked from 2,080 to 2,087 on October 1, 1983, Federal employees are scheduled to have their pay cut on October 1, even though they will receive a 3.5- to 4-percent pay raise 90 days later.

It was intended that all salary changes would be made at the same time as the annual cost-of-living increase, which normally comes on October 1, to cushion the effect of this necessary but unfortunate pay adjustment. Without this bill our decision to postpone the pay increase to January 1 would be a double blow to Federal workers: Not only would their annual increase be late, but they would actually see their paychecks reduced on October 1.

In addition to the equity feature of this bill for Federal workers, the measure would save the Federal Government considerable time and expense of accounting and bookkeeping changes in Federal checks only 3 months apart.

Federal employees do an outstanding job in the service of our country. We owe it to all civil servants to be fair and understandable when we make changes that affect them.

H.R. 3871 is needed, fair and sound. I urge its adoption.

● Mr. FAZIO. Mr Speaker, I would like to take this opportunity to strongly endorse H.R. 3871, which will delay the recomputation of Federal white-collar salaries from October 1 until the date of the Federal pay comparability adjustment for fiscal year 1984. The expeditious action by Congress on this issue is due to the commitment of our colleagues to the Federal workforce, and I would especially like to commend Representative BILL FORD, chairman of the Post Office and Civil Service Committee, for his leadership in bringing this legislation to the floor of the House.

The recomputation involves a changeover from computing pay on the basis of a workyear of 2,080 hours to one of 2,087 hours and will cost the average civil servant about $3.20 every 2 weeks. The bookkeeping change, as mandated by the 1982 Omnibus Budget Reconciliation Act, was to go into effect this October 1—the usual date for the annual Federal pay adjustment—so that its impact would be minimized. Now that the President has proposed a pay adjustment to take place in January, it is only fair that the recomputation be delayed to that date. This bill has received the endorsement of the Office of Personnel Management, and represents a bipartisan effort among Members of Congress on behalf of our Federal work force. I urge my colleagues to give H.R. 3871 their swift and favorable consideration.●

● Mr. WOLF. Mr. Speaker, I rise in support of H.R. 3871, a bill I cosponsored which would delay until January the effective date for recomputing hourly pay rates for certain Federal employees. This bookkeeping change was originally slated for implementation in October, however, I support this effort to delay the effective date for several reasons.

I did not support the Omnibus Reconciliation Act of 1982 which initially imposed this change. I believe the intent of the original legislation, though, was to have this computational change coincide with the next comparability pay increase. Since the next pay raise now appears likely in January, if this bookkeeping change were made then, I believe it would be absorbed by the pay raise and pose less of a negative impact on Federal workers. Likewise, this yearly work-hour change would coincide with the calendar year to which this change pertains rather than with the fiscal year.

This bill as introduced by the chairman of the House Post Office and Civil Service Committee, has broad bipartisan support and, as outlined in the attached letter from the Office of Personnel Management, has administration backing as well.

Mr. Speaker, I urge my colleagues to support this bill.

OFFICE OF PERSONNEL MANAGEMENT,
Washington, D.C., September 9, 1983.

Hon. WILLIAM D. FORD,
Chairman, Committee on Post Office and Civil Service, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to express the Administation's support for a delay in the effective date of the impending change in the method by which pay for Federal salaried workers is computed.

Under section 310(b) of Public Law 97-253, the Omnibus Budget Reconciliation Act of 1982, General Schedule employees, and most other annual rate employees of the Government, will have their pay computed during fiscal years 1984 and 1985 under a different formula than has been used in the past. In order to compute paychecks for these employees, it is necessary to convert their annual salary rates into hourly rates. Up till now, this has been done by dividing the annual rate by 2,080 (the number of hours in 52 weeks of 40 hours each) and rounding the result to the nearest cent to yield the hourly rate. Since there is a fraction of a week more than 52 weeks in a calendar year, this formula has resulted in most employees being paid a little more than their stated annual rate in most calendar years. In recognition of this situation, the Reconciliation Act provided that the mathematically more precise divisor of 2,087 would be used in lieu of the 2,080 divisor for two years, beginning October 1, 1983.

The Reconciliation Act was subsequently amended by Public Law 97-346, which provided, among other things, that the effective date of the 2,087 divisor would be delayed until the first day of the first pay period beginning on or after October 1, 1983. This change was made so that the effective date of the new computation formula would coincide with the then-expected ef-

fective date of the fiscal year 1984 General Schedule pay adjustment, and the pay reduction resulting from the new divisor would thus be more than offset by the pay adjustment.

However, on August 31, 1983, the President transmitted to Congress an alternative pay plan that will delay the effective date of the General Schedule pay adjustment to the first pay period in January 1984, and this same delayed effective date is assumed in H. Con. Res. 91, the fiscal year 1984 budget resolution that was adopted by the Senate and House of Representatives on June 23, 1983. Accordingly, it now seems clear that the pay raise will in fact be delayed until January, and the implementation of the 2,087 divisor will therefore not coincide with the pay raise.

As a result, the affected employees will suffer a reduction in their pay averaging $3.20 per pay period, and ranging up to $8.80 per day period for high-paid employees. While this is a relatively small amount, any reduction in pay is certainly a difficult matter for low-paid employees, and would have an adverse effect on the morale of employees at all levels. Since it was clearly not the intent of anyone that this change in the pay computation formula take place in isolation and actually reduce people's take-home pay, we urge that the Committee initiate legislation delaying the effective date of the 2,087 divisor until the first day of the first pay period beginning on or after January 1, 1984, the same day that the General Schedule pay adjustment will become effective.

While this delay would reduce the savings anticipated from the 2,087 divisor during fiscal year 1984, these savings could be recouped in fiscal year 1986 by extending the current expiration date of the 2,087 divisor from September 1985 to December 1985, and we urge that such an extension be included in legislation delaying the use of the 2,087 divisor.

The Office of Management and Budget advises that, from the standpoint of the Administration's program, there is no objection to the submission of this report.

Sincerely,

DONALD J. DEVINE,
Director.●

● Mr. MATSUI. Mr. Speaker, I rise in support of H.R. 3871, legislation to delay the recomputation of hourly Federal pay rates. Passage of this bill is vital if we are to prevent the recomputation from taking effect on October 1.

As we are all aware, because of a provision of last year's Reconciliation Act, on October 1, salaries for Federal employees will be based on a work-year of 2,087 hours rather than on the current 2,080 hours. This will reduce the average employee's salary by $6.40 per month and save the Government an estimated $240 million during fiscal years 1984 and 1985.

Over the past 2 years, Federal employees have witnessed an unprecedented assault on their rights and benefits by this administration. Health insurance benefits have been reduced by an average of 16 percent, while premiums have been increased by an average of 56 percent. At the same time, the administration has attempted—so far, unsuccessfully—to increase the employee contribution to civil service retirement, raise the retirement age and change the formula for computing retirement benefits. Thus, the actual loss of wages next month—no matter the rate—would be one more burden imposed on Federal employees.

For this reason, I strongly support the delay of the recomputation until such time as the Federal comparability pay raise takes effect. I urge my colleagues to do the same.●

● Mr. DAUB. Mr. Speaker, I rise in support of H.R. 3871 which will delay the implementation of a change in the computation of the hourly wage rates for Federal civil servants.

Because this change will result in a reduction for Federal workers, it was to be initiated on October 1, 1983, in concert with the scheduled cost-of-living increase for the Federal work force.

Now that this cost-of-living increase has been delayed until January 1, 1984, the only responsible course of action is to delay this recomputation in wage rates until the same date.

Those who work in public service at the Federal level certainly merit more than this small sign of respect and concern from the Congress, but it is a step in the right direction. I urge my colleagues to vote in favor of this bill.●

● Mrs. SCHROEDER. Mr. Speaker, I rise in support of H.R. 3871, legislation to prevent 2 million Federal workers from seeing a real reduction in their paychecks 2 weeks from now. Frankly, we made a drafting error in the conference report on the Omnibus Budget Reconciliation Act of 1982 and we have come back here today to correct it before anyone is harmed by it.

The story has already been told: We achieved savings by switching the presumed number of hours of annual employment from 2,080 to 2,087. The higher number reflects reality somewhat more accurately; nevertheless, the change was made to reach budget reconciliation savings by slightly reducing Federal pay. To make sure this went by with little notice, we timed the change in presumed hours to the October 1, 1983 comparability adjustment. Well, for the first time in recent memory, there is not scheduled to be a comparability adjustment on October 1, 1983.

All this bill does is delay the change in hours until there is a pay comparability adjustment. Both under the alternative pay plan proposed by the President and under the budget reconciliation legislation reported by the Committee on Post Office and Civil Service, a January 1, 1984 pay adjustment is planned. We only differ on the amount. So, the delay provided in this bill is certain to be only 3 months long.

In more general terms, however, I think we have done far too much false economizing out of the pay and benefits of Federal workers. We have a demoralized and anxious work force. We do not have the pick of the labor market, as we used to. Young people are no longer excited about a career in public service. Senior workers are retiring as early as they can to avoid having their retirement system pulled out from under them. It is time for the Congress and the President to declare a cease-fire in the war against the public service. Such a cease-fire will allow Government workers to get back to doing what they do best: Providing needed and wanted service to the American people.●

Mr. FORD of Michigan. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MURTHA). The question is on the motion offered by the gentleman from Michigan (Mr. FORD) that the House suspend the rules and pass the bill, H.R. 3871.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on this bill, H.R. 3871.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CROP FEED GRAIN AND WHEAT PROGRAMS

Mr. DE LA GARZA. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3914) to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The Clerk read as follows:

H.R. 3914

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ANNOUNCEMENT OF ACREAGE LIMITATION AND SET-ASIDE PROGRAMS

SECTION 1. (a) Effective for the 1984 and 1985 crops of feed grains, the second sentence of section 105B(e)(1)(A) of the Agricultural Act of 1949, as amended by section 124(l) of the Omnibus Budget Reconciliation Act of 1982, is amended to read as follows: "The Secretary shall announce any such feed grain acreage limitation program or set-aside program for the 1984 crop not later than September 30, 1983, and for the 1985 crop not later than September 30, 1984: *Provided*, That, notwithstanding any other

provision of law, the Secretary shall have the authority to make appropriate adjustments in such announcement for the feed grain acreage limitation program or the set-aside program for the 1984 crop not later than October 30, 1983, and for the 1985 crop not later than October 30, 1984, if the Secretary determines that there has been a significant change in the total supply of feed grains since the earlier announcement.".

(b) Effective for the 1985 crop of wheat, the second sentence of section 107B(e)(1)(A) of the Agricultural Act of 1949, as amended by section 122(l) of the Omnibus Budget Reconciliation Act of 1982, is amended to read as follows: "The Secretary shall announce any such wheat acreage limitation program or set-aside program for the 1985 crop not later than July 1, 1984; *Provided*, That, notwithstanding any other provision of law, the Secretary shall have the authority to make appropriate adjustments in such announcement for the wheat acreage limitation program or the set-aside program for the 1985 crop not later than July 31, 1984, if the Secretary determines that there has been a significant change in the total supply of wheat since the earlier announcement.".

The SPEAKER pro tempore. Is a second demanded?

Mr. MADIGAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. MADIGAN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3914, a bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grains programs. This bill replaces H.R. 3564 which had passed the Congress but was vetoed by the President on August 12, 1983.

H.R. 3914 is compromise legislation that is supported by the administration and generally meets the objectives sought by the committee in H.R. 3564. As was the case with the earlier legislation, the compromise proposal would change the final date for announcing the acreage limitation program for the 1984 and 1985 crops of feed grains from November 15 until October 1 of the year preceding the year in which the crop is harvested, and in the case of wheat from August 15, 1984, to July 1, 1984. However, in addition it would vest the Secretary with authority to make appropriate adjustments in the announcement within 30 days of such dates if the Secretary determines that there has been a significant change in the total supply of the affected commodities since the earlier announcement.

This legislation is designed to meet a perennial complaint made by farmers regarding participation in wheat and feed grain programs requiring acreage cutbacks that these programs are never announced early enough so that farmers can maximize their participation in the programs. The inconvenience and added cost of having to adjust production after production plans have already been adopted discourages many farmers from participating in the offered program. Many farmers cannot afford to participate in these programs because the benefits of the program do not offset the financial losses they would experience by idling land that has already been prepared for cropping. This earlier date of announcement would encourage greater farmer participation, thereby making our farm programs more effective and cost efficient.

Early announcement of next year's wheat and feed grain programs is also extremely important to farm suppliers. For instance, the delayed payment-in-kind (PIK) program announcement aggravated the severe financial bind agribusiness experienced in 1983.

The bill should allow Government officials sufficient time to assess the present year's production in relationship to the expected demand. With this information in hand, these officials would then be in a position to decide, given the estimated season-end carryover stocks, whether a wheat and feed grain program would be needed in the next crop year and if so, design and announce the details of the program by these dates. The drought that has afflicted agriculture has changed only the need for another massive acreage reduction program—not the need for an early program announcement.

I would like to read to the Members a letter I have received from the Secretary of Agriculture in support of the provisions contained in H.R. 3914:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., September 16, 1983.

Hon. KIKA DE LA GARZA,
Chairman, Committee on Agriculture, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: There has been much interest and concern about the legislation, H.R. 3564, which mandates an earlier announcement of the 1984 crop feed grain program and the 1985 crop wheat and feed grain programs. The Department understands and supports the need for program announcements to be made as early as possible; however, we do not support the enactment of H.R. 3564, as these dates may be too early to allow for effective program design.

To avoid any unnecessary confrontation with the Congress, while at the same time furthering producers' interests and facilitating responsible program design and administration, the Department has agreed to the following:

1. Announcement of the 1984 crop feed grain program intentions by September 30, with the understanding the Secretary may make adjustments in the program announcement within 30 days if there is a significant change in the total supply of feed grains;

2. Accept legislation that would require the Department to announce the 1985 crop wheat program by July 1, 1984;

3. Accept legislation that would require the Department to announce the 1985 crop feed grain program by September 30, 1984; and

4. Accept legislation providing discretionary authority for the Secretary of Agriculture for an additional 30 days to make adjustments in each program announcement if there is significant changes in the total supply of such commodities.

We believe that our proposal will meet the needs of farmers while allowing the Department to responsibly manage these programs. We hope you and the Congress share our views.

We are sending a copy of this letter to Congressmen Madigan, Foley and Marlenee, as well as Congressmen Roberts and Bedell.

Sincerely,

JOHN R. BLOCK,
Secretary.

Mr Speaker, I urge the Members to join me in support of this legislation.

Mr. MADIGAN. Mr Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS. Mr. Speaker, I rise in strong support of H.R. 3914, the substitute bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 and 1985 feedgrains program and the 1985 wheat program.

For the third year in a row, the wheat program has been held hostage to politics, budget considerations, and weather conditions. This has meant that once again the wheat producers from Nebraska to Texas have had to make crop preparations and undergo costs without knowing what the Government wheat program will be for the next year.

During the August district work period, I visited all 58 counties that I have the privilege of representing. In virtually every county courthouse, farmers expressed concern, anger, and frustration over the delay of the 1984 wheat program. This bill will provide the farmer with what he needs most—consistency, predictability, and a better planning horizon so that he can make more rational business decisions on his cropping plans. As one producer told me recently: "Pat, I don't care what the USDA and the Congress do to me, just let me know in time."

The USDA has objected to an earlier version of this bill (H.R. 3564) because they said they needed the flexibility of the current statutatory dates. However, while the USDA may feel that the July 1 date is early for the announcement of the wheat program, I would point out to the USDA and my colleagues that the summer-fallow producer begins working his fallowed

ground in March and April. For the summer-fallow wheat producer in Kansas, a May 15 announcement would be timely. Unfortunately, the USDA objects to this date and the July 1 date, with the 30 days of flexibility, is a compromise date.

Mr. Speaker, this bill, the so-called earlier announcement bill, really mandates an announcement date for the wheat program that is only 2 months before wheat farmers start planting in Kansas and the High Plains—the area where most U.S. wheat is harvested. While I would prefer an earlier announcement for the wheat program, I urge my colleagues to support this bill. This bill is a simple matter of equity for the farmer. The road to sound policy is always paved with good intentions, but these intentions do not help the farmer if the USDA and the Congress do not follow through.

I urge the House to adopt this bill.

□ 1310

I think this shows what we can do, Mr. Speaker, if in fact we can work together and avoid a Presidential veto and avoid the kind of partisan politics that should be avoided in this particular case in working out the compromise with the gentleman from Iowa (Mr. BEDELL). I think the President wins, I think without question this body wins, I think the USDA wins, and most important, I think the farmer wins.

I want to express my personal thanks to the gentleman from Iowa (Mr. BEDELL), my good friend and colleague. I want to express also my strong appreciation to the chairman in regard to his efforts, and thanks to our Republican leader, the gentleman from Illinois (Mr. MADIGAN) who was able to bring the compromise together, and to my colleague, the gentleman from Iowa (Mr. EVANS) who was also very, very instrumental in this compromise.

Mr. COLEMAN of Missouri. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I would be happy to yield to my colleague, the gentleman from Missouri.

Mr. COLEMAN of Missouri. I thank the gentleman for yielding.

Mr. Speaker, I would like to state this: that the gentleman in the well certainly deserves a great deal of credit for allowing us to go forward with this bill today and not be confronted with a Presidential veto override.

I think when the gentleman talked about visiting 58 different counties in his district, in the great First District of Kansas, the biggest wheat-producing district in the country, I am sure the people out in Dodge City, and Goodland, and all over are going to appreciate the representation. Nobody is ever totally satisfied with any one piece of legislation that comes through here, but I think that those wheat farmers will be better served by this resolution when it is signed into law than the present law which actually would set back to August 15 the announcement date for wheat.

So the gentleman has done a very good job for his farmers, he has done a good job for this country, and I want to congratulate him for it.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I would be happy to yield to my colleague from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the committee and everybody for working on this legislation. It is some improvement over the present situation.

But I do want to ask this question: Is the gentleman in agreement that it would be a very extraordinary situation when they would change within that 30-day period?

Mr. ROBERTS. Yes, sir. As a matter of fact, it is mandated in this bill that we have to have a circumstance of real change in the crop reports, and the crop estimates, and the total commodity carryover prior to making any change.

I know that the farmer says, "Well, this is never set in concrete," but in this particular instance there would have to be sigificant change, and that language is in this legislation.

Mr. SMITH of Iowa. I just want to make it clear because I think people down in the Department, some of them may not realize the investments that are made in farming and it could be a big expense to a farmer to fertilize his land, and prepare it, and then have to change his plans.

Mr. ROBERTS. I thank the gentleman for his comments. He makes an excellent point.

Mr. MARLENEE. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I yield to my friend and colleague, the gentleman from Montana.

Mr. MARLENEE. I thank the gentleman for yielding.

Mr. Speaker, I would like to offer my congratulations and thanks to my colleague, who serves with me on the Wheat Subcommittee, and to the ranking minority member, the chairman, and the gentleman from Iowa (Mr. BEDELL).

I think they deserve this commendation for pulling the chestnuts out of the fire on this one. This is something that we had sought all along when we had pursued early announcement or earlier announcement for the farm programs. The negotiation that took place is commendable, due no doubt to the expertise of the handling of it by those people who I have mentioned.

I support this as a cosponsor of H.R. 3914, and urge my colleagues to pass this particular piece of legislation quickly and swiftly, and again commend my colleagues for their work in negotiating this particular settlement.

Mr. ROBERTS. I thank the gentleman for his kind comments and for his contribution.

Mr. EVANS of Iowa. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS. I would be happy to yield to my friend and colleague, the gentleman from Iowa.

Mr. EVANS of Iowa. I thank the gentleman for yielding.

Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Missouri and the gentleman from Montana, and to take just a moment to address the concerns that I imagine exist in the minds of some of the Representatives from the summer-fallow wheat areas, and to say that I think the members of the committee understand very well that July 1 is not the best date for an announcement, and that July 31 is not the best date for revisions, and to assure them that the members of the committee understand that problem very well.

We are going to be looking hard at that in the future and we hope that we can do better by those summer-fallow growers there the next time around.

Mr. ROBERTS. I appreciate the gentleman's comments.

The SPEAKER pro tempore. The gentleman from Kansas (Mr. ROBERTS) has consumed 7 minutes.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to our colleague, the gentleman from Iowa (Mr. BEDELL), the original author of the legislation, the bill that passed initially, and this bill.

Mr. BEDELL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of H.R. 3914 which I introduced yesterday, together with the gentleman from Kansas (Mr. ROBERTS), along with 35 of our colleagues, including the gentleman from Texas (Mr. DE LA GARZA), the chairman of the committee, and 26 members of the Committee on Agriculture.

I want to again thank the chairman of our committee for his continued cooperation and support in assuring that this issue is resolved in a timely and acceptable manner.

The bill, H.R. 3914, essentially ratifies an agreement worked out between the administration and members of the Committee on Agriculture regarding the announcement dates for our 1984 feed grains program, and our 1985 wheat and feed grain programs. The legislation would require the Secretary of Agriculture to announce the 1984 feed grains program by September 30 of this year, and the 1985 wheat and feed grain programs by July 1 and September 30, respectively, of next year. In all cases, the Secretary would

be granted the authority to make appropriate adjustments in the announced programs, for a period of 30 days following the initial program announcement, if warranted by a significant change in the total supply of wheat or feed grains, as the case may be.

Mr. Speaker, I should also state that we have a letter from the Department saying that if this legislation is not signed into law in time this year that they commit themselves to doing this for the feed grains program in the current year.

Mr. Speaker, one of the great pleasures of serving on the Agriculture Committee is the opportunity to work in the often nonpartisan manner to address the issues confronting agriculture. Indeed, the area of agriculture—as perhaps no other—offers the chance for Members from both sides of the aisle to work in a cooperative fashion to achieve what is best for our farmers and the farm community as a whole.

It was in this cooperative and nonpartisan spirit, I think, that the current accord came about. Because of the active involvement of a number of Members from the Republican side including, certainly, Mr. ROBERTS, Mr. EVANS of Iowa, Mr. MARLENEE, and others, the administration was persuaded to reconsider its opposition to earlier program announcements and to accept a reasonable compromise.

I believe the agreement before us today has something for everyone, just as every compromise should. The earlier announcement dates provide farmers and the supply businesses which serve them with an early indication of the Department's intentions with respect to any acreage reduction program or change in price support levels. The Department, on the other hand is provided with an important safeguard which allows program adjustments if sudden weather developments or other unforeseen events significantly change the outlook for our total supplies of wheat or feed grains.

Finally, the taxpayers may receive something as well. Although, the earlier program announcements by themselves will result in absolutely no additional costs to the Federal Government, it is possible that the more timely announcement of our programs will actually lead to lower outlays for farm price supports. This is because earlier announcements provide more farmers with the option of participating in our farm programs, and higher participation means a program more effective at reducing periodic surpluses, and a program more effective at reducing our surplus reduces farm price support costs.

Again, Mr. Speaker, I urge the prompt adoption of this important compromise, and I wish to again thank all of those who have been responsible for working out this important compromise which I believe is beneficial to our farmers, to everybody involved, and to the taxpayers as well.

The SPEAKER pro tempore. The gentleman has consumed 4 minutes.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Mississippi (Mr. FRANKLIN.)

Mr. FRANKLIN. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of this legislation.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to add my congratulations to the gentleman from Iowa (Mr. BEDELL) and the gentleman from Kansas (Mr. ROBERTS) who worked so hard to make this compromise a real possibility, and also, of course, to the distinguished chairman of the full committee, the gentleman from Texas (Mr. DE LA GARZA) without whose leadership none of this would have been possible.

Mr. Speaker, I rise in support of H.R. 3914, a bill that successfully merges the interests of farmers, consumers, and taxpayers. Farmers need the earliest possible announcement of Federal farm programs to help them make crop decisions. H.R. 3914 calls for announcement dates several weeks earlier than present law, while retaining the ability to deal with natural disasters and other emergencies.

Consumers need to be assured that an abundant supply of affordable food is available. H.R. 3914 provides the administrative flexibility to insure steady food supplies. Taxpayers want to know that the money being spent on support of farm programs is being wisely used to achieve aims that are in the public interest. H.R. 3914 allows time for adjustments in the grain programs to insure adequate support for farmers without needlessly overspending.

Mr. Speaker, it is not often in this body that we are able to take an action that deals with the concerns of such a broad cross section of American concerns. I want to especially commend the efforts of my colleagues, the gentleman from Iowa, (Mr. BEDELL) and the gentleman from Kansas, (Mr. ROBERTS), who put this bill in its final form and have worked to achieve this compromise.

The advantages of H.R. 3914 over previous attempts to legislate early announcements of grain programs have been made more apparent over the last 60 days, as our corn farmers have faced a drought of staggering proportions. The extent and severity of this natural calamity could not be foreseen in July, and the full impact of the drought will not be assessed for several weeks yet. A rigid early announcement scheme would prevent adequate evaluation of damage and could lead to a distorted feed grain program. In the same way, my district in Illinois was part of a wide area in which the 1974 corn crop was severely damaged by frost. An early announcement of the feed grains programs with no flexibility to assess that late damage would have been disastrous for the farmers in my area.

H.R. 3914 provides a measure of certainty about Government programs that farmers badly need, while insuring that late-breaking developments that could produce major changes in the crop picture can be taken into account. The Secretary of Agriculture has stated his willingness to accept the provisions of this legislation for the 1984 and 1985 crop years. As we move to enact the next farm bill in 1985, we should consider making the provisions of H.R. 3914 a part of permanent law.

For now, however, I urge the Members of the House to support H.R. 3914. The farmers, consumers, and taxpayers of the Nation will thank you for it.

Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. EMERSON).

□ 1320

Mr. EMERSON. Mr. Speaker, I want to pay my compliments to the gentleman from Iowa (Mr. BEDELL), and the gentleman from Kansas (Mr. ROBERTS) for their fine leadership in bringing about this important compromise that will, indeed, be to the benefit of our agricultural producers.

Mr. MADIGAN. Mr. Speaker, I yield back the balance of my time.

Mr. DE LA GARZA. Mr. Speaker, I yield back the balance of my time.

Mr. FRANKLIN. Mr. Speaker, I rise in support of the bill, H.R. 3914. I feel that this bill represents a valid compromise between the American farmer and the Department of Agriculture in the area of early announcements for farm programs. When these programs are planned it is important to meet the farmers' needs as well as to allow the Secretary of Agriculture to develop responsible programs.

It is essential that the farmer and the supply businesses which serve them have the benefit of early announcements. Farmers must have sufficient time to weigh various farm program options and to make decisions about program participation.

I also understand that it is important to the Department of Agriculture to have the best possible information about the current year crop for planning purposes. The Secretary of Agriculture needs this data and needs a certain flexibility to respond quickly to unforeseen circumstances, such as drought.

Valid estimates of production and timely announcements are both essential in planning successful programs.

This bill would give the farmer the benefit of early announcements and also allow the Secretary of Agriculture the flexibility he needs. In the spirit of this compromise I wish to express my support.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and pass the bill, H.R. 3914.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

REQUIRING EARLIER ANNOUCEMENT OF 1984 CROP FEED GRAIN PROGRAM AND 1985 CROP WHEAT AND FEED GRAIN PROGRAMS—VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore. The unfinished business is the further consideration of the veto message of the President on the bill (H.R. 3564) to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The Chair recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that the veto message of the President on the bill, H.R. 3564, together with the accompanying bill, be referred to the Committee on Agriculture.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3914, the bill previously passed, and on the unanimous consent request with reference to the veto message of the President on the bill, H.R. 3564.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMUNITY RENEWAL EMPLOYMENT ACT

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 302 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 302

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1036) to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes, the first reading of the bill shall be dispensed with, and all points of order against the consideration of the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed three hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and said substitute shall be considered for amendment by titles instead of by sections and each title shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. WHEAT) is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, for the purposes of debate only, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 302 is an open rule providing for 3 hours of general debate to be divided equally between the chairman and ranking minority member of the Committee on Education and Labor. The rule makes in order an amendment in the nature of a substitute which is recommended by the Committee on Education and Labor and is now printed in the bill. This amendment in the nature of a substitute shall be considered as original text for the purpose of amendment under the 5-minute rule. Furthermore, the bill shall be considered by title instead of by section for amendment and each title shall be considered as having been read.

House Resolution 302 also waives points of order agaisnt the bill for failure to comply with section 402(a) of the Congressional Budget Act of 1974. As you know, Mr. Speaker, section 402(a) requires any authorization for new budget authority be reported before May 15 of the preceding fiscal year. The waiver is necessary because the bill becomes effective fiscal year 1983. Since the bill was not reported by May 15, 1982, it violates section 402(a) of the Budget Act.

Finally, Mr. Speaker, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, the importance of H.R. 1036, the Community Renewal Employment Act, cannot be overly stressed. While some cite declining unemployment figures as evidence that the recession is over, the fact remains that the unemployment level in this country is abnormally high.

As of August of this year, the unemployment rate in the Nation was 9.5 percent. That means that at least 10.7 million people in this country are out of work. An additional 1.5 million had ceased to look for work because of the state of the Nation's job market.

Mr. Speaker, these figures indicate that for a significant numbr of Americans, the economy has not recovered.

H.R. 1036, the Community Renewal Employment Act, is a bill which would aid this Nations' unemployed and assist State and local governments in constructing and rehabilitating public facilities.

H.R. 1036 authorizes $5 billion for this fiscal year and $9.2 billion for the next fiscal year, to be used to pay wages to individuals to work on public works projects, repair public buildings, staff day care centers and improve educational facilities. It is estimated that as many as 900,000 of the currently unemployed could benefit if this legislation is enacted.

Mr. Speaker, H.R. 1036 is a responsible piece of legislation which seeks to remedy some of the problems that have resulted because of the current recession. For many, it will provide an opportunity which has been denied them for too long—the oportunity to work and provide for themselves and their loved ones.

Therefore, I urge that we adopt the rule so that we may expeditiously proceed to consideration of this important piece of legislation.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill which this rule makes in order attempts to decrease unemployment by throwing money at the problem one more time.

This is the wrong approach for several reasons.

First, any economic stimulation that may result from pouring billions of dollars into the economy in the name of job creation will be more than offset by the economic drag created by redistributing the dollars from the private to the public sector.

Second, Mr. Speaker, public service jobs were tried and failed under the CETA program. The jobs were expen-

sive. They did not develop skills which led to permanent employment. Finally, the CETA public service jobs program was subject to problems of fraud, and abuse. We do not want to repeat that experience.

Third, Mr. Speaker, last year Congress passed the Job Training Partnership Act, legislation to provide job training for disadvantaged and dislocated workers. This training should provide a means by which individuals can move into unsubsidized jobs and become productive members of our labor force.

Fourth, Mr. Speaker, this Congress has already enacted an emergency jobs bill. We appropriated $4.6 billion. These dollars have barely begun to flow out from the Federal Treasury. The results of that legislation are not yet in.

Mr. Speaker, even if this bill were the right solution it is being offered at the wrong time. If public service job creation is useful at all, it is useful at the beginning of an economic downturn, not at its end. To throw taxpayers money into this kind of a program while the economy is accelerating merely serves to drive up deficits and ultimately interest rates. By taking capital out of the economy and forcing individuals and businesses to pay higher interest rates than would otherwise be the case, would hinder the recovery rather than help it.

Mr. Speaker, Members on both sides of the aisle have repeatedly expressed concern about our large deficit numbers. We cannot complain about large deficits and at the same time continue to spend billions more for new initiatives such as this.

The Congressional Budget Office has estimated that this bill will cost $5 billion in the first year, which we do not have and over $9 billion in the second year which we will not have either.

Finally, Mr. Speaker, this whole effort may well be an exercise in futility. At the time of the Rules Committee hearing on this bill, the Office of Management and Budget provided us with a policy statement indicating that if H.R. 1036 were to reach the President's desk, disapproval would be recommended.

Mr. Speaker, this rule before the House provides 3 hours of general debate and an open amending process. There is a waiver of section 402(a) of the Budget Act which is the May 15 authorization deadline.

Mr. Speaker, while the chairman of the Budget Committee wrote a letter to the Chairman of the Rules Committee agreeing to go along with this waiver, he did express the following reservation, with which I agree. He wrote:

I think we would all agree that failure to report out and act on authorizations in a timely manner impacts directly on the ability of the House to consider appropriations bills and thwarts enactment of appropriations prior to the beginning of the fiscal year.

Mr. Speaker, I concur with this point. We are waiving Budget Act provisions far too frequently.

□ 1330

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. WHEAT. I yield to the gentleman from Illinois.

POSTPONING CONSIDERATION OF VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES, CORRECTING PUBLIC LAW 98-63, SUPPLEMENTAL APPROPRIATIONS, 1983

Mr. YATES. Mr. Speaker, I ask unanimous consent that consideration of the veto message of the joint resolution (H.J. Res. 338) to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069, which is scheduled for consideration tomorrow, be postponed until September 28, 1983.

I have cleared this with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. WHEAT. Mr. Speaker, I am glad that the Members of the minority support the passage of this rule for consideration of this very important bill to alleviate the 9.5-percent unemployment that still exists in this country.

Let me take just a moment, Mr. Speaker, to point out that in trying to adjust the problems of the deficit, one of the most important things we can do is to address the unemployment problem. As we know, every 1 percent of unemployment in this country adds 25 percent to the bill that we as American taxpayers have to pay.

Probably the most important thing we can do is to address the unemployment problem by considering the Community Renewal Employment Act.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The vote was taken by electronic device, and there were—yeas 309, nays 108, not voting 16, as follows:

Mr. WHITTAKER, Mrs. SMITH of Nebraska, and Mr. DAUB changed their votes from "yea" to "nay."

Mr. ANDREWS of North Carolina changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 302 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1036.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1036) to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes, with Mr. WHEAT, Chairman pro tempore, in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from California (Mr. HAWKINS) will be recognized for 1½ hours, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 1½ hours.

PARLIAMENTARY INQUIRY

Mr. JEFFORDS. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN pro tempore. The gentleman will state his parliamentary inquiry.

Mr. JEFFORDS. I would like to clear up the procedure for today and ask the gentleman from California as to what the intentions are. I would ask the Chairman if he would set forth the procedure for today.

There is some confusion on the calendar indicating that there would only be general debate today. I wondered if the Chair could clarify first of all as to whether or not that is correct; and, second, as to what time we may rise.

Mr. HAWKINS. Mr. Chairman, I will be very glad to answer the gentleman's question.

It is the intent of the managers on this side to proceed through general debate today and to take up such amendments as we can possibly accommodate during the period of time before 6 o'clock. It is the intent to rise at 6, not later than 6.

So in the event that the general debate is concluded before that time, it is possible that we may have several amendments.

Mr. JEFFORDS. It is my understanding that there are 3 hours allowed for general debate, which would mean that we would be ending, in any event, by 5 o'clock, which would mean that in all likelihood there will be time between 5 and 6 for amendments.

Is that correct?

Mr. HAWKINS. The gentleman is correct.

Mr. JEFFORDS. And if there is time less than 3 hours utilized, then we will have more time for amendments; is that correct?

Mr. HAWKINS. The gentleman is correct, depending on the amount of time we have.

We have approximately enough requests to consume a little over 1 hour of time at this point on this side. I assume that others will join that list. But we will try to not add to that list, to the extent that we can limit it. But I would assume that we will have at least 1½ hours of general debate on this side.

Assuming the gentleman has the same amount of time, that would consume the 3 hours.

Mr. JEFFORDS. Mr. Chairman, I thank the gentleman for that clarification.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Chairman, I yield 6 minutes to the gentleman from Kentucky (Mr. PERKINS), the distinguished chairman of the Education and Labor Committee.

Mr. PERKINS. Mr. Chairman, enactment of the Community Renewal Employment Act will make jobs available very quickly to 500,000 Americans who have been unemployed for the longest periods of time. These jobs will provide badly needed work that our counties and cities have not been able to do.

Because local tax revenues are limited, we all know that local governments cannot afford to pay for many kinds of needed work to be done. It simply makes sense to give jobs to the long-term unemployed to get that work done. Under this bill, the Federal Government would both help the unemployed get work and at the same time help local governments provide useful services to the citizens.

This country is still suffering the effects of the worst recession in more than 40 years—since before World War II. Responsibility for the high level of unemployment rests with the current occupants of Federal office—the President, the Federal Reserve Board, and the Congress—whose policies have tolerated high interest rates which brought on the recession.

The unemployed victims of those misguided policies have already paid a heavy price.

The least the Federal Government can do is to provide jobs for many of those who have been unemployed for so long in order that they can perform work that needs to be done anyway.

For a year, the national unemployment rate has been around 10 percent. In the last 2 months, the unemployment rate of the civilian labor force has been 9.5 percent. More than 10 million citizens are jobless, according to official figures.

Over 4 million of the jobless have been out of work for at least 15 weeks. The bill before the House today is aimed at those who have been unemployed for 15 weeks or more.

If we pass this bill into law, and if we appropriate the money which has been provided for it in the budget resolution, 500,000 out of the 4 million long-term unemployed could be put to work—1 out of 8 of the number of people who have been jobless for 15 weeks or over.

The Community Renewal Employment Act gives priority to individuals who do not qualify for unemployment insurance or who have exhausted their rights to UI.

A recent study for the Department of Labor showed that only 45 percent of the total unemployed population have been receiving UI payments recently. That is a much lower percentage than during the recession in 1975, when 78 percent of the numbers of unemployed received UI benefits.

The fact that more than half of the unemployed are not receiving UI benefits shows why it is so important at

this time to pass this bill to provide work for those who no longer can receive such benefits.

This bill will allow local governments to put 500,000 unemployed people to work doing vitally needed work in our communities. These workers will help in repairing bridges and roads; repairing schools, libraries, and other public buildings; installing weatherization materials; carrying out reclamation activities; providing emergency medical rescue services; and assisting nutrition programs and other services for the elderly and the handicapped—to name just a few types of jobs they will be doing.

Mr. Chairman I would like to point out just a few other features of the bill.

Most of the jobs will be provided through local governments in both rural and urban areas. Twenty percent of the funds under the bill will be reserved for educational agencies to put unemployed individuals to work repairing school facilities.

Training is also authorized by the bill.

Funds under the bill may be used for training through educational institutions or other agencies where an employer has a job for the participant after completion of the training.

In addition, an annual authorization of $30 million would enable the Job Corps to establish a limited number of career preparation demonstration centers on a regional basis. These centers would not be residential centers, but would demonstrate the use of teaching materials and techniques which have been developed successfully through Job Corps experience. This would be demonstrated through the provision of training to eligible participants, including youth, who are receiving training under this bill.

Mr. Chairman, the U.S. Conference of Mayors has strongly endorsed this bill.

Its president, Dick Fulton, will be remembered by many of you as a former colleague of ours in this body. He is now mayor of Nashville, Tenn. The letter on behalf of the Nation's mayors states forcefully:

With 10 million people unemployed in this Nation, we feel that it is absolutely essential for the Congress to take positive steps to provide employment.

Hopefully, the Nation will soon find the correct formula for continued economic growth and prosperity. However, people are out of work now. They need to feed their families and keep their homes now. Tomorrow may be a better day, but we need to provide relief today. The most positive type of relief is employment. It provides the means for people to earn the money they need and regain their dignity.

The Community Renewal Employment Act would provide such employment opportunities. At the same time it would provide a way to rehabilitate the urban infrastructures and school facilities upon which economic development is at least partially dependent.

The letter concludes with the assurance that the mayors "stand in support of the bill and anxiously await the opportunity to implement the employment program when it comes to our cities."

The letter mentioned follows:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., September 19, 1983.

Hon. CARL D. PERKINS,
Chairman, House Committee on Education and Labor, Washington, D.C.

DEAR CARL: The Conference of Mayors would like to express its strong support for H.R 1036, the "Community Renewal Employment Act", which is scheduled for consideration by the full House on September 20, 1983. With 10 million people unemployed in this nation, we feel that it is absolutely essential for the Congress to take positive steps to provide employment.

Hopefully, the nation will soon find the correct formula for continued economic growth and prosperity. However, people are out of work now. They need to feed their families and keep their homes now. Tomorrow may be a better day, but we need to provide relief today. The most positive type of relief is employment. It provides the means for people to earn the money they need and regain their dignity.

The "Community Renewal Employment Act" would provide such employment opportunities. At the same time it would provide a way to rehabilitate the urban infrastructures and school facilities upon which economic development is at least partially dependent.

Throughout the progress of the "Community Renewal Employment Act" as it passed through the Committee, I have made sure that mayors were kept informed on its provisions and its prospect for passage. I have received continued interest in the bill, especially from those cities in which unemployment has been very high. I assure you, on behalf of the Conference of Mayors, that we stand in support of the bill and anxiously await the opportunity to implement the employment program when it comes to our cities.

Sincerely,

RICHARD H. FULTON, *President.*

Mr. Chairman, the legislation before us was developed by the Member of the House who has devoted more attention to the employment and training needs of the Nation than any other public leader—GUS HAWKINS, the author of the Humphrey-Hawkins Full Employment and Balanced Growth Act. I have always taken pride in standing shoulder to shoulder with him on every piece of employment and training legislation he has sponsored as chairman of the Subcommittee on Employment Opportunities of the Committee on Education and Labor. I commend him for the excellent leadership he has provided on this bill.

□ 1400

Mr. JEFFORDS. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, I speak in opposition to the bill being considered today, H.R. 1036, the Community Renewal Employment Act. As the ranking Republican on the Education and Labor Committee, the committee of record for this bill, I believe that I represent the views of many of my colleagues when I say that we should not perpetuate the errors of the past by discussing a bill that ignores the improved state of the economy and proposes instead to increase categorical spending programs. A program that has the possibility of continuing too long, contributing to inflation as the economy recovers, and that will increase the total deficit over the next 5 years, unsettling financial markets and leading to higher longer term interest rates, should not be a priority of this Congress.

As well intentioned as H.R. 1036 may be, it suffers from four major failings. First, to pay for the temporary jobs created under this bill, the Federal Government will have to borrow billions of dollars. This borrowing will retard the economic recovery now underway and serve as a contributing factor to continued high unemployment rates. Equally important, the individuals who get these temporary jobs receive little or no training. Thus, when their subsidized jobs terminate, they will be no better prepared for the job market than they are now. Further, by considering this legislation, we divert attention from other alternatives which create jobs without increasing the deficit and inhibiting the recovery. Finally, this legislation ignores the real needs of the structurally unemployed once the full employment, noncyclical level is reached. Under H.R. 1036, funding would be continued regardless of the level of unemployment, even though we have learned that at the level of full employment, job creation is not what is needed by those who remain out of work.

The most important step that the Congress can take now is to make certain that the economic climate continues to improve so that job growth can occur. If there is anything that we should have learned from the past 3 years it is that high interest rates and the resulting slowdown in capital investment take their toll in jobs. Any economic stimulus that may result from pouring billions of dollars into the economy in the name of job creation will be more than offset by the economic drag created by redistributing the dollars from the private sector to the public sector.

The real cause of unemployment is stagnant economic growth. The lethargy of our economy is a chronic condition created largely, and made worse, by unrestrained Federal spending. Clearly, a healthy economy is the best creator of jobs. The information we are hearing now points to a much

improved economy and a strong recovery.

The Government's index of leading economic indicators increased again last month, as it has for the past 11 months. Capacity utilization in the Nation's manufacturing, mining, and utility industries increased 1.2 percentage points in July to 75.8 percent, the highest rate since late 1981. Similarly, industrial production increased 1.8 percent in July especially sharp rises in automobile and steel. The industrial production index stood 10.2 percent above its most recent November 1982 low. Clearly, these are not signals for the Government to create new jobs.

According to the Congressional Budget Office's update of the economic and budget outlook in August, the country is now well on the way to recovery. Consumer spending increased sharply in the second quarter, contributing to an 8.7-percent annual rate increase in real GNP. The gains in economic activity were large and widespread. Labor markets improved dramatically. Real earnings, employment, and consumer balance sheets have improved and consumer confidence has risen to the highest level in more than a decade.

Employment indicators appear to be improving as well. According to a quarterly survey by the National Association of Business Economists, nothing but growth and few problems are predicted for the next year and a half. That is, the association sees no outbreak of inflation, no upsurge in interest rates, and no new recession. Additionally, the latest survey of the National Federation of Independent Business, which represents about 500,000 independent businesses, indicates that small firms plan strong employment expansion during the third quarter of this year. The hiring plans were strongest in manufacturing and construction, with one out of every four firms planning to increase employment. Furthermore, the results of a recent Bureau of National Affairs survey indicate that about 22 percent of the private employers responding, plan to increase production/service payrolls, 20 percent plan to hire more technical/professional employees, and 13 percent will expand office/clerical staffs in the remaining months of 1983.

In August, there were 101.6 million people employed in the United States. This is the largest work force in our Nation's history. Nearly 1.5 million people have gone back to work this year, and the unemployment rate dropped half of a percent in July. This drop is the largest drop in the unemployment rate in this country since December 1958. The unemployment rate held steady in August. The lack of a further decline could appear to be discouraging, but generally an improving economy and a declining unemployment rate encourages workers to reenter the labor market. Therefore, the fact that the rate of unemployment did not increase, and held level, is an indication that the situation is improving.

Long-term unemployment declined for the second straight month. Since June, the number of very long-term unemployed, those jobless for 6 months or longer, the major target population under H.R. 1036, has decreased by half a million people. Additionally, the mean duration of unemployment dropped sharply over the month between July and August, from 21.7 to 19.9 weeks. The median duration of unemployment registered its third consecutive monthly decline by falling 1 full week.

The decrease in unemployment was widespread across all sectors of the economy, showing strength in the establishment industries. In manufacturing, the index of hours worked rose about 8.5 percent in the 8 months through July; durable goods manhours by 10.8 percent. In the transportation equipment (auto) industry, callbacks and overtime increases raised the hours index by 17 percent during the 8 months. Altogether, 76 percent of industries showed increases in employment in the first half of 1983. Almost all industries have shown some increase in production, but the auto industry has grown particularly fast. The unemployment rate in that industry has fallen from about 25 percent in November 1982 to 9.5 percent today. Residential construction, though, has been the star performer of the economy in recent months. Housing starts are 47 percent above the July 1982 level.

With this knowledge, I question the wisdom for example, of including as eligible activities for funding under this act the repair, rehabilitation, and maintenance of public facilities such as road repair, water systems, mass transportation systems, and education facilities. The overall unemployment rate among construction workers declined almost 4 percent the first 6 months of this year. To place workers subsidized under this act in direct competition with construction workers in the private sector seems to be self-defeating. Instead, our efforts should be to assure that the unemployed can find long-term, unsubsidized work in the private sector.

One factor that cropped up time and again, even though the indicators show a growing economy and improvement, is the uncertainty as to what the Congress will do to reduce the deficit, spend realistically, and not jeopardize the economic recovery with actions that increase inflation, interest rates, and long-term deficits. Huge deficits inhibit private capital formation, which is the root of real job creation. A bill such as this one, which pulls billions of dollars out of a recovering economy, only exacerbates unemployment by removing dollars from where they can be most productive.

Admittedly, unemployment is likely to remain relatively high for some time to come. Nevertheless, the question is whether the best way to solve the needs of the unemployed is to put them into jobs which will only result in short-term work and not provide them with kinds of skills and employability development which they really need if they ultimately are to be able to compete for employment in the growth sectors of the economy.

Matching people with the jobs of the 1980's is a true challenge. Technology has created new vocations and is phasing out others. Some jobs have simply ceased to exist. We can never go back to the kind of work force we had in the past. Therefore, job retraining and relocation will play vital roles in increasing employment.

The jobs of the future will be in categories which the individuals targeted under this proposal, if given appropriate counseling and training, would be qualified to obtain. Some of the fastest growing occupations during the 1980's are projected to be: Data processing mechanics, computer operators, office machine servicers, computer programers, tax preparers, and correction officers. Because the individuals targeted under this bill have demonstrated labor force attachment, with a small investment in training, they could again become productive members of our Nation's work force.

Economic expansion increases the demand for highly skilled workers. Although the new technologies represent a break with the past, they are not so radical that existing workers cannot be retrained to handle the new equipment or techniques. A rapidly changing economy is almost always bound to experience shortages of some workers, because future needs are never predicted perfectly. Now is the time to train out-of-work individuals to meet the challenges of a dynamic marketplace.

Last year we passed the Job Training Partnership Act, legislation calling for the strong pairing of the public and private sectors to implement a program that provides job training for disadvantaged and dislocated workers. This training, if designed properly, should provide a means by which individuals can move into unsubsidized jobs and become productive members of our labor force. The frustration with temporary, subsidized jobs is that the unemployed are filling them at the very time that they should be receiving training so that they can benefit from the jobs that are created by a healthy economy.

Rather than considering a proposal that absorbs billions of dollars to

create jobs, the Congress should examine existing laws for ways that with minor changes, jobs could be created. Also there are proposals before the Congress that offer alternatives that create jobs in concert with the private sector. In March, the Republican Task Force on Employment Opportunities did just that. The result was a report that made recommendations which focused in the problems of the structurally unemployed, including youth between the ages of 16 and 25, and the dislocated worker. Our alternative included retraining tax credits, pension plan investment in residential mortgages, small business investment credits, new jobs tax credits, and the possible use of a national public works bank. These recommendations created hundreds of thousands of job slots with little pressure to increase the budget. To move on the approach provided in H.R. 1036 only makes it less likely that these more effective alternatives will receive the priority consideration they deserve by the Congress.

Finally, this bill ignores blatantly what we have learned in previous employment and training programs. That is, that the structurally unemployed do not need temporary jobs, but rather education, training, relocation, job search assistance, and other measures to increase incentives and opportunities to work, as I have mentioned before. This bill proposes an open-ended authorization of appropriations which puts scarce funding into job creation programs even at full employment levels. The people who are unemployed, when the overall national rate of unemployment reaches the noncyclical rate, are the stucturally unemployed. Why must we continue to fund a jobs program at that unemployment rate, when what is proposed is not the best way to aid those who remain unemployed? Without a provision to phase down the funding for this program so that at the full employment level, no authorization for appropriations remains, this bill is even more seriously flawed. The result of a job-creation program which continues too long is unnecessary economic stimulation and increased deficits, outyear interest rates, and inflation. Not a favorable prospect. It is my hope that should the supporters of this bill succeed in gaining its passage, an amendment be accepted that insures that the programs which are initiated are for short periods of time when the unemployment rate is unusually high due to economic downturns.

Although H.R. 1036 addresses many of the ills of previous jobs-creation programs, it is still the wrong program at the wrong time. Any public employment program that produces goods or services takes time to plan and implement. Therefore the effect of the program is to create jobs when they are no longer needed. If job creation is useful at all, it is most useful at the beginning of an economic downturn, not at its end. We do not need this type of program now. I urge my colleagues to vote against this proposal and defeat this effort to undo what is the best creator of jobs that we have, an improving economy.

□ 1410

Mr. HAWKINS. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, 5 years ago next month, the Full Employment and Balanced Growth Act was enacted. This act, for the first time, established full employment as a clear national priority and set a goal of 4 percent unemployment to be reached by 1983. Regrettably, the mandates under that act, which are now the law of the land, have been ignored, and the Nation has suffered ever rising rates of unemployment, reaching the post-Depression record of 10.8 percent this past winter, unemployment deliberately and needlessly generated in the name of combatting inflation.

I do not need to remind my colleagues of the pain and suffering that unemployment has caused throughout the land. This Hall has heard more eloquent statements than I can offer about that needless suffering and the waste it has brought to our economy. Nearly one out of every four persons in the labor force experienced some unemployment during 1982—4 million were unemployed for the entire year. For the first time in decades, the number of individuals in poverty is increasing and the Nation has seen soup kitchens and tent cities reminiscent of the worst days of the Great Depression.

Even as the recession deepened to historic levels, precious little Federal response has been made to alleviate the suffering and put people back to work. Unlike previous recessions, no job creation measure has been enacted. In fact, the only program previously on the books to provide jobs was eliminated as a part of the 1981 Omnibus Reconciliation Act.

Today, we have an opportunity to remedy that deficiency by passing H.R. 1036, the Community Renewal Employment Act. If enacted and funded at the approved budget level, this measure would put 500,000 long-term jobless individuals to work immediately in productive activities ranging from repair of public facilities to disaster relief and health care in communities around the Nation.

Despite marginal reductions in the overall jobless rate in recent months, unemployment remains unacceptably high in the Nation as a whole and disasterously so in regions of the country and among certain groups in the labor force including women, minorities, older workers, and teenagers. In August, 1 out of every 5 black workers was unemployed; over 53 percent of black teenagers were jobless. Unemployment among Hispanics is 35 percent greater than the national average. For these groups, and others, the economy continues to be in a depression.

The signs of economic recovery do not portend significant increases in employment. In fact, increased profitability in many industries is being accomplished through permanent reductions in the work force. Harvey Shaiken, a Massachusetts Institute of Technology specialist on labor and technology, says that previously, as with the recovery that followed the Depression, "people were reintegrated into the labor force." Now, he says, "we are looking at the possibility of economic recovery and redundant workers at the same time." Recent testimony by the administration before the Ways and Means Committee, reinforced this view. Assistant Secretary of Labor Daniel Benjamin stated:

> Despite the impressive economic gains in the last 9 months, more than ten million Americans continue to be unemployed and 2.4 million of these individuals have been unemployed for more than 6 months. It is also clear that continued economic expansion is not likely to reduce unemployment as quickly as we would like.

The Congressional Budget Office, in its revised Economic Outlook released last month, projects unemployment at 8.4 percent in 1984 and 7.9 percent in 1985. On the basis of these estimates, unemployment would not get down to even pre-recession levels, much less anything approaching full employment, until after 1986—3 years after now. What are the millions of unemployed workers to do during this time?

Recently, six former Secretaries of Labor in both Republican and Democratic administrations sent a letter to the President urging a comprehensive program of job creation and retraining. The letter, signed by former Secretaries Willard Wirtz, Arthur Goldberg, Ray Marshall, Peter Brennan, John Dunlop, and W. J. Usery, Jr., told the President:

> We agree that the private sector, under ideal circumstances, should generate such jobs and participate in retraining programs, but this will take time. Until then, Government has an obligation to provide relief.

It is also apparent that this economic recovery is very uneven. Whole industries and regions of the country have been bypassed. Fortune magazine, in its October 1983 issue, examined 12 industries and came up with six basic industries which remained mired in depression: steel, entertainment, paper, construction machinery, cosmetics and hotels-motels. For many of these industries, a return to profitability will require a permanent reduction of their work force, so that even if an industry recovers, its workers will not.

While national unemployment has dropped to 9.5 percent, 15 States have unemployment rates of 10.2 percent or above. West Virginia, the highest, has an unemployment rate of 17.4 percent. Similarly, many cities continue to experience depression level unemployment: Mobile, Ala., 14.1 percent; Modesto, Calif., 17.6 percent; Lakeland, Fla., 17 percent; Peoria, Ill., 16.7 percent; Dubuque, Iowa, 11 percent; Shreveport, La., 11.9 percent; Flint, Mich., 16.5 percent; Brownsville, Tex., 16.6 percent. For these communities, and countless others, there is no recovery. A recent Wall Street Journal article described the recovery as "one of the most uneven in memory." The article described the "biggest losers in this recovery are the energy-producing regions, including parts of Texas, Louisiana, West Virginia, Oklahoma, and Wyoming."

Nor is the continuing recession just an urban problem. Rural areas have been doubly affected by staggering interest rates and by drought and the strong dollar's impact on exports. In fact, nonmetropolitan areas have an average unemployment rate of 11.4 percent compared with an average metropolitan rate of 9.3 percent.

The cycles of recession and recovery over the past two decades have led to a disturbing pattern: At each recovery, unemployment is left at higher levels than the previous cycle. The chart behind me illustrates this phenomenon. In 1969, for example, there were 2.8 million individuals unemployed, 3.5 percent: at the beginning of the next cycle, in 1973, 4.4 million were unemployed, 4.8 percent; in 1980, 6.6 million were unemployed, 6.3 percent; and in 1981, 7.8 million were unemployed, 7.2 percent. Mind you, these are the low points of the unemployment cycle.

Let us assume for the sake of argument that the administration's economic projections are correct and that the current economic recovery will be sustained at least through 1986, but let us speculate that inflation rises during that period and that economic policymakers decide to combat inflation by another round of constrictive monetary and fiscal policies. Unemployment would then rise significantly from a plateau of 7.5 percent. Does this mean that the new full employment level is 7.5 percent, over 8 million Americans unemployed? What level are we as a nation willing to tolerate as our base level of unemployment—8, 15, 20 percent? What does that say about us as a nation if we cannot function without sacrificing millions of citizens who want only to contribute their productive energies and support themselves and their families?

There has been much wringing of hands in recent weeks about the deficit. Let me be absolutely clear and emphatic about this issue—unemployment and recession cause deficits. Putting people back to work reduces deficits. It is widely accepted that each 1-percent increase in the rate of unemployment adds $25 billion to $30 billion to the deficit. The joblessness we are continuing to experience has increased outlays for unemployment compensation alone by 50 percent between 1980 and 1983. Other Federal assistance programs increase as the number of low-income persons eligible for medicaid, food stamps, and cash assistance payments grows as unemployment rises. The Community Renewal Employment Act would more than pay for itself through reductions in unemployment-related payments, increases in tax revenues, through the value of community improvements and the indirect employment generated by the stimulus to the economy.

The 1984 first budget resolution includes $4.5 billion in budget authority for this program in 1983 and $3.5 billion for 1984. At the proper time during consideration of H.R. 1036, I intend to offer an amendment to the committee-reported bill to delete authority for 1983 recognizing that the 1983 fiscal year is ending within days of the House's action on this bill. I will also propose to amend the 1984 authorization in the bill to bring it to the ceiling in the first budget resolution—$3.5 billion.

It is important to note that H.R. 1036 includes a triggered authorization designed to bring funding down as the level of unemployment declines. The authorization formula in the bill is directly proportional to the severity of the hardship caused by unemployment. Funds are authorized to provide job opportunities for 20 percent of the number of long-term unemployed individuals—those who have been unemployed for 15 weeks or more. For example, at 8.5 percent unemployment, approximately 500,000 jobs would be authorized under the triggering formula; at 5.6 percent unemployment, the bill's formula would authorize 191,000 jobs.

By emphasizing the long-term unemployed, the bill targets these federally assisted job opportunities on those individuals who have experienced the greatest difficulties locating employment. Although it is not realistic to expect sufficient funds to be available to serve all of the long-term unemployed, it is clearly feasible to employ 20 percent of the long-term unemployed in useful activities filling unmet public needs.

In addition to requiring that 90 percent of the participants must be certified by the employment service as having been unemployed for at least 15 out of 20 weeks, the bill establishes a priority for individuals who have been unemployed for the longest periods of time and those residing in families in which no other member is employed on a full-time basis. Unlike previous periods of high joblessness, this recession has been accompanied by reduced protection for individuals who lose their jobs. During 1982 only about 45 percent of the Nation's unemployed workers received unemployment benefits compared with about 78 percent claiming benefits in 1975. During August only 3.7 million of the 10.7 million unemployed received benefits—only 36 percent. The majority of jobless must exhaust savings, rely on family or charity and on Federal and other government payments in the form of food stamps and welfare.

The Community Renewal Employment Act targets resources on the areas experiencing the most severe unemployment while assuring that all areas have the possibility of putting long-term jobless to work in their communities. All jurisdictions of 50,000 population or more would be eligible to be direct recipients under the act. Funds would be distributed by a highly targeted formula, however, so that 75 percent of the funds would go to areas above the national average rate of unemployment. Rural areas, which have experienced disproportionately high unemployment during this recession, would receive their fair share of the job opportunities provided.

The bill provides a simplified, expedited procedure for allocating funds so that jobs could be created quickly. Testimony presented before the Education and Labor Committee during consideration of the Community Renewal Employment Act underscored the backlog of repair and renovation activities as well as unmet service needs which could be quickly mounted in virtually every community.

The jobs which would be created under the Community Renewal Employment Act are not make-work jobs—they are useful, productive activities which will leave a tangible benefit to the community. The bill authorizes employment in three categories of community improvement activities: First, the repair, rehabilitation or improvement of public facilities; second, the conservation, rehabilitation or improvement of public lands; and third, public safety, health, social service and other activities necessary to the public welfare. Within these categories, local officials would have the discretion to design projects to meet local priorities; such activities as removal of asbestos from school buildings, reclamation of public lands damaged by strip mining, emergency food and shelter programs, and disaster relief are just four examples of the scores of vital public projects which could be implemented to put jobless individuals to work in the community. Because of the broad flexibility given to local job creation and the authority for providing services as well as con-

struction and repair activities, the bill assures that job opportunities will be available to women and minorities.

Unlike previous job creation programs, funds can be used under this measure to support private sector employment. In many communities, it is routine practice to contract with private companies for certain services, particularly activities associated with the repair or rehabilitation of public facilities. H.R. 1036 would permit employment of eligible participants by private firms under such contracting arrangements.

The bill has intentionally constrained wages to assure maximum job creation out of the Federal funds. The maximum wage which could be federally subsidized is $230 per week—approximately $12,000 per year. Wages could be supplemented out of local resources, but only up to 50 percent of the Federal wage. This wage limitation is intended to allow equitable wages for work performed while still discouraging participants from viewing employment under this act as more attractive than unsubsidized jobs. It should also be noted that the jobs are temporary, not more than 1 year, and that participants must engage in job search for unsubsidized employment.

While the emphasis of the Community Renewal Employment Act is on job creation to provide employment opportunities where private unsubsidized employment is unavailable, the bill also provides flexibility to use funds for training for identified job openings. If, for example, a hotel is being constructed in a community which has suffered substantial job loss due to plant closings, jobless workers could be trained for openings in the hotel so long as the new employer agreed to hire them at the conclusion of training. In this provision, as well as other provisions of the bill, job creation is intended to be closely tied to economic development activities.

The Community Renewal Employment Act recognizes the particularly severe rate of joblessness among young workers. In August, youth aged 16 to 19, representing almost 18 percent of the total unemployed, experienced an unemployment rate of 23 percent—almost one in every four young people in the labor force was jobless. For black teenagers, the rate of unemployment is catastrophic—officially 53 percent, the highest rate ever recorded for these young workers. These young people must compete with older, more skilled workers who are also jobless. H.R. 1036 requires that 20 percent of the funds be used for programs for unemployed youth aged 16 through 19. Reflecting the highly successful youth incentive entitlement program, the bill requires that participating youths will be employed no more than 32 hours per week in community improvement projects and must be enrolled in high school, a high school equivalency program or skill training program for at least 8 hours per week.

In addition, the bill establishes a career preparation demonstration program to test the effectiveness of using combined written, audiovisual and computer-based materials within the basic instructional format of the Job Corps and establishes five centers as high technology centers to provide training in combination with subsidized internships in the private sector to prepare individuals for careers in expanding and emerging high technology occupations.

One of the most perplexing yet remediable aspects of our changing economy is the mismatch between the jobs which are available and those who are seeking work. To the extend that this mismatch reflects a change in skill requirements, retraining must be provided. Under the Job Training Partnership Act, we are beginning to address this problem. Much more needs to be done to assure the flexibility of the work force to meet rapidly changing occupational requirements. Yet much of the mismatch is the result of inadequate information on the availability of job openings and insufficient job search skills. The Community Renewal Employment Act addresses these deficiencies in two ways. First, the bill provides direct authority to the State employment service agencies to provide job search services to eligible participants to help them find regular unsubsidized jobs as soon as possible. Second, the bill authorizes $50 million for 1984 for the development and impelmentation of job bank systems in each State. At present, only 21 States are operating automated job matching systems. Some States still rely upon manual systems for filing paper or card job applications and orders. Computerized systems could be used not only for matching employers and job seekers but to display occupational supply and demand information and projected trends.

Mr. Chairman, the Community Renewal Employment Act is not a resurrection of past jobs programs. It is an entirely new initiative which reflects the extensive evaluations conducted on both public works and public service employment job creation strategies of the past two decades. It responds to the criticisms of those programs and reflects the changes in our economy. It is a carefully conceived proposal which can be quickly implemented to create productive and useful employment opportunities targeted to the long-term unemployed and to areas of high joblessness.

This legislation is not the only solution to our current unemployment crisis. A comprehensive strategy which includes not only job creation but retraining and other structural policies as well as monetary and fiscal policies designed to assure economic growth is essential to a lasting recovery. However, job creation and H.R. 1036 in particular, is an essential component of a comprehensive employment strategy such as the one called for by six former Secretaries of Labor. At present, the United States is the only Western industrialized nation which does not include some form of job creation as an integral component of economic policy. In Great Britain, for example, a Community Programme, providing jobs for long-term unemployed people on community projects, will provide 130,000 full and part-time places by October 1983. Similar programs are operating in Canada, Denmark, Norway, and Belgium. Japan, a country with which we are at an increasing competitive disadvantage, establishes full employment within its constitution and integrates job creation into its unemployment insurance system. For us to do likewise is not only a humane response to the suffering of millions of unemployed Americans. It just makes good sense if we are to be competitive with the rest of the industrialized world.

I urge this House to send a message to the 10.6 million officially unemployed Americans and to the 1.7 million discouraged workers not even counted as unemployed and to the 5.8 million part-time workers who cannot find full-time work. That message is that we are concerned about their plight and that we are willing to take the essential first step to put them back to work.

□ 1420

Mr. JEFFORDS. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. BARTLETT).

Mr. BARTLETT. Mr. Chairman, I rise to speak against the so-called jobs bill, H.R. 1036.

I would first give my personal regards, in the good working relationship that I have as a member of the subcommittee, to the chairman, the gentleman from California. He and I work well together, and I have the highest personal regard. On this particular subject and on the subject of how to create jobs in this country, we have vehement and very substantial disagreement.

There was a sad joke that made the rounds of this country last spring, that made the rounds of the rest of the country, but apparently Congress did not hear it, and the joke was that the country must be in a recovery because Congress is passing a jobs bill. And that sad joke becomes a macabre joke today as Congress is considering passing another so-called jobs bill.

I speak against the so-called jobs bill because it is not a jobs bill at all. It is a spending bill, it is a borrowing bill, it

is an unemployment bill, and it is a high-interest-rate bill, but it is not a jobs bill, because this bill would result in an incrementally higher rate of interest, and it is those interest rates that would plunge the economy back into a recession and cause more people to be unemployed.

The result of this legislation and other legislation like it would be that more people would be thrown out of work and out of permanent jobs, and there would in fact be fewer jobs created in this country than there would be without this bill.

So I rise to speak, Mr. Chairman, on behalf of those 10 million Americans in this country who are unemployed and who want to and are eager to go back to work and rejoin the work force. And they can only do so, Mr. Chairman, if this Congress has the discipline and the priorities and the guts to act to hold interest rates down, to reduce the deficit and to allow the economy to breathe again and to invest to create more jobs.

Americans can be helped by a recovering economy; Americans can be hurt by the creation of temporary make work, 12-month jobs that in fact, while it may create a temporary band-aid, will not create any sort of a permanent cure.

The fact of the matter is that since this subcommittee began marking up H.R. 1036, this economy, through a recovery process, through lower interest rates, and some modest curtailment of the growth of Federal spending, has added jobs. During the markup this economy has added over 1½ million new jobs, just since December 1982.

Now, I realize that this so-called jobs bill is going to pass. It is going to pass not for reasons of the 10 million unemployed Americans but for politics. I think we ought to examine for a few minutes what this so-called jobs bill would actually do, and I would contend that it would deny permanent employment to millions of Americans.

No. 1, the jobs bill and so-called jobs bills like H.R. 1036 would give false hope to people who truly want to work in permanent jobs, jobs with a future, because participation in temporary jobs programs may well prevent that individual from being brought into the private labor market, and then once the public funds run out, which they always do, so does the job, and the participant is thrown back into the economy, not only not being helped, but being hurt by his experience.

No. 2, H.R. 1036 may not be a bona fide make-work program, but H.R. 1036, there is no doubt about it, emphasizes short-run temporary 12-month job creation rather than training and placement into permanent jobs.

□ 1430

No. 3, Mr. Chairman, if we want to help the structurally unemployed in this country, which we do, in addition to a recovering economy, we need to understand that the presence of short term temporary public works jobs and the existence in the placement of long term unemployed do not necessarily match.

Areas that need public service projects are not necessarily those areas that have the highest levels of unemployment. H.R. 1036 specifically wrongly assumes that there is a match between the skills of the long term unemployed and the skills needed for public works jobs. The skills needed to build bridges and rake leaves are not those of unemployed auto and steel workers.

Those workers need retraining, they need a secure future, not a 12-month band-aid. America's unemployed do want, they do demand jobs. They want to go to work; they want to badly. This bill, H.R. 1036, would not offer them jobs or a future or meaning; they are offered dogma, they are offered more politics.

H.R. 1036 does not offer jobs; it offers political rhetoric. While we have waited until well into the recovery to even begin debating it on the House floor, even the timing of this bill reeks of politics.

I support jobs bills, Mr. Chairman. I support a reduced deficit, lower interest rates, private job retraining account, as we heard in our subcommittee hearings, which are not contained in this bill, enterprise zones, and lower interest rates. In short, I support those permanent, structural, real, creative jobs that Americans can obtain and are eager to obtain to put themselves back to work.

Mr. HAWKINS. Mr. Chairman, I yield 4 minutes to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in support of H.R. 1036. I plan to offer an amendment however which is designed to insure that the rural areas with high unemployment will receive a fair share of the jobs money in this bill.

In my part of the country many people are suspicious of Congress whenever we consider a jobs bill. Their concern is based in large part on the fear that the money in jobs bills passed by Congress will end up in the Nation's urban areas at the expense of the unemployment problems of people in the rural areas.

I would like to remind the Members that, as Chairman HAWKINS has said earlier, right now there is higher unemployment percentagewise in the rural areas than in the urban areas, and that holds true in my State of Missouri.

On that issue, I want to commend Chairman HAWKINS for his diligence in putting together a jobs bill to deal with the grave unemployment problems in both the major cities and the rural areas.

I also want to thank him for his cooperation in working with those of us from the rural areas who had concerns about this bill.

The amendment we have worked out would require the States to use the basic allotment formula in the bill in distributing the jobs funds to the so-called balance of State counties. These counties are the rural counties which would be served by the State governments under this bill.

As reported by the committee the bill provides that cities and counties with populations of 50,000 or more would be designated as independent eligible entities to operate the program directly and funds would be alloted to them on a formula basis.

For the "balance of State" counties the bill would make the State governments responsible for administering the jobs program. The bill would give the States discretion in distributing jobs money to these counties.

The problem is that a rural county with high unemployment faces the possibility, under the bill, without amendment, that it would receive no funds because the State government decided, at its discretion, against distributing jobs money to that county.

My amendment would require the States to use the "balance of State" funds in accordance with the bill's basic allotment formula, thereby assuring an equitable share to rural counties.

The formula share is based: One-third on the relative number of unemployed; one-third on the relative number of unemployed individuals in excess of 6.5 percent of the civilian labor force; and one-third on the number of unemployed in excess of the national average rate of unemployment.

Under the amendment the "balance of State" areas would recieve a share of the funds relative to their share of the national total on each formula factor.

Also under the amendment the areas in the "balance of State" would be eligible to receive funds only if their initial allotment were greater than or equal to $25,000. Any excess funds within a State, resulting from areas not meeting the minimum allotment requirement, would be redistributed among eligible areas within the "balance of State."

I also want to tell you what my amendment will not do. It will not change the provisions of the bill requiring the States to operate the programs for the "balance of State." It will not reduce, in any way, the

amount of funds available to the independent eligible entities.

The amendment will simply assure that the "balance of State" funds will be distributed to these areas on the basis of relative unemployment in the rural areas.

H.R. 1036 contains a number of provisions designed to insure that rural areas receive and use productively their fair share of the job opportunities provided. My amendment will add yet another provision which will further improve the bill from the standpoint of rural America.

My amendment will meet the purpose of H.R. 1036 which is to target assistance to the long-term unemployed and to target resources to areas experiencing the greatest unemployment. I urge your support.

In closing, I would also like to say that for many people in my district, which is basically a rural district, we have many who still have not found employment. They have been unemployed for over a year. Many of those in the highest unemployment counties in my district are those in rural areas, the rural counties, and not the urban counties.

We do need this type of legislation. If we wait for the recovery, as many people have waited now for over a year, since 1981 and early 1982, they may not see any employment for yet another year, and yet they have no source of income. They have families, they have house payments to make, car payments to make, and this bill will help them through this time until we do have the recovery.

Mr. JEFFORDS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to speak on this bill and ask the Members on my side of the aisle to take an objective look at this legislation. This is especially true if an amendment of mine is offered and accepted which would make this bill not a permanent program but one which would be phased out when, as all of us hope, enough private jobs are there so that the unemployment rate goes down below 6 percent, which is now generally accepted as a noncyclical rate of unemployment.

My amendment which I refer to as the "Faith in America" amendment, would indicate that we do expect that we are going to handle these problems by a good economy and that this program would not be necessary under such circumstances. I would ask that those on my side of the aisle keep some things in mind.

First, the evidence is that we are going to have sustained unemployment for a few years and most likely the normal cyclical occurrences which we have experienced in the past are not about to occur now.

Second, there is a basic Republican philosophy which we have espoused over and over again which we ought to consider when we take a look at this bill, and that is "workfare not welfare." It is better to put people into meaningful work than it is just to give them income transfer payments.

Also, I think it is important to examine the results of other jobs bills which we have passed this year, and ask whether or not they are effective ways of funding new jobs from a Government perspective by comparing the experience in this legislation and what it would promise with that which has been experienced in the public works-type employment bills.

Mr. Chairman, the Community Renewal Employment Act is one response to high unemployment. Some of you may question why some Republicans would be supportive of such a proposal. More to the point, I wonder why not more Republicans are supporting it.

Is not it basic Republican policy to support the concept that those who are in need of assistance should work for that help? That is the common cry of "workfare not welfare" that we have all been hearing. It makes far greater sense to fund programs that not only provide assistance to those who need it, but that in return, result in useful community services and repair.

Sociologists and psychologists warn of the serious side effects and social problems associated with long-term unemployment. There is a greater demand for social services in areas of high unemployment. The long-term unemployed suffer from greater health-related problems, have a higher incidence of divorce, experience more spouse and child abuse in their families, and tend to withdraw from being productive, contributing members of society.

We need to take an objective look at this bill and some reasons for giving it support. First, it was Republican amendments in 1978 that improved the public service employment programs under CETA. In the President's budget recommendations for fiscal year 1982, credit was given to these amendments which limited wages, tightened eligibility criteria, and limited tenure in the program for correcting many of the problems associated with public service programs. It is from this base that the proposal before us was developed. Those errors are not repeated. The stigma of the CETA programs, prior to the 1978 amendments, should not be carried over to these programs. Rather, we should recognize the improvements made by the Republicans that have been carried forward in the development of this program.

Second, the typical economic cycles that we are used to are not with us today. Periods of substantial unemployment and economic downturn are predicted to last longer, thereby creating a greater need for some type of program which assists the long-term unemployed. We should not force the burden of unpredictable economic swings on a few, when it is through no fault of their own that they find themselves unemployed.

Third, the public works projects of the past no longer work under current economic conditions. With greater numbers of long-term unemployed for longer periods of time, we cannot afford to authorize programs that focus their funding on equipment and construction supplies and materials. Instead we should target these resources on wages, so that our efforts are labor intensive, not capital intensive. The cost per participant in a public works program is double, even up to 40 times that in a public service program. There is also no guarantee that those people who get jobs under a public works bill are those individuals who are the long-term unemployed. With the unemployment rates very high for women and youth it is difficult to look to public works to provide opportunities for them as well.

I would like to repeat some of the comments that I made concerning the problems of the emerging jobs bill enacted earlier this year and our penchant for looking to public works bills to solve our problems.

When jobs bills are considered, there is a misguided, nostalgic preoccupation with public works. Most of us have heard of the excellent results of public works in the Great Depression. But these are the eighties, not the thirties. What was done in the thirties with shovels and wheelbarrows is now done with bulldozers and trucks. For comparable amounts of money, in equal real dollars, where millions could be put to work in the thirties, only thousands of unemployed will be put to work in the eighties.

The reasons for this are fairly simple. The programs of the New Deal were targeted to the unemployed. Jobs under the Work Projects Administration, for example, were given almost exclusively to men and women who were unemployed heads of households who had exhausted their assets. Roughly 95 percent of WPA workers came from the ranks of the unemployed. Few unemployed workers will be hired as a result of the bill before us today.

The workers who will be hired will be mostly from the skilled construction trades. Again, the model of the New Deal does not serve us well. The vast majority of workers under the New Deal programs were unskilled workers.

The proportion of labor to nonlabor costs has changed even more dramati-

cally. Under the WPA, three-quarters of the money went to wages. Under our public works program of the late seventies, only a quarter of the funds did.

With national unemployment at devastatingly high levels, the temptation is strong to advocate massive, New Deal-style public works programs. Unfortunately, the economic climate of 1983 does not lend itself to the same responses as 1933. A trillion dollar national debt and a $200-billion deficit will simply not accommodate one large public works program designed more to stimulate the economy than to create jobs. By increasing pressure on the limited funds available for capital investment, such programs would most likely be counterproductive.

When one considers the fiscal restraints placed on us by the $200 billion deficit, the predominant use of public works programs, as against other alternatives, is irresponsible, if not criminal.

A little math makes it apparent why public works programs, while they might be justifiable on other grounds, cannot be justified as a good way to create jobs. Every billion dollars we spend can accommodate 1 million participants in summer youth jobs programs. Or we could pay for 1 million participants in vocational rehabilitation for the unemployed handicapped. That same $1 billion would pay for 500,000 training slots for disadvantaged workers, or 400,000 training slots for dislocated workers—assuming a State match of 40 percent. Or it could pay for 400,000 Youth Conservation Corps slots, or 130,000 Jobs Corps slots or 100,000 public service jobs. But if we put the $1 billion into capital-intensive public works projects, we will create only 15,000 to 30,000 jobs. In the last public works go-around, each job cost $64,500 and only 13 percent of those jobs went to individuals who were unemployed. Few if any jobs go to youth, to women, or to unemployed minorities.

In summary, whereas we will spend from $40,000 to $400,000 for each unemployed person helped by untargeted public works, we can train a person to be employed for $2,000 to $4,000, or give meaningful work in other areas for $10,000 per person.

Clearly, we need to step back and make an honest assessment of the situation. We cannot afford to look at this debate as a pure political battle. This proposal uses basic Republican principles in providing constructive alternatives and answers to these new and perplexing circumstances. We cannot totally depend upon the Job Training Partnership Act to serve the needs of the long-term unemployed. About half the unemployed do not need training, but rather an opportunity to work. Also, it is not enough to say that we should create jobs in the private sector. The fact is that in times of high unemployment when business and industry are unable to retain their work force, let alone hire new workers, we cannot depend totally on the private sector to deal with this problem. Substantial, long-term unemployment is here for the foreseeable future. The final answer must come basically from the private sector, but that is tomorrow—or the day after—years away—not today.

I am speaking in support of H.R. 1036, the Community Renewal Employment Act. Just over 6 months ago, with much sound and fury, we approved a so-called jobs bill to put Americans back to work. Six months later, I think that we would be hardpressed to find a single worker outside of Washington, D.C., on the job as a result of that bill. The emergency supplemental was a public works bill and should have been presented and debated as such.

Today we have a jobs bill before us, pure and simple. For all of us—who on the campaign trail promised to do something to create jobs—this bill is our one and best chance.

Our Nation has faced historically high levels of unemployment recently, with an average unemployment rate of 9.7 percent for 1982. Thus 26.5 million people, or 22 percent of the labor force in that year, experienced some spell of joblessness. Many alternatives have been offered this Congress to alleviate the problems faced by the millions of unemployed and to create jobs to employ those who have been most severely affected by long-term unemployment. Unfortunately, I do not believe that those proposals would prove to be successful in reaching their goals.

I believe that this bill, developed to provide employment opportunities to the long-term unemployed in high unemployment areas in projects to repair and renovate vitally needed community facilities, can serve as a strong vehicle to supplement job training programs in periods of unusual economic downturn and exceptionally high unemployment.

We are in the midst of an economic recovery. For many of us, this recovery means being able to stretch our paychecks further, finally having repairs made that we have been postponing, or buying that new car. But for about 10.7 million people and their families, talk of a recovery is meaningless. Though other economic indicators are improving, present evidence indicates the high rate of unemployment will continue well beyond the recovery. The administration and the Congressional Budget Office estimate that the unemployment rate will remain around 8 percent through 1985, a full 2 years down the road.

As a nation, we cannot afford to disenfranchise 10 million workers. Through no fault of their own, but rather because of changing national economic policy, rapid technological change, and international recession, millions of Americans find themselves unemployed for long periods of time. These individuals have invested in our economy. They have worked long and hard, and have a wealth of occupational skills. They do not necessarily need job training, but need instead some means by which the burden of long-term unemployment can be eased.

There are different opinions regarding the appropriate actions, if any, necessary to ease this burden. We must remember that there is no one magic solution.

A year ago, Congress considered and passed job training legislation to replace the Comprehensive Employment and Training Act. The result is the Job Training Partnership Act (JTPA) which goes into effect in just about 2 weeks. The JTPA can serve as a major part of an overall national strategy to meet the employment and training needs of disadvantaged and dislocated workers, but it cannot resolve the unemployment problem alone. Many of the concepts embodied in the JTPA were supported strongly by the Republicans. These are: Including the private sector as a decisionmaking partner, devoting a major portion of the funds to the direct provision of training rather than for support costs, providing a greater structural role for the States, incorporating a more rational structure for coordination of separate employment and training programs at the State and local levels, and stressing performance outcomes rather than process. The bill before us today also contains concepts that can be supported by Republicans.

Republicans have long supported the philosophy that it is better to pay people for doing something than for doing nothing. I believe that Republicans would find it preferable to have the long-term unemployed put to work and paid for the services they can provide rather than keeping them idle, unproductive, and dependent on their unemployment insurance benefits and other income transfer payments and assistance. The economic interests of the community, State, and Nation are best served when those who are capable of working are involved in productive activities which contribute to the overall tax structure and provide substantive services and improvements.

Is it not better to provide an opportunity for 500,000 long-term unemployed to engage in community service, than to expend billions of dollars in supplemental compensation which pays them for not working? Under the current Federal supplemental compensation program, we have committed $5.5 billion in fiscal year 1983 already for payments to 4.5 million people.

Also, it is not unlikely that we will soon extend this program an additional 6 months. Is this the only alternative we have to serve the needs of the long-term unemployed?

Congress has considered legislation to help those who find themselves without health insurance benefits because of unemployment; to supply assistance to those who face mortgage defaults because they cannot meet the payments without a salary; and to distribute commodities so that the nutritional needs of those who are dependent upon the lost income are met.

By providing the long-term unemployed with meaningful work experiences that contribute service to the communities in which they live, the fiscal pressures on these other support programs for assistance can be reduced. The ripple effect of H.R. 1036 extends throughout the community. It stimulates secondary job creation, reduces the need for income and support payments, lessens the drain on community services, and improves the overall health of the community.

The main purpose of H.R. 1036 is to establish a program that provides productive and useful employment opportunities to the long-term unemployed. In the past, such programs have been perceived as the cause of many of the problems associated with employment and training programs. Those problems have been addressed in this bill. It remains critical though, that rather than to respond hastily in periods of high unemployment with temporary, make-work job programs, a well-defined initiative be in place to be implemented quickly as the need arises.

There rests my single concern with this bill. The authorization for appropriations under this bill is open ended. Even if we reach full employment, this program could continue to be funded. The bill establishes the expectation that the needs of the long-term unemployed, regardless of the economic conditions and the overall unemployment rate, are best served by the creation of short-term, temporary jobs. I do not believe that such a national policy should be established. As such, the economic needs of the country are ignored.

Although high unemployment is sustained generally beyond the period of an economic downturn, the incidence of long-term unemployment is sensitive to cyclical conditions, which suggests that it will diminish as the economy recovers. In fact, the best creator of jobs is a sound economic recovery, but in the interim, other measures such as those in this bill may be necessary to assist those most affected by the recession. These programs, however, should be sensitive to economic conditions, so that in periods of economic downturn, greater numbers of the unemployed can be assisted. As the recovery takes hold, a balance must be achieved so that inflation is not ignited as employment increases. That is, as the overall national rate of unemployment reaches the full employment level, the need to fund programs such as those established under this bill, subsides. The authorization to appropriate funds under this act should be controlled realistically so that it is phased down as the unemployment rate declines. Without a phase out provision, we run the risk of continuing a job creation program too long thereby contributing to inflation and increasing out year deficits which lead to higher long-term interest rates. A similar position on a trigger-off provision for job creation programs was taken by Isabel Sawhill, a senior fellow at the Urban Institute in testimony before the budget committee earlier this year.

Additionally, once the unemployment rate reaches the noncyclical unemployment range, those who remain unemployed are not those who benefit from placement in a temporary job. They are individuals whose skills are obsolete, who lack the prerequisite training to obtain a job, who do not know how to find a job, who do not have basic educational skills, or who lack an attachment to the labor force. What is needed by the long-term unemployed subsequent to economic recovery and improved unemployment rates, is not short-term temporary jobs, but a means by which permanent jobs can be obtained and retained. The purpose of the JTPA, enacted in the 97th Congress, is to provide such training. Unless the funding for the program created under this bill can be limited once unemployment is reduced substantially, scarce resources will be diverted from training programs when the need for them is most evident.

With high unemployment and in the absence of new jobs, to simply provide training to these workers pushes someone else further back in the hiring queue and reshuffles the unemployed. Education and training are good long-term growth strategies and work toward reducing structural unemployment. I intend to offer an amendment that allays my concerns regarding the authorization for appropriations under this bill. With the inclusion of the amendment, I am confident that an appropriate balance is struck between the need for job creation and training programs during periods of economic fluctuation. I encourage my colleagues on both sides of the aisle to recognize the need for this amendment and to support it.

In my judgment H.R. 1036, along with the Job Training Partnership Act, brings our policies a long way toward meeting this national need.

□ 1440

Mr. Chairman, in summary, I believe that it is important, provided that my amendment is adopted which makes this bill a temporary program, that we as Republicans give an objective look at this bill and consider supporting it, because I believe it is consistent with Republican philosophies and policies and I believe it may well be preferable to other programs that we have in existence today. This is an authorization bill and an option we may prefer to use now, or in the future.

Mr. HAWKINS. Mr. Chairman, I yield 6 minutes to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, the bill before us, H.R. 1036, deserves the strong support of this Congress. It should not be rejected on the basis that recovery is here, that the jobs provided would be of no use, or that the deficit is too large. None of these arguments are tenable. Millions of Americans continue to suffer from the devastating effects of unemployment. It would provide worthwhile jobs to those who have been out of work the longest and those who have exhausted all benefits. I took to the floor last week during the special order on deficits to discuss the national and international consequences of the historic Federal deficit. This measure is being brought into conformance with the budget resolution.

Those who believe that the recent upturn in the economy will solve the problems of the long-term unemployed are sorely mistaken. The sad truth is that the needs of the long-term unemployed will remain for some time to come. Anyone who is opposed to this legislation on the grounds that the recovery will provide all the jobs we need should try and tell the unemployed in my district, some of whom have been out of work for 1 year or 18 months. Tell them to wait longer; tell them that it is somehow better to remain unemployed rather than going to work. The people in my district are practical, commonsense people. They know that a job now makes a lot more sense than waiting for a possible job that may exist somewhere down the road. They want no handouts. They want to work. Last week in our local ironworkers hall on a typical morning, 376 workers came in. There were two jobs. Twenty-five percent of our carpenters are out of work; 40 percent of our truckers; 20 percent of our autoworkers; our local boilermakers, who work on such difficult projects as nuclear powerplant construction and ships' boilers see no work in sight. We know that in July housing starts took a nosedive, as did housing sales in my area.

Nationally unemployment remains at staggering levels. In August 1983, 10.7 million Americans were officially classified as unemployed; 1.7 million more were so discouraged about their job prospects that they had quit look-

ing for work; while 5.8 million Americans who preferred full-time positions, resigned themselves to part-time jobs. These figures add up to 18.5 million individual Americans. The issue here is whether to enact legislation aimed to help roughly 500,000 individuals. Are there 500,000 individuals who need work today? The answer to that question is a resounding yes!

H.R. 1036 is carefully drafted to target aid to those most devastated by the recession—the 4.0 million individuals who have been unemployed for more than 15 weeks. Less than 40 percent of the long-term unemployed receive any unemployment insurance benefits, while 1.4 million of the long-term unemployed have been out of work for over a year. In my district alone, over 8,000 unemployed workers will have exhausted their unemployment insurance by October 1. My district needs this bill—now, and my district is not alone.

The upturn in the economy cannot be counted on to solve the problems of the long-term unemployed for three reasons. First, it will not produce jobs fast enough. The latest CBO projections estimate that the unemployment rate will be at 8.9 percent at the end of this year and 8.2 percent at the end of next year. These rates correspond to unemployment levels of 10 million and 9.4 million people.

Second, the upturn will not affect all areas of the country evenly. High levels of unemployment will remain for some years to come in States like my own, like West Virginia, Louisiana and Ohio where unemployment rages at 17.5 percent, 12.8 percent and 11.1 percent respectively. Severe unemployment problems will also remain in Laredo, Tex., and Modesto, Calif.: areas with unemployment rates of 26.6 percent and 20.5 percent. Unemployment will remain high in these areas because of the historic transformation occurring within the American manufacturing base. My district, the Toledo, Ohio area, which is heavily dependent on the auto and glass industries, is only one example of the many areas where workers are attempting to make the difficult adjustment required by economic restructuring.

Third, a continued economic uptrun is by no means assured. The Federal deficit, high interest rates, the huge trade imbalance, uneven exchange rates, and a shaky international economy, all dim the prospects of a recovery long enough to solve the problems of the unemployed. In the meantime people must survive. Who in this body could turn their backs on Americans who wish to work?

Let me now focus on the provisions of the legislation. H.R. 1036 is not, as some critics claim, a wasteful program providing unproductive jobs and fraught with all the problems of the early CETA program. Real or potential problems were considered and addressed in the drafting of the bill. CETA experience was valuable in suggesting ways in which this bill could be strengthened. This has been done.

The bill targets aid to those most devastated by the recession—the 4 million individuals who have been unemployed for more than 15 weeks. Eligible individuals must be certified by a State employment agency. Funds under this bill would be carefully targeted by a three-part formula to States, cities and counties based on the severity of their unemployment: consequently, approximately 75 percent of the funds will go to areas with unemployment above the national average.

Useful work in much-needed community improvement projects would be provided. H.R. 1036 specifies vital activities—such as road and street repair, removal of hazardous materials from public buildings, infrastructure repair, repair of public housing, rehabilitation of water systems, improvement of public lands, disaster relief, school and library repair, child care, health care and other services—which local communities are not now providing, due to the severity of the recession and budget cuts. Tough, enforceable anti-substitution provisions include automatic review to prevent displacement of regular workers and severe financial penalties on any community abusing Federal job funds. There are also strict limits on wages and length of employment. And Davis-Bacon applicability is carefully thought through and applied modestly. And local government recipients are liable for the ways in which funds are expended.

Finally, let me turn to the issue of the deficit. An amendment offered by Chairman HAWKINS conforms the bill to the budget resolution. This amendment lowers fiscal year 1984 funding authorization to $3.5 billion, the amount provided to the reserve fund for economic recovery programs. Furthermore, outlays for the program will be partially offset immediately by reductions in Federal payments to the jobless in the form of food stamps and welfare. Federal revenues will increase by the taxes paid by these newly employed workers. In addition, if the economy does improve, automatic adjustment provisions contained in the bill readjust funding levels based on the number of remaining long-term unemployed.

While the deficit issue requires urgent action, the deficit argument must not be allowed to defeat proposals designed to assist those in desperate need of productive work. These programs should be our first funding priority, not our last.

Mr. Chairman, one need only look behind the rosy figure of GNP growth to know that the need for this jobs bill is indisputable. H.R. 1036 will provide many unemployed individuals with what they want and with what they desperately need—a decent job. It will provide our communities with services—from school repair to health care—that are vitally important. I strongly urge my colleagues to vote help where it is vitally needed and pass H.R. 1036. For those of us elected last November in order to be a voice for the unemployed, this bill provides a major opportunity for us to translate the message of the people's mandate.

□ 1450

Mr. JEFFORDS. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. PACKARD).

Mr. PACKARD. Mr. Chairman, I would like to enter into a colloquy, if I may, with the chairman of our subcommittee, the gentleman from California (Mr. HAWKINS).

Mr. Chairman, I would appreciate it if you could clarify for me a provision of the general requirements of this bill. The purpose of H.R. 1036, as I understand it, is to provide opportunities for employment to individuals who have been unemployed for 15 of 20 weeks, especially directed to areas of high unemployment. Such employment will be created with Federal grants to State and local governments for labor costs associated with repair, maintenance, or rehabilitation of essential public facilities and other activities. Mr. Chairman, in our efforts to help provide meaningful jobs for our unemployed citizens, we must also be sure that we are providing opportunities which can lead to eventual long-term, permanent job skills, and which will also help to revitalize industry and commerce.

One of our most basic industries, construction, has been severely hampered during these difficult times. Over 20 percent of America's construction workers have been unemployed for long periods of time. As our economy improves, and unemployed construction workers return to the producing work force, other industries will also improve and generate long-term economic improvement.

Section 501(c) of H.R. 1036 states that funds shall not be used from this bill for private contractors or organizations to perform activities "customarily performed by employees of a State, a political subdivision, or a local educational agency in the area served by the program." Let me ask my first question. Is this provision intended to prohibit displacement of current public sector employees affected by this bill?

Mr. HAWKINS. Mr. Chairman, if the gentleman will yield, I would say yes, the committee does not want to displace the permanent public work force by transferring work normally

done by public employees to work contracted out to private employers, as a result of this measure.

Mr. PACKARD. I appreciate that, Mr. Chairman. My second question, then, does the reverse also hold equally true? That is, shall communities in which it is routine practice for State and local governments to contract with private companies or organizations for certain services, particularly construction associated with repair or rehabilitation of public facilities, be encouraged to continue their normal practice of contracting with private contractors for the provision of services authorized under this bill?

Mr. HAWKINS. Yes, that is our intent and the intent of the bill. By providing private employment opportunities, the bill increases the likelihood that unemployed workers have the chance for permanent, unsubsidized employment with private firms, which the distinguished gentleman alluded to in his earlier remarks. In some instances, the cost of the service or activity determines whether it is performed by private contractors or public employees. In other cases the decision is based on the nature of the activity or on provisions of State law. In any situation, the committee does not wish to disrupt the established method for determining how the project shall be performed for the purposes of this measure.

Mr. PACKARD. I thank the distinguished gentleman for his clarifying remarks. I, too, believe that work which has been contracted out should continue in that manner, and that a bill of this nature, which is addressing the very pressing question of unemployment, should not, as an unexpected result, put persons currently employed out of a job—be that job in the private sector or in the public sector.

I appreciate again the comments of the gentleman from California.

□ 1500

Mr. HAWKINS. Mr. Chairman, I yield 2½ minutes to the distinguished gentleman from Pennsylvania (Mr. GRAY).

Mr. COYNE. Mr. Chairman, will the gentleman yield?

Mr. GRAY. I yield to the gentleman from Pennsylvania.

Mr. COYNE. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of H.R. 1036, the Community Renewal Employment Act of 1983.

The 10.7 million Americans now searching for work would be the principal beneficiaries of this overdue measure, a bill which would create jobs for 500,000 in community improvement projects and in the repair of educational facilities in fiscal year 1984.

Let us keep in mind that the unemployment rate, while slightly reduced from that of a year ago, remains at the highest it has been since the Great Depression. After 8 months of recovery, the unemployment rate in August of this year stood at 9.5 percent. This is one-half of 1 percentage point higher than in any recession since the 1930's.

The duration of unemployment for millions of Americans is just as disturbing as the aggregate number of jobless. In 1979 the average length of unemployment was 10.8 weeks. By July 1981 the average length of time without work was 14 weeks. This is nearly double the amount of time one went without work in 1979. Last month, roughly one out of four people unemployed was without work for more than 6 months.

The Community Renewal Employment Act aims to provide work to those long-term unemployed. Local governments would receive funds to hire those who have been without work for at least 15 of the past 20 weeks.

The funds would be distributed in a manner to assure that those areas with the highest unemployment would receive the greatest share. Eighty percent of the money would go to community improvement projects, such as renovation of public buildings, repair of parks and playgrounds, rehabilitation of mass transportation, and weatherization. In addition, funds under this part of the bill, title II, could assist emergency food and shelter programs, public health, child care, and library programs, and services for the elderly and handicapped. The bulk of the funds would go for wages and salaries, with an allowance for up to 25 percent for materials, tools, and administrative expenses.

I am especially pleased that title III of H.R. 1036 sets aside 20 percent of the funds authorized for jobs created by the rehabilitation of school facilities. I can assure my colleagues that those funds will go to good use in the city of Pittsburgh, where the average age of our 90 public schools is 50 years.

The city has targeted three high schools for renovation, on a staggered basis, beginning in the spring of 1984. The cost of renovation of Schenley High School, constructed in 1916, will be $7.6 million. Renovation costs for the North Side's Oliver High School, built in 1924, will be $11.3 million. Squirrel Hill's 56-year-old Tayler-Allderdice High School needs $10.8 million in rehabilitation.

In each of these schools, vocational and business areas will be modernized. Where necessary, inadequate physical education facilities will be replaced. New roofs on Schenley and Oliver, and new windows at Taylor-Allderice, will reduce long-term energy costs.

The legislation now before us would enable the city of Pittsburgh to coordinate a locally initiated program, financed by a planned bond issue, with a federally funded jobs program. This is the type of partnership we should encourage. It addresses community needs while putting the jobless back to work.

At this point, I think it is worthwhile to note that we will be putting people back to work at a reasonable cost to the Federal Government. While every job created through the defense procurement process costs the Treasury about $120,000 per job, and each public works job requires a $40,000 to $50,000 Federal commitment, the average job created by H.R. 1036 will cost approximately $12,500.

By improving our communities while helping someone out of work obtain a useful income, we reap double dividends on our Federal investment.

I urge a "yes" vote on the Community Renewal Employment Act of 1983.

Mr. GRAY. Mr. Chairman, I rise in support of H.R. 1036.

There are a number of myths regarding the potential impact of this proposal which I would like to address at this time.

First, this proposal will have the effect of reducing the overall Federal deficit and not, as many purport, raising that deficit. The Congressional Budget Office has estimated that each 1 percent increase in unemployment adds between $26 to $40 billion to the Federal deficit. This proposal, if passed, could create as many as 500,000 new jobs for the unemployed, having the effect of reducing the unemployment rate from 9.5 percent to 9 percent.

I have estimated that the net effect of removing the unemployed from the Federal rolls and putting them on the payrolls will more than offset the Federal investment envisioned in H.R. 1036.

Second, there are many who argue that H.R. 1036 is not needed because the recent upturn in the economy will create new job opportunities, thus alleviating unemployment—all we have to do is wait. In response, however, the economic recovery has not alleviated the problems of the long-term unemployed, and indeed there is universal agreement within economic circles that the unemployment rate will continue to hover at or near 9 percent throughout 1984 and beyond.

What are we to do, then? Wait for the private sector and the long-awaited recovery? Even the administration's own optimistic people say it will be 1986 before unemployment comes down to the 1980 level of 7.2 percent. What, I ask, are people to do? Are they to wait? Are they to listen to us say, just wait 3 years, we will find you a job.

What are we to tell them, that we have a great economic theory, that if they just wait 3 years, and 1986 will

come, they will find employment? I say that we must act here in this body, and that we ought to pass 1036. It will not solve all of our problems, but it will go a long way toward addressing the problem of the long-term unemployed who cannot wait 3 years and have their dreams and their hopes deferred because of an economic theory that has not worked, is not working, and even the most optimistic people in the administration say it will be 1986.

Mr. JEFFORDS. Mr. Chairman, I yield such time as he may consume to the gentleman from Utah (Mr. NIELSON).

Mr. NIELSON of Utah. Mr. Chairman, I rise in opposition to H.R. 1036. The district I represent is not unfamiliar with the hardships that accompany unemployment. I have just returned from that district where, in almost 40 town meetings, I talked with steelworkers, coal miners, and many others about the steps that must be taken to provide a real answer to unemployment. Without exception, I heard unified voices telling me that budget deficits do matter and that Congress must quit relying on deficit spending in attempting to achieve economic and political goals. These people are painfully aware that it has been Congress' past unwillingness to bring fiscal responsibility to the Federal budget that has led to the economic problems of today.

In order to pay for the temporary jobs that H.R. 1036 would provide, the Federal Government would take billions of dollars out of the private sector. This would come at a time when economic indicators have given us positive signs that the fragile recovery is definitely underway. The prime rate is down around 11 percent—half of the 22.5-percent rate in 1980. The rate of inflation was 12.4 percent in 1980 and is now 3.5 percent. Other statistics indicate that 500,000 unemployed persons have returned to work across the Nation. Now is the time we must encourage true, long-term employment. This can be achieved through much more cost-effective measures such as private sector tax incentives, vocational education programs, small business investment tax credits, and enterprise zone legislation.

This is not the time to look for an easy answer to unemployment. It is not the time to adopt a Federal program that creates another bureaucracy, gives us high interest rates, high inflation, and fails to address the decline in productivity that hampers the economy. It is not the time to spend additional billions of dollars—billions of dollars we do not have—in a year that has already seen the passage of a major jobs bill. The $4.6 billion emergency supplemental appropriations for public works programs, as finally passed by Congress, promised to provide employment through aid to local communities, job training programs, summer youth programs, and humanitarian aid. Let us give this program a chance to work before we pass competing legislation.

Neither the taxpayers nor the unemployed would benefit from this bill. I urge a vote for fiscal responsibility—a vote against H.R. 1036.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I have served on the subcommittee with my colleague. I have great respect for him. I would like to ask a very practical question: This morning in the Pittsburgh Post Gazette there is a headline, "Four Thousand"—not blue collar workers, not 40, not 400, but 4,000 "White Collar Workers Are Being Laid Off Today in Pittsburgh."

I ask my colleague, is this not proof that there are many, many pockets throughout this country that must be addressed and a solution must be advanced, and this bill is the least, the only solution that we have presently before us?

Mr. NIELSON of Utah. I agree with your symptoms but not your solution. There are a lot of white collar people being laid off at Kennicott and United States Steel in my area as well.

Mr. GAYDOS. I cannot understand the callousness then. I have sensitive feelings toward the white collar people and blue. But this shows the depth to which the unemployment now is progressing.

Mr. NIELSON of Utah. I grant that. However, I do feel that we have to get hold of the budget and bring down our spending and cut down the inflation it brings.

I think that is the better solution.

Mr. GAYDOS. Would my colleague agree with me that maybe the better problem to address would be maybe foreign aid, and maybe some of these development banks, where the money does not get to the people it is supposed to serve. Maybe that is the place we should be practicing the economy that you speak of rather than here with our own people.

Mr. NIELSON of Utah. I have supported such legislation. I supported section 409 of the IMF bill and also Mr. RITTER's amendment to protect the steel companies. I agree with that. We need to help on the foreign aid side as well. But I do think this legislation does not do it.

Thank you.

Mr. GAYDOS. Thank you for yielding.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I think we ought to recognize these kinds of programs that we have before us today have not worked either. I quote from a New York Times article with regard to the emergency jobs program that we passed earlier in the Congress, where the New York Times says:

> Although the money was intended primarily to help men and women whose jobs have been in declining industries, the early beneficiaries of the funds have been the lawyers, accountants, engineers and consultants brought in to draw up proposals, plan new projects and conduct public hearings on them.

That is where the money goes. It does not get to the unemployed and that is the tragedy.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield.

Mr. NIELSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Lawyers and accountants are unemployed today. The record shows that. They pay taxes. They should have some programs that help them too. If fundamentally we are right on the principle, and I suggest that we are in this bill, I do not think the sponsor of this bill or the maker of this bill has ever directly or indirectly insinuated that this bill is a solution.

This bill is to help people, help families, to overcome those emotional problems, wife beating, drinking, broken homes. If this bill accomplishes just that, I think it is well worth it. I do not like the callousness of my good friend who does not seem ever to have the sensitivity to respond to people and their needs.

□ 1510

Mr. NIELSON of Utah. Reclaiming my time, I do not believe the gentleman should impugn motives.

Mr. WALKER. Will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I think it is important to point out that the New York Times article made it quite clear that the lawyers and accountants and all of these consultants that they were talking about were not people off the unemployment roles; they were people who had jobs and who were simply eating up the money that the Federal Government apportioned to supposedly help these people.

I am certain that the gentleman from Pennsylvania is going to be willing to support an amendment and I am going to propose one later which I will talk about here in a few minutes that would devote 100 percent of all of the jobs that are created in this bill to people who have been unemployed for 6 weeks immediately prior to the enactment of this bill.

In other words, let us make certain, at least on one of the bills we have around here, that every job that is created as a result of this bill goes to

somebody who has had a long record of unemployment.

Let us not have the money siphoned off by the lawyers and the accountants and all of these people out there who are doing work that does not really end up helping the unemployed.

Let us really employ some unemployed people and I am certain, given the gentleman's remarks, that that amendment is one that he is definitely going to want to support.

Mr. GAYDOS. Will the gentleman yield one more time?

Mr. NIELSON of Utah. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I sincerely appreciate the gentleman yielding.

I submit to my good friend from Pennsylvania this bill does exactly that which he requests. So I really welcome him aboard. I know he is going to help us pass this because this bill does exactly that.

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. NIELSON of Utah. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. I appreciate the gentleman yielding. We are debating this bill and not the previous jobs bill. But I do want the gentleman from Pennsylvania to come to the State of Michigan and to talk to the thousands of youths who were employed this summer because of the actions of this Congress.

It is mythology that our action does no good. It did so several months ago in terms of the summer and, as I will remark in a few minutes, we can act again to help the unemployed of this Nation.

I thank the gentleman for yielding.

Mr. NIELSON of Utah. I thank the gentleman and yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. ANDERSON).

Mr. DIXON. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to my colleague, the gentleman from California.

Mr. DIXON. Mr. Chairman, I rise in support of this bill and congratulate the subcommittee on crafting a bill that brings some equity and some jobs to our society.

We began the 98th Congress with a commitment to address the No. 1 problem facing America—unemployment.

Our initial response, and emergency jobs bill passed last March, provided $4.6 billion in additional funds for existing public works, infrastructure, and safety net programs.

However, this only primed the pump. The emergency jobs bill was only begun to stem the rising unemployment rate that had consumed 12 million American workers. Left undone were programs to address the needs of those already without jobs—particularly women, minorities, youth, and the long-term unemployed.

Today, we begin to address the job that was left undone. The Community Renewal Employment Act, sponsored by Congressman GUS HAWKINS, will provide important employment opportunities to those citizens hardest hit by the recession.

We all know the statistics, and we know that they are not good. Despite claims that the economy is on the mend, nearly 11 million Americans are without jobs; youth unemployment is more than double the national average; and the black unemployment rate is a staggering 20 percent.

For these people and the national economy, H.R. 1036 makes good economic sense. The bill is targeted for long-term jobless workers in areas of high unemployment. The bill provides employment opportunities in conservation of public lands, repair of public facilities, and the provision of day care, health, and other community services.

Funds have been specifically targeted for individuals who have exhausted their unemployment benefits, and for part-time employment opportunities for the Nation's youth. Special provisions will be added here on the floor to improve targeting for rural areas, and to decrease the bill's authorization in the event that unemployment drops significantly.

H.R. 1036 is the essential next step in combating unemployment. It provides an opportunity for those workers who can no longer wait on an economic recovery that continually passes them by. Each percentage point of unemployment affecting these workers also adds $20 billion to the national debt. As our debts increase, interest rates climb higher. And high interest rates will only plunge us into another devastating recession.

It is our responsibility to provide this positive stimulus to get our country back on its feet, and I urge you to support passage of H.R. 1036.

Mr. ANDERSON. Mr. Chairman, as a coauthor of the Community Renewal Employment Act, I rise to urge our colleagues' support for this bill. I feel that the author, Chairman HAWKINS, has written into this legislation sufficient safeguards against its becoming labeled a "make work" jobs bill; it is not. Also, the amendment he intends to offer will bring H.R. 1036 into conformity with the budget resolution for fiscal year 1984.

H.R. 1036 will provide worthwhile jobs to persons who have been unemployed for at least 15 of the past 20 weeks. Because H.R. 1036 specifies a timeframe within which any appropriations must be applied to renewal projects, this legislation will not create a bureaucratic maze. Rather, chronically unemployed Americans will almost immediately be hired to repair dilapidated schools; to operate public health, child care, and nutritional programs; and to augment services to the elderly and the handicapped.

Mr. Chairman, even in the wake of the administration's increasingly optimistic forecasts about the strength of the recent economic upturn, a nationwide unemployment rate of 9.5 percent is astoundingly high. Particularly for blacks, Hispanics, and American Indians, it seems unemployment is a stigma which our society is all too willing to accept. The rate of joblessness for Hispanics is 12.9 percent; and today one out of every five black Americans cannot find work. The Bureau of Indian Affairs reports that the jobless rate among American Indians is 51 percent, meaning one in two is unemployed.

What even these statistics do not bear out is the large number of jobless Americans who do not turn up in the monthly unemployment statistics because they have lost confidence in American business and, quite frankly, in their elected officials. The August 9.5 percent unemployment figure does not take into account those who have lost their jobs, have run out of unemployment insurance, and have lost all hope. The latter are callously disregarded as no longer a part of the American work force.

It is particularly unfortunate that, in my district, far too many people who want to work, and are capable of holding a job, are still unemployed. A constituent of mine who was dismissed because of the deep recession wrote to me:

> I am among the number of people having been laid off for 13 months. I was a foreman at the time. Now I have 27 years experience and am unable to obtain a job.

She and other constituents of mine have not been inquiring about what the Congress is doing to expand welfare programs. These people do not want food stamps, they want jobs. They long to contribute to the growth and the strength of our country, and they want to know whether this Congress has any compassion and is willing to do something to help them. In answering my constitutents, I urge my colleagues to join me in passing H.R. 1036.

Mr. JEFFORDS. Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin (Mr. PETRI).

Mr. PETRI. Mr. Chairman, while I have reservations about this legislation, there is at least one good idea here that deserves our attention. I refer to the career preparation demonstration program, added in committee by my colleague on the Education and Labor Committee, the distinguished gentleman from Vermont. This program extends the benefits of the Job Corps to more Americans.

The Job Corps traditionally serves potentially dangerous problem youth by providing training and discipline in tough residential centers. While these centers are just what the doctor ordered for some, others who could benefit from the training, do not need the discipline. One of my constituents, a fine young woman from a good home, mistakenly got recruited into a Job Corps residential center only to later learn by sad experience that, in the words of one residential security guard, "This is no place for a nice girl from Reedsville."

At the same time, Job Corps has a long and successful history of working with the most disadvantaged youth. Throughout its history, the Job Corps has become a learning laboratory under which many useful programs have been developed. Career preparation demonstration centers would test the effectiveness of using Job Corps materials to train eligible participants on a nonresidential basis.

These centers would be distributed equitably between rural and urban areas and spread geographically among 10 regions. Outreach satellite centers would provide training close to home. Five high-tech demonstration centers would provide training in combination with subsidized private sector internships to prepare individuals for careers in high technology jobs.

The career preparation demonstration program is a good idea. Even if this bill is dragged down by its other provisions, we should preserve this idea, and take steps to extend the benefits of Job Corps training materials to nice girls and boys from Reedsville and elsewhere.

Mr. HAWKINS. Mr. Chairman, I yield 10 minutes to the gentleman from Michigan (Mr. KILDEE).

Mr. McCLOSKEY. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I am happy to yield to the gentleman.

Mr. McCLOSKEY. Mr. Chairman, I rise in support of H.R. 1036. The recession has not ended in the Eighth District of Indiana. Although the percent of working people who receive unemployment continues to fall slowly, the total numbers are still staggering. In the Eighth District of Indiana, 39,000 people are still unemployed. In Evansville alone, over 8,000 men and women turned to their unemployment insurance to pay the rent, buy food, and get their children clothes for school.

H.R. 1036 would directly channel funds to those counties in southwestern Indiana hardest hit by unemployment, with $1.6 million going to Lawrence County, $2.24 million to Vanderburgh County, and nearly $900,000 to Monroe County. This bill does not require communities in need to compete with each other. H.R. 1036 will provide over $7 million in direct funds to the Eighth District to create jobs for both men and women. This phase II jobs bill funds jobs in bridge repair, land conservation, and of great concern to our area, reclamation of lands affected by strip mining. In times such as these, jobs in the service sector are particularly important to the well-being of the community, and H.R. 1036 creates employment in veterans services, health care, child care, and elderly care facilities.

It is less expensive to return people to work than to support mistaken economic policies with various forms of Federal charities. Unemployment is itself a major factor in the deficit: Each 1-percent increase in unemployment adds $25 billion to the national deficit.

A quarter million Hoosiers still are unemployed. I can hardly call this a recovery. H.R. 1036 is an important step toward genuine economic growth.

FUNDS FOR DISTRICT EIGHT UNDER H.R. 1036

	Title II [1]	Title III [2]
Crawford County	234,000	58,000
Daviess County	290,000	85,000
Gibson County	341,000	87,000
Greene County	564,000	130,000
Knox County	451,000	118,000
Lawrence County	1,368,000	298,000
Martin County	188,000	46,000
Monroe County	609,000	253,000
Orange County	453,000	105,000
Pike County	103,000	27,000
Posey County	112,000	36,000
Spencer County	246,000	61,000
Vanderburgh County	1,859,000	391,000
Warrick County	219,000	60,000
Washington County	653,000	152,000

[1] Eighty percent.
[2] Twenty percent for school repair and rehabilitation.

Mr. KILDEE. Mr. Chairman, there are those who say this bill is not needed, that this country is in the midst of a very robust recovery, or at least a recovery. While many people say that very sincerely, including Members of this House and members of the committee, they are really ignoring the facts.

Let us listen to a recitation of those very dreary, dismal, and disheartening facts. Those facts should lead us to some type of action because governments cannot remain coldly neutral in the face of the highest unemployment since the Great Depression.

I cannot remember, although I was born in 1929, I cannot remember as well as my parents could those dismal days. But I do know that nothing has been worse in my adult lifetime than what I see in the city of Flint, Mich., and the State of Michigan in general.

So if we are going to read objective data and remain coldly neutral, perhaps we should examine our own consciences.

We know that the August national unemployement is 9.5 percent. That is an outrageous figure.

□ 1520

That should sensitize us to some type of action. We find that there is 1.7 million workers who have become discouraged and are actually out of that figure now.

We have 5.8 million people who are working part time who wish to work full time. We have 18 million, then, who are unemployed, dropped out, or underemployed. We cannot ignore that fact and call ourselves people of conscience.

Now, in my city of Flint, Mich., we have 21.9 percent unemployment, according to the last available figures, 21.9.

You know, I used to teach school in that town. It has been a long time since I have taught school. I have students of mine who are unemployed. They are in their forties. But you can be sure that people under 30 are probably not working or not working full time because you really need about 12 years of seniority in the plants there to still be working.

So that generation, those under 30 are not working. That is a terrible thing to which we must be sensitive. We must demonstrate our conscience. Those are the people who want to start a family, who want to get into homes, but they cannot do it. That puts severe strains upon them and upon, very often, the parents with whom they have moved back to live, sometimes after they have been married. There are two families trying to make it under difficult circumstances.

Those people, I know those people well, I have lived in that town 54 years. Those people want to work. They prefer work to welfare. Yet we hear work fare, work fare, work fare. If you are sincere on work fare, I submit that you should be concerned then about a jobs bill because it is inconsistent to talk about work fare and then try to scuttle a meaningful jobs bill.

I commend Mr. HAWKINS. He has worked hard on this bill. This is one of the best jobs bill I have seen in my 18 years of public service.

This is carefully crafted, it is addressing real problems. It works with the private sector, for public contractors who can be involved in it. Let us look at those objective figures, have those move us to some type of action. We cannot remain coldly neutral in the face of those things; 9.5 unemployment. You know we have passed jobs bills with unemployment far less than that and I submit they have been helpful, they have worked.

Now we have 9½. I guess the reason why people think that figure is good is because things were worse a few months ago. But 9½ objectively, is intolerable, immoral, unconscionable.

This House must address itself to it or we, then, share the guilt for it.

So let us address ourselves to those people out there, particularly those

under 30 who want a job. Let us give them some opportunity for that job.

Now I would like to address myself to one part of the bill that I worked on with Mr. HAWKINS. That is title III of the bill which will help our educational institutions to take care of deferred repairs, a massive number of repairs, very often because of the very recession we are in.

We have a school district in my city that has deferred repairs because Flint has been strapped for dollars. They are the victims of this recession. They cannot take care of the repairs because they have more immediate problems to address themselves to. This bill, in a very meaningful way, not only will provide jobs for people but will also take care of those deferred repairs that many of our educational institutions, elementary, secondary, colleges, need to take care of because they have had to delay them. A delayed repair becomes a very costly repair.

In the high school in which I taught, for example, and this is very specific, and Members should look around in their districts, but in a high school in which I taught the bandroom has asbestos dropping down into the bandroom from the ceiling. The school board is scurrying around trying to find some way to either cover it up or do some temporary repairs to protect the health and safety of those students.

Now, cannot we, who spend billions of dollars where we should not spend them—you know, it is not a question of busting the budget, it is a question of priorities—we put a bill through here with about $187.5 billion for defense, and all of us do want a first-class defense but that was a bad bill. If everyone who thought that bill was too much had voted against it, I doubt whether it would have passed. But they are afraid to have to explain that bill to certain people.

But that was way too much money for that department of Government, way too much. It will be spent but will not be spent wisely, nor will every dollar spent there contribute to the defense of this country. So it is a question of priorities.

I submit that if we cannot find a few billion dollars to put our younger people to work, our people under 30 especially, then it is our fault for having misplaced priorities in this country.

So let us think of those people, let us think of our educational institutions.

We talk about excellence in education; title III of this bill can pair and wed those two well, jobs for people and help for our educational institutions. We will respond to the call for excellence in education and at the same time provide needed jobs.

Gentlemen, examine your consciences and please vote for this bill.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. KILDEE. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I want to thank my colleague for yielding.

Mr. Chairman, I want to congratulate the gentleman (Mr. KILDEE) in the initial instance because I think he has squarely put the question. We look at waste, and a lot of my colleagues criticize this bill, and I am not going to say this personally, but a lot who do criticize this bill never criticize the folly of a program such as the IMF and all of its ramifications, the wasted money in foreign aid in so many different ways, the Asian-American Development Bank, the Inter-American Bank, and all the projects going down the drain. Nobody complains about those.

When it comes to this little bill here, $3.5 billion, it was properly pointed out that the unemployment rate was so much less 2 or 3 years ago and the expenditures was so much more, in the neighborhood of $5 billion to $6 billion, and this stinky, little $3.5 billion, under these conditions people are getting up and objecting to, particularly when this bill itself on the face of it, one of the primary elements in it, one of the titles in there provides that you must have, I believe, 15 weeks of unemployment before you qualify.

Now, if that is not a safeguard, what is it that you want?

Now, I mentioned what appeared in the Pittsburgh Post-Gazette, I was most sincere, I did not do it for any other reason than to emphasize the fact that it is not just the blue-collar people who are now being affected, it has insidiously invaded the white-collar people and the professionals.

Do you not remember, do I have to ask my colleagues in this House, do you not remember when we had the airplane industry down the drain, in a tailspin, do you remember that; 50,000 engineers? Did we not make Federal funds available, unquestionably, to bail them out? We put those people back to work.

The CHAIRMAN pro tempore. The time of the gentleman has expired.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes additional to the gentleman from Michigan (Mr. KILDEE).

Mr. CLAY. Mr. Chairman, will the gentleman from Michigan yield to me?

Mr. KILDEE. I yield to the gentleman from Missouri.

Mr. CLAY. Mr. Chairman, I rise in support of the bill.

Mr. Chairman, the greatest con job in history is currently being perpetrated on the American public. The administration, the media, and big business are involved in a major campaign to convince the public that economic recovery is just around the corner. The lead stories on television, the headlines in the daily press, and the propaganda issued from the White House all suggest that our Nation is recovering from economic recession.

The fact is that only some Americans are recovering from the recession, while almost 11 million Americans remain unemployed and without prospects of returning to the work force.

Unemployment is still worse than at the worst point of any recession since the Great Depression, and the jobless rate is not projected to return to a tolerable level for several years to come. The unemployment crisis remains our Nation's most urgent problem and it must be this Congress foremost priority. We should not even have to debate the merits of the legislation before us today.

The Community Renewal Employment Act will authorize $5 billion in fiscal year 1983 to provide job opportunities to long-term unemployed individuals and is targeted to high-unemployment communities. This legislation would provide grants to States and local governments for repair, maintenance, or rehabilitation of essential public facilities, including the repair of public school buildings. It will also fund such activities as weatherization and energy conservation programs, emergency food, and shelter programs, disaster relief, dependent care, and services to veterans, the handicapped, and the elderly. This form of direct job creation is the most effective, timely, and efficient means to combat record high levels of unemployment. The jobs created by this legislation will be of tangible benefit to all citizens. The need for the community renewal employment bill cannot be overstated.

My only criticism of the legislation is that it will not be able to help all of those in need. Budget constraints have already forced a funding reduction in this proposal. But the Community Renewal Employment Act remains our best plan for helping alleviate the unemployment crisis which continues to threaten the quality of life in our society and the strength of our Nation. We must enact H.R. 1036 and provide some relief to the 10.7 million unemployed Americans. If we fail to enact this legislation, we are negligent in our responsibility to promote the human enterprise. H.R. 1036 will put people to work. It will provide needed maintenance and repair in our communities, it will take an important step toward reviving our economy and it will give hope to those who have been most victimized by this long-term recession.

The Community Renewal Employment Act will provide vital community services in addition to providing employment opportunities for up to 500,000 Americans. I urge my colleagues to move in the direction of a more productive future for all Ameri-

cans and to vote for passage of H.R. 1036.

Mr. GAYDOS. Will the gentleman yield further?

Mr. KILDEE. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I thank the gentleman for yielding further.

What I am probably trying to say and probaby very clumsily in stating it is that this is not a novel thing.

We went to work and we helped that city with its problems. We went to Chrysler, we took care of the aerospace industry, and we do this all over the world. If so, what, why, and how, what is the rationale, the reasoning here? Why is this such a bad bill? If I had someone respond to that with good reasons, I might pull off the bill. But I do not think that is the case.

Let me close with one point: Most of the unemployment in the steel industry is the direct result of a bad international trade policy in this country. We are being penetrated by 24-percent steel imports.

Let me give you an example: In Korea, because we are trying to build up that bastion of democracy over there in the Southeast Asian area, in Korea we take from them into this country, into our market, 25 percent of the steel that they manufacture and 50 percent—and I have to emphasize that, because I get so worked up about it—50 percent of their total output in world trade is what we take.

□ 1530

And now, because they have problems down in the Caribbean, we have a Caribbean Initiative. A Caribbean Initiative, over 10 to 12 years, we are going to take many, many products, in fact, most of their production duty free into this country.

That, I submit to reasonable men and women, is why I say that the problem we have in the steel industry today is based upon a fallacious and a bad foreign policy in trade. I challenge anybody to question that. I could talk for hours on what is happening. I have made an attempt to do that, to talk and to explain to my colleagues on the record in many of our special orders.

Mr. Chairman, there was much self-congratulation in July when what some call the recovery knocked half a point off the unemployment rate, which has been 9.5 percent since then.

Yet with this bill—H.R. 1036—funded at a reduced level of $3.5 billion, we can knock half a point more off that awful rate, and if we were able to fully fund it we could look for a rate in the neighborhood of 8.5 percent.

This alone is enough to commend the bill.

However, there is more in its favor.

There is little sign of recovery in the parts of America that make the goods that are the objectives of dumping and subsidy in the current trade war of our foreign trading partners. Their goal is to keep their people working. The result is unemployment here.

And when you have import penetration of 20 percent, and 30 percent, and 50 percent in dumped and subsidized goods, you have people out of work who should not be out of work; and no recovery will help them.

Pittsburgh, seat of the steel industry, is one such area and for almost 2 years there has been no truce in the trade war.

Unemployment among steelworkers in one of the United Steelworkers of America's biggest district still is running over 50 percent; and unemployment in my hometown of McKeesport is over 18 percent.

I wish those who see a recovery could walk with me through the streets of McKeesport, and Monessen, and New Kensington.

They would find formerly hard-working men and women—who have supported pay cuts to fight imports—whose unemployment benefits have run out or are expiring, and whose trade adjustment assistance is gone. They would find them in the hundreds and thousands.

And all of these people would ask the experts, what recovery? Steel companies are still laying off steelworkers and white-collar help.

These people understand what is happening, and they are by letters, and cards, and personal contact asking that the Government quit pretending they do not exist.

Much of the unemployment in industrial America stems from a Government that has for decades been afraid to enforce its just and proper trade laws against subsidy and dumping.

So now—when this fear has resulted in wide destruction—it is the responsibility of this same Government to react to what it has caused.

H.R. 1036 is necessary because it will lead to productive work and create related economic activity that is targeted into the areas of highest unemployment.

And, best, it is to benefit the long-term unemployed. A criteria for eligibility is unemployment in 15 of the last 20 weeks. We have men and women who have been unemployed for 104 of the last 104 weeks, and they want to work badly.

Passage of H.R. 1036, coupled with other bills such as last week's measure on trade adjustment assistance, will show these people they do not fight alone.

Mr. Chairman, I strongly urge passage of H.R. 1036, the Community Renewal Employment Act.

Mr. JEFFORDS. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I would say, first of all, that this bill certainly is brought to the floor with the very best of intent. I have no doubt that the sponsors of the bill really do want to see people employed, really do believe that this bill will meet the employment needs of the future, really do think that this is the way to go to bring down the unemployment rates that are devastating this country at the present time.

I would submit, though, that it is a rewarmed version of precisely the way in which we have tried to deal with unemployment and recession in the past. And in the immediate past we have found that those efforts have been quite unsuccessful, particularly toward getting the unemployed employed.

When President Carter attempted to respond to the recession, which came about toward the end of the Ford administration, he responded with exactly this kind of program. And this kind of program was the program that then led us toward the Carter recession that we have now been trying to work our way out of, too.

We, so far on this floor today, have failed to note that there is job creation now underway. In fact, we have had more job expansion than ever before in modern history following a recession in the last 9 months. The last 9 months have seen the employment force not only gain back the 3 million jobs that were lost in the midst of the recession, but we have created another million as well.

So that, in fact, there is job creation taking place right now under a new kind of idea that involves tax incentives, that involves stimulus to investment, that involves getting small business, once again, investing in the country and thereby investing in jobs.

This is precisely the kind of program, with its potential deficit add ons and the potential cost of that is on interest, which will frustrate and undermine the efforts that are now underway. And we could very well see a turnaround in the kinds of things that are now happening. That would be devastating.

One of the previous speakers mentioned, for example, that one of the ideas behind this bill is to bring the unemployment rate down from 9½ percent down to 9 percent. That is a goal we all share. But I would submit that virtually the entire economic community now says that we will probably achieve 9 percent unemployment by the end of this year anyhow under the programs that the administration now has in place.

Now that is not going far enough. We need to bring it down a lot further than that. But if this bill is attempting to achieve a 9-percent rate, we are going to get a 9-percent rate anyhow.

And then the question becomes, how much does this add on to the deficit result in more potential for unemployment in the future?

If we take a look at this kind of welfarism approach that is embodied in this kind of bill, we find that the past programs simply have not worked very well. The programs passed in the late seventies, the programs to which I referred, 88 percent of the jobs went to people who previously had a job, only 12 percent got to the unemployed. And 98 percent of the money was spent on people who already had a job. Only 2 percent of the money got to people who were without work. There is something wrong with a program like that. And it needs to be addressed here and I am afraid that it has not been addressed. The committee has made some effort to respond to that. There is some effort in the bill. But I would submit to my colleagues that even under this bill 25 percent of the moneys can be used elsewhere, other than employing the jobless. It has a provision for 90 percent of the jobs going to the unemployed. Why not 100 percent?

I hope that my colleagues will support me when I offer an amendment later on that says 100 percent of the jobs created under this bill have to go to people who have been unemployed for 6 weeks immediately prior to the passage of the bill.

Let us get all of the work in the hands of the people who are unemployed. If we are going to go this route, let us make certain that the real unemployed are the people who get jobs under the bill that we pass.

Now, I would hope that perhaps the amendment would be supported. Certainly the jobs programs that we passed earlier in this Congress, the emergency jobs program that was passed—again with the best of intentions—has not worked in that way.

I quoted earlier from the New York Times and I would like to include it again, because the New York Times makes it quite clear that these same arguments that are being made on the floor today were being made about that program and here is the result:

> Although the money was intended primarily to help men and women whose jobs had been in declining industries, the early beneficiaries of the funds have been the lawyers, accountants, engineers and consultants brought in to draw up the proposals, plan new projects and conduct public hearings on them.

That is precisely what happened the last time out. It happened on the emergency jobs program. And I submit to my colleagues that the potential is there to do it again if we do not say that virtually every job created under the bill should go to a person who is unemployed.

Mr. GEKAS. Mr. Chairman, will be gentleman yield?

Mr. WALKER. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I thank the gentleman for yielding.

The gentleman from Pennsylvania (Mr. WALKER) made an interesting reference to the bill taking on the proportions of a kind of welfarism bill. And that is in concord with some of the conversations I have had over the recess with some of the unemployed in my district.

I am wondering if the gentleman has had the same experience where the unemployed themselves, who have been laid off from productivity types of factory and other kinds of producing types of jobs, have said to the gentleman that when they go back to job they want to go back to the same type of productivity. They do not want these kinds of makeup jobs that seem to be giving them something to do, but in their hearts would know would not be a permanent type of thing, would not be a reestablishment of the productivity to which they have been used.

Has the gentleman run across that kind of sentiment?

Mr. WALKER. I certainly have. I think that that is true across the country, that people do not want Government-sponsored kinds of jobs. They do not want jobs that are created as a make-work kind of project. They want real jobs and a productive economy. And you have got to have a productive economy producing those jobs in order to get the kind of jobs created that the gentleman is talking about.

That is the reason I say that I think one of the great dichotomies between the parties on this floor is the fact that we tend to base a social program around work. The other party tends to base their ideas for improving social betterment around welfare. And the approaches that we bring to the floor exemplify those two different approaches.

I think that that is exemplified in this bill. I think that this bill does say flatly that we believe that the way that we are going to reduce unemployment for the future is with some kind of Government involvement, more expenditures at the Federal level, which in my mind then frustrate the productive economy from creating that same number of jobs or probably more.

Mr. GEKAS. The other comment that I wanted to make, to the extent that Government through the consensus of this House needs to get into stimulating some of the economy, is it not true that the bill that was passed in the spring to that measured extent is to serve that purpose?

□ 1540

And now, the rest of the time that we have in the 98th Congress, ought to be to stimulate the economy to provide for those kinds of jobs that we have referred to as the permanent productivity-related jobs.

Mr. WALKER. I think that is a legitimate point. And I also point out to my colleagues that last December we passed a bill for highway construction that was supposed to be a great boon to jobs and was going to be a great boon to the economy. The direct result of that bill was that when the 5-cents-a-gallon gasoline tax was imposed as a part of that approach, it set off a wave of inflation which is the highest inflation we have had so far this year.

In other words, Government helped pull down the economy by having a 2-month period in which inflation spiked way up, led by fuel costs. Those fuel costs were imposed because of the additional taxation that we brought about in Congress supposedly to do some good for the economy and help the unemployed. That increased inflation will ultimately result in fewer people working, and that is a tragedy.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Maryland.

Mr. MITCHELL. I have listened with a great deal of interest, and you are really pointing out a fundamental difference between approaches in terms of the two parties. But I was constrained to ask you to yield some time to me because my experience is in sharp contradistinction to yours.

People in my district are saying, "Get me any kind of damn job you can get me. Sweeping floors, hauling garbage, anything."

They are not worried about going back into productive jobs in the private sector. They never have had them. Black people in my district have been disproportionately unemployed since the end of World War II, twice as high. And you come up here with this stuff about, "Let us go into certain kinds of jobs, where we are back in the factories."

My people are not telling me that. "Any damn kind of a job you can get me," that is what they are telling me. I think you have got to take them into account, as well as those folks over there.

I thank you for yielding to me.

Mr. WALKER. I thank the gentleman for his point, because I do think it is important that we make certain that we give people the opportunity to work. He is absolutely right. And the people who have not gotten jobs before, we ought to be providing job opportunities out there for them.

I would hope that as we create those kinds of jobs that we create jobs with future and with hope.

The problem here is that we create jobs that are very temporary in nature, that really are dead end kinds of jobs, in too many instances, and what we need to be doing is creating

the kinds of jobs that give people some real hope and opportunity, as well as just the work.

Mr. MITCHELL. Will the gentleman yield for one more moment?

Mr. WALKER. I yield to the gentleman from Maryland.

Mr. MITCHELL. I will get my own time on this, but let me explain something to you that you apparently just do not understand. Despite everything that we have done, people are still out of work disproportionately. And you are acting like some guy who is dealing with a patient who has cancer and says, "We have some things we can treat you with, but we would rather not give you any treatment at all because somewhere down the line we are going to invent a cure for cancer."

Meanwhile, people are suffering.

I will get my own time to answer you, but I get so upset when I hear all of these specious arguments about the right kinds of jobs, long-term jobs, jobs that have a real future.

People are not talking about that right now. They want a job today.

Mr. WALKER. Well, I would submit to the gentleman that those people failed to get jobs in the last jobs bills that were passed around here, when 98 percent of the money went to people who already had jobs.

Mr. MITCHELL. Some of them got jobs.

Mr. WALKER. It was some of your constituents who failed to get jobs because 98 percent of the money ended up in the hands of people who are already employed.

Mr. MITCHELL. Some of my people got jobs.

Mr. WALKER. I would hope also that the gentleman would listen to the next part of my presentation, because there are a couple of other things that I intend to offer in terms of amendments here that I think speak to some of the problems that he brought up.

One of the problems that is being pointed out by more and more observers on the national scene is the fact that there are groups within our society who are particularly susceptible to unemployment, who have not been able to get jobs, in the first place, largely because of labor restrictions which are Government imposed.

In many instances what the Government has done is set up barriers to people getting jobs. This bill has some of those same barriers in it. And I also will offer amendments that will speak to some of those.

I know the gentleman is acutely interested in, and reasonably so, the problem of minority youth unemployment. And what we have seen there is that as the economy has improved, minority youth unemployment has still gone up, so that the minority youth in this country are not benefiting in any way from the little bit of economic recovery that we have seen. That has been a problem in nearly every recovery that we have had. Ever since the early 1960's we have seen economic recoveries come and go, but minority youth have been left out of it.

The statistics on it are absolutely devastating. It is a terrible crime in this society that some of the people who are looking to get on to the economic ladder, who are looking to climb in the first place, have not been able to do so because of a number of restrictions, labor restrictions, economic restrictions, that we have imposed at the Government level.

Now, we are not wise enough to know what all of those may be as they apply to local community. So I intend to offer an amendment which would say that the local community, if they see those kinds of labor restrictions imposed under this act, and they feel that they could create substantially more employment if they could waive those restrictions, that they would be able to apply to the Secretary to get such a waiver so that they could create more jobs in their communities. And that is one way in which we could speak to the need to increase jobs out there. It will impact on programs that are very, very popular with a lot of special interests around here. It impacts on things like Davis-Bacon, it impacts on things like minimum wage, it impacts on a number of those kinds of things. But it is very important to understand that those labor restrictions are among the things that are creating unemployment out there, particularly among the most vulnerable people in our society.

I think we as a Congress need to begin to speak to that issue, as well—of whether or not we ought to pass things in the guise of a jobs bill that includes the same kinds of restrictions that have caused much of the unemployment in the first place.

I am going to propose amendments, one of which will be directed toward a general waiver in a community. If that would not pass, I think we ought to at least address the problems of minority youth, because they are that pocket of unemployment in the country which is devastating. Of that 10.5-percent unemployment that we had a while back, the minority youth were unemployed at the rate of 50 percent. And now we have moved down to 9.5 percent, and they are up to 53 percent of the unemployed.

Now, that seems to me to be a pocket that we can at least address, from the standpoint of labor restrictions.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. I really hesitate to interrupt the gentleman and I do not question his sincerity. But I would like to ask the gentleman a question. The gentleman has raised so many side issues that I am confused, I really cannot follow. Taft-Hartley, this and that. I am so confused.

Mr. WALKER. I do not think I mentioned Taft-Hartley. Davis-Bacon I think I mentioned.

Mr. GAYDOS. Davis-Bacon. You raised them all.

Mr. WALKER. All cut from the same cloth.

Mr. GAYDOS. May I ask a very simple question? I know my colleague will be honest enough to respond. If a country, any country—we are talking about our country here, I think it is our country yet, I hope it is—if a country asked its youth and its people, No. 1, to pay taxes, No. 2, to serve and to make that supreme sacrifice, in many instances, like Vietnam, and so forth, where we make the decisions and they go ahead and carry them out, if that is the case, does not my colleague in the well agree with me that that person, that individual, that citizen or that family man, call him what you will, does he not have a right to expect a job?

Mr. WALKER. Absolutely.

Mr. GAYDOS. Then why are you confusing the issue here with all of these collateral issues?

Mr. WALKER. I will tell the gentleman from Pennsylvania that is exactly the point of this gentleman.

Mr. GAYDOS. I do not know where you fellows get your information. You go back to your district and you hear strange things.

Mr. WALKER. Let me reclaim my time. I think it is important to understand that the point that I was making was that this Government, through some of the laws and regulations that we have put on the books, deny people the opportunity to work.

We are eliminating jobs in our society as a result of actions we have taken.

Now, all I am going to propose here at some point is that instead of doing that, we ought to allow local communities to waive those restrictions that we have artificially imposed in order to allow more people to work within those communities. That seems to me to be a reasonable kind of thing to do. Let us put more people to work, let us get them in jobs where Government here is denying them jobs, where we have created the restrictions.

Mr. GAYDOS. Will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. GAYDOS. I thank the gentleman for yielding, I really and sincerely do. The point I am making is that you ought to leave those things to another time, another place, and another piece of legislation, because I submit in good conscience to my good friend from Pennsylvania, my colleague from my State, that you are confusing the

issue, so confusing that we are not going to pass anything because you are raising all of these red herrings, and we are going to lose the basic fundamental principle of the bill.

Mr. WALKER. Well, I do not think I have waved a fish on the floor yet, but I think what I am attempting to do is to point out that to bring jobs bills out here that do not address some of these issues, basic issues in the employment sector of our country, is to make a mockery, too, that that confuses the issue, that it confuses the issue to bring a bill out that we call a jobs bill which then, as in the past, the experience in the past, that only 2 percent of the money got to the unemployed. And we beat ourselves on the chest and said that we were doing something to help the jobless, but in fact the money did not get to the jobless. I think that confuses the issue, too.

Mr. HAWKINS. Mr. Chairman, will the gentleman yield at that point?

Mr. WALKER. I yield to the gentleman from California, the distinguished author of the bill.

Mr. HAWKINS. I appreciate what the gentleman is saying and for yielding.

The gentleman keeps repeating that somehow we passed a bill recently in which only 2 percent of the jobless——

Mr. WALKER. That was passed in 1977. The bill I am referring to was the 1977 bill.

Mr. HAWKINS. What bill is the gentleman referring to.

Mr. WALKER. That was the jobs bill that was passed in 1977. I do not recall the name of it.

Mr. HAWKINS. Is the gentleman referring to the Comprehensive Employment and Training Act?

Mr. WALKER. Yes; I think that is the one.

□ 1550

Mr. HAWKINS. The gentleman must have his facts incorrect, then, because that bill was labeled as being very effective; that it returned at least $1.42 for every dollar invested. What is the basis on which the gentleman is basing the 2 percent?

Mr. WALKER. That was a study that was done, and I will have to get a copy of the study for the record for the gentleman. But that, in fact, was a study that was done of the bill and it showed that 98 percent of the money went to people who have previously had jobs and only 2 percent of the money got into the hands of people who had been jobless at the time the bill was passed.

Mr. HAWKINS. I think the gentleman has his facts incorrect.

Mr. WALKER. I would say to the gentleman that I think the facts I am presenting are quite correct.

Mr. HAWKINS. Well, if the gentleman has any reference to base those facts upon, we certainly would appreciate them because we do not agree completely with all of the bills that have been passed heretofore, but we have built upon that experience to craft a bill that will overcome some of those deficiencies.

Did I understand the gentleman to also refer to the supplemental appropriation bill which we passed this year as also the one under which these so-called employed white-collar workers, was that the reference?

Mr. WALKER. The New York Times article to which I referred on the bill recently was in reference to the emergency jobs law.

Mr. HAWKINS. That we passed in March?

Mr. WALKER. The $4.6 billion emergency jobs program that was passed. This article refers to 3 months after it became law. I do not have the exact date.

Mr. HAWKINS. Is the gentleman aware that that was not a jobs bill? It has been mislabeled as such, but the President himself indicated that it was not a jobs bill when he signed it. It was a public works bill. It was not targeted to the unemployed. It was to do the public works that it was felt necessary to be done. To view that as a jobs bill and to say that did not result in jobs, I think, is correct, and I would agree with the gentleman.

I said at that time that it was not a jobs bill; that we do not have a jobs bill today. We have not enacted one since 1981; therefore, we are without a jobs bill, and if we do not pass this one, we will be completely without a jobs bill of any kind.

Mr. WALKER. Mr. Chairman, if the gentleman will allow me to reclaim my time, I would say to the gentleman that the history of these, as I have pointed out previously, has been extremely checkered and that we have found that, in fact, they have not gotten to the unemployed, and I think the gentleman recognizes that in his bill.

There is an attempt in this bill, and I think it is a meritorious attempt, but there is an attempt in this bill to speak to some of those very issues. So obviously they are not phony issues. Obviously the committee recognized, when it was drafting this bill, that there have been some problems in the past. That is the reason why that material was put in here, and all I am saying is let us toughen it up even further. Let us make it a 6-week requirement in terms of unemployment, and let us make it 100 percent of the jobs.

That was the only point that I was making with regard to the past program. Why not adopt that?

With regard to the Government-imposed labor restrictions in the bill, as I say, there will be four amendments, one directed to the general community. If we do not adopt that, one directed at minority youth. If we cannot see our way clear to try to give a little bit of help to minority youth, there is also one directed at women, as well, because what we have found is that labor markets, in a recent study by the Heritage Foundation confirming this completely, is that women have been particularly devastated by the labor restrictions that have been Government imposed.

Let me just quote from the conclusion of that study.

It said:

> While the efforts of women to advance have been hampered by the outdated attitudes of those who choose to discriminate, they have been frustrated as well by government regulations and restrictions. By creating obstacles, imposing costs, and reducing competition, these restrictions have helped to perpetuate a climate in which discrimination could take place.

That is the point here. It is the point with regard to women. It is the point with regard to many of the minorities in our society. Adoption of the kind of amendments that I plan to offer would move us one small step toward addressing these concerns as a part of a job-related issue. If we are going to speak to jobs, let us speak to the totality of the climate in which jobs are being denied. That includes the fact that the economy has not performed well, but it also includes that fact the we in Government too often have not recognized that what we do on one hand supposedly to help people ends up harming people, and too often the people harmed are at the very bottom of the economic ladder.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I would be glad to yield to the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentleman for yielding.

Mr. Chairman, for clarity's sake, I think the bill the gentleman is referring to that had a very bad record as far as creating jobs was the Local Public Works Capital Development and Investment Act of 1976. I would agree pretty much with the comments the gentleman made in that it was not, as referred to, the Comprehensive Employment and Training Act.

Mr. WALKER. I thank the gentleman for correcting the record on that, and I think if I understand the gentleman correctly, the statistics that I was quoting were for that particular bill.

Mr. JEFFORDS. Yes; they were, and they pointed out the very, very low productivity of public works type jobs in assisting the unemployed people of this country.

Mr. WALKER. I thank the gentleman very much.

I appreciate the gentleman yielding me this time.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from Montana (Mr. WILLIAMS).

Mr. WILLIAMS of Montana. I thank the gentleman for yielding this time to me.

Yes, Mr. Chairman, this bill has a major flaw. It does not do enough. There are jobs to be done in this country and there are millions of unemployed people to do them. There are alleys to be cleaned and streets to be paved. There are children and elderly to be cared for. There are bridges to be reconstructed. There are mine dumps to be reclaimed. We have 10.7 million people out of work willing to do those jobs.

This bill does not spend enough money. This bill does not touch enough people. If it has a flaw, that is it.

Does this bill target the highly unemployed? Absolutely. People who have been unemployed 15 of the last 20 weeks in the hardest hit communities are eligible for this money, and it is the first jobs bill to come before this session of Congress.

Does this bill violate the budget? No. No. Even with its cost, it does not violate the budget. The contingency reserve fund, which was agreed upon by this House and by this Senate in the conference committee has the money in it for this bill.

This House has a flaw. This institution and the Members of this institution have a short memory. Have we forgotten about the infrastructure that we talked about, the bridges and the roads and the highways and the necessity for jobs in this country that we talked about just 90 days ago? Apparently, from some of the debate here today.

Have we forgotten about the unemployment of last winter and the unemployment that is going to be here again in the months ahead, starting in 30 days? Apparently.

Mr. Chairman, presently, 10.7 million Americans are searching for work, close to 1.7 million more have become so discouraged that they have stopped looking, and another 5.8 million who want to work full-time have only been able to find part-time jobs. Thus, a total of 18 million workers—one-sixth of the labor force—are now either unemployed, discouraged, or underemployed. The average unemployed worker has been out of a job for just short of 20 weeks, and there are 2.4 million people who have been unemployed for more than 6 months.

In terms of unemployment, the 1981–82 recession was clearly the most severe since the 1930's. Although unemployment has been declining recently, it still remains very high—not only when compared to prerecession levels, but also when compared to the levels reached at the worst point of earlier recessions.

During the recession, the unemployment rate reached a peak of 10.8 percent in December 1982, before beginning to decrease. In August—the latest month for which data is available—unemployment stood at 9.5 percent—more than 2 full percentage points higher than the 7.2 percent unemployment rate recorded in July 1981, the month when the recession began. In fact, the most recent unemployment rate is still a half-percentage point higher than the highest unemployment rate recorded during any previous recession since the Great Depression—9 percent in May 1975.

In terms of the numbers of people affected, 10.7 million workers were officially counted as unemployed in August, compared to 7.9 million unemployed in July 1981. Thus, after 8 months of declining unemployment, there are still 2.8 million more people out of work than there were when the recession began.

The official unemployment figures tell only part of the story. In addition to those counted as unemployed, there are also the discouraged workers—persons who want a job but who have become so discouraged about the prospects of finding one that they have at least temporarily stopped looking. These workers are not included in the official unemployment total, because the Government's definition of unemployment requires a person to be actively searching for work in order to be counted.

According to the Bureau of Labor Statistics (BLS), there were 1.8 million such discouraged workers in the fourth quarter of 1982, the bottom of the recession. (Statistics on discouraged workers are compiled quarterly, rather than monthly.) This was by far the highest number recorded since the BLS began publishing these statistics in 1970. By the second quarter of 1983—the latest period for which data is available—the number of discouraged workers had edged down only slightly, to 1.7 million. This most recent total is still 615,000 above the prerecession level of 1.1 million. In fact, the most recent figure is 560,000 higher than the level reached at the bottom of the 1974–75 recession, which, at the time, was the most severe recession since the 1930's.

When these discouraged workers are counted along with the officially unemployed, there are clearly still more than 12 million people who want to work but are without jobs—despite the fact that economists declared the recession to be officially over at the end of last year.

In addition to those who are unemployed or discouraged, there is a large number of people who are underemployed—those who want a full-time job but who have been able to find only part-time work. This figure, too, reached a postdepression record of 6.4 million in December 1982. Since that time, the total has dropped to 5.8 million, still 1.4 million more than when the recession began.

If workers able to find only part-time jobs—but who desire full-time work—are counted along with the unemployed and the discouraged, the total number of jobless and underemployed stands at roughly 18 million. This represents 16 percent of the labor force, or one worker out of every six.

Long-term unemployment reached a peak in June 1983. At that time, the average unemployed worker had been jobless for 22 weeks—more than 5 months. Since then, the duration of unemployment has declined only slightly, and in August the average stood at 19.9 weeks. By comparison, the average duration of unemployment at the start of the recession in July 1981 was 14 weeks, and the average in 1979 was 10.8 weeks—roughly one-half the current figure.

In August, 23 percent of the unemployed—2.4 million people—had been out of work for more than half a year. In July 1981, 14 percent of the unemployed, or 1.1 million people, had been jobless for more than half a year, and in 1979, only 9 percent, or 535,000 people, had been jobless for more than half a year.

With unemployment still above the high water marks of previous recessions, the unemployed are receiving far less assistance from the Government that they received in previous downturns, largely as a result of Reagan budget cuts and administrative/Republican resistance to emergency programs of recession relief. Currently, only 36 percent of the unemployed are receiving unemployment compensation, compared with 76 percent of the unemployed receiving benefits in 1975, and 67 percent in 1976—2 comparable years in terms of unemployment levels.

As a result of cuts made by the Gramm-Latta reconciliation law, the extended benefits program—designed to provide additional weeks of benefits at times of high unemployment—is now operating in only two States. While up to 65 weeks of unemployment benefits were provided in 1975 and 1976, in most States only 34 to 40 weeks of benefits are now available.

In addition, Federal spending on employment and training programs has been reduced from $10.3 billion in fiscal year 1980 to $5.2 billion in fiscal year 1983. If the House accepts the fiscal year 1984 Labor-HHS-Education Appropriations Act, H.R. 3913, without amendment, funding for employment and training will be further cut to $3.6 billion in fiscal year 1984.

In the absence of a recovery which creates new jobs for the millions of unemployed, the Congress must enact an interim measure to provide jobs. This bill will do just that.

During the debate on this bill in subcommittee and full committee a number of amendments that I offered were adopted and are in the final bill. In response to the valid criticism of previous jobs bills that women and other traditionally underrepresented groups do not receive their fair share of jobs under these bills, I authored an amendment to correct this problem (section 103(f)). Specifically, it requires the State employment service to certify and refer such eligible applicants. The committee report (House Report 92-199) states:

The committee bill also directs the State employment service agency to be responsible in certifying and referring eligible participants for insuring equal employment opportunities and the full participation of traditionally underrepresented groups including women and racial and ethnic minorities in such employment. It is not the committee's intent to establish a system of quotas or to place burdensome and costly compliance mandates upon the State employment service agency. However, as the primary certifying agency under this act, it is important for the employment service to be sensitive to the needs of traditionally underrepresented groups and to exercise fairness in fulfilling its certification and referral responsibilities.

I also offered an amendment that allows projects to be conducted on private lands as long as they provide "a documented public benefit and reimbursement will be provided to the recipient for that portion of the total costs of the project which does not provide a public benefit" (section 201(d)).

I was also responsible for an amendment which further targets the 5-percent set-aside for State job programs (section 241(c)). Specifically, my amendment requires that States:

Shall give special consideration to the establishment of those programs and activities which will provide job sites: First, within areas in the States in which the rate of unemployment equals or exceeds the national average rate of unemployment; or second, if there are no such areas within the States, within areas in the State in which the rate of unemployment equals or exceeds the average rate of unemployment in the States. In designing projects under this section, the State shall evaluate projects on the basis of the severity and duration of unemployment within localities in the State and the level of need which exists for the activities and services to be provided.

In title III, Mr. KILDEE's amendment to the bill, we achieved a set-aside of one-half of 1 percent to fund projects at Indian tribal schools (sections 302(a)(1)(B) and 301(d)(1-4)).

I urge my colleagues to vote for jobs for Americans and to support this bill.

□ 1600

According to the Bureau of Labor Statistics, there were 1.8 million such discouraged workers in the fourth quarter of 1982, the bottom of the recession. This was by far the highest number recorded since the Bureau of Labor Statistics began publishing these statistics.

I have asked for permission to revise and extend my remarks, and I have what I think are some interesting facts here. They will appear in the RECORD, and I encourage my colleagues and my staff to sort them out when they have a chance.

Mr. Chairman, let me end by again quoting someone out of the administration of Franklin Roosevelt and the New Deal. One would think that this argument was behind us now. At that time there was some objection to Roosevelt's public works efforts, and the suggestion was made to the President that his programs were not workable enough because the jobs were short term.

The CHAIRMAN pro tempore. The time of the gentleman from Montana (Mr. WILLIAMS) has expired.

Mr. HAWKINS. Mr. Chairman, I yield 30 additional seconds to the gentleman from Montana (Mr. WILLIAMS).

Mr. WILLIAMS of Montana. Mr. Chairman, to continue, someone said to the President, "Mr. President, the jobs that you are creating are short term," and FDR said, "My friend, people eat in the short term."

These people want to work so that they can feed their families, and there will be millions of people who will work under this bill. The question is whether or not this House has the will to provide the funds so that those people can come off of the end of that soup line and get on the end of that shovel.

Mr. Chairman, I thank the gentleman from California (Mr. HAWKINS) for yielding this time to me, and I thank the House for giving me its attention.

Mr. JEFFORDS. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. GEKAS).

Mr. GEKAS. Mr. Chairman, I was a little bit surprised when I saw my colleagues, the gentleman from Maryland and the gentleman from Pennsylvania, rise in such indignation about what we were trying to get across about the difference in the types of jobs.

There is no one in this Chamber, I submit, who would say, "We don't want our people to get jobs." I want every American to have a fulfilling job. That is your goal, and that is my goal.

What I simply said was that my understanding in talking with unemployed is, of course, that they would take any job—any job, just like the gentleman from Maryland said—but when we ask them about what the Government's role is in this, in trying to get them jobs, I say to the Members that they say they would prefer a job that had long-term implications, productivity, a purpose to it, and a future to it. They would prefer that type of job to any kind of job if they had their preference. And their instructions to us, to the gentleman from Maryland, to the gentleman from Pennsylvania, and to every other Member, whether we hear those instructions or not, are: "Create the atmosphere to do what you can as government officials to prepare an environment where there will be full-productivity, full-term, long-term jobs or futuristic jobs."

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. Let me finish my statement.

Mr. Chairman, in the meantime, let us do what we can to give them any kind of job, sweeping the streets, cleaning the highways and so forth. Let us do what we can on that.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. But they want those long-term jobs.

The difference in the approaches, I say to the Members, is that while Members say, "Yes, let's give them that temporary job that they want so desperately now," they should then say, "But let's work together with management, with labor, and wherever the Government stimulus will be to create that kind of environment that will insure the full productivity and permanent future jobs that will stabilize the economy, not exacerbate it with government giveaway jobs."

That is the only point I make, and what we are saying is that the previous public works jobs bill, or whatever it was, did take a measured step toward giving them any kind of job, as the gentleman from Maryland has said.

Mr. MITCHELL. Mr. Chairman, does the gentleman want to yield now?

Mr. GEKAS. What we want to do now is to say, "Don't make that deficit situation worse so that we can allow the productive portion of our American establishment and work environment have the full sway to make those jobs fully producing."

Mr. GAYDOS. Mr. Chairman, will my colleague, the gentleman from Pennsylvania, yield?

Mr. GEKAS. I just want to set the record straight with the gentleman. If he rises in indignation and indicates that I do not want to see my people work, the gentleman is sadly mistaken, and he misses the whole point and resorts to indignation of rhetoric instead of trying to listen and work through this with us and listen to what we want to say.

Mr. MITCHELL. Again, Mr. Chairman, I would ask the gentleman, will he yield to me?

Mr. GAYDOS. Mr. Chairman, will the gentleman yield to me?

Mr. MITCHELL. Or would the Chairman give me some time?

Mr. GEKAS. I yield to the gentleman from Maryland. He sprang up first.

Mr. MITCHELL. That is right, I sprang up. The gentleman is right, I sprang up in righteous indignation.

The gentleman is talking about a deficit. I do not want a deficit either, but that does not mean a darned thing to my people. I say to the gentleman, "You kept us out of work in good times and bad."

Mr. GEKAS. Mr. Chairman——

Mr. MITCHELL. Mr. Chairman, the gentleman yielded to me, and let me keep going.

Mr. GEKAS. The gentleman is indulging in rhetoric again.

Mr. MITCHELL. I am talking about fact, and if the gentleman looks at the record, he will see that we have been disproportionately unemployed in the black community, in black America, since the end of World War II, and that has been when we had a little deficit, a big deficit, good times, or bad times. It has been the same.

Point No. 2: One reason why we have been so disproportionately unemployed is, I say to the gentleman, "I do not see you guys on that side rising in anger when there is still discrimination at the hiring gates, even though you have a title 7."

I ask the gentleman, "Why don't you talk about that some time?" If that is rhetoric, those are still the facts, I say to the gentleman.

Mr. GEKAS. Mr. Chairman, I will take my time back.

That has nothing to do with what we are talking about. The gentleman may be right, and I have joined in a hundred different causes having to do with discrimination. That has nothing to do with what I am talking about, and I want to keep it in the context of the difference between permanent types of jobs and temporary types of Government-created jobs that do not satisfy our hunger for full employment.

Mr. GAYDOS. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield to the gentleman from Pennsylvania.

Mr. GAYDOS. Mr. Chairman, I would like to ask my colleague a question, if I may.

How are we going to provide long-term, stable jobs, which is what I think the gentleman is referring to, and stay away from the short-term jobs? How are we going to create the long-term jobs when we cannot even get together to create these little short-term jobs because we run into brick walls? We have no job program in place now.

Mr. GEKAS. Then, Mr. Chairman, I say that we worked futilely last spring to try to do something in the same kind of debate with the same kind of words the distinguished gentleman from Pennsylvania is using now.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. GEKAS) has again expired.

Mr. JEFFORDS. Mr. Chairman, I yield 2 additional minutes to the gentleman from Pennsylvania (Mr. GEKAS).

Mr. GAYDOS. Mr. Chairman, if the gentleman will yield, I believe I have raised a logical question.

Mr. GEKAS. Mr. Chairman, this is like deja vu. Last spring the gentleman from Pennsylvania joined with others in this Chamber to speak on the same subject, with the same level of rhetoric, with the same concerns, and with the same sense of responsibility.

Mr. GAYDOS. And we were emotional then, too, were we not?

Mr. GEKAS. That debate was on the bill that was passed in the spring, and that was to advance public works to create jobs. It was a jobs bill, no matter what everybody else said, because the actual intent was to create these temporary jobs. And I say that is well and good. We have to do that from time to time. It is the business of Government to stimulate the work force through those kinds of things. That is part of our life and times, and I am willing to submit to that.

All I am saying is that if we ask someone in the unemployment lines, "Which kind of job would you prefer? Would you prefer a long-term job or one the Government has created for you?" Nine chances out of ten, they will say to us, if we put it to them properly, that they want the kind that means full productivity, long-term employment, the kind that they can look to with some kind of predictability and stability, rather than a handout job.

That is all I am saying. It is not that the handout jobs and the short-term jobs are not important, but they have to be placed in their proper context so we can work together while we are working on this long-term program to stimulate productivity. And that goes along with this one strong element: Do not increase that deficit.

Mr. GAYDOS. Mr. Chairman, if the gentleman will yield on that point, my colleague raises the point of the deficit when it pertains to or is connected directly or indirectly with jobs.

Is it not unfair to raise that point when many of our colleagues—and I am not going to include my colleague, the gentleman from Pennsylvania—do not raise the point of the deficit when they are talking about foreign aid and when they are talking about a multitude of other expenditures? When it comes to jobs, they always raise the point about the deficit, but when it comes to other things, no one raises the question of the deficit.

Mr. GEKAS. Mr. Chairman, I submit that the gentleman's memory is short.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. GEKAS) has again expired.

Mr. JEFFORDS. Mr. Chairman, I yield 1 additional minute to the gentleman from Pennsylvania (Mr. GEKAS).

Mr. GEKAS. Mr. Chairman, I just finished saying to the gentleman from Pennsylvania that in the spring, when we had a large deficit, this House approved, in the face of that deficit, just what the gentleman is asking that this Congress do now. This House passed a public works advancement jobs bill.

□ 1610

So that the allegation of the gentleman that we did not keep the deficit in mind when we passed these bills or legislation does not pertain, because in the face of that deficit we did pass that advanced public works jobs bill. We did that and the gentleman wants to do it again and again.

I am saying, stop and look what we are doing. While we did that in the spring and we are going to do other little things to try to help in the short term, we have got to turn our full attention to narrowing the deficit, to not exacerbating it at least, so that we can create that atmosphere for full productivity jobs.

Mr. GAYDOS. If my colleague will yield further, I know it is the gentleman's time, but permit me one observation. If the gentleman is talking about deficits as such, I can take two parts of the argument.

No. 1, if we are talking about creating a deficit and if the gentleman is correct, and I am not conceding that point, I say so be it; but I think the other point, jobs do not create deficits. They help to uncreate them.

Mr. HAWKINS. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. OWENS).

Mr. LEVIN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. OWENS. I yield to my colleague, the gentleman from Michigan.

Mr LEVIN of Michigan. Mr. Chairman, I rise in strong support of this bill. There are several points I would like to make in behalf of our country's need for a well crafted, carefully targeted jobs program, which this legislation would create.

First, high levels of unemployment will not go away soon. Even the Reagan administration forcasts that unemployment will still be at 8.7 percent by the end of 1984. That unemployment rate is higher than the rate recorded at any time between 1942 and 1980, with the exception of the 8 worst months of the 1974-75 recession. The administration does not project unemployment going below 7 percent until 1987. The administration does not foresee unemployment receding to the 5.8-percent rate of 1979 until the end

of this decade, at the earliest. In my home State of Michigan, the unemployment rate in August actually rose by more than 1 percent, from 13.1 percent to 14.3 percent. The rise meant there were 47,000 more jobless workers in the State, bringing the total to 616,000.

Second, there will be no easy, magical solutions to this problem. As a front-page article in this past Sunday's New York Times pointed out, high technology is no jobs panacea.

Third, the problem of long-term unemployment has been more severe in this recession than at any time since the Great Depression. In June of this year the average unemployed worker had been jobless for 22 weeks—more than 5 months. By comparison, the average length of unemployment at the start of the the recession in July 1981 was 14 weeks, and the average in 1979 was 10.8 weeks, approximately half the current figure.

Fourth and most tragically, our social safety net is breaking down. Currently, only 36 percent of the unemployed are receiving unemployment compensation, compared to 76 percent during the 1975 recession. What is happening to those people no longer receiving benefits? Many not only exhaust their unemployment insurance but their life savings as well. Long-term unemployment often has serious physical and mental health side effects and areas of high unemployment report dramatic increases in child abuse and family breakup.

The question we have to ask ourselves—all of us—is what are we going to do about this?

I would argue tht the best alternative is a job.

The cost of this jobs program will be significantly offset by reductions in Federal payments to the jobless, and increased Federal revenues in 1984 and 1985 from taxes paid by the newly reemployed workers.

I have studied the bill under consideration carefully, and I am convinced that it is the most carefully thought out and crafted jobs bill ever produced by the Congress. The bill targets aid to those most in need and to areas of the country most severely hit by unemployment. The bill specifies the community improvement projects eligible for funding, and contains tough, enforceable antisubstitution provisions to prevent displacement of regular workers, and severe financial penalties for any community abusing Federal job funds.

In his election campaign in 1980, President Reagan decried the 7-percent unemployment rate as unacceptable. Well it looks like an unemployment rate above 7 percent will be with us for many years. That represents a personal crisis for millions of Americans and a crisis of conscience for all of us as a nation. I urge my colleagues to support this legislation as an important step toward meeting that crisis.

Mr. OWENS. Mr. Chairman, I think what a lot of the previous debate shows is that we have not recognized that a very new phenomenon has emerged and that economic recovery has less and less to do with unemployment or employment. The correlation between economic recovery and employment is less and less all the time. That is true now and I think it is going to be more so in the future.

While the economy goes forward, all the other indicators are positive and they go forward, there is no decrease in unemployment which is corresponding. There is no increase in employment which is corresponding to the economy surging forward.

We have a situation where all indicators may go up, but the job market still goes down. We should come to grips with that fact.

There are new forces at work in our internationally oriented economy. These new forces have erased the conventional cause and effect relationship which once existed between the general economic performance and the availability of jobs.

We take certain steps in order to be competitive in the international world. We have to automate as rapidly as possible. We have to move in order to increase profitability and keep up with the Japanese or the Germans. We move factories around. We do things which may increase the economic performance and it results in greater profits, but it does not necessarily have anything to do with increasing the number of jobs.

The performance of the economy is almost irrelevant in this discussion. The performance of the economy from now on should be separated and we should have separate discussions which deal separately from the need to provide jobs.

Unemployment is a crisis which stands isolated by itself. Unemployment is a separate disease which must be treated regardless of the health of the larger economic body.

The goal of increased employment itself, by itself is a worthwhile goal.

Who among us really wants to deny jobs to 500,000 people. This bill only proposes to give jobs to 500,000 people. There are 10.7 million people unemployed. All we are proposing is to help 500,000.

Who here would propose or would like to contend that the economic recovery is going to take care of that 10.7 million people, even if it is successful. Even if the economic recovery does go forward and is successful, do you propose that it is going to employ all those 10.7 million people, or will it employ even a million more to reduce the unemployment from 10.7 million to 9.7 million, or will it employ 2 million?

You know, how far down do you think we are going to get unemployment, assuming that the economic recovery is successful and continues to go forward?

I do not think any of us will argue, nobody here will argue that it is going to employ everybody and the 500,000 we are talking about here will not need those jobs. The 500,000 will be taken care of, in addition to the rest of the 10.7 million.

This is a small step. It puts food on the table immediately. It takes care of families immediately. It provides dignity to men out of work immediately and I think the American taxpayer would support it if we would only give them a chance.

In opinion poll after opinion poll they indicate that jobs are a high priority. Why is it that this House and the Members of this Congress find it so difficult to understand that jobs are a high priority?

The American taxpayer will get better value for his dollar with this legislation than will be achieved with any other legislation which we have passed this year, any other expenditures we have made this year. We get better value.

Consider for a moment the fact that once an amendment is offered and accepted, and I think the chairman of the committee, the author of the bill, is prepared to make an amendment which will reduce the expenditure related to this bill to $3.5 billion. Now, $3.5 billion happens to be almost exactly the same cost as one aircraft carrier. One aircraft carrier costs $3.5 billion. For one aircraft carrier, for the price of one aircraft carrier, we can create 500,000 jobs.

Who here wants to discuss the dificit in terms of these 500,000 jobs?

The CHAIRMAN pro tempore. The time of the gentleman from New York has expired.

Mr. HAWKINS. Mr. Chairman, I yield 1 additional minute to the gentleman from New York.

Mr. OWENS. For the cost of one aircraft carrier, we deny 500,000 people a job. There is no real contradiction here or conflict with the proponents who say that the economic recovery is the automatic solution. If the economic recovery is the automatic solution, the bill is phased or structured so that it will be phased out if the economic recovery is successful.

Again I say that the economic recovery has nothing to do with the decrease in unemployment. These are human beings who deserve the support of their leaders. We are their leaders. We cannot afford to make a mess, to ruin the economy and then expect these people to survive. Everybody has a right to have a job, to be able to look to their leaders for means of survival. Our total social structure

is based on people yielding certain of their rights in exchange for what they get from the society. Our society should at least provide a job opportunity to every individual who wants to work.

Mr. JEFFORDS. Mr. Chairman, I yield 6 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Chairman, I would like to begin my remarks today, if I can, in a fashion that I think is only proper for those of us who have sat on the Subcommittee on Employment Opportunities, which has heard all the debate regarding this bill. Regardless whether one is for or against this particular legislation, and reasonable men and women can certainly differ on this particular issue, I think we would all be remiss if we did not give a special debt of gratitude to the distinguished chairman of our subcommittee, the gentleman from California (Mr. HAWKINS) and the ranking member, the gentleman from Vermont (Mr. JEFFORDS) for the long hours that they have put into this particular legislation.

As a member of that subcommittee, I have sat through not hours, but days and days of hearings on this particular issue as we have brought in all kinds of economists and individuals from across this country to discuss really what is going on in America industrially and economically and what ought to be done to deal with this problem.

I would suggest that there is not a Member among us that is not concerned about the unemployment in this country, and if there is one, they ought not to be a Member of this Chamber, I say quite simply and quite frankly; but as we go through all those hearings and as we have heard the different testimony that has occurred, I think it is fair to say that we really came to two conclusions.

The first one was brought forth most eloquently by that MIT economist, Dr. Richard Thurow, who said,

> The fact is, we are not in an American economic shutdown, we are in a worldwide economic shutdown.

No longer does the American economy exist simply by itself, irrelevent or not affected by what happens worldwide, and I could go into the problems with Japan, England, Germany and all of our Western industrialized countries, what they are feeling.

The second thing is I think all too common to all Americans. It has been brought forward by John Nesbitt in his book, "Megatrons." It has been brought forward by Lane Kirkland, the head of the AFL-CIO. We are in a changing industrial base in this country. Lane Kirkland of the AFL-CIO said not too long ago that 25 percent of the people who are unemployed in this country will never get their jobs back, regardless of what happens to the economy, because unfortunately that 25 percent has been replaced by technology.

□ 1620

So we need to begin this discussion today and for the next couple of days as we debate this legislation, exactly where are we and where are we trying to go, and how best can we put together some kind of economic program, jobs policy, training program, that will get us where we want to go.

And I think that is how reasonable men and women can differ on the merits or demerits of H.R. 1036 that is in front of us.

I happen to believe this will not solve the problem. What my distinguished colleague on the committee, Mr. OWENS, just said, is just exactly right, 500,000 jobs with 10.7 million people unemployed does not solve the problem. And we ought not try to tell the American people that it is going to. Worst of all, we ought not to try to tell the unemployed that it is going to do that for them, because too often the reason that the Congress suffers credibility in this country is we give people impressions we are going to do things we really cannot do or are not able to do.

We are going to spend $5 billion, $3.5 billion, if the amendment is adopted, and this combined with a jobs bill of $4.6 billion that we passed earlier will give us an expenditure of about $8 billion in this area.

The two of them will employ about 800,000 people in temporary jobs. The problem is what do we do with the other 10 million people unemployed in this country and what do we do with the 800,000 people once their year is up.

It seems to me when we talk about some kind of an industrial jobs policy in this country, that there are a couple of things we need to keep in mind. Most important is, as you talk to every individual and every labor union, every unemployment line in this country, they do not want a permanent public sector job. The fact of the matter is most of those people do not like us in Government very well. What they want is a permanent private sector job, and exactly how do we get that? The way we get that is from training, and I stand here to tell you I will vote for more job training funds, and we are going to in an appropriation bill later this week appropriate about $6.4 billion for the Job Training Partnership Act, going to increase funding for vocational adult education to over $800 million. And I think that kind of funding is going to be absolutely necessary.

But we need to ask ourselves today as we debate this bill in general debate before we get to the amendments, regardless of the economic policy, and I think we can debate that pros and cons as it is affecting the deficit, but in terms of putting people back to work in America how do you do it.

First and foremost you have to expend the money on training. The average person who graduates from high school today is going to have four different careers in their lifetime. We are going to have to put into place in this country the most massive adult training and retraining program we can ever imagine. And is it going to cost money? Yes, it is going to cost a lot of money. It is going to cost the Federal Government money. We better be ready to pay for that.

In addition, beyond training, the second most preferable way to deal with people in putting them to work is in some kind of a public works project where you have something to show for it. That is what the $4.6 billion bipartisan public works program was last spring. That is what the Public Works and Transportation Committee is calling for in their $3.6 billion phase II jobs bill. That ought to be our second preference.

Only at the end should we look and even consider something like we are looking at today which is some type of temporary assistance with no training and no future. That my friends by itself is the greatest disservice, not service, we can give to 10 to 11 million unemployed in this country.

I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I yield 2 minutes to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, which would create jobs for individuals who have been unemployed 15 weeks or more, with preference going to unemployment insurance exhaustees. This bill represents the second portion of a plan to stabilize the economy and to revitalize the employment sector by providing opportunities in activities which benefit the community as well as the individual.

Mr. Chairman, no survey or poll is necessary to tell us that one of the most serious problems in the minds of Americans today is unemployment.

We all know the numbers, and a recapitulation of the statistics at this point would be almost redundant. We all are too well aware that unemployment has climbed to a heartbreaking rate of 9.4 percent and that more than 10 million people are officially counted as jobless—and more than 4 million of them have been out of work for more than 15 weeks.

While the average unemployment rate is unacceptably high, it is a poor indication of the true status of certain groups, such as blacks, Hispanics, and youth. August figures show that 790,000 Hispanics, or 12.9 percent out of a total work force of 6,124,000 are out of work, as are 20 percent of

blacks. Unemployment figures in Puerto Rico are at 24.1 percent, and have not been below 20 percent since 1981. Almost one-fourth of teenagers searching for employment have met with no success. In every case, these figures indicate a worsened status for each subgroup over last month. And we must remember that these figures do not count those who have decided to return to school, those who have accepted part-time jobs earning abysmally low salaries, or those who have simply given up hope and have stopped looking. Just as the construction industry is beginning to move again here on the mainland, Puerto Rico statistics show that construction suffered the largest loss in job slots during August—jobs affecting mostly males ages 25 to 44. Our unemployment is hitting the major family breadwinner in his prime years.

The Community Renewal Employment Act can help to reverse the trend America's labor force is now experiencing. Not only would H.R. 1036 provide employment to those individuals who need it most urgently, it would insure that those jobs are designed by local governments to improve community resources, such as in the repair and conservation of public buildings, expansion of day care centers, services to the handicapped, rebuilding of educational facilities, and in disaster relief. Funds would flow to cities with populations of 50,000 or more, and would be targeted so that areas of highest unemployment would receive the largest share of funds.

Mr. Chairman, I would also like to point out that the Education and Labor Committee worked diligently to insure that this bill would not fall to the same criticisms as did the public service employment program under CETA. I believe we have crafted a program which escapes the major CETA pitfalls—jobs are funded for a maximum of 52 weeks, and provisions are included to assist participants to obtain unsubsidized employment. Only individuals with demonstrated inability to secure employment in the regular economy are eligible for jobs under this act, and they must have been unemployed for at least 15 weeks. Funding for local projects must be used within 105 days of receipt, to insure prompt action to meet current, not past, community needs.

Jobs may also be filled through contract with private employers if such contracting is the customary procedure for the activity to be funded, such as repair or renovation of public facilities.

Substitution of funds or displacement of regular workers is virtually eliminated by the inclusion of the toughest antisubstitution provisions in any Federal grant program, including an automatic triggering of an investigation by the Inspector General where the regular work force declines more than 5 percent.

H.R. 1036 is a temporary measure, designed to phase out as the number of individuals unemployed 15 weeks or more declines.

While the current authorization level would be $5 billion, an amendment will be offered by Subcommittee Chairman AUGUSTUS HAWKINS to reduce authorizations for fiscal year 1984 to $3.5 billion. This revised figure would be in accordance with the House and Senate passed fiscal year 1984 budget resolution, and would not be a budget buster.

I expect that Puerto Rico's unemployed would benefit substantially from H.R. 1036, given the funding due the island under current formula allotments. Preliminary estimates show that more than $175 million in sorely needed funds would reach the 12 eligible communities in Puerto Rico, and the elementary, secondary, and postsecondary institutions throughout the island.

Clearly, the private sector is not fully prepared to absorb the large unemployed work force which so desperately needs an opportunity. In the context of an economic situation where almost 1 of every 10 adults is in search of work, sole dependence on the private sector is not feasible.

I urge my colleagues to strongly support H.R. 1036, which would provide Federal support for employment in areas of long-term unemployment. I believe that it is only through this type of intervention that we can ameliorate the present day economic situation, particularly in areas which are hardest hit, such as Puerto Rico.

Mr. JEFFORDS. Mr. Chairman, I yield myself such time as I may consume.

I do this for a relevant but not exactly relevant issue which I would like to bring to the attention of the chairman and also of this body.

At recent hearings which we held in Vermont regarding social security disability problems, it came to my attention that we were creating a class of people who are not eligible for assistance. Under the review process, a number of people are being removed from social security disability rolls. When they then take the time and effort to go and seek assistance or training, they find that because of their disabilities they are ineligible for training. This means that they are put in a real catch-22 circumstance of being told by the Goverment that they are ready, able to work, and yet going to other agencies to ask for help in being employed, to be able to find gainful work, and find they are too disabled to be eligible for training.

Though this is not particularly relevant to this bill, I would just raise it to a sense of visibility such that when we reconsider the Joint Training Partnership Act or Vocational Rehabilitation Act that we take into consideration that these people ought to be given an opportunity to be training for work and that we ought to do whatever is possible to make sure that we are not creating what is a rather absurd situation under our laws.

I just wanted to raise that to the body's attention so that perhaps sometime in the future we may be able to make some relevant amendment to some bill. I would just ask the chairman of the committee, make him aware of that and hope that at some point we can try to take care of some of these problems as we go into relevant legislation.

Mr. HAWKINS. The chairman of the committee is fully aware of it. I wish to commend the gentleman for calling it to our attention today. I think we can certainly assure the gentleman that the committee has a deep commitment to do something about the problem, and in conjunction with the ranking minority member we will certainly plan early hearings and we will certainly move forward on doing whatever is necessary.

It was, I think, the intent of the committee that JTPA would be used to help these people. If that is not being accomplished, I think certainly the committee will take every effort, make every effort to see that it is done.

Mr. JEFFORDS. I thank the gentleman.

Mr. Chairman, I have no other requests for time, and I retain the balance of my time at this time.

Mr. HAWKINS. Mr. Chairman, I yield 2½ minutes to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL. Mr. Chairman, I lost my temper on the floor a few minutes ago and I make no apology for doing it. I think it time we get angry about all of these arguments against human beings, against the general welfare of our citizens.

I for one have been in this Congress for 14 years and have seen and heard the same old hoary agruments time and time again from certain Members on that side who, when it comes to social programs, when it comes to the welfare of human beings, always have some tortured rationale as to why it cannot be done.

□ 1630

Where were these voices when we talked about jobs being exported out of this country by the big corporations? When we raised that issue those on that side, some of them said, well, that was a free enterprise system, but it was creating more employment for us.

Where were those voices that raised those hoary arguments again today when we said look, more and more

spare parts are being imported into this country and you are putting our people out of work?

Nobody said anything. That is the free enterprise system.

Bethlehem Steel in my district has laid off because this Congress and this Government permitted the Japanese to dump steel and force my people out of work.

Earlier today I took a 1-minute speech. Better than 10,000 people in my State of Maryland are going to lose their extended unemployment compensation benefits and there is no money left in the State for them.

What are we going to do with those people? Wait for this so-called economic recovery to take place? It has not happened in my district as yet.

I am sorry. I get angry and I am not sorry that I got angry about it. If you had to live every day like I live, hearing the plaintive cries of desperation from people, you would be angry too, people who just want to work.

Nobody raised any voices on that side about $187 billion for the military budget, and 10 B-1 bombers at a half billion dollars each. There was no argument about that from some on that side.

I am sorry the gentleman from Pennsylvania (Mr. WALKER) is not here. He was quoting from the Heritage Foundation and that is one of the most conservative pseudoscientific publications that I know about. They make the facts to fit their rationale.

The real thing we deal with are human beings and real human beings are out there in the street, hungry and desperate and wanting to maintain some dignity.

No, it is not going to employ everybody, only half a million people. But if it employed 50,000 people, is that not better than none at all?

I am sick of it. Let us vote for a decent bill and put some people to work.

Mr. HAWKINS. Mr. Chairman, I yield 3 minutes to the gentleman from the District of Columbia (Mr. FAUNTROY).

Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 1036, a bill that is quite familiar to some 100,000 American citizens who gathered here in Washington now 3 weeks ago to celebrate the 20th anniversary of the march on Washington, this time for jobs, for peace, and for freedom.

They assembled in the best tradition of the first amendment of these United States and its Constitution.

Our forefathers were blessed with wisdom when in the Constitution they recognized there would come times when those elected to make public policy would be out of touch with where the people are and so in addition to guaranteeing the right of people to vote and elect public officials they guaranteed the right of people to peacefully assemble to petition their Government for redress of grievances.

So they came, 500,000 strong; they came by bus, and by bike, and by airplane, and by wheelchairs with the handicapped to say: "We want jobs, we want peace, and we want freedom." And they came because they feared that our public officials are not aware of the fact that 8 months into the so-called recovery we still have 9.5-percent unemployment, 18 million people out of work, and that is the highest unemployment since the depression.

They came recognizing that a bill to provide jobs for 500,000 of them, not the 2.5 million who have been out of work for 27 weeks, nor even the 1.4 million who have been out of work for 1 year, but jobs for a paltry 500,000, and they said it because they have seen as we have seen.

I do not know to whom some of these Members are talking. They have seen people who have been out of work, who no longer have unemployment compensation, whose food stamps have been cut by some $7 billion over this 4-year period, whose medicaid has been cut $3.9 billion, whose AFDC has been cut by some $7 billion.

So they came, nearly half a million people, because they are concerned about what this long-term unemployment is going to do to people. They are concerned about the nervous breakdowns, the wife beatings, the child abuse, the drunkenness. So they are saying do something.

We have said this is not a panacea, not an ideal bill. It is simply a necessary first step for those who have been the most hurt by the continued long-term unemployment that they are experiencing.

Then there are some saying that this will increase the deficit. The fact is that the deficit will be enhanced. We will reduce the deficit by $1.5 billion to $1.8 billion as a result of reduced outlays in unemployment compensation and other things, and as a result of the increased tax revenues.

So we are going to do good with this bill and I hope those of us who have been concerned about their constituents who want jobs will recognize this necessary first step is indeed one that the Nation must take by passing H.R. 1036.

Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act, legislation which would authorize a job-creation program providing public jobs for the long-term unemployed in community improvement projects and repair of educational facilities.

A little over 3 weeks ago, on August 27, 1983, nearly 500,000 citizens assembled before the likeness of Abraham Lincoln to urge our Nation to adopt 14 pieces of legislation with a prime focus on H.R. 1036, the Community Renewal Act.

The 500,000 people participating in the March on Washington 1983 for jobs, peace, and freedom were marching not only to commemorate the march on Washington of 1963, 20 years before, but in support of legislation such as H.R. 1036 and the 13 other pieces of legislation on which the march of 1983 was sharply focused. Though neither ideal nor panacean, the passage of these legislative initiatives would be important first steps in reviving Dr. Martin Luther King, Jr.'s, dream of jobs, peace, and freedom for all American.

H.R. 1036 is a prime focus of the New Coalition of Conscience that developed in the process of organizing the 1983 march on Washington. The New Coalition of Conscience is focused on this legislation because our Nation is still in the midst of the crisis of unemployment. Over 10 million Americans are without jobs and the overall unemployment rate is 9.5 percent. The average length of unemployment is now 19.9 weeks and over 4 million of the 10 million unemployed have been out of work 15 weeks or longer. Unemployment is particularly severe among women and minority groups. This legislation would guarantee jobs for many women, minorities, and youth groups plagued most often by structural unemployment and the economic situation confronting our Nation and the world.

The New Coalition of Conscience recognizes that this legislation with the committee amendment will be a positive first step in addressing the human catastrophe of unemployment by creating 500,000 new jobs. The coalition is also mindful that this legislation would help to meet another vital national need. The Congressional Budget Office has estimated that an additional $17 billion a year is needed between now and 1990 to repair the Nation's crumbling public infrastructure. Local officials also report a severe lack of people providing crucial human services. Only 43 percent of the demand for services in areas of basic human needs such as food and shelter are being met; only 36 percent of the eligible population is receiving public health services; and only 14 percent of all eligible persons are receiving child day-care services. In my own district, Washington, D.C., where the unemployment rate is above 11 percent, many of my constituents go without the vitally needed services cited above.

The New Coalition of Conscience, made up of 715 national organizations and 352 locally based organizations drawn from civil rights, labor, religious, women's rights, youth, environmental, and peace organizations, is united in firm support of H.R. 1036 as

a necessary first step in the quest for full employment and jobs for all Americans.

Support of H.R. 1036 would be a positive response to the New Coalition of Conscience of citizens which 3½ weeks ago peacefully petitioned our Government under first amendment provisions urging us to pass this legislation.

I urge my colleagues to vote yes on H.R. 1036.

Mr. HAWKINS. Mr. Chairman, at this time I would like to indicate that as the manager on this side it is our intent for my next speaker to complete the speakers on this side participating in the general debate.

It is further our intent that we will take up one amendment which I have discussed with the minority, which is noncontroversial. It is a committee amendment with respect to the funding.

After the completion of that amendment, it is the intent to rise.

At this time I yield 5 minutes to the distinguished gentleman from Pennsylvania (Mr. GAYDOS).

Mr. GAYDOS. I want to thank my chairman sincerely for allowing me this additional time. I think it is important at this time to remind my colleagues that this bill, as distinguished from one of our earlier bills, the accelerated public works program wherein aid to school districts was exclusively and pointedly prohibited, that this bill will permit repair to school buildings.

If most congressional districts are like mine, and if my colleagues, when they went home, did have some public workshops, and I am sure they did, they would be in full accord with my observations that this is a vital necessity in this bill.

School districts are under a terrible burden. The Federal Government in our various programs to elementary and secondary education have deaccelerated, pointedly deaccelerated funds that are available, and school buildings throughout all of our thousands of districts in this country are in dire need of repair.

Unemployed people cannot pay property taxes and particularly school taxes.

So that is a very vital element to not overlook when considering this bill.

Before yielding to my colleague who is well versed in school matters for all of his political career, my colleague that serves on the committee from Illinois (Mr. SIMON), let me make this concluding observation.

In my area we had 45,000 steelworkers working prior to the catastrophe that has befallen us these last 2 to 3 years. We now have roughly half, 20,000, that are working, and most of those part time.

That, to me, is a very, very critical situation. I want to close, before I yield, by again referring to the headlines, and maybe some of my colleagues did not have an opportunity to hear it, or maybe they missed it, but the headlines in the Pittsburgh Post Gazette again very emphatically said this morning 5,000 not blue collars, not part-time underemployed people, but 5,000 white-collar workers are going to be laid off by United States Steel in the steel valley which I represent.

I think that is significant, and I would like my colleagues to bear that in mind.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to my colleague from Illinois.

Mr. SIMON. I thank my colleague from Pennsylvania.

I just want to add a word or two and ask my colleague then to yield to our colleague from Washington.

There are those who say let the free market system work these problems out. I am for the free market system working where it can to solve problems. But the free market system needs a little lift.

That argument, "Let the free market system work" was the argument that was used against social security and against every positive step we have made in this country.

□ 1640

The reality is we have to permit the people of America to be productive. When they are not productive, it is not good for the country, it is not good for those people.

This is one small step in the right direction.

I thank my colleague (Mr. GAYDOS) for yielding.

Mr. LOWRY of Washington. Mr. Chairman, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. I thank my colleague for yielding to me.

Mr. Chairman, the defense authorization bill we passed last week was $187.5 billion. But that was only the major chunk of a 1984, $268 billion total defense authorization function. That is $123 billion more than the same function in 1980.

Now, if we can spend $123 billion more in 1984 than we did in 1980 for the defense function, certainly we can spend $3.5 billion for this very important, solid, good legislation.

Mr. Chairman, I rise in continued support of this legislation. I compliment the committee for bringing it here.

Mr. Chairman, I thank my friend (Mr. GAYDOS) for yielding.

Mr. GAYDOS. In conclusion, Mr. Chairman, I would state this bill is a good bill. It is not perfect. It is a bill that may be comparable to the Chinese philosophy that "A thousand-mile journey starts with the first step." Maybe this is a first step.

It is distinguished from other bills that we had passed prior hereto; it is a sensitive bill.

I think it is grossly inadequate insofar as the $3.5 billion price tag on it, which is what it is eventually going to have on it, as I understand.

In my mind, looking at the gravity of the situation, I think it is just a drop in the bucket, so to speak, but something is better than nothing. Maybe, philosophically, we are going to score some points and maybe this is a step in the right direction.

I want to conclude by congratulating the chairman and the committee for the fine job that they have done.

● Mr. RAHALL. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act.

I am especially pleased with this legislation because it places emphasis on providing assistance in the form of employment opportunities for community improvement projects and the repair of educational facilities. This is not make-work. This is needed work, serving the public interest. Of further importance is that these jobs would mostly go to individuals experiencing long-term unemployment.

The long-term unemployed have already used their unemployment insurance. They are the hardest hit by the recession. And do not let anyone fool you. The recesssion is still raging in the hills and hollows of Appalachia. West Virginia has the highest unemployment level in the Nation at 17.4 percent. The national average is only 9.4 percent. All of the eight counties in my congressional district have unemployment levels higher than the national average. Worst yet, half of them have higher levels of unemployment than the West Virginia average. McDowell County is laboring under an unemployment level of 31.6 percent, Wyoming County at 26.5 percent, Logan County at 23.1 percent, and Mingo County at 22.8 percent.

The Community Renewal Employment Act gives priority to individuals who have exhausted or are not eligible for unemployment insurance, have been unemployed longest prior to applying for this program or belong to a household where no other member is employed full time. I commend Chairman PERKINS and his committee for this provision, and for bringing H.R. 1036 to the floor of the House.

This legislation will provide funds to local governments for community improvement activities. These activities include road and bridge repair, renovation of public buildings and improvement of parks and playgrounds. Moreover, funds may also be used to assist in emergency food and shelter programs, public health programs, child care programs, and services for the el-

derly and handicapped. Of the total authorized by this legislation, 80 percent of the funds would be directed to these activities allocated on a distribution formula based on the number of unemployed in an area, the number of unemployed in excess of a 6.5-percent unemployment rate, and the number of unemployed in excess of the national unemployment rate. I expect West Virginia to do quite well under this formula.

The other 20 percent of the funds authorized by this legislation would go to the repair of educational facilities. Of this amount, 75 percent would be directed at providing jobs in the repair of elementary and secondary schools and 25 percent for higher education facilities.

Mr. Chairman, the work provided by this legislation is good, honest work. It serves the public interest. I urge adoption of H.R. 1036.●

● Mr. LAGOMARSINO. Mr. Chairman, it never fails to amaze me how quickly some Members of the other party can change gears. For the past 2 months, all we have been hearing from the other side of the aisle are complaints about high interest rates and how they are going to snuff out the recovery. Then along comes this bill, like some afterthought to the budget resolution, calling for another $3.5 billion in outlays, with absolutely no suggestions as to how to pay for it.

Not only is the timing all wrong for this bill—it comes at the end of a recession rather than in the middle—but the effect will be completely the opposite from what I presume the authors of this legislation want. The effect of this legislation, Mr. Chairman, will be to remove $3.5 billion from the capital formation markets, add $3.5 billion to the Federal deficit, put further upward pressure on interest rates, and increase the difficulty of achieving economic recovery and full employment.

We already have a Federal jobs program in place. We passed it at the beginning of this year and it is doing the job it was intended to do—creating new jobs in the private sector and improving the Nation's infrastructure. This new proposed program, Mr. Chairman, does precisely the opposite. It takes funds from the private market, increases the Federal payroll and budget deficit, and does nothing in the long term for unemployment. When this $3.5 billion runs out, it is gone. And the jobs will be gone with it. The workers will be back out on the street, the recovery will have been delayed, and the sponsors of this bill will be back before us asking for an extension or yet another make work program. That is not the way to solve unemployment.

Mr. Chairman, I urge the Members to take the long view. Do not throw money at this problem—that does not work, especially when you do not have the money to throw. Leave that money in the economy to do the job it is supposed to do—provide funds for capital formation, for payrolls, for new Government receipts as these workers come on line. Do not sabotage the economy at the very point where it is working. What we need is to adequately fund and expand the job training bill we passed last year. That will do the job of helping to create permanent, productive jobs in the private sector. Recognize this bill for the cruel hoax that it is, and vote no.●

● Mr. RAY. Mr. Chairman, I rise in opposition to H.R. 1036, the Community Renewal Employment Act.

Although the sponsors and supporters of this legislation have good intentions in trying to reduce our country's high unemployment, we must begin to understand that more temporary dead-end jobs are not the solution.

Earlier this year, the House passed a jobs bill which provided over $4 billion to create temporary jobs for the unemployed of our Nation. This is $4.1 billion that we did not have in America's bank account and money that will have to be added to our already incredible national debt.

Today, we are considering another jobs bill, which will create still more make-work positions for the jobless. This bill, moreover, will spend another $5 billion which we do not have and will create an entitlement program which will drain our country's coffers for years to come.

The intentions behind this legislation are honorable. We would all like to see the unemployment rate reduced and our country's production increased. However, we cannot continue to use Band-Aids to patch up our country's hurts, when these hurts are growing to the point where major surgery is needed.

This jobs legislation is simply another Band-Aid to hide the worsening problem which our fiscal irresponsibility and increasing budget deficits are causing. It covers the wound, but does nothing to heal it.

It is time we as a Nation, and more immediately, we as Members of this House, begin to work seriously to solve our Nation's economic problems and to curb our rampant spending. This is the only way we will be able to return these unemployed Americans to our work force in productive, necessary roles rather than in temporary dead-end jobs.

Also, I believe we are making a serious error in considering more jobs legislation before we have had time to examine the results of our earlier jobs legislation. All the funds given to the States in that earlier legislation have not been put to work yet, and we have not seriously discussed how that money has been spent or how much more is needed by the individual States. This legislation would simply hand the States more money to make more jobs before an accounting of the earlier effort can be made.

There have been considerable problems in getting these funds to the people which they are supposed to help. The funds have been held up in several States for a variety of reasons: The State legislature had adjourned for the year and could not determine how the funds would be spent; local officials could not agree among themselves on how to use the funds; or simply because the money came as a surprise to the States and they had made no plans in their budget for spending them. Yet, we are discussing sending these States more money when we do not know how effective our previous funds were.

To summarize, I agree with my colleagues who say we must have concern for the unemployed of our country. I am very concerned about their plight and believe we must make every effort to return these people to productive positions.

But we will not do this by creating more temporary jobs. The only way to restore these people to positions which are vital to our country's economy and positions which they can depend on as they look to their future is to work to support and encourage our Nation's recovery. Specifically, we should direct funds to training programs so that American workers whose skills have been made obsolete by the rapidly changing world economy, can be made productive again. Adding another $5 billion to our national debt will endanger our recovery, not help it along.

We must look for solutions that will reach to the core of our problems and solve them, not short-term solutions that will whitewash our rotting economic foundation.

Our national debt is already over $1 trillion. If we continued deficit spending at our current rate, in 40 months our national debt will reach the outrageous total of $2 trillion. The interest on this debt alone will equal our current military budget—$187.5 billion.

Our economy cannot survive with deficit levels this high and the burden of this debt will have to be carried by all American people—including the aged, the ill, the unemployed, and all those on fixed incomes. Therefore, I must oppose H.R. 1036. I believe that a vote against H.R. 1036 is a vote that, in the long run, will be in the best interests of all Americans, including the unemployed.●

● Mr. DOWNEY of New York. Mr. Chairman, our President recently made the comment that the economy is "beginning to sparkle." Well, for the 55,000 unemployed people in my own county of Suffolk, and for millions of Americans nationwide, that sparkle is nothing but cheap tinsel.

American workers have been cheated by the administration's economic policies. Stupendously high rates of unemployment have caused millions of workers to suffer physical and mental illness, emotional distress, the breakup of families, and increased rates of alcoholism and suicide.

Children have suffered. Child abuse, infant mortality, and illness have all tragically increased. And while the state of child health has worsened, parents' ability to pay for doctors and the availability of public health care and nutrition programs has disintegrated.

Youth and minorities have been especially hard hit. Overall youth unemployment has risen to 23.5 percent while youth training and employment programs have been dismantled. Black unemployment rose well above 20 percent and the unemployment rate for black teenagers hovers at a shocking 50 percent.

Dislocated workers are ignored, as is the fact that many of their jobs will not ever come back. Employment in the primary metals industries is 26 percent below its prerecession levels, and more than 40 percent of the UAW members in the agricultural equipment and heavy machinery industries remain laid off. Yet Federal employment and training programs have been halved in the space of 3 years, absorbing 23 percent of the cuts made in human resource programs. Local governments have been abused. Budget cuts have shifted more responsibility onto their shoulders, while public schools, bridges and streets fall apart, and the demand for fire protection, public health services, shelter assistance, and day care is exploding.

The administration's economic policy is a policy of negligence. And it is precisely these neglected areas that H.R. 1036, the Community Renewal Employment Act addresses.

The unemployed will benefit. Five hundred thousand new jobs will be created, skills will be acquired, and new, permanent jobs in the work force will become a reality.

Children will benefit. As their parents go back to work, they will be freed of the emotional and financial strains of unemployment, and public health care, day care, and nutrition services will be expanded.

Minorities and youth will benefit. The emphasis on targeting jobs on these groups, and the work experience they gain, will help them become self-reliant.

Local units of government and all citizens will benefit. Public schools will have their sidewalks and roofs repaired, potholes will be filled in, bridge supports can be replaced, and street signs repaired.

Everyone stands to gain from passage of this bill. Everyone has to lose by continuing to believe in the false sparkle held out at the end of the administration's tunnel. I strongly urge my colleagues to support this bill.●

● Mr. BIAGGI. Mr. Chairman, I rise, as an original cosponsor of this legislation, to lend my strong support for the Community Renewal Employment Act before us today.

Let us not be lulled into a belief that full economic recovery is around the bend. I believe that this legislation is insurance against the possibility that it may not be the recovery that all of us—Democrats and Republicans alike—hope for. Our national priority should continue to remain full employment—for all of those willing and able to work. It should also be employment which is directed toward improving our communities and the services these communities provide. This legislation does just that.

This bill also recognizes the fact that the long-term, hard core unemployed should be the target and the focus of our national reemployment effort. This bill does that by making eligible those individuals who have been unemployed at least 15 out of the last 20 weeks. It places them in community jobs which require no additional training—such as repair of roads and buildings, as well as mass transit systems, improvement of parks and playgrounds, weatherization and other energy conservation activities, and also allows people to be employed in food banks and shelters for the homelesss, senior citizen centers, child care centers and libraries. By targeting jobs in these areas—we attempt to address a dual problem—the lack of services in local communities as a result of budget cuts in programs such as the social services block grant—as well as a lack of jobs as a result of the elimination of CETA and other countercyclical job programs over the past several years.

The bill sees a central role for local units of government—who can best decide how to target resources provided under H.R. 1036. Ninety-three percent of the funds are provided to areas with populations over 50,000. They are distributed directly on the basis of unemployment; one-third allocated according to the number of persons unemployed in the area; one-third on the basis of the amount of unemployed in excess of 6.5 percent and one-third on the number of persons in excess of the national employment rate. The remaining 5 percent is allotted for State-run programs and 2 percent provided for native American units of government.

I also wish to note that the committee remains concerned that the most recent available census data be used in calculating the distribution of funds under this program. The Department of Labor has traditionally been lax in previous Federal job programs in collecting timely unemployment data which has the direct effect of reducing funds to some areas, such as my own city of New York, which would otherwise qualify. I intend to vigorously monitor this area to insure that New York as well as other localities which are suffering under unemployment of excess of the national average will receive their fair share of funds under this legislation.

Of particular concern to me are the provisions in this legislation that will prevent federally funded activities under this bill from supplanting local public-sector jobs. It specifically protects collecting bargaining rights of union employees, requires that any subsidized employment be in projects that would otherwise not be conducting with existing funds, prohibits contracting out work that would normally be done by public employees, establishes a complaint process for alleged substitution and an automatic review process by the inspector general where such alleged activity occurs. It also requires that participants be paid the highest of Federal, State or local minimum wage up to $230 per week or $11,960 annually.

Finally, title III of the bill earmarks 20 percent of the $5 billion authorization under this legislation for the renovation and repair of educational facilities. These funds would not only be used specifically on schools to repair and also weatherize as well as remove architectural barriers. It also allows for unused school buildings to be converted into community centers to provide health and social services to local residents.

Prior to approval of this legislation by the House Education and Labor Committee, I conducted hearings in this specific bill in my home city of New York. We learned that the problem of addressing the deteriorating infrastructure of the older cities of the Northeast can be done through this bill. The estimated costs associated with making our infrastructure up-to-date run into the billions. While H.R. 1036 will not be a cure-all, it certainly will be a needed first step toward eliminating the problemmatic breaking water mains and potholes that continue to plague New York City residents.

I also wish to commend the distinguished chairman of the subcommittee, Hon. GUS HAWKINS whose dedication to full employment in this Nation is exceeded by no one in this body. In 1981, the programs which GUS spearheaded to assist the unemployed in this Nation were wiped out in one budget vote. This legislation is a reasoned response to its predecessor, CETA, where we have built upon the best and tried to address the abuses. I believe that H.R. 1036 is a fiscally responsible piece of legislation as well for its funding is directly tied to unem-

ployment. As the unemployment rate subsides, the funding in the bill is decreased. In addition, we have accommodated this legislation in the first concurrent budget resolution signed by the President earlier this year. Thus, we are not in excess of the spending assumptions that we have bound ourselves to nor are to adding to the projected Federal deficits.

This legislation deserves our support. We cannot expect optimal recovery and leave those who depend upon the bill to be left with no more job opportunities than they had prior to its passage. It is not a long-term solution—but rather a stopgap measure to help those very people who have been hurt by the infamous tear in the so-called safety-net. It is time to stop promising and time to start delivering. Let us pass H.R. 1036, the Community Renewal Employment Act today.●

● Mr. ROYBAL. Mr. Chairman, I rise in support of H.R. 1036, the Community Renewal Employment Act. It is important we pass this measure, if only in recognition of the fact that our economy is by no means recovered and our unemployment rate still hovers at 9.5 percent. With 10.7 million Americans looking for work and another 1.7 million so discouraged that they have stopped looking, we must respond to this desperate need for jobs in our communities. The alternative is the prospect of a core of several million long-term, jobless Americans, unable to provide for themselves or their families.

It is difficult for me to understand how many in power have failed to grasp the seriousness of the above statistics. Families with no means of support have no place to sleep at night. They do not know where their next meal is coming from. Their health problems are increasing, but they have little access to medical care. Millions of other Americans fill our welfare rolls, depend solely on food stamps for their nutritional needs and medicaid for their health problems, and have no job skills or access to employment training. These people will not go away just because others will not acknowledge their existence. What kind of a true recovery can we generate until we begin to respond to the needs of all Americans? And what these particular Americans need most is employment.

This need may translate into expanded job training programs or retraining for workers with obsolete skills. It may mean providing adequate day care facilities so that single parents will be able to seek employment. It may mean intensive programs of industrial development or redevelopment. Or it may take the course of this bill by simply providing what is needed most to those who are most in need.

H.R. 1036 targets funds to areas of high unemployment to provide assistance especially to the long-term unemployed and to young people. The bill is also designed to increase job opportunities for minorities and women, groups that have been little affected by previous jobs actions.

The jobs provided will not be just make-work projects, for that would be no real solution to anyone's problem. Eighty percent of the funds will go toward employment in community improvement projects—our infrastructure that we have discussed so thoroughly during the last few years; our infrastructure that everyone admits is sadly in need of repair. These funds can also be used to assist in providing some of the services so desperately needed by the unemployed.

Twenty percent of these funds will also be targeted for youth employment. One look at the unemployment rate of our young people should be enough to convince us of the desperate need in this area. We certainly don't want the youth of America to become discouraged workers before they are even old enough to enter the labor force full time.

The remaining 20 percent of the funds authorized by this bill will be used for employment in the repair and renovation of educational facilities. With the scarcity of funds designated for education, it is hard to argue with the wisdom of using the money and labor provided for in H.R. 1036 to beef up the facilities. Communities will then be able to free up more of their funds for in-school education projects.

We cannot afford not to pass H.R. 1036. It makes sense for our jobless, it makes sense for our communities, and it makes sense for our taxpayers. If we expect to bring about a true and lasting national recovery, we must respond to the problems which create recession in the first place. I urge all of you to join with me in support of this measure.●

● Mr. SUNIA. Mr. Chairman, as one of the cosponsors of H.R. 1036, I would like to add my support and wholehearted approval for this most important piece of legislation.

Although American Samoa, my district, is small in comparison to the vastness of the United States and the larger more conventional districts represented by the distinguished Members of this House, we still, in Paradise, suffer from high unemployment and are in reality a microcosm of reflecting economic pressures and conditions as they are in the United States. The last figures that I saw indicated that there was an estimated 12 percent, or better, unemployment rate in our islands, by local statistical survey. This is extremely bad when compared to our virtual one-industry economy—tuna fishing and canning. I am very pleased at the provision in this bill whereby priority is extended to those who "are otherwise not eligible for unemployment insurance benefits." This typifies my district as we in American Samoa do not have the coverage afforded by unemployment insurance, at this time.

We also are a very underdeveloped jurisdiction. Any assistance that this bill may provide will be a godsend when it comes to repairing and rehabilitating our essential community and educational facilities—which, due to our unique climate and rain characteristics, are always in sore need of repair and rehabilitation. This will allow us to do what we might not have been able to do otherwise under extremely constrained budgetary and appropriation conditions for this fiscal and next fiscal year.

In summary, then, I would like to add my support to that which has already been shown here today, and say that I feel that all of America will be the beneficiaries of this legislation, not just my district, which definitely will benefit the Nation as a whole.

I strongly urge passage and approval so that the job of recreating America at its best community and educational facility level—may take place.

Thank you for allowing me to participate with this support for H.R. 1036—thank you, Mr. Chairman.●

Mr. JEFFORDS. Mr. Chairman, I have no further requests for time and I yield back the balance of my time.

Mr. HAWKINS. Mr. Chairman, I have no further requests for time and I yield back the balance of my time.

The CHAIRMAN pro tempore. All time for general debate having expired, pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the reported bill shall be considered by title as an original bill for the purpose of amendment, and each title shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

H.R. 1036

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act, together with the following table of contents, may be cited as the "Community Renewal Employment Act".

TABLE OF CONTENTS

TITLE I—GENERAL PURPOSE AND AUTHORITY

Sec. 101. Statement of purpose.
Sec. 102. Authorization of appropriations.
Sec. 103. Eligible participants.
Sec. 104. Limitation on use of funds.
Sec. 105. Career preparation demonstration program.

TITLE II—COMMUNITY RENEWAL EMPLOYMENT PROGRAMS
PART A—COMMUNITY IMPROVEMENT PROJECTS
Sec. 201. Employment activities in community improvement projects.
Sec. 202. Eligible entities.
Sec. 203. Allotment of funds.
Sec. 204. Requirements for receipt of allotment.
Sec. 205. Project design.
PART B—COMMUNITY IMPROVEMENT ACTIVITIES FOR YOUTH TRAINEES
Sec. 221. Youth trainee activities.
Sec. 222. Eligible youth.
PART C—STATE JOB PROGRAMS
Sec. 241. Financial assistance for State job programs.
TITLE III—EDUCATIONAL FACILITY REPAIR AND RENOVATION EMPLOYMENT ACTIVITIES
PART A—ELEMENTARY AND SECONDARY SCHOOL FACILITY IMPROVEMENT JOBS
Sec. 301. School facility repair and renovation projects.
Sec. 302. Allotment of funds.
Sec. 303. Requirements for receipt of allotment.
PART B—HIGHER EDUCATION FACILITY IMPROVEMENT JOBS
Sec. 321. Academic facility repair and renovation projects.
Sec. 322. Allotment of funds.
Sec. 323. Requirements for receipt of allotment.
PART C—SPECIAL DEFINITIONS FOR TITLE III
Sec. 341. Definitions.
TITLE IV—STATE EMPLOYMENT SERVICE RESPONSIBILITIES
Sec. 401. Certification and referral.
Sec. 402. State job bank systems.
TITLE V—GENERAL PROVISIONS
Sec. 501. General requirements.
Sec. 502. Labor standards.
Sec. 503. Fiscal controls; sanctions.
Sec. 504. Judicial review.
Sec. 505. Definitions.

The CHAIRMAN pro tempore. The Clerk will designate title I.

The text of title I is as follows:

TITLE I—GENERAL PURPOSE AND AUTHORITY

STATEMENT OF PURPOSE

SEC. 101. It is the purpose of this Act to provide productive and useful employment opportunities to long-term unemployed individuals through payments for labor and related costs associated with the repair or rehabilitation of essential community and educational facilities; with the conservation, rehabilitation, and improvement of public lands; and with public safety, health, social service, and other activities necessary to the public welfare.

AUTHORIZATION OF APPROPRIATIONS

SEC. 102. (a) In order to provide employment opportunities for unemployed individuals under this Act—

(1) there are authorized to be appropriated $5,000,000,000 for fiscal year 1983; and

(2) there are authorized to be appropriated for each succeeding fiscal year not more than the product of (A) 20 percent of the number of long-term unemployed individuals, multiplied by (B) $10,000.

(b) Of the amount appropriated pursuant to subsection (a) for any fiscal year, 80 percent shall be available for purposes of title II and 20 percent shall be available for purposes of title III.

(c) For purposes of this section, the number of long-term unemployed individuals means the average number of individuals in the civilian labor force of the United States who, in the first three months of the calendar year in which begins the fiscal year for which the appropriation is to be made, had been unemployed for 15 or more weeks as determined by the Bureau of Labor Statistics on a seasonally adjusted basis.

ELIGIBLE PARTICIPANTS

SEC. 103. (a) An individual shall be eligible to participate in a program or activity receiving funds under this Act only if the appropriate State employment service agency certifies that such individual (1) is an unemployed individual (as defined in section 505) at the time of such certification, and (2) has been unemployed for at least 15 of the 20 weeks immediately preceding the date of such certification, except as otherwise provided in subsection (e) of this section and section 222. In the case of an eligible entity described in section 202(a)(5), individuals may be so certified, by other means than the employment service agency, in accordance with procedures agreed to by the employment service agency and the eligible entity.

(b) No individual who is eligible under subsection (a) shall receive wages from funds made available under this Act in excess of fifty-two weeks in any two-year period.

(c) In the selection of participants for activities under this Act, priority shall be given to individuals who, at the time of selection, have exhausted or are otherwise not eligible for unemployment insurance benefits, particularly (1) those individuals who have been unemployed for the longest periods of time preceding the date of their selection, and (2) those residing in families in which no other member is employed on a full-time basis.

(d) With regard to services to veterans provided under section 201(a)(3)(N) of this Act, special consideration in selecting participants for employment in such activities should be given to veterans who otherwise meet the eligibility requirements in this section.

(e)(1) Notwithstanding subsection (a)(2), not more than 10 percent of the eligible participants selected by a recipient for subsidized employment from funds appropriated pursuant to this Act for any fiscal year may be individuals certified in accordance with paragraph (2).

(2) For the purposes of paragraph (1), an unemployed individual who has been unemployed for less than 15 weeks shall be certified by the State employment service agency if it determines that—

(A) such individual has been employed only intermittently or temporarily during 15 weeks of the 20 weeks immediately preceding the date of such certification and has experienced substantial periods of unemployment prior to and during such 15 weeks;

(B) such individual does not have an established work history which can be documented to provide verification of 15 weeks of unemployment during the 20-week period;

(C) such individual is a worker with the requisite skills necessary to fill a nonmanagement position to ensure the productivity and usefulness of the work carried out in a particular project or activity; or

(D) such individual has recall rights under a formal agreement with the employer which provides the subsidized job position.

(f) In certifying eligible participants under subsection (a) and in referring them for employment to recipients under titles II and III of this Act, the State employment service agency shall be responsible for ensuring equal employment opportunities and the full participation of traditionally underrepresented groups, including women and racial and ethnic minorities, in employment provided with funds made available under this Act. Each recipient of funds under title II or III of this Act shall be responsible for ensuring such opportunities and full participation in the selection of eligible participants for such employment.

LIMITATION ON USE OF FUNDS

SEC. 104. (a) Except as provided in subsections (b) and (c), funds made available under titles II and III of this Act may be used only to provide for wages and related employment benefits to eligible participants for work which the recipient certifies has been performed in one or more of the activities authorized under this Act.

(b)(1) Subject to paragraph (2), not more than 25 percent of the funds provided to any recipient under title II or III of this Act from funds appropriated for any fiscal year may be used for the cost of administration (including supervision) and the acquisition of supplies, tools, equipment, and other materials. Nothing in this Act shall be construed to preclude or limit the payment of such costs, either in whole or in part, from non-Federal sources or from Federal sources other than this Act, such as section 106 of the Housing and Community Development Act of 1974 (42 U.S.C. 5306) (popularly known as the community development block grant program) and chapter 67 of title 31, United States Code (popularly known as the general revenue sharing program).

(2) In designing projects under this Act, the recipient shall, to the extent feasible, ensure that supplies, tools, equipment, or other materials purchased or procured (in accordance with paragraph (1)) have been manufactured, mined, or produced in the United States, unless such supply, tool, equipment, or material is not available in reasonable quantity and quality as required to fulfill the needs of the project or activity.

(c) Notwithstanding subsection (a), funds available under title II may be used for costs associated with training and related support for a number of participants if—

(1) employers have made commitments to fill an equal number of unsubsidized jobs with participants who have successfully completed such training;

(2) the recipient has entered into an agreement for the provision of such training to participants with one or more of the following: an administrative entity designated under section 103(b)(1)(B) of the Job Training Partnership Act (Public Law 97-300), a local educational agency, an area vocational education school, an institution of higher education, a community-based organization, a career preparation demonstration center established under section 105, or other qualified public or private nonprofit provider of training services; and

(3) the costs associated with providing such training and related support to any participant from funds available under this Act do not exceed, on a weekly basis, the maximum wage which may be paid with funds available under this Act in accordance with section 501(g)(2).

CAREER PREPARATION DEMONSTRATION PROGRAM

SEC. 105. (a) There are authorized to be appropriated for fiscal year 1984 and for

each of the three succeeding fiscal years $30,000,000 for the purposes of this section.

(b) The Secretary, utilizing the Office of Job Corps, shall establish in each of the Federal regions four career preparation demonstration centers (equitably distributed between rural and urban areas) to demonstrate the effectiveness of using combined written, audiovisual, and computer-based materials within the basic instructional format developed by the Job Corps to provide training to eligible participants, primarily under section 104(c) or 221. Such Centers—

(1) shall be nonresidential;

(2) shall provide basic skills and literacy training and remediation, occupational skill training (including customized training), technology-related training, employability skills training, and classroom training leading to employment or the acquisition of a high school diploma or its equivalent;

(3) shall utilize appropriate materials, curricula, and methodologies developed successfully through Job Corps program experience;

(4) shall establish outreach training sites in locations easily accessible to eligible participants; and

(5) shall utilize, to the extent feasible, the facilities and expertise of existing Job Corps centers (including Civilian Conservation Centers) or contractors operating such centers.

(c)(1) Not more than five of these Centers shall be designated as high technology training centers to provide training in combination with subsidized internships in the private sector to prepare eligible participants for careers in expanding and emerging high technology occupations including, but not limited to, robotics, health technology, and computer operations.

(2) The costs associated with providing any subsidized internship in the private sector under this section from funds available under this Act shall not exceed, on a weekly basis, the maximum wage which may be paid with funds available under this Act in accordance with section 501(g)(2).

AMENDMENT OFFERED BY MR. HAWKINS

Mr. HAWKINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HAWKINS: Page 4, strike out lines 6 and 7 and insert in lieu thereof the following:

(1) there are authorized to be appropriated $3,500,000,000 for fiscal year 1984; and

Mr. HAWKINS. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. KILDEE) having assumed the chair, Mr. WHEAT, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1036) to provide employment opportunities to long-term unemployed individuals in high unemployment areas in projects to repair and renovate vitally needed community facilities, and for other purposes, had come to no resolution thereon.

REAGAN ADMINISTRATION'S RECORD OF APPOINTING WOMEN

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, yesterday President Reagan called on those of us who have criticized his record on the appointment of women to stop "talking in generalities" and examine his record. Well, I have reviewed the data produced by the White House and can tell you that President Reagan has appointed vastly fewer women than President Carter. The data shows one other fact with clarity: the Reagan administration has vastly more political appointees than the Carter administration did. Both of these conclusions come from White House supplied documents.

President Ronald Reagan told a press conference on July 26, 1983, that he had appointed over 1,000 women to executive positions in his administration and that his record on the appointment of women compared favorably to that of President Jimmy Carter at midterm. Since these revelations contradicted statistics released by the U.S. Commission on Civil Rights, I wrote the White House to ask for documentation.

On September 14, the President again told a news conference that his record exceeded that of President Carter and had White House Personnel Director John S. Herrington explain.

Finally, the next day, I received most of the documentation I had requested. Copies of it are available at the office of the Subcommittee on Civil Service in room 122 of the Cannon House Office Building.

The White House data shows two things: First, that President Reagan has made vastly more political appointments than President Carter. Second, President Carter appointed vastly more women, particularly to policymaking positions, than President Reagan has.

There are two charts prepared by my subcommittee. Chart No. 1 shows the staggering growth in the number of political appointees in the Reagan administration. In terms of full-time Presidential appointees, which includes both agency heads who have to be confirmed by the Senate and White House staff who do not, there has been a 14-percent growth in number of appointees during the first 2 years of the Reagan administration over the same period of the Carter administration.

Moving to the next column, you see a 44-percent growth in the number of political appointees to boards and commissions. This category includes, in the case of the Reagan administration, 252 appointees who had to be confirmed by the Senate, such as the members of the Legal Services Corporation Board, and 1,139 who did not, such as members of the Grace Commission.

There has also been a 44-percent growth in the number of Senior Executive Service positions held by other than career public servants. As you know, the Senior Executive Service was created by the Civil Service Reform Act of 1978 as a cadre of top career managers.

Finally, according to White House figures, there has been a 10-percent growth in the number of schedule C appointees. Schedule C appointees are paid at the GS-15 level or below—GS-15, step 1 now pays $48,553 a year. Schedule C appointees are appointed outside of the competitive service because their jobs have "a confidential or policy-determining character." Schedule C jobs include some midlevel speechwriters and policy analysts as well as numerous personal secretaries, drivers, and the like.

It is impossible to give you a precise cost estimate for this growth, but such figures are hard to calculate because we do not know how many days of pay have been claimed by those serving on boards and commissions. Excluding that category, the cost for the rest of the growth is $76 million a year, in salary costs alone. This figure is clearly too low, but it is impossible to be more accurate.

Chart No. 2 is quite straightforward. It shows the percentage and number of women appointees as of midterm by President Reagan and President Carter. The single most important column is the first one which shows full time, Presidentially appointed, Senate confirmed individuals. Within this category are all the major actors in the Government, such as Cabinet Secretaries and Assistant Secretaries, Ambassadors, judges, and the like.

The figures show that President Carter appointed women to 10.9 percent of these positions, while President Reagan appointed women to only 8.3 percent. Although President Reagan has made 7 percent more appointments to these jobs, the number of women has declined by 22 percent.

The next column refers to those people appointed by the President who are not confirmed by the Senate. The overwhelming majority of these people work in the White House office. Again, the percentage of women appointed to these jobs have declined from 20.7 percent under President Carter to 16.9 percent under President Reagan.

The third column shows appointments to boards and commissions. Here the difference is most pronounced. President Carter appointed women to 31.5 percent of the positions on boards and commissions which he

filled. President Reagan has only appointed women to 18.0 percent of these positions.

The final column gives the total numbers for Presidential appointments as of midterm. Unfortunately, the White House could not supply us with comparative data on Senior Executives or Schedule C's during the Carter administration. Nevertheless, the data for all Presidential appointees shows that President Carter appointed 22.4 percent women and President Reagan has appointed 14.3 percent women. While President Reagan has made 30 percent more appointments than President Carter did during the same period, President Reagan appointed 18 percent fewer women.

Before concluding, let me deal with President Reagan's claim that he has appointed more than 1,200 women to executive jobs in the Federal Government, a claim he repeated yesterday. The White House got to 1,200 by counting 584 female Schedule C's who are at GS-13, GS-14, and GS-15 and another 181 noncareer SES members. Also counted in this figure are 329 women who serve part time on boards and commissions. Generally, when we talk of executive level positions in the Federal Government, we are talking about those individuals paid under the executive level pay schedule, which runs from $63,800 to $80,100. The sad fact of the matter is that, as of midterm, there were only 88 women who held full-time executive level positions in this administration.

I hold no special brief for Jimmy Carter. I was quite critical of his record in appointing women to his administration. Nevertheless, the record of the Reagan administration is much worse. No one should be misled by White House assertions to the contrary, no matter how often they are repeated.

THE REGULATORY OVERSIGHT AND CONTROL ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. LOTT) is recognized for 15 minutes.

● Mr. LOTT. Mr. Speaker, today I am being joined by a group of my House Republican leadership colleagues in introducing the Regulatory Oversight and Control Act of 1983 in response to the recent Supreme Court decision holding the legislative veto device unconstitutional.

Mr. Speaker, in its sweeping decision in the Chadha immigration case, and in its subsequent holdings in the FERC natural gas and FTC used car rule cases, the Supreme Court presumably thrown some five decades of carefully developed congressional-executive branch relations and some 200 legislative veto statutes out the window. It did so on grounds that this procedure to give one or both Houses of Congress a check on powers delegated to the Executive tilts the balance between the branches in favor of the Congress by excluding the President from the process. I will refrain here from a discourse on which branch currently has the upper hand in our Government, notwithstanding the existence of the legislative veto device. Suffice it to say that the invalidation of this important mechanism has left the Congress in a temporary state of disarray and at a clear disadvantage vis-a-vis the executive branch in many important areas.

One of these areas is the realm of Federal regulations. The Senate brief filed in the Chadha case identifies some 56 currently operable legislative veto statutes, of which some 15, containing approximately 20 legislative veto provisions, apply to Federal regulations. These include one- or two-House vetoes for regulations of the Department of Education, the Federal Election Commission, the Federal Trade Commission, the Consumer Product Safety Commission, and certain regulations of the Department of Transportation and the Environmental Protection Agency.

Moreover, the drive to extend the legislative veto device to nearly all regulations through an amendment to the Administrative Procedure Act was particularly strong in the Congress at the time of the Chadha ruling. In the last Congress, Representative LEVITAS had some 253 House cosponsors on such a bill, H.R. 1776, including 142 Republicans and 111 Democrats. The legislative veto mechanism for Federal regulations was also endorsed in the 1980 Republican platform and by candidate Ronald Reagan at the time.

Mr. Speaker, the strong support in the Congress for such a check on regulations was further evidenced in the last Congress by the inclusion of a two-House veto in the regulatory reform bill passed by the Senate last year, S. 1080, by a vote of 94 to 0, after the veto amendment itself had passed on a vote of 69 to 25. The overwhelming support for this mechanism in the Congress emanated from a general concern that, in delegating rulemaking authority to agencies, we had given away our article I lawmaking function to unelected bureaucrats without retaining proper control over it. In many instances, our delegations were too broad, and we had nobody but ourselves to blame when agencies promulgated regulations that bore little resemblance to the statutes we thought we had enacted. Nevertheless, there was little we could do but vent our rage, accept the heat from our constituents, scapegoat the bureaucrats, and maybe pass a law to amend the regulation or cutoff funds for its implementations. In short, it has not only been an embarrassing and frustrating experience for us, it has been an often painful and costly experience for those directly affected by the regulations.

The lesson from all this is that we should not only hold agencies more accountable for the regulations they issue, but that we should hold ourselves more accountable for the laws we pass and the regulations they give rise to. That was the whole theory behind the legislative veto procedure for regulations. Now that we have been deprived of that tool by the Supreme Court we must find new means to accomplish the same objectives.

The purpose of the Regulatory Oversight and Control Act we are introducing today is to insure greater accountability from both the agencies and Congress for the regulatory process by establishing alternatives to the traditional legislative veto device. Our bill recognizes that in order to make the regulatory process more responsible and responsive, we must not only be able to rifleshot particular regulations, though that should be one important weapon in our arsenal, but we must also reform the agencies' internal rulemaking procedures to make them more accountable, and we should improve our own overall oversight efforts in order to determine how well the laws, agencies and programs we have put in place are working.

AGENCY RULEMAKING IMPROVEMENTS

Title I of our bill would amend the Administrative Procedure Act to provide for internal improvements in the rulemaking process. At the heart of this title is a requirement that agencies perform regulatory analyses for all major rules and their alternatives. Major rules are defined as those which an agency or the President determine would have an annual impact on the economy of $100 million or more or would otherwise have substantial impact on some sector. The agencies would be required to choose the most cost-effective alternative unless otherwise prohibited by the regulation's underlying statute. Agencies would also be required to establish a review schedule for all existing major rules at least once every 10 years. And new and existing major rules would sunset or cease to be effective according to the schedule established by the agency. If an agency wants to extend or amend a rule after its sunset date, it would have to perform a regulatory analysis and resubmit the rule.

Title I of our bill also includes many provisions which have previously appeared in various House and Senate regulatory reform bills reported or passed over the last few years. These include a requirement for a regulatory agenda to be published semiannually in the Federal Register in which agencies would list all their planned rule-

making activities for the next year, together with certain required information. The informal rulemaking process would be reformed to make it more accessible to public participation and information. A modified Bumpers amendment for judicial review would require appeals courts to independently decide all relevant questions when agency actions are challenged, without according any presumption in favor or against the actions. The so-called race-to-the-courthouse problem would be resolved by permitting the Administrative Office of the U.S. Courts to choose the court in which the record shall be filed when actions are challenged in two or more courts within 10 days of the agency action. And finally, intervenor funding would be prohibited using Federal funds unless specifically authorized by law.

Mr. Speaker, title I of our bill is virtually identical in many respects to the compromise regulatory reform bill worked out in the last Congress between representatives of the Speaker's Office, the White House, the House Judiciary Committee, and business and public interest groups. Although this bill never got out of the House Rules Committee due in part to an extended hearing process involving a few committee chairmen, I think it is an important foundation on which to build in this Congress. After all, it is not every day we can get the Speaker of the House, the current President, and diverse business and public interest groups to agree on something.

CONGRESSIONAL REVIEW OF AGENCY RULES

Title II of our bill also amends the Administrative Procedure Act. Under this title, all rules subject to the informal rulemaking process shall be transmitted to Congress for a period of 90 days of continuous session of Congress after their final publication. The rules would be referred to the committee of primary jurisdiction in each House. For major rules to take effect, a joint resolution of approval must be enacted within that review period. Other rules could take effect unless a joint resolution of disapproval is enacted, and could take effect sooner if neither House has acted on a joint resolution within 60 days or if either House had rejected a resolution.

Mr. Speaker, one of the criticisms of many veto devices is that they are meaningless since they could simply be bottled up in committees while the review period lapses. This would be an especially troublesome prospect for major rules under our bill since they require approval by enactment of a joint resolution. To address this situation we have utilized the automatic consideration procedures now found in chapter 9 of title 5 of the United States Code relating to the President's reorganization authority for the executive branch. While that authority, which permitted a one-House veto of executive reorganization plans, expired on April 7, 1981, an extension of the authority has been reported in H.R. 1314 which calls for approval of executive reorganization plans by enactment of a joint resolution. That bill retains the automatic consideration procedures which we have adopted in our bill for major rules resolutions which require enactment for a regulation to take effect.

Under this procedure for major rules, the chairman of the committee to which a rule is referred, or his designee, must introduce a joint resolution of approval within 1 day after receipt of the major rule. The committee is required to report the resolution not later than 45 days after receipt of the rule. If it does not, the resolution is automatically discharged and placed on the appropriate calendar of the House. A motion to proceed to its consideration is privileged, and, if adopted, debate on the resolution would be for 2 hours. If the chairman or his designee fails to introduce the required resolution, the first resolution introduced by anyone else would be discharged after 45 days.

For other rules, subject to joint resolutions of disapproval, there would be no such automatic consideration procedures since this could burden the Congress with hundreds of rules resolutions each year which any Member might introduce. Instead, for nonmajor rules we have provided a front-end discharge mechanism which will require a showing of substantial support before a resolution can be brought to the floor. Under this provision, a "motion for consideration" can be filed with the Clerk of the House or Secretary of the Senate at any time after a resolution of disapproval is introduced, but not later than 25 days after the rule is received. If, not later than 30 days after the rule is received one-fourth of the membership of the House involved signs the motion for consideration, the committee involved would be required to consider and report the resolution, though obviously it could report the resolution with a recommendation that the resolution be rejected. If the committee has not reported as required within 45 days after the rule is received, it would be automatically discharged of the resolution which would then be placed on the appropriate calendar.

At the appropriate time, a motion to proceed to the consideration of the resolution would be privileged, but, if the resolution has been discharged pursuant to the motion for consideration procedure, the motion would be debatable for 20 minutes. In instances in which the committee has reported the resolution on its own, the motion to proceed to its consideration would not be debatable. If the motion is adopted, the resolution would then be debated for 1 hour.

Finally, our procedure makes provision for resolutions received from the other House. If a House receiving such a resolution has not reported or been discharged of its own resolution within 75 days after the receipt of the rule, the resolution of the other House would be considered discharged and placed on the appropriate calendar and subject to privileged consideration. In any event, if a resolution is received from the other House, and the receiving House has reported or been discharged of its own resolution in the meantime, the final vote would occur on the resolution of the other House in order to avoid the necessity for a vote on both resolutions by both Houses.

Mr. Speaker, the advantage of our front-end discharge procedure is to give committees sufficient warning and opportunity to report on a resolution for which there is substantial Member interest. Under many existing discharge procedures, a committee could be blind-sided by such motions at the last minute, without opportunity to consider and report on the matter. Our procedure respects both the integrity and expertise of our committee system, and would give the Congress an informed basis on which to act. This is especially important in the case of regulations which are often very technical and complex.

REGULATORY OVERSIGHT AND CONTROL AMENDMENTS TO HOUSE RULES

Title III of our bill would amend House rules to make several important changes. First, there would be established a House Regulatory Review Calendar to which would be referred all approval and disapproval resolutions for regulations which have been reported or discharged from committees. This Calendar would be called after the approval of the Journal on every first and third Monday and second and fourth Tuesday of each month. The purpose of this Calendar is to provide for the orderly consideration of these resolutions. Given the privilege attached to these resolutions and other expedited procedures involved, it is important that the leadership retain this form of control over the House floor schedule and that Members have advance warning of what is likely to be considered and when. Under our procedure, priority consideration would be given to resolutions for regulations whose review period would expire before the next calling of the Calendar. As mentioned previously, motions to proceed to the consideration of a resolution would be privileged, and, in the case of those brought pursuant to a motion for consideration signed by one-fourth of the membership, would be debatable for 20 minutes.

Our second amendment to the Rules of the House would modify the current restriction on limitation amend-

ments to appropriations bills, clause 2 of rule XXI. Under the current procedure adopted at the beginning of this Congress, limitation amendments may not be considered until other amendments have been disposed of and only if the House then votes down the motion that the Committee of the Whole rise and report the bill to the House. Under our revision, certain limitation amendments could be considered during the initial amendment process—amendments to prohibit the use of funds to implement a regulation for which a resolution of disapproval has not been considered by the House, or has been passed by the House but not enacted, within the specified review period. This is to make clear that the appropriations process should be used as a last resort to block a rule if it has not been properly considered by the authorizing committee involved, or if its disapproval has been blocked by the other body or by a Presidential veto of the disapproval resolution.

Our third set of amendments are aimed at improving House oversight efforts. House rule X would be amended to require committees to formally adopt their oversight plans at the beginning of a Congress and would prohibit the consideration of their funding resolutions unless these were adopted and submitted to the Government Operations Committee. At present there is a requirement that oversight plans be submitted at the beginning of a Congress, but no requirement that these receive formal committee consideration and approval. As the chairman of the Government Operations Committee has conceded, this is basically a staff operation. As such, it is basically meaningless since most Members are not even aware that the plans exist. Our rule change would also require that the committee's final activity report at the end of the Congress contain an oversight section which relates its original plans to its actual oversight activities and accomplishments.

Finally, we have suggested another House rule which would permit the Speaker to appoint, with the approval of the House, special ad hoc oversight committees for specific purposes from among the membership of two or more committees with shared jurisdiction over a problem. This authority currently exists for legislative purposes only. Our bill specifically provides for such appointment in the case of a regulation referred to Congress over which more than one committee has primary jurisdiction, but it obviously could be used for other useful oversight endeavors.

CONCLUSION

Mr. Speaker, we offer this bill at a time when the Congress is groping for appropriate responses to the Chadha decision that will enable us to retain our rightful role in our system of government bereft of the legislative veto device which has been so critical in such areas as foreign affairs, budget matters, and regulations. On July 26 our Committee on Rules was petitioned by 15 House committee chairmen to take a central role in coordinating our response to Chadha. Our two Rules Subcommittees will be holding joint hearings, this month with this in mind. We have introduced this bill today as one appropriate response for the post-Chadha Congress to take to our delegation of rulemaking powers to agencies. We think our comprehensive approach is both responsible and workable. Moreover, it makes good sense to take a uniform approach through such a generic law. If we do not, we will again witness these types of legislative vetoes being attached piecemeal to every authorization bill that comes along. We invite our colleagues to join us in cosponsoring this important legislation.

At this point in the RECORD, Mr. Speaker, I include a brief summary of our bill. The summary follows:

BRIEF SUMMARY OF THE "REGULATORY OVERSIGHT AND CONTROL ACT OF 1983"

TITLE I—AGENCY RULEMAKING IMPROVEMENTS (AMENDMENTS TO THE ADMINISTRATIVE PROCEDURE ACT)

Regulatory Analysis of Major Rules.—Agencies would be required to perform regulatory analyses of major rules and alternatives. Major rules are those which the agency or President determines would have an annual impact on the economy of $100 million or more or would otherwise have a substantial impact. The agency would be required to choose the most cost-effective alternative unless another alternative is mandated by the underlying statue. The President (or the Vice President or other Executive Officer confirmed by the Senate) would establish guidelines for compliance and would review and monitor compliance. The Comptroller General may also monitor compliance.

Regulatory Agenda.—Each agency shall publish in the Federal Register in April and October of each year a regulatory agenda listing all rules the agency tends to propose, promulgate, modify, repeal or otherwise consider in the next 12-months. Certain information is required to be included with each rule listed on the agenda.

Agency Review of Existing Rules.—Not later than nine months after the effective date, each agency shall publish in the Federal Register a schedule for the review of existing major rules over the next ten years. A final schedule would be published not later than six months later, after public comment. The President could add rules to this review schedule. The reviews would be subject to the same comment and analysis requirements as new major rules.

Sunset for Major Rules.—All newly proposed and existing major rules scheduled for review shall include a date on which they shall cease to be effective, not later than 10 years after they are initially effective, in the case of new rules, and according to their sunset review schedule for existing rules.

Informal Rulemaking Process.—The informal rulemaking process is amended to provide greater notice, information, and opportunity for oral and written public comment.

Judicial Review (modified "Bumpers Amendment").—When agency actions are challenged in the courts, the courts shall independently decide all relevant questions without according any presumption in favor or against the actions.

Appeals of Agency Orders ("race to courthouse" problem).—When agency actions are challenged in two or more courts of appeals within ten days of their issuance, the Administrative Office of the U.S. Courts shall, by random selection, designate one court in which the record shall be filed.

Intervenor Funding.—Federal funds could not be used for public participation in agency rulemaking proceedings unless specifically authorized by law.

TITLE II—CONGRESSIONAL REVIEW OF AGENCY RULES (AMENDMENTS TO ADMINISTRATIVE PROCEDURE ACT)

Submission and Review of Agency Rules.—Agencies would be required to submit most rules of general applicability to Congress for a 90-day review period. The rules would be referred to one committee of primary jurisdiction in each House or to an ad hoc committee if more than one committee has primary jurisdiction.

Congressional Action on Rules.—Major rules could not take effect unless a joint resolution of approval is enacted within 90-days of continuous session of Congress; other rules could take effect unless a joint resolution of disapproval is enacted within the 90-day period, and could take effect sooner if neither House has acted on a resolution within 60-days or if either House has rejected a resolution.

Committee Consideration of Resolutions.—In the case of major rules, resolutions of approval must be introduced by the chairman (or his designee) of the committee to which the rule is referred within one day after the rule is received, and the committee would be required to report the resolution not later than 45-days after receipt of the rule, or would thereafter be discharged of the resolution. Other rules would be subject to joint resolutions of disapproval which the committee could report at its own discretion or would be required to report if a "motion for consideration" is filed within 25-days after the rule is received and is signed by one-fourth of the membership of the House involved not later than 30-days after the rule is received. If the committee has not reported such a resolution within 45-days after receipt of the rule, the resolution would be discharged.

Floor Consideration of Resolutions.—Resolutions reported or discharged would be referred to the appropriate calendar of the House involved, a motion to proceed to their consideration would be privileged and, if adopted, debate on major rules resolutions would be for two-hours, and for other rules resolutions, one-hour. If one House receives a resolution from the other House and has not reported or been discharged of its own resolution within 75-days after the rule is received, the resolution of the other House would be placed on the appropriate calendar.

TITLE VII—REGULATORY OVERSIGHT AND CONTROL AMENDMENTS TO HOUSE RULES (AMENDMENTS TO THE RULES OF THE HOUSE)

House Regulatory Review Calendar.—A Regulatory Review Calendar would be established in the House to which all joint resolutions of approval and disapproval would be referred once reported or dis-

charged from committee. The Calendar would be called on the first and third Monday and second and fourth Tuesday of each month after the approval of the Journal. Priority consideration would be given to resolutions for rules whose review period would expire before the next calling of the Calendar. Motions to proceed to the consideration of a resolution would be nondebatable except for resolutions discharged pursuant to a "motion for consideration" signed by one-fourth of the membership, in which case the motion would be debated for twenty minutes.

Regulatory Appropriations Riders.—The present House rule restricting the offering of limitation amendments to appropriations bills would be amended. At present such limitation amendments can only be offered after other amendments are disposed of and only if the House votes down a motion that the Committee of the Whole rise. Under the proposed rule change, limitation amendments could be considered during the initial amendment process with respect to regulations for which a resolution of disapproval has not been considered by the House, or has been passed but not enacted, during the specified review period.

Oversight Improvements.—Committees would be required to formally adopt oversight plans at the beginning of a Congress and their funding resolutions could not be considered until the plans have been submitted to the Government Operations Committee. Committees would also be required in their final oversight reports to relate their actual oversight activities and accomplishments to their original plans. The Speaker could create special ad hoc oversight committees, subject to House approval.

REPUBLICAN LEADERSHIP GROUP COSPONSORS OF LOTT'S "REGULATORY OVERSIGHT AND CONTROL ACT OF 1983"

EMMETT DEDMON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, I rise to call to the attention of my colleagues the untimely passing of Emmett Dedmon, former vice president and editorial director of the Chicago Sun-Times and the defunct Chicago Daily News.

Emmett Dedmon was my good friend for over 25 years. He was a highly respected journalist who had the best interests of his readers, and especially the city of Chicago, at heart. Over the years, he contributed so much, not only as a journalist, but as a civic leader as well, and all those who had the privilege of knowing him will miss him greatly.

Emmett graduated with a degree in economics in 1941 from the University of Chicago and joined the old Chicago Times as an assistant to the foreign editor. A few months later, after the Japanese attacked Pearl Harbor, he quit to join the Army Air Corps. He rose to the rank of captain, was awarded the Air Medal for his service, and spent 2 years as a prisoner of war in Stalag Luft II in Silesia.

After the war, he returned to his beloved Chicago where he became the old Chicago Sun's literary editor and drama editor of the Sun-Times. He became assistant managing editor of the Sun-Times in 1955, managing editor in 1958, executive editor in 1962, editor in 1965, and in September 1968, was named executive vice president and editorial director of the Sun-Times and Daily News. He resigned from the Sun-Times and the Daily News in February 1978, and went on to explore new challenges. He is the author of five books, with a sixth to be published soon.

Emmett was inducted last year into the Chicago Press Club Hall of Fame, and he was a trustee of the University of Chicago and merited the university's Alumni Service Medal in 1983. He also served as president of the YMCA of Metropolitan Chicago from 1965 to 1968, and gave generously of his time and effort to numerous civic activities aimed at the betterment of our great city of Chicago.

I shall always remember Emmett as a man of extraordinary courage, commitment, and effectiveness, who was regarded with affection and admiration by all those who knew him.

Mrs. Annunzio joins me in expressing our heartfelt sympathy to his devoted wife, Claire, and to his son, Jonathan, as well as to the other members of his family.

Mr. Speaker, at this point in the CONGRESSIONAL RECORD I would like to include the text of an article about Emmett Dedmon which appeared in the September 19 edition of the Chicago Sun-Times. The article follows:

[From the Chicago Sun-Times, Sept. 19, 1983]

FORMER SUN-TIMES EXECUTIVE DEDMON DIES

(By Bob Olmstead)

Emmett Dedmon, 65, former vice president and editorial director of the Sun-Times and the defunct Chicago Daily News, died of cancer Sunday night in the University of Chicago Hospital.

Mr. Dedmon, of the Near North Side, resigned from the Sun-Times in 1978 after 38 years as a Chicago newsman, critic and executive.

Until he entered the hospital a few weeks ago, Mr. Dedmon worked as a senior consultant for Hill & Knowlton Inc., an international public relations firm. He was a frequent world traveler and the author of five books in print as well as a sixth to be published soon.

Both as a newspaper editor and in his civic life, Mr. Dedmon was a frequent speaker and board member. He was a trustee of the University of Chicago, national chairman of its alumni fund for 20 years and former chairman of its visiting committee of the Center for Far Eastern Studies. The university awarded him its Alumni Service Medal in 1983.

He was president of the YMCA of Metropolitan Chicago from 1965 to 1968 and had been a trustee of the Chicago Historical Society, the Pullman Educational Foundation, the American Public Service Institute and the Newberry Library. He was a former member of the Pulitzer Prize selection committee and a founding member of the Trilateral Commission.

He was a past director of the United Way and former vice president of the Economic Club of Chicago, and served on the executive committees of the Chicago Club and the Commercial Club.

Marshall Field V, chairman of the board of Field Enterprises Inc., owner of the Sun-Times, said "Under Emmett Dedmon's leadership the Sun-Times earned a position among the great newspapers of this country. He contributed so much to the paper and to our city with his dynamic style and boundless energy. All of us who worked with him will miss him."

James Hoge, Sun-Times publisher, said, "With energy and imagination Emmett Dedmon gave editorial leadership to the Sun-Times during one of its periods of significant growth. He contributed mightily to Chicago as an editor, author and caring civil leader."

Sun-Times Editor Ralph Otwell said, "Although an adopted son of the city, Emmett had a love affair with Chicago and proudly wore his heart on his sleeve, not only in his civic and charitable activities, but also as a journalist with a strong commitment to Chicago and its people."

Herman Kogan, corporate historian for Field Enterprises, said: "Emmett was one of the quality guys I found over the years. Up to the point of his death, he was a guy with a lot of guts."

Hannal H. Gray, president of the University of Chicago, said, "Emmett Dedmon was a dedicated friend of the university for more than 40 years, since he graduated here. As a trustee and as national chairman of our alumni fund-raising efforts for nearly 20 years, he served his alma mater with an extraordinary blend of cheerfulness, commitment and effectiveness. He will be missed."

Mr. Dedmon, born Emmett Deadman, son of a minister in Auburn, Neb., described himself, probably accurately, as brash—even as a high school newspaper editor who took it upon himself to cover a bank robbery in Fairbury, Neb. He was a gregarious, bluff, hearty man with a short fuse and an ability to soothe wounded feelings after his explosions.

After graduating with a degree in economics in 1941 from the University of Chicago, where he was editor of the Daily Maroon, Mr. Dedmon joined the old Chicago Times as an assistant to the foreign editor.

But a few months later the Japanese attacked Pearl Harbor and he quit to join the Army Air Corps, where he became a navigator and rose to the rank of captain. He flew many missions before the days of fighter escorts and returned safely from one in a

burning plane. He was awarded the Air Medal for his service.

He was shot down over Germany in July, 1943, on a bombing mission to Hanover, and parachuted from his B-17 bomber. Captured, he spent two years as a prisoner of war in Stalag Luft II in Silesia. He later incorporated his prison camp experiences, which he had recorded on the backs of chocolate bar wrappers, in a novel, *Duty to Live.*

After the war, Mr. Dedmon returned to Chicago to become the old Chicago Sun's literary editor and, later, both literary and drama editor of the Sun-Times. He also was the ballet critic, occasional music critic, feature editor and news editor.

He rose to assistant managing editor of the Sun-Times in 1955, managing editor in 1958, executive editor in 1962, editor in 1965 and, in September, 1968, was named executive vice president and editorial director of the Sun-Times and Daily News.

Mr. Dedmon continued traveling, to the Philippines, Japan, Germany, the Soviet Union and China. At the same time his travels and civic interests led him to publish four more books—*Great Enterprises,* a centennial history of the YMCA in Chicago; *A History of the Chicago Club; China Journal,* an account of a 23-day trip to China in 1972, and the best-selling *Fabulous Chicago,* a history of Chicago published in 1953 and updated in 1981.

A sixth book on the history of Standard Oil Co. (Indiana), written with the company's recently retired chairman, John E. Swearingen, is expected to be published soon.

Mr. Dedmon resigned from the Sun-Times and Daily News in February, 1978, two years after Hoge was named editor in chief of both newspapers and shortly after the closing of the Daily News was announced. Marshall Field V. who then was the publisher, said, "With the impending demise of the Daily News, Emmett feels that much of the challenge of his job has been lost and, in his words, he 'wants to explore new challenges.' "

In recent days, his name had been mentioned in print as one of the principals in the proposed founding of a new afternoon newspaper, the Chicago Evening Post. But his family said that although he showed some initial interest, he never was heavily involved.

Mr. Dedmon was inducted last October into the Chicago Press Club Hall of Fame.

Survivors include his wife, Claire, whom he met in his first newspaper job; a son, Jonathan, an account executive at Hill & Knowlton; a sister, Dee Henney, and two brothers, Homer and Robert.

Funeral arrangements are incomplete.●

VICTIMS OF KAL 007

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. DWYER) is recognized for 5 minutes.

● Mr. DWYER of New Jersey. Mr. Speaker, it is with a deep sense of sadness that I join today in this special order honoring the 269 innocent people who lost their lives on Korean Air Lines flight 007.

Much has already been said about this total act of barbarism on the part of the Soviet Union, and we are sure to hear more as the debate on the foreign policy implications of this incident continues.

It is an essential debate that must be carried out fully, openly and with diligence to uncover every detail possible in an all-out effort to prevent this international atrocity from recurring.

Throughout this debate, however, we must never lose sight of the fact that the central issue is the loss of innocent, civilian lives. Sixty of these individuals were American citizens. I am sorry to report that one young man was from my own congressional district, and several other passengers were residents of the State of New Jersey. I join my colleagues in extending my most heartfelt sympathies to the survivors of all the passengers and crew members on KAL flight 007.

The resolution passed by this Chamber last week is an important first step in expressing our outrage. We owe it to the victims' families and to the victims themselves to remain steadfast in our determination to make the Soviets fully accountable for their act of terrorism.

The tragedy of the downing of KAL flight 007 will remain with us for a long time, and that is as it should be. We must actively search for the truth surrounding this incident and seek effective international responses on many fronts.

To help guide us in this quest, we can be inspired by the KAL passengers and crew members, who will stand forever as international symbols of the humanity we strive to protect in a world marked by the forces of peace and reason than by the inhumane actions of totalitarian regimes.●

THE NEED FOR PERSONAL EMERGENCY RESPONSE SYSTEMS FOR THE SEVERELY FUNCTIONALLY IMPAIRED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.●

Mr. PEPPER. Mr. Speaker, I am very pleased to introduce today, with my distinguished colleague from Tennessee (Mr. QUILLEN), a bill that will provide medicare (part B) and optional medicaid coverage of personal emergency response services for the severely functionally impaired. This bill is similar to a bill I introduced last session with the Honorable Margaret Heckler, now Secretary of the Department of Health and Human Services. I believe this legislation takes an important step toward the prevention of premature institutionalization while at the same time providing savings to the Federal Government.

Mr. Speaker, the rapid growth of Federal expenditures for institutional health care increasingly has led the health-care community and Congress to consider in-home and community-based alternatives to nursing homes and hospitals that would be less expensive while at the same time better meet the needs of health-care recipients. Personal emergency response services represent precisely the kind of alternative care that can help improve the quality of life for the elderly and disabled while reducing the overall costs of long-term care. My bill will offer the Federal Government the opportunity to participate with the private sector in supporting these services for those most at risk of institutionalization. Indeed, through this support, the Federal Government has the proven potential to avoid the significantly higher institutional and other health-care costs it would otherwise incur on behalf of these service recipients. Thus, we have the rare opportunity of helping people and having a positive impact on the Federal budget at the same time.

The essential purpose of personal emergency response services is to permit an individual at home to summon assistance automatically in the event of a medical or environmental emergency. The utility of such a service is clear. Elderly or disabled persons with physical or mental infirmities but no need for around-the-clock care frequently enter nursing homes simply to insure 24-hour monitoring in the event an emergency should arise. A personal-emergency-response service can permit these individuals to remain independent and in the community, secure in the knowledge that assistance can be summoned by the push of a button. If used as part of hospital discharge planning, the service can also facilitate a patient's early return home.

A recently completed study sponsored by the National Center for Health Services Research (NCHSR) strongly supports the conclusion that personal emergency response services can assist the elderly and disabled to remain independent in their own homes while reducing the incidence of institutionalization and creating significant savings in health-care costs for the severely functionally impaired. The study, conducted by Drs. Syliva Sherwood and John Morris of the Hebrew Rehabilitation Center for Aged in Boston, evaluated the effects of a particular personal emergency response system known as lifeline. The lifeline system allows clients to request aid by simply pressing a button on a portable pocket-sized unit; if the person is unconscious, the system senses the inactivity over a period of time and signals for help automatically.

In greater detail, the lifeline system tested by the study works as follows:

The personal-emergency-response service client normally carries a miniature wireless call button that can be

worn on a chain, or attached to a belt, or other article of clothing. When help is needed, the client presses the button and a small machine attached to the telephone receives the wireless signal, captures the phone line, and sends a digital message over the phone line to a community-based 24-hour emergency response center—such as a hospital's emergency switchboard—where the message is automatically printed.

Response center personnel read the client code from the printed tape and retrieve the client information card with name, address, telephone number, a brief statement of medical or physical problems, and a list of volunteer responders. These responders are designated by the client at the time the system is installed. Included are people such as relatives, friends, or neighbors, with whom the client is comfortable and who have indicated their willingness to respond in the event of an emergency. Also on the list are municipal agencies, such as police and ambulance services, which can provide assistance in the event that the volunteer responders are not available.

On receipt of the alarm, a response center worker immediately places a call to the client. If the client can get to the telephone, the coordinator evaluates what help may be needed and responds accordingly. If the client is unable to answer the phone, the coordinator assumes that the client is injured and unable to move. Immediate action is taken to contact a responder who can arrive on the scene quickly.

In the event that the client is unconscious and unable to press the button, a clock timer in the lifeline equipment at the client's home will initiate an emergency call. The timer can be set for 11 or 24 hours and is reset manually by pushing the reset button on the unit. Lifting the telephone handset during normal use also automatically resets the timer.

The NCHSR-sponsored study made several significant findings of particular significance for this bill.

First, psychological benefits. Personal emergency response service users felt more confident about continuing to live independently. They reported better sleep patterns and moved around their homes with greater ease.

Second, reduced need for institutional care. The largest group of tested personal emergency response service users:

Severely functionally impaired and not socially isolated;

Averaged only one day in a nursing home compared to an average of up to 11 nursing home days for nonservice users during the 13-month testing period.

Third, cost benefits. For the largest group tested, each $1 spent for personal emergency response services produced a net savings of $7.19 in total long-term care costs due to reduced use of both institutional and community services. Subsequent experience with tens of thousands of users has shown that personal emergency response services can be offered for under $20 per month, including amortized capital costs.

Fourth, screening instrument. The researchers developed a brief, reliable screening questionnaire to identify potential personal emergency reponse service users with the greatest need and who would benefit most from such a service.

Personal emergency response services can clearly offer advantages to people of all ages and physical conditions. However, this bill would limit coverage of personal emergency response services to those individuals for whom the services would be most beneficial and cost effective: severely functionally impaired persons who are living alone or are left alone for substantial periods of time. Restricting coverage in this manner recognizes the importance of carefully targeting Federal health-care dollars to achieve the maximum benefit, consistent with the NCHSR-sponsored study's findings.

Mr. Speaker, it is clear that personal emergency response services can assist the frail at-risk elderly, and disabled to live independently in the community and to avoid inappropirate institutionalization while reducing long-term-care costs. Medicare and medicaid support of these services will help insure their availability for the severely functionally impaired who will most benefit from both an economic and social perspective while at the same time providing savings to the Federal Government. I believe this legislation exemplifies the way in which Congress can allocate the Federal health dollar in a socially beneficial, cost-effective manner, improving quality of life for the elderly while reducing overall costs of long-term care.●

KAMPUCHEA AND THE UNITED NATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CROCKETT) is recognized for 5 minutes.

● Mr. CROCKETT. Mr. Speaker, during the current General Assembly meeting of the United Nations, it is expected that the issue of ousting the current representatives of the nation of Kampuchea will be put before the nations of the world.

As many Members are aware, the United States has supported the present Kampuchean delegation to the United Nations consisting largely of former members of the regime of Pol Pot, whom the Chicago Tribune called "the greatest mass murderer since Hitler." Those who support the ouster of this delegation, which they believe to be illegal and against the wishes of the vast majority of the people of Kampuchea, have circulated petitions calling for Pol Pot's removal from the United Nations. It is my understanding that over 6,000 signatures have already been secured for these petitions.

Mr. Speaker, I would like to insert in the RECORD for the benefit of my colleagues a copy of the resolution, circulated by the National Lawyers Guild, which expresses the concerns upon which the petition is based, and the text of the petition itself:

1983 NATIONAL LAWYERS GUIDE CONVENTION

RESOLUTION CALLING FOR THE SEATING IN THE GENERAL ASSEMBLY OF THE REPRESENTATIVE OF THE PEOPLE'S REPUBLIC OF KAMPUCHEA

Whereas

1. Kampuchea's seat in the United Nations is now held, with major U.S. support, by a representative of a grouping, comprised largely of the forces of the former regime of Pol Pot, which calls itself the government of "Democratic Kampuchea;"

2. The present government of the People's Republic of Kampuchea, with its capitol in Phnom Penh, is the only effective government in the terriorty of Kampuchea;

3. From 1975 through 1979 the people of Kampuchea were subjected to dreadful suffering and tragedy in every aspect of their lives, at the hands of the government of that period, under Pol Pot, during which period more than 25 percent of them lost their lives;

4. In 1979 the government of the Socialist Republic of Vietnam intervened militarily in Kampuchea. It is not the purpose of this resolution to approve or to condemn the Vietnamese motives for such intervention, but merely to acknowledge the fact that this action put a stop to the wanton internecine bloodshed that had for those four years been visited upon the people of Kampuchea, and established a period of relative tranquility in which the Kampuchean people could begin the process of reconstructing their nation and their own lives.

5. The U.S.A. has played the leading role in organizing opposition to the seating of the representative of the People's Republic of Kampuchea as a part of the continuation, by other means, of its war against Vietnam, and in furtherance of its geopolitical strategies without regard to the well-being of the Kampuchean people.

6. The exclusion of the People's Republic of Kampuchea from the United Nations violates international law, particularly the UN Charter and the internal rules and precedents of the General Assembly; when there is a change of government in a member country, the General Assembly seats the representative of the government which possesses in fact the effective power within the territory of the country. Examples include Yemen, Chile and Kampuchea itself, when the U.S. backed Lon Nol deposed Prince Sihanouk from what was then the ruling regime of Cambodia.[1]

7. It is for these reasons that the National Lawyers Guild calls upon the government of the United States, and upon the United Nations, to accept the reality and the legitimacy of the effective administration of the

[1] This resolution is supported by a memorandum of law which has been furnished to the Permanent Resolutions Committee.

government of the People's Republic of Kampuchea. It is only in this way that the process of reconstruction can proceed, that peace in the Southeast Asia can be maintained and secured, and that the possibility of a renewal of the devasting internal shedding of blood can be avoided.

Resolved: This August 1983 Convention of the National Lawyers Guild demands that the United States government end its support for the Pol Pot grouping in the United Nations that that it vote to seat the representative of the People's Republic of Kampuchea.

Implementation: The National Executive Committee shall immediately communicate this resolution to the President, the Dept. of State, the Senate Foreign Affairs C'ee, the government of the PRK, the UN General Assembly, the IADL and other appropriate bodies.

To President Reagan and Congresspeople: Oust the Pol Pot Coalition from Kampuchea's Seat in the U.N.!

The murderous Pol Pot dictatorship was responsible for the massacre of almost three million people before it was overthrown in January 1979. The Kampuchean people, now in control of their own destiny, are steadily recovering from the effects of the deposed genocidal regime and rebuilding their country.

U.S. support in the U.N. for the ousted barbaric regime, however, aids and encourages continuous raids by remnant Pol Pot terrorist bands, hindering the recovery of Kampuchea and endangering peace and stability in the entire region.

We, the undersigned, demand that the Reagan administration end its support for the Pol Pot coalition in the U.N. and vote to seat the legitimate, elected government of the Kampuchean people: the People's Republic of Kampuchea.●

JOBS AND ENERGY SECURITY

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, once again, Members of this body will consider the need to fund the CRBR. As we enter this often emotional debate, I would like to keep some important facts in perspective.

The case for Clinch River rests firmly on its national importance as a research and development facility that can tap an essentially inexhaustible resource. In addition to this essential role, the CRBR will also provide two other significant national benefits:

It will generate electric power sufficient to meet the needs of a city of 200,000 people;

It will provide employment for thousands of people, and even more jobs from the secure energy supply it will create.

These aspects are well brought out in the speech "Jobs, Energy, Security and the Clinch River Project," by Mr. Robert A. Georgine, president of the Building and Construction Department of the AFL-CIO, and I ask that Mr. Georgine's comments be entered in the RECORD.

We must take heed and listern to the clear practical commonsense approach of Mr. Georgine. I urge your support by joining me in the effort to complete the Clinch River breeder project.

Mr. Georgine's comments follow:

JOBS, ENERGY, SECURITY AND THE CLINCH RIVER PROJECT

(By Robert A. Georgine)

I'd like to thank the master of ceremonies for that long and comprehensive introduction outlining my pedigree. What you could have done was just say that I was born in Chicago and that I'm a building tradesman and that I'm here and that would have been enough.

It is a great pleasure to be here today in Oak Ridge, Tennessee. I'm extremely impressed with all the progress that has been made on the Clinch River Breeder Reactor Plant Project. I only wish that more people, especially those in decision-making positions, could see the progress that has been make. Perhaps than more of them would recognize how far we've come and that Clinch River is a living and breathing and important technological demonstration project.

I also wish more people could come down here to witness firsthand the productive and cooperative environment that exists between labor and management. Work has moved along in a very smooth and efficient fashion—the application of the stabilization agreement[1] and the commitment on the part of everyone to live up to the spirit of that agreement. Both contribute to the healthy and productive atmosphere that exist here.

Organized labor has long supported the completion of the Clinch River Project, because we recognize the potential for breeder technology to supply vast amounts of electricity in the next century and even beyond. We also recognize that the nation's energy future is frighteningly unsettled. We can only be made secure by an aggressive and decisive commitment to energy research and development and demostration. Here in Oak Ridge, you have a fine example of that commitment: a commitment the nation must rededicate itself to; and I, for one, can assure you that we remain committed to Clinch River and to other efforts like it.

As labor officials, our obvious concerns related to the quality and the availability of employment for all Americans. Yet some often overlook the intricate balance required to attain the goals that we all seek. These goals depend first and foremost on a strong and a productive economy. In turn, a strong, productive economy is largely dependent on the availability of abundant and affordable energy supplies. The potential of breeder technology, a potential that is far greater than all of OPEC's oil, is one we cannot afford to ignore. As I said a moment ago, our energy future is dangerously unsettled; and when we have ready for demonstration a technology that could do as much for us as breeder technology, then we must—and we should—take advantage of it to ensure future generations that this technology will be available to meet their future needs. While I'm obviously concerned about the 4,000 or so jobs that Clinch River will create here in Oak Ridge, I'm even more concerned about the many thousands and even millions of jobs that a secure energy supply will help create.

As many of you know, I chair a relatively new coalition known as the Committee on Jobs, Environment and Technology. CJET includes among its diverse membership the U.S. Chamber of Commerce, the National Association for the Advancement of Colored People, the General Federation of Women's Clubs, the National Conference of Black Mayors, and the National Association of Manufactures, in addition to approximately seventeen trade unions. Completion of Clinch River is the Committee's first issue and first priority. Over the last five months we have been working hard to establish local chapters across the country to increase the awareness and support for Clinch River among the general public and the decision makers.

Now I mentioned CJET beacuse it is a very visible manifestation of our ongoing commitment to Clinch River, as well as the commitment that is shared by many diverse and very credible national and local organizations. Right now it appears that a decision—in fact, what might be the most important decision ever rendered on Clinch River—faces us in this Congress. I'm personally impressed by the analysis and the proposals that have come out of the Department of Energy and the utilities regarding alternate methods of financing the completion of Clinch River. The proposals clearly meet the mandate of the last Congress. They reduce the strain on the federal budget by some 40 percent and call for the infusion of a substantial amount of private funds to make up the difference. As I understand it, there is general agreement among the government, the investment community, and the utility industry that about one billion dollars can be raised.

Now that's an impressive number. It should erase once and for all any impression that private industry is not committed to seeing Clinch River built or that the commitment to, or confidence in, this project and its technology does not exist. It does exist. It exists in the more than a half billion dollars that private industry has committed to breeder programs prior to and including Clinch River. And it exists in the ability to raise that one billion dollars that I spoke of. Certainly, as has always been true with most major research and development, much of the risk must be borne by the government. But the plans that are now receiving the most attention will reduce the actual outlay of funds, and that's what the mandate from Congress called for.

So for our part, I repeat once more than we will continue to work closely with everyone involved in this Project and to make clear our continued and our irrevocable support. I am confident that once our elected officials have the time to review and to study the proposals that have been put forth, Clinch River will continue to move forward on time, on schedule, and ultimately on line; because God knows it's a long time in coming. Thank you.

[1] The labor agreement mentioned will facilities accelerated construction of the Clinch River Plant. The contract placed the project under terms of the National Nuclear Power Construction Stabilization Agreement. This 1978 accord essentially eliminates strikes and "lockouts" during construction.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. JEFFORDS) to revise and extend his remarks and include extraneous material:)

Mr. LOTT, for 15 minutes, today.

(The following Members (at the request of Mr. SIMON) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. DWYER of New Jersey, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. PEPPER, for 5 minutes, today.

Mr. CROCKETT, for 5 minutes, today.

Mr. FOLEY, for 60 minutes, on September 27.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BLILEY, to revise and extend on H.R. 3871.

(The following Members (at the request of Mr. JEFFORDS) and to include extraneous matter:)

Mr. LEWIS of Florida.

Mr. CAMPBELL.

Mr. RUDD in two instances.

Mrs. HOLT.

Mr. ZSCHAU.

Mr. DENNY SMITH.

Mr. YOUNG of Alaska.

Mr. FIELDS in two instances.

Mr. CORCORAN.

Mr. ERLENBORN.

Mr. DUNCAN.

Mr. PARRIS.

Mr. COURTER in two instances.

Mr. WILLIAMS of Ohio.

Mr. GOODLING.

Mr. MCDADE.

Mr. LAGOMARSINO.

Mr. PHILIP M. CRANE in three instances.

(The following Members (at the request of Mr. SIMON) and to include extraneous matter:)

Mr. MONTGOMERY.

Mr. FLORIO.

Mr. MORRISON of Connecticut.

Mr. RICHARDSON.

Mr. HARRISON.

Mr. MARKEY.

Mr. CLAY in two instances.

Mr. LANTOS.

Mr. EDWARDS of California.

Mr. BONIOR of Michigan.

Mr. CONYERS.

Mr. MATSUI.

Mr. EDGAR.

Mr. FLIPPO.

Mr. SOLARZ.

Mr. WEISS.

Mr. RATCHFORD.

Mr. JACOBS in two instances.

Mr. SMITH of Florida.

Mr. ROYBAL.

Mrs. BOXER.

Mr. OTTINGER.

Mr. PEPPER.

Mr. STARK in three instances.

Mr. BARNES.

Mr. GARCIA.

Mr. LEHMAN of California.

JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on September 19, 1983, present to the President, for his approval, a joint resolution of the House of the following title:

H.J. Res. 353. Joint resolution condemning the Soviet criminal destruction of the Korean civilian airliner.

ADJOURNMENT

Mr. SIMON. Mr. Speaker, on behalf of my colleague, the gentleman from Illinois (Mr. HAYES) and myself, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 48 minutes p.m.) the House adjourned until tomorrow, Wednesday, September 21, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1876. A letter from the Assistant Secretary of the Air Force (Manpower, Reserve Affairs and Installations), transmitting a draft of proposed legislation to amend section 301 of title 37, United States Code, to assure equity for members of the Reserve components in computation of hazardous duty pay; to the Committee on Armed Services.

1877. A letter from the Acting Deputy Assistant Secretary (Logistics and Communications), transmitting notice of the Air Force's decision to convert to contractor performance the consolidation containerization point function at McClellan Air Force Base, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1878. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 5-62, "Closing of Portions of Public Streets Abutting Squares 459 and 460 Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1879. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 5-63, "Rental Housing Conversion and Sale Act of 1980 Amendments and Extension Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1880. A letter from the Chairman, Japan-United States Friendship Commission, transmitting the sixth annual report of the Commission's activities covering fiscal year 1982, pursuant to section 5(b) of Public Law 94-118; to the Committee on Foreign Affairs.

1881. A letter from the Inspector General, Veterans' Administration, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1882. A letter from the Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Standing Rock Sioux Tribe in docket 119, U.S. Court of Claims, pursuant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1883. A letter from the Assistant Secretary for Human Development Services, Department of Health and Human Services, transmitting a report on voluntary foster care placement agreements, pursuant to section 102(e) of Public Law 96-272; to the Committee on Ways and Means.

1884. A letter from the Director, Office of Legislative Affairs, Agency for International Development, transmitting a letter to correct an error in the Agency's report on the allocation of funds appropriated by the Supplemental Appropriations Act of 1983, pursuant to section 653(a) of the Foreign Assistance Act of 1961, as amended, which was submitted on August 30, 1983 (Ex. Com. No. 1838); jointly, to the Committees on Appropriations and Foreign Affairs.

1885. A letter from the Comptroller General of the United States, transmitting the first of a series of reports on States implementation of the block grants authorized by the Omnibus Budget Reconciliation Act of 1981 (GAO/RCED-83-186; September 8, 1983); jointly, to the Committees on Government Operations and Banking, Finance and Urban Affairs.

1886. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation to amend section 1225(b)(2) of the Panama Canal Act of 1979; jointly, to the Committees on Post Office and Civil Service and Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3308. A bill to designate the Federal building in Las Cruces, N. Mex., as the "Harold L. Runnels Federal Building" (Rept. No. 98-360). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3379. A bill to name a U.S. post office in the vicinity of Lancaster, Pa., the "Edwin D. Eshleman Post Office" with amendments (Rept. No. 98-361). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3576. A bill to designate a Federal building in Cincinnati, Ohio, as the "John Weld Peck Federal Building" with an amendment (Rept. No. 98-362). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 1551. A bill to name the Federal building to be constructed in Savannah, Ga., as the "Juliette Gordon Low Federal Building" (Rept. No. 98-363). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 1748. A bill to name the building to be constructed in Lufkin, Tex., and leased to the United States as the "Colonel Homer Garrison, Jr.,

Federal Building" (Rept. No. 98-364). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3090. A bill to designate the Federal building at Fourth and Ferry Streets, Lafayette, Ind., as the "Charles A. Halleck Federal Building" (Rept. No. 98-365). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3303. A bill to designate the Federal building in Fort Myers, Fla., as the "George W. Whitehurst Federal Court Building" (Rept. No. 98-366). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3238. A bill to designate the U.S. Post Office Building in Flushing, N.Y., as the "Benjamin S. Rosenthal Post Office Building" (Rept. No. 98-367). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI (for himself, Mr. CONABLE, and Mr. FORD of Tennessee):

H.R. 3929. A bill to extend the Federal Supplemental Compensation Act of 1982, and for other purposes; to the Committee on Ways and Means.

By Mr. CLAY (for himself and Mr. ERLENBORN):

H.R. 3930. A bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to improve the single-employer pension plan termination insurance program, and for other purposes; jointly, to the Committee on Education and Labor and Ways and Means.

By Mr. DANNEMEYER:

H.R. 3931. A bill to require annual authorizations for amounts appropriated for the Smithsonian Institution; to the Committee on House Administration.

By Mr. FAUNTROY:

H.R. 3932. A bill to amend the District of Columbia Self-Governmental Reorganization Act, and for other purposes; to the Committee on the District of Columbia.

By Mr. FISH:

H.R. 3933. A bill to amend title 11, United States Code, with respect to forward contracts; to the Committee on the Judiciary.

By Mr. LEHMAN of California:

H.R. 3934. A bill to amend the National Housing Act to extend the authority of the Secretary of Housing and Urban Development to enter into contracts to provide assistance payments and mortgage insurance under the homeownership assistance program for lower income families; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LONG of Maryland:

H.R. 3935. A bill to restore benefits and allowances under the Job Training Partnership Act to the level payable under the Comprehensive Employment and Training Act; to the Committee on Education and Labor.

By Mr. McCLOSKEY:

H.R. 3936. A bill to prohibit new loans to be made to Communist countries, and to provide for the purchase by the United States of outstanding loans to such countries; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOORHEAD:

H.R. 3937. A bill to direct the President to provide for the award of the Purple Heart to prisoners of war held during World War I, World War II, and the Korean conflict under the same criteria applicable to prisoners of war held during the Vietnam era; to the Committee on Armed Services.

By Mr. PARRIS:

H.R. 3938. A bill to provide for a 6.9-percent pay comparability increase for Federal officers and employees, effective as of January 1, 1984; to the Committee on Post Office and Civil Service.

By Mr. LOTT (for himself, Mr. FISH, Mr. QUILLEN, Mr. BROYHILL, Mr. KINDNESS, Mr. KEMP, Mr. CHENEY, Mr. MARTIN of North Carolina, Mr. EDWARDS of Alabama, Mr. VANDER JAGT, Mr. LAGOMARSINO, Mr. LATTA, Mr. TAYLOR, Mr. LEWIS of California, Mr. HYDE, Mr. PASHAYAN, Mr. THOMAS of California, and Mr. COLEMAN of Missouri):

H.R. 3939. A bill to amend title 5, United States Code, and the Rules of the House of Representatives and the Senate to make regulations more cost effective, to insure review of rules, to improve regulatory planning and management, to provide for periodic review of regulations, and to enhance public participation in and congressional oversight and control of the regulatory process, and for other purposes; jointly, to the Committees on the Judiciary and Rules.

By Mr. RUDD:

H.R. 3940. A bill to authorize a land conveyance from the Department of Agriculture to Payson, Ariz.; to the Committee on Interior and Insular Affairs.

By Mr. WAXMAN:

H.R. 3941. A bill to amend title XIX of the Social Security Act to prohibit the charging of copayments with respect to prescribed drugs under State medicaid plans; to the Committee on Energy and Commerce.

By Mr. ZABLOCKI (for himself, Mr. BROOMFIELD, Mr. WRIGHT, Mr. FOLEY, Mr. MICHEL, Mr. LOTT, Mr. KEMP, Mr. FASCELL, Mr. HAMILTON, Mr. SOLARZ, Mr. MICA, Mr. BARNES, Mr. CROCKETT, Mr. GEJDENSON, Mr. LANTOS, Mr. SMITH of Florida, Mr. BERMAN, Mr. REID, Mr. FEIGHAN, Mr. WINN, Mr. GILMAN, Mr. LAGOMARSINO, Mr. PRITCHARD, Mr. LEACH of Iowa, Mr. HYDE, Mr. SOLOMON, Mr. SILJANDER, and Mr. ZSCHAU):

H.J. Res. 364. Joint resolution providing statutory authorization under the war powers resolution for continued U.S. participation in the multinational peacekeeping forces in Lebanon in order to obtain withdrawal of all foreign forces from Lebanon; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

261. By the SPEAKER: Memorial of the Legislature of the U.S. Commonwealth of the Northern Mariana Islands, relative to nonvoting representation in the House of Representatives; to the Committee on Interior and Insular Affairs.

262. Also, memorial of the Legislature of the State of California, relative to water rights of areas of origin; to the Committee on Interior and Insular Affairs.

263. Also, memorial of the Legislature of the State of California relative to the American Telephone & Telegraph Co. divestiture rulings; to the Committee on Energy and Commerce.

264. Also, memorial of the Legislature of the State of California, relative to Executive Order 9066; to the Committee on the Judiciary.

265. Also, memorial of the Legislature of the State of California, relative to the U.S. Merchant Marine; to the Committee on Merchant Marine and Fisheries.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 375: Mr. GAYDOS and Mr. BRITT.

H.R. 433: Mrs. SCHROEDER.

H.R. 1016: Mr. FORD of Michigan.

H.R. 1197: Mr. SISISKY, Mr. PORTER, Mr. PANETTA, Mr. EMERSON, and Mr. ROBINSON.

H.R. 1415: Mr. FUQUA, Mr. WEBER, Mr. MORRISON of Washington, Mr. ROEMER, Mr. SPRATT, Mr. RAY, Mr. CROCKETT, and Mr. MCCOLLUM.

H.R. 1905: Mr. CAMPBELL, Mr. SEIBERLING, Mr. GINGRICH, Mr. TALLON, Mr. GEKAS, and Mr. WISE.

H.R. 1918: Mr. SMITH of Florida, Mr. KASTENMEIER, Mr. DAUB, Mr. MURPHY, Mr. TOWNS, and Mr. VANDERGRIFF.

H.R. 1942: Mr. GEJDENSON and Mr. ROE.

H.R. 2086: Mr. GEKAS.

H.R. 2226: Mr. WOLF.

H.R. 2352: Mr. MARRIOTT, Mrs. COLLINS, Mr. MARTINEZ, and Mrs. KENNELLY.

H.R. 2468: Mrs. SMITH of Nebraska.

H.R. 2837: Mr. STANGELAND and Mr. ROBINSON.

H.R. 2871: Mr. FAZIO.

H.R. 2911: Mr. EMERSON, Mr. DERRICK, Mr. RAHALL, Mr. NIELSON of Utah, Mr. MOLLOHAN, and Mr. WILLIAMS of Montana.

H.R. 2916: Mr. RINALDO and Mr. LEWIS of Florida.

H.R. 2929: Mr. RUDD.

H.R. 3045: Mr. BOUCHER.

H.R. 3072: Mr. TORRICELLI.

H.R. 3265: Mr. MITCHELL, Mr. DE LUGO, Mr. STOKES, and Mr. FAZIO.

H.R. 3273: Mr. DANIEL.

H.R. 3325: Mr. BERMAN.

H.R. 3350: Mr. WISE.

H.R. 3354: Mr. LAGOMARSINO, Mr. COUGHLIN, Mr. GORE, Mr. GUNDERSON, Mr. FRANK, Mr. HARTNETT, Mr. GINGRICH, Mr. PETRI, and Mr. PARRIS.

H.R. 3405: Mr. FOGLIETTA, Mr. FRANK, Mr. HARRISON, Mr. CORRADA, Mr. FROST, Mr. BOXER, Mr. SMITH of Florida, Mr. WON PAT, Mr. RATCHFORD, Mr. LELAND, Mr. LANTOS, Mr. TOWNS, and Mr. VENTO.

H.R. 3591: Mr. FOGLIETTA.

H.R. 3616: Mr. BROWN of California, Mr. DWYER of New Jersey, Mr. CORRADA, Mr. MORRISON of Connecticut, Mr. CONYERS, Mr. REID, Mr. FISH, Mr. CLINGER, Mr. WEAVER, Mr. PENNY, Mr. CORCORAN, Mr. VENTO, Mr. SCHEUER, Mr. YATES, Mr. MINETA, Mr. RICHARDSON, Mr. ECKART, Mr. MCNULTY, Mr. LEVIN of Michigan, and Mr. LAFALCE.

H.R. 3635: Mr. RAHALL and Mrs. ROUKEMA.

H.R. 3681: Mr. LATTA, Mr. WILEY, Mr. BEILENSON, and Mr. KINDNESS.

H.R. 3697: Mr. WEISS.

H.R. 3755: Mr. SHANNON, Mr. JACOBS, Mr. MATSUI, Mr. ANTHONY, Mr. ROYBAL, Mr. WRIGHT, Mr. CONTE, Mr. SHUMWAY, Mr. SYNAR, Mr. OBERSTAR, Mr. VENTO, Mr. SISISKY, Mr. CLARKE, Mr. MACKAY, Mr. MOLLO-

HAN, Mr. RAHALL, Ms. OAKAR, Mr. FORD, of Tennessee, and Mr. PEPPER.

H.R. 3870: Mrs. ROUKEMA.

H.J. Res. 176: Mr. GEJDENSON, Mr. BERMAN, Mr. FEIGHAN, Mr. DIXON, Mr. WIRTH, Mr. KOGOVSEK, Mr. COLEMAN of Missouri, Mr. BOUCHER, Mr. DUNCAN, and Ms. SNOWE.

H.J. Res. 239: Mr. HERTEL of Michigan, Ms. MIKULSKI, Mr. OTTINGER, Mr. SKELTON, Mr. FRENZEL, Mrs. BURTON of California, Mr. ANTHONY, Mr. HOYER, Mr. WAXMAN, Mr. WIRTH, Mrs. COLLINS, Mr. KOGOVSEK, Mr. RICHARDSON, Mr. CLAY, and Mr. CORCORAN.

H.J. Res. 240: Mr. BARNES.

H.J. Res. 241: Mr. BARNES.

H.J. Res. 284: Mr. ROE, Mr. BROWN of California, Mr. WALKER, Mr. SCHEUER, Mr. HARKIN, Mr. GREGG, Mrs. LLOYD, Mr. MCGRATH, Mr. WALGREN, Mr. SKEEN, Mrs. SCHNEIDER, Mr. GORE, Mr. LOWERY of California, Mr. YOUNG of Missouri, Mr. CHANDLER, Mr. BATEMAN, Mr. NELSON of Florida, Mr. BOEHLERT, Mr. LUNDINE, Mr. MCCANDLESS, Mr. RALPH M. HALL, Mr. LEWIS of Florida, Mr. MCCURDY, Mr. DYMALLY, Mr. SIMON, Mr. MINETA, Mr. DURBIN, Mr. ANDREWS of Texas, Mr. MACKAY, Mr. VALENTINE, Mr. REID, Mr. TORRICELLI, Mr. BOUCHER, Mr. MCDADE, Mr. MICHEL, Mr. FLIPPO, Mr. DASCHLE, Mr. MARTINEZ, Mr. JENKINS, Mr. WATKINS, Mr. UDALL, Mr. MCEWEN, Mr. STENHOLM, Mr. WILSON, Mr. WHITLEY, Mr. GREEN, Mr. RICHARDSON, Mr. PEPPER, Mr. PANETTA, Mr. BEDELL, Mr. MCKINNEY, Mr. DE LUGO, Mr. HYDE, Mr. TALLON, Mr. KASICH, Mrs. HOLT, Mr. HORTON, Mr. HUGHES, Mr. WON PAT, Mr. NIELSON of Utah, Mr. SABO, Mr. YOUNG of Alaska, Mr. BARNARD, Mr. HUTTO, Mr. COATS, Mr. BERMAN, Mr. WHITEHURST, Mr. CROCKETT, Mr. BARTLETT, Mr. WYDEN, Mr. CORRADA, Mr. NEAL, Mr. SUNIA, Mr. LELAND, Mr. BOLAND, Ms. FIEDLER, Mr. DWYER of New Jersey, Mr. HANSEN of Idaho, Mr. PATTERSON, Mrs. BOXER, Mr. CHAPPELL, Mr. BEVILL, Mr. GINGRICH, Mr. FOWLER, Mr. WOLPE, Mr. GRAMM, Ms. FERRARO, Mr. GAYDOS, Mr. FIELDS, Mr. FOGLIETTA, Mr. FAZIO, Mr. FEIGHAN, Mr. DICKS, Mr. GUARINI, Mr. BROOKS, Mr. EVANS of Iowa, Mr. DANIEL, Mr. PASHAYAN, Ms. OAKAR, Mr. O'BRIEN, Mr. MAVROULES, Mr. MATSUI, Mr. MARRIOTT, Mr. KEMP, Mr. LAGOMARSINO, Mr. FORSYTHE, Mr. WORTLEY, Mr. KILDEE, Mr. DEWINE, Mr. WOLF, Mr. HOYER, Mr. BARNES, Mr. FORD of Tennessee, Ms. MIKULSKI, Mr. EVANS of Illinois, Mr. SMITH of Florida, Mr. VANDERGRIFF, Mr. STOKES, Mr. MYERS, Mr. BONER of Tennessee, Mr. THOMAS of California, Mr. MOORHEAD, Mr. LIPINSKI, Mr. TRAXLER, Mr. RATCHFORD, Mr. SKELTON, Mr. MCNULTY, Mr. LEWIS of California, Mr. STANGELAND, Mr. LANTOS, Mr. HEFTEL of Hawaii, Mr. ORTIZ, Mr. LEVINE of California, Mr. FRENZEL, Mr. KAZEN, Mr. DREIER of California, Mr. VENTO, Mr. KRAMER, Mr. WAXMAN, Mr. MORRISON of Washington, Mr. LIVINGSTON, Mr. FROST, Mr. CORCORAN, Mr. WIRTH, Mr. RINALDO, Mr. ARCHER, Mr. FISH, Mrs. MARTIN of Illinois, Mr. SHELBY, Mr. EDGAR, Mr. WHITTAKER, Mr. BRITT, Mr. BILIRAKIS, Mr. MCHUGH, Mr. DE LA GARZA, Mr. ADDABBO, Mr. WHEAT, Mr. GEKAS, Ms. SNOWE, Mr. WEISS, Mr. MCCOLLUM, Mr. BADHAM, Mr. BERMAN, Mr. BEREUTER, Mr. OWENS, Mr. HAMMERSCHMIDT, Mr. HATCHER, Mr. GEPHARDT, Mr. HAWKINS, Mr. BREAUX, Mr. CONYERS, Mr. CHAPPIE, Mr. HARRISON, Mr. SAM B. HALL, JR., Mr. CLAY, Mr. HANSEN of Utah, Mr. LONG of Maryland, Mr. EMERSON, Mr. SISISKY, and Mr. SHUMWAY.

H.J. Res. 292: Mr. LENT, Mr. GARCIA, Mr. KOSTMAYER, Mr. HALL of Ohio, Mr. GRADISON, Mr. IRELAND, Mr. BROYHILL, Mr. BEILENSON, Mrs. MARTIN of Illinois, Mr. MAZZOLI, Mr. LEVIN of Michigan, Mr. STOKES, Ms. FERRARO, Mr. ARCHER, Mr. DICKS, Mr. LAGOMARSINO, Mr. HOWARD, Mr. HAWKINS, Mr. FRANK, Mr. MCDADE, Mr. CONABLE, Mr. CONYERS, Mr. TRAXLER, Mr. THOMAS of California, Mr. HARRISON, Mr. FLORIO, Mr. BEVILL, and Mr. SHELBY.

H.J. Res. 333: Mr. HUGHES, Mr. FORSYTHE, Mrs. BOXER, Mr. FRANK, Mr. MINETA, Mr. DASCHLE, Mr. DYMALLY, Mr. FAZIO, Mr. CONYERS, Mr. OWENS, Mr. VANDERGRIFF, Mr. STOKES, Mr. FISH, Mr. FOGLIETTA, and Mr. HORTON.

SMITH, Mr. DYMALLY, Mr. DASCHLE, Mr. DIXON, Mr. DANIEL, Mr. LOEFFLER, Mr. WINN, Mr. WYDEN, Mr. VANDERGRIFF, Mr. MCNULTY, Mr. STUMP, Mr. SUNIA, Mr. WON PAT, Mr. BONIOR of Michigan, Mr. YOUNG of Missouri, Mr. HUTTO, Mr. BEVILL, Mr. DENNY SMITH, Mr. STENHOLM, Mr. MORRISON of Washington, Mr. DWYER of New Jersey, Mr. LEWIS of California, Mr. HANCE, Mr. TALLON, Mr. SOLOMON, Mr. HORTON, Mr. WHITTAKER, Mr. MAVROULES, Mr. OBERSTAR, Mr. ROE, Mr. FRENZEL, Mr. TORRICELLI, Mr. MADIGAN, Mr. PATTERSON, Mr. BEDELL, Mr. NEAL, Mr. BARNARD, Mr. LUKEN, Mr. GORE, Mr. FISH, Mr. ROEMER, Mr. MOORE, Mr. BREAUX, Mrs. BOGGS, Mr. LONG of Louisiana, Mr. ZSCHAU, Mr. MCCURDY, Mr. WAXMAN, Mr. OXLEY, Mr. FAZIO, Mr. JEFFORDS, Mr. GRAMM, Mr. RALPH M. HALL, Mr. WILSON, Mr. EDGAR, Mr. BRYANT, Mr. DERRICK, Mr. DOWDY of Mississippi, Mr. FASCELL, Mr. NATCHER, Mr. HAMMERSCHMIDT, Mr. LAGOMARSINO, Mr. HIGHTOWER, Mr. CHAPPELL, and Mr. DE LA GARZA.

H.J. Res. 348: Mr. VENTO and Mr. STOKES.

H. Con. Res. 142: Mr. CHAPPIE.

H. Con. Res. 156: Mrs. BOXER, Mr. COYNE, Mr. FOGLIETTA, Mr. LELAND, Mr. NEAL, Mr. ECKART, Mr. FORSYTHE, Mr. KOGOVSEK, Mr. COURTER, Mr. LEHMAN of Florida, Mr. FRANK, Ms. FERRARO, Mr. HORTON, Mr. MRAZEK, Mr. WAXMAN, Mr. LEVINE of California, Mr. FASCELL, Mr. LAFALCE, Mr. MITCHELL, Mr. BARNES, Mr. CONYERS, Mr. HUGHES, Mr. WILLIAMS of Montana, Mr. OLIN, Ms. KAPTUR, Mr. EVANS of Illinois, Mr. MCNULTY, Mr. TALLON, and Mr. BEDELL.

H. Res. 191: Mr. FOGLIETTA.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

232. By the SPEAKER: Petition of the De Witt County Taxpayers League, Yoakum, Tex., relative to national defense; to the Committee on Armed Services.

233. Also, petition of Raymon Ramos, Jr., et al., relative to political dissenters in the Philippines; to the Committee on Foreign Affairs.

234. Also, petition of the Board of Supervisors, County of Los Angeles, Calif., relative to the Soviet Union's attack on the Korean Air Lines passenger airplane; to the Committee on Foreign Affairs.

235. Also, petition of the Common Council of the City of Utica, N.Y., relative to shooting down of the South Korean airliner; to the Committee on Foreign Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1036

By Mr. SOLOMON:

—Page 45, after line 24, insert the following new subsection:

"(i) The Secretary shall insure that each individual participating in any program established under this Act, or receiving any assistance or benefit under this Act, has not violated section 3 of the Military Selective Service Act (50 U.S.C. App. 453) by not presenting and submitting to registration as required pursuant to such section. The Director of the Selective Service System shall cooperate with the Secretary in carrying out this section."

H.R. 2144

By Mr. SIMON:

(Amendment in the nature of a substitute.)

—Strike all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Challenge Grant Amendments of 1983".

SEC. 2. Part C of title III of the Higher Education Act of 1965 (hereinafter in this Act referred to as "the Act") is amended by adding after section 332 the following new section:

"ENDOWMENT GRANTS

"SEC. 333. (a)(1) The purpose of this section is to establish a program to provide matching grants to eligible institutions of higher education in order to establish or increase endowment funds at such institutions, to provide additional incentives to promote fundraising activities by such institutions, and to foster increased independence and self-sufficiency at such institutions.

"(2) For purposes of this section:

"(A) The term 'endowment fund' means a fund established by State law, by an institution of higher education, or by a foundation which is exempt from taxation and is maintained for the purpose of generating income for the support of the institution, but which shall not include real estate.

"(B) The term 'endowment fund corpus' means an amount equal to the grant or grants awarded under this section plus an amount equal to such grant or grants provided by the institution.

"(C) The term 'endowment fund income' means an amount equal to the total value of the endowment fund established under this section minus the endowment fund corpus.

"(b)(1) From sums available for this section under section 347, the Secretary is authorized to award endowment grants to eligible institutions of higher education to establish or increase an endowment fund at such institution. Such grants shall be made only to eligible institutions described in paragraph (4) whose applications have been approved pursuant to subsection (g).

"(2) No institution shall receive a grant under this section, unless such institution has deposited in its endowment fund established under this section an amount equal to the amount of such grant. The source of funds for this institutional match shall not include Federal funds or funds from an existing endowment fund.

"(3)(A) The period of a grant under this section shall be not more than 20 years.

"(B) During the grant period, an institution may not withdraw or expend any of the endowment fund corpus.

"(C) After the termination of the grant period, an institution may use the endow-

ment fund corpus plus any endowment fund income for any educational purpose.

"(4)(A) An institution of higher education is eligible to receive a grant under this section if it is an eligible institution as described in section 331(a)(1) (A) or (B).

"(B) No institution shall be ineligible for an endowment grant for a fiscal year by reason of the previous receipt of such a grant but no institution shall be eligible to receive such a grant for more than two fiscal years out of any period of five consecutive fiscal years.

"(5) An endowment grant under this section to an eligible institution year shall—

"(A) not be less than $50,000 for any fiscal year; and

"(B) not be more than (i) $250,000 for fiscal year 1984; or (ii) $500,000 for fiscal year 1985 or any succeeding fiscal year.

"(6)(A) An eligible institution may designate a foundation, which was established for the purpose of raising money for the institution, as the recipient of the grant awarded under this section.

"(B) The Secretary shall not award a grant to a foundation on behalf of an institution unless—

"(i) the institution assures the Secretary that the foundation is legally authorized to receive the endowment fund corpus and is legally authorized to administer the fund in accordance with this section and any implementing regulations;

"(ii) the foundation agrees to administer the fund in accordance with the requirements of this section and any implementing regulation; and

"(iii) the institution agrees to be liable for any violation by the foundation of the provisions of this section and any implementing regulations, including any monetary liability that may arise as a result of such violation.

"(c)(1) An institution awarded a grant under this section shall enter into an agreement with the Secretary containing satisfactory assurances that it will (A) immediately comply with the matching requirements of subsection (b)(2), (B) establish an endowment fund independent of any other such fund of the institution, (C) invest the endowment fund corpus, and (D) meet the other requirements of this section.

"(2)(A) An institution shall invest the endowment fund corpus and endowment fund income in low risk securities in which a regulated insurance company may invest under the law of the State in which the institution is located such as a federally insured bank savings account or comparable interest bearing account, certificate of deposit, money market fund, mutual fund, or obligations of the United States.

"(B) The institution, in investing the endowment fund established under this section, shall exercise the judgment and care, under the circumstances then prevailing, which a person of prudence, discretion, and intelligence would exercise in the management of his own affairs.

"(3)(A) An institution may withdraw and expend the endowment fund income to defray any expenses necessary to the operation of such college, including expenses of operations and maintenance, administration, academic and support personnel, construction and renovation, community and student services programs, and technical assistance.

"(B)(1) Except as provided in clause (ii), an institution may not spend more than 50 per centum of the total aggregate endowment fund income earned prior to the time of expenditure.

"(ii) The Secretary may permit an institution to spend more than 50 per centum of the endowment fund income notwithstanding clause (i) if the institution demonstrates such an expenditure is necessary because of (I) a financial emergency, such as a pending insolvency or temporary liquidity problem; (II) a life-threatening situation occasioned by a natural disaster or arson; or (III) another unusual occurrence or exigent circumstance.

"(d)(1) If at any time an institution withdraws part of the endowment fund corpus, it shall repay to the Secretary an amount equal to 50 per centum of the withdrawn amount, which represents the Federal share, plus income earned thereon. The Secretary may use such repaid funds to make additional endowment grants, or to increase existing endowment grants, to other eligible institutions.

"(2) If an institution expends more of the endowment fund income than is permitted under subsection (c), the grantee shall repay the Secretary an amount equal to 50 per centum of the amount improperly expended (representing the Federal share thereof). The Secretary may use such repaid fund to make additional endowment grants, or to increase existing endowment grants, to other eligible institutions.

"(e) An institution receiving a grant under this section shall provide to the Secretary (or his designee) such information (or access thereto) as may be necessary to audit or examine expenditures made from the endowment fund corpus or income in order to determine compliance with this section.

"(f) In selecting eligible institutions for grants under this section for any fiscal year, the Secretary shall—

"(1) give priority to an applicant which is a recipient of a grant made under part A or B of this title during the academic year in which the applicant is applying for a grant under this section; and

"(2) give priority to an applicant with a greater need for such a grant, based on the current market value of the applicant's existing endowment in relation to the number of full-time equivalent students enrolled at such institution;

"(3) consider—

"(A) the effort made by the applicant to build or maintain its existing endowment fund; and

"(B) the degree to which an applicant proposes to match the grant with nongovernmental funds.

"(g) Any institution which is eligible for assistance under this section may submit to the Secretary a grant application at such time, in such form, and containing such information as the Secretary may prescribe. Subject to the availability of appropriations to carry out this section and consistent with the requirement of subsection (f), the Secretary may approve an application for a grant if an institution, in its application, provides adequate assurances that it will comply with the requirements of this section.

"(h)(1) After notice and an opportunity for a hearing, the Secretary may terminate and recover a grant awarded under this section if the grantee institution—

"(A) expends portions of the endowment fund corpus or expends more than the permissible amount of the endowment funds income as prescribed in subsection (c)(3);

"(B) fails to invest the endowment fund in accordance with the investment standards set forth in subsection (c)(2); or

"(C) fails to properly account to the Secretary concerning the investment and expenditures of the endowment funds.

"(2) If the Secretary terminates a grant under paragraph (1), the grantee shall return to the Secretary an amount equal to the sum of the original grant or grants under this section plus income earned thereon. The Secretary may use such repaid funds to make additional endowment grants, or to increase existing endowment grants, to other eligible institutions.".

SEC. 3. Section 347 of the Act is amended—

(1) by inserting after the period at the end of subsection (a)(2) the following: "Of the amount appropriated for such part for fiscal year 1984, 20 per centum shall be available for grants under section 333 of such part, and of the amount appropriated for such part for fiscal year 1985, 100 per centum shall be available for grants under such section"; and

(2) by adding at the end thereof the following new subsection:

"(f) For each fiscal year, the Secretary may reserve from the appropriation for part B not more than an amount equal to the aggregate amount grantees receiving grants under part B would contribute under section 324 to the cost of the grants in that fiscal year, assuming the grant amounts remain the same as those received in the prior fiscal year, and may use those funds to award grants to eligible institutions under section 333. In reserving and awarding such funds, the Secretary shall assure that funds that would have been reserved under part B for the institutions described in subsection (c) or (e) shall continue to be set aside under section 333 for those institutions.".

SEC. 4. (a) Section 516(c) of the Omnibus Education Reconciliation Act of 1981 is amended by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) The total amount of appropriations to carry out title III of the Higher Education Act of 1965 shall not exceed $134,416,000 for fiscal year 1984.".

(b) Section 503 of such Act is amended by striking out "1982, 1983, and 1984" and inserting in lieu thereof "1982 and 1983 and $159,700,000 for fiscal year 1984".

(c) Notwithstanding section 516(g) of such Act, there are authorized to be appropriated such sums as may be necessary to carry out parts A and B of title VII of the Higher Education Act of 1965.

(d) Subsections (a)(2), (b) and (c) of section 721 of the Higher Education Act of 1965 shall not apply to funds appropriated by Public Law 98-63 for part B of title VII of the Higher Education Act of 1965. Such funds shall be used in accordance with section 713(g) of such Act and distributed in accordance with the statement of the managers pertaining to the appropriation of such funds, as contained in the conference report on Public Law 98-63 (H. Rep. 98-308, p. 53).

SENATE—*Tuesday, September 20, 1983*

(Legislative day of Monday, September 19, 1983)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

If any of you lack wisdom, let him ask of God, that giveth to all liberally, and upbraideth not; and it shall be given him. But let him ask in faith.—James 1 :5, 6, KJV.

God of all wisdom, when the discussion and debate are finalized, when everything that can be said has been, the time for decision has come, and the buck stops with Congress and the White House. Many have made loud noises, but they are free from this awesome responsibility. They can criticize and complain, but they do not have to decide. And dear God, the destiny of the whole world often rides on these decisions.

Father in Heaven, in these critical hours, when the world could explode in a conflagration, guide the Senators and the President as they face this monumental burden. In the loneliness of decision, reassure them that Thou art willing to lead them through the tangled web of confusing and contradictory alternatives to a righteous judgment. In the name of the Prince of Peace, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, when the Senate completes its opening formalities today and the time for the recognition of the two leaders has expired and the special order and morning business, at 11:45 a.m., we shall return to the Interior appropriations bill. I am advised by the distinguished chairman of the subcommittee that he thinks we can finish this bill today. We made good progress yesterday. If my memory serves me, we disposed of 17 amendments and a number of colloquies. We are probably more than halfway through. The major controversies on this measure apparently will not be submitted. I am speaking primarily of the WPPSS issue. In a word, I would like to finish this bill today if we can, Mr. President, and I think we can.

It will be the intention of the leadership on this side to ask the Senate to turn to the consideration of the revenue sharing reauthorization bill after the completion of the Interior appropriations bill. I have advised the minority leader of this in private conversations before the opening and it has been on our list of things that might be brought up for sometime. I hope no Senator is taken by surprise by this announcement. I believe they should not be. We do not have a time agreement on that bill yet but we should have, in my opinion. I hope staff on both sides of the aisle will work to that end.

In any event, it is the wish of the leadership on this side that the Senate turn to the consideration of the reauthorization as soon as we finish Interior appropriations. I assume that will be on Wednesday. It could be this afternoon, depending on how fast Interior appropriations is completed.

After revenue sharing reauthorization, Mr. President, it is the hope of the leadership on this side that we shall turn to the consideration of one of the three bills from the Foreign Relations Committee or related to foreign policy matters. That is, State Department authorization or Export-Import Bank, which is from the Banking Committee but international in character, and the foreign assistance authorization bill—one of those three—this week. I have talked to the distinguished chairman of the Committee on Foreign Relations this morning. I have not yet had an opportunity to talk to Senator GARN, who is chairman of the Banking Committee, but I hope one of these will be taken up.

My own personal choice would be to take up the State authorization bill, since it is one of the line agencies that does not yet have an authorization bill addressed by the Senate. Whatever we do in that respect I hope we can do by the close of business on Thursday or perhaps earlier. It is the intention of the leadership on this side to ask the Senate to turn to the consideration of the Martin Luther King, Jr., holiday bill on Thursday afternoon or on Friday, depending on when we finish the State Department authorization or whichever of those three bills we decide to go to. I have previously indicated that bill will be taken up this week and it is my intention to do so.

As I said at the beginning of this week, this will be a full week. We shall certainly be in on Friday, Mr. President. Depending on circumstances, there is at least some possibility that it may be necessary to have a Saturday session. I do not think so but I wish Senators would at least take account of that possibility simply because there are 16 days left, counting Saturdays—I repeat, counting Saturdays—before the October 7 break.

That means there are only 14 working days left if we do not count Saturdays. So we have a good bit to do in the ordinary course of events, to say nothing of a continuing resolution and a debt limit bill, perhaps, and appropriations bills as they are available, and other matters that I have discussed with the minority leader, such as authorization bills, some of which I have mentioned this morning. And, of course, Mr. President, there is the possibility of taking up a resolution relating to the status of American personnel in the Middle East.

I do not know that we shall reach that. Under the statute, it is not necessary that we reach it before we go out on the 7th, but it is my view that if we can work out an accommodation on a bipartisan basis and with the President, we ought to do promptly whatever we are going to do. If we cannot work it out, we shall find a mutually convenient way to address the issue under the terms of the War Powers Act.

The clock is running on that act by reason of the introduction of two resolutions—certainly one, the Mathias resolution. But I reiterate, Mr. President, if it is possible to work this thing out, I would like to do it promptly, sooner rather than later.

I shall consult with the minority leader further on that matter of scheduling. I bring this matter up only to point out that, in addition to the regular work we have to do, it might be severely increased by the necessity to deal with the resolution of the War Powers Act even before we go out. While there is a time limitation of 3 calendar days on such resolution, it would still be a major part of the 16 days remaining to us, or maybe 14 days if we are not in on Saturdays.

Mr. President, these rambling remarks are to sort of set the stage for our agenda between now and the 7th of October. It is the intention of the leadership on this side to ask the Senate to go out on the 7th of Octo-

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

ber. Members have made plans and, absent an extraordinary national emergency or such compelling reasons that we could not do otherwise, it is the firm intention of the leadership to ask the Senate to adjourn on the 7th of October for the 10 days in which both the House and Senate are scheduled not to be in session.

In brief résumé, Mr. President, I hope we finish the Interior appropriations bill today, to be followed by revenue-sharing reauthorization, to be followed by State authorization for one of the foreign operations-type bills, one of the other two, to be followed by the Martin Luther King, Jr., holiday bill, and such other matters as may be cleared on both sides to deal with.

The Senate will be in session 5 full days this week, with some possibility of a Saturday session, which I do not now predict but which I wish to warn Senators about. I will have a further announcement, Mr. President, about the schedule for next week after the matter is a little clearer.

Mr. President, I am prepared now to yield my remaining time to the minority leader.

Mr. President, if I might impose on the time of the minority leader for one further question. Last evening we had a folder of so-called wrap-up material. Would the minority leader be in a position to do those things after his standing order time today as the first item of business in morning business, or during leader time, if he wishes?

Mr. BYRD. Mr. President, in response to the majority leader, I had a few remarks to make, but they will not consume the 10 minutes that I am entitled to under the order, so we can do those during that 10-minute period.

Mr. BAKER. I thank the minority leader. If there is any time remaining, I urge that we do the wrap-up as soon as we can.

Mr. President, may I recapture enough time to yield to the distinguished Senator from Mississippi?

Mr. STENNIS. Mr. President, I appreciate the accommodation of the leader.

The PRESIDENT pro tempore. The Senator may proceed.

THE WAR POWERS RESOLUTION

Mr. STENNIS. Mr. President, I am here at this moment primarily concerning what we are going to do about the War Powers Act. I am not trying to demand or insist on any particular thing being done right now, as tragic as the world affairs likely are. But we are in disagreement. We must work together some way, if at all possible; that being the legislative and the executive branch.

I have been interested in this for many years, since the Vietnamese war, particularly. I think that we make a great mistake if we sidetrack that now, as urgent as these other matters are.

Mr. BAKER. I agree with the Senator.

Mr. STENNIS. I am glad to see the concern of the majority leader and I know the Senator from West Virginia is concerned, also.

I have no full answer. I am not advocating that we just pull out of Lebanon. But I think there is something fundamental about this problem and I think we should find a way to understand each other, the executive and the legislative, within a ground of machinery of action when it becomes necessary.

So I want to encourage the leaders to continue to grapple with this matter.

I have some brief remarks prepared about it, but I will not go into it further now. But the problem is No. 1 of all of our affairs concerning a war and the possibility of a war and policy questions.

Mr. BAKER. Mr. President, I thank the Senator. I read a newspaper account this morning recounting the early words of caution and concern expressed by the Senator from Mississippi on the War Powers Act and about the general situation of the relationship with the Congress and the President in terms of international policy and national defense. He has been a leader in this field and a clear thinker for longer than I have been in the Senate and I commend him for it.

Let me take just 30 seconds, if I may, so I do not unduly impose upon the miniority leader's time, to express my view.

Mr. President, my first duty is to my country. My second duty is to the Senate. My third duty is to see, if possible, that there is a functional arrangement between the President and the Congress to address effectively the great issues that confront us. It is in the second and third category that I am now trying to discharge an obligation.

The concern I have, Mr. President, is that we find some way to express what I believe is a substantial support within the Congress and within the country for American action in the Middle East without infringing on the authority, either constitutional or statutory, of the Congress and without diminishing the authority and responsibility of the President of the United States.

That is not an easy job, but I am persuaded that there is a possibility we can work that out. I have communicated directly with the President on this subject, with the Secretary of State, with the President's National Security Adviser, with the minority leader, with representatives of the Speaker, Congressman MICHEL, Senator PERCY, and Congressman ZABLOCKI. I tried to sample opinions from many sources to try to put together some sort of a vehicle to avoid technicalities and get down to the issue.

I would report to the Senate and to my friend from Mississippi that I have found absolute good faith and cooperation among everyone of those people. I told the minority leader yesterday that if and as there is a resolution produced that I think has a chance of going, I intend to submit it to him because he and I must work together if possible in this body to see that we discharge our responsibilities.

So that while I have no answers, as the Senator from Mississippi indicates he has no answers, I wish to assure him that I believe I recognize the urgent need involved, to report that negotiations are underway, and that I am hopeful that a combination and not a confrontation can be arrived at.

Mr. STENNIS. I thank the majority leader. I am glad to hear this report, which I think is encouraging. I thank the Senator very much.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I apologize to the minority leader for taking this additional time, perhaps out of his time, and I ask unanimous consent that if I have encroached on his time, it be restored to him under the standing order.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. BYRD. Mr. President, I thank the majority leader for his characteristic courtesy. I think I will require the full 10 minutes and perhaps more, but little more, if at all. I will try to avoid that. So do I have 10 minutes, Mr. President?

The PRESIDENT pro tempore. Yes. The minority leader is correct.

Mr. BYRD. I thank the distinguished Presiding Officer, the President pro tempore of the Senate.

CONGRESS AND FOREIGN POLICY

Mr. BYRD. Mr. President, I am becoming increasingly concerned over what appears to be an escalation of attacks by administration spokesmen regarding the role of Congress in the conduct of foreign policy.

These attacks imply that the Congress does not have any role in the fashioning of our policies as they relate to the rest of the world or to decisions which may place the lives of American servicemen on the line. These statements, far from seeking bipartisan cooperation in the area of foreign policy, are directed at exclu-

sion of the Congress from its constitutionally mandated role.

Just a few days ago, the third highest ranking official in the Pentagon, Mr. Fred C. Ikle—I hope I am not mispronouncing his name—delivered what I considered one of the most inappropriate and bellicose attacks on the Congress that I have ever witnessed in my 31 years as an elected official representing my constituents from West Virginia on Capitol Hill.

Mr. Ikle claimed that the Congress was, according to newspapers, crippling the President's military assistance program in latin America and that this would cause the United States to be locked into a protracted failure in that region. Mr. Ikle claimed that the Congress was tying the President's hands and denying to the President the means to succeed in that region. Mr. Ikle further stated that the American people should not tolerate Congress. He claimed further that the legislative actions of the Congress would enable the promoters of totalitarianism and totalitarian-Leninist forces to operate in Latin America from safe havens that would be protected by the U.S. Congress.

I think that is simply outrageous. That is outrageous, Mr. President.

These are extreme statements and an uncalled-for attack upon the integrity of the Congress which ignore the role that Congress must play in fashioning reasonable and enduring policies regarding our global obligations. And in his attack on Congress he was not distinguishing between Democrats and Republicans. The Congress is made up of Republicans and Democrats. When he attacks the Congress, he attacks both Republicans and Democrats, many of whom, if not most of whom, are certainly as zealous as I am in guarding the constitutional prerogatives of the Congress in matters affecting war and peace.

What it worse is that is appears Mr. Ikle's remarks might not have been the untempered, isolated, or off-the-cuff observations of a minor administration official. The New York Times on September 12, 1983, reported that unnamed senior administration officials viewed the speech by Mr. Ikle as the kickoff of an intense campaign to get congressional support for its military assistance request for Latin America.

The Times reported an unnamed administration official as stating the administration had had it with opposition in the Congress—they have had it with opposition in the Congress—and that the administration was fed up with their interference, meaning the Congress.

I would like to set the record straight on the congressional role as it relates to Central America.

Only recently has the Congress refused to approve the full amount of administration security assistance requests for Central America. In fiscal year 1981, Congress approved everything asked for. In fiscal year 1982, Congress approved everything except $35 million in military assistance to El Salvador over the initial request. This was defeated not as a result of the Central America debate but because the whole security supplement failed. Also in fiscal year 1982, Congress allocated $75 million in supplemental ESF under the Caribbean Basin Initiative rather than the full request of $128 million for El Salvador, but the total package of money for Central America was approved. It should be noted that this passed the Congress only over the President's veto. In fiscal year 1983, the Congress has approved the entire ESF request of the President for Central America. It has only balked at the sharply increased level of military aid for El Salvador. Congress approved $86.3 million in military aid instead of the $136 million requested.

Many Members of the Congress on both sides of the aisle have expressed their opposition to any expansion of the number of U.S. advisers in El Salvador beyond 55. But surely Congress has the right and the duty to hold and express such views.

The ceiling of 55 advisers is not now a congressionally imposed limit. It is the limit the administration itself adopted in 1981. Certainly if that limit were to be lifted, many Members of the Congress, including the members of the President's own party, would be critical of such an action. But that is because the President told us our direct military involvement in El Salvador would be limited, that 55 advisers were enough to do the job, and now members of his administration complain about the limit. That only indicates that their estimates of success may have been exaggerated.

Finally, the administration has sent over 100 U.S. military trainers to train Salvadoran troops in Honduras as a way of circumventing the 55-adviser limit. It has done this despite the Senate Foreign Relations Committee's explicit request that such training not be done in Third World countries lest those countries be drawn into the maelstrom of the Salvadoran war.

Radio Marti has been passed by both Houses of Congress. It was delayed not because of any congressional opposition to having radio broadcasts to Cuba but because Congress had serious reservations about the method of broadcasting that the administration was proposing. When the administration agreed to reach a compromise on that issue, the Senate passed the measure immediately.

In short, what the administration seems to be objecting to is the very fact of congressional criticism, of participation in debate on U.S. policy toward Central America. But that is the price of democracy. It is simply not true that the Congress has tied the President's hands in Central America.

I, Mr. President, repeatedly have said that I want a bipartisan foreign policy. However, a decision by the executive branch, if that is the case, to attack the Congress is not a serious way to go about forging such a bipartisan consensus. This is why I am hopeful that that speech and reports of it representing a change in the administration's methods of dealing with the Congress are an isolated incident.

I ask unanimous consent, Mr. President, to insert into the RECORD the New York Times article to which I have alluded.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PENTAGON GETS TOUGH ON LATIN POLICY

(By Philip Taubman)

WASHINGTON, Sept. 11.—The Reagan Administration, despite the objections of some top State Department officials, has decided to go on the attack against Congressional opposition to its Central America policy, according to senior Administration officials.

The new stance, which represents a break with past efforts to reach an accommodation with Congress on Central America, is scheduled to be outlined in a policy speech on Monday by the Under Secretary of Defense for Policy, Fred C. Iklé, the third ranking official in the Pentagon.

The tone of the speech, which Mr. Iklé is to deliver to the Baltimore Council on Foreign Affairs, includes some of the harshest criticism of Congress by the Reagan Administration on this or any other foreign policy issue, Administration officials said. They said it was endorsed last week by White House aides over the opposition of some State Department experts on Latin America. An advance text was made available by a foreign policy adviser involved in its preparation.

It says, in part, "As long as Congress keeps crippling the President's military assistance program, we will have a policy always shy of success." It also says: "The President's policy for Central America has not been given a chance to work, Congress has denied the President the means to succeed."

"AN ARSENAL FOR INSURGENCY"

In addition, the speech offers the clearest statement to date by the Administration on United States opposition to the Nicaraguan Government.

"We must prevent consolidation of a Sandinista regime in Nicaragua that would become an arsenal for insurgency," the text says. "If we cannot prevent that, we have to anticipate the partition of Central America. Such a development would then force us to man a new military front line of the East-West conflict, right here on our continent."

Senior Administration officials said the speech will be the kickoff for an intense Administration campaign this fall to fight for increases in security assistance to El Salvador and Honduras and against a cutoff in American support for Nicaraguan rebels.

Congress has not completed action on a series of requests for supplemental security assistance for El Salvador and Honduras for the current fiscal year, but the Senate and

House committees involved have approved less than half of the $110 million in extra money asked for El Salvador. The House voted last month to end support for Nicaraguan rebels.

"WE'RE FED UP"

"We've had it with the opposition in Congress," a senior Administration official said today. "We're fed up with their interference on one hand and their lack of support on the other and we intend to fight for what we think is a minimum American commitment in the region."

The decision to go on the attack, which was reportedly supported by Defense Secretary Caspar W. Weinberger, William P. Clark, the White House national security adviser, and William J. Casey, the Director of Central Intelligence, appears to end a protracted debate within the Administration about how best to deal with Congress on Central America.

The State Department has advocated using a conciliatory posture to try to negotiate compromises with Congress on security assistance and support for Nicaraguan rebels.

This tactic was openly ridiculed by Defense Department officials, including Mr. Iklé, who argued that the best way to handle Congress was to hold out for the Administration's goals and make Congress take responsibility if American policy failed.

Administration officials see the coming fight as a crossroads for American policy in Central America. They are particularly concerned that a failure to obtain continued financing for Nicaraguan rebels in the 1984 fiscal year, which begins next month, will lead to a serious setback for United States interests in the region. The Administration has requested $50 million to finance rebel activities in fiscal 1984.

The House, which has voted to cut off financing for the Nicaraguan rebels in fiscal 1983, is not expected to approve any money for the operation in budget bills for 1984. The Republican-controlled Senate, which has not supported last month's House cutoff, is likely to vote to extend the financing, forcing the two houses to resolve the issue when the budget legislation comes up for compromise negotiations between the House and Senate.

The text of Mr. Iklé's speech warns that a failure to extend financing could allow Nicaragua to become a "second Cuba" that would pose a direct military threat to its neighbors. In a direct slap at the House vote to cut off money for the rebels, the text says, "The House, in effect, voted to establish a sanctuary for the Sandinistas." It goes on to charge that a failure by Congress to continue financing for the rebels would be tantamount to creating "safe havens" for terrorist and insurgent attacks.

J. LYNN HELMS' STATEMENT TO INTERNATIONAL CIVIL AVIATION ORGANIZATION COUNCIL

Mr. BYRD. Mr. President, during last week's extraordinary session of the International Civil Aviation Organization Council on the Korean Air Lines tragedy, U.S. Delegate J. Lynn Helms of the Federal Aviation Agency delivered an excellent statement to the Council. Mr. Helms brought to bear his own experience in civil aviation in his remarks, and I find them to be commendably firm and decisive.

I asked that a member of the Senate Democratic Policy Committee staff attend those meetings. He did attend them, and I think certainly made a fine contribution to the discussion.

I ask unanimous consent that Mr. Helms' statement appear in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF FAA ADMINISTRATOR J. LYNN HELMS BEFORE THE EXTRAORDINARY SESSION OF THE COUNCIL OF THE INTERNATIONAL CIVIL AVIATION ORGANIZATION (ICAO)

Mr. President, Distinguished Members of Council, I need not repeat the outrage expressed at the highest levels of my Government at the interception and destruction by Soviet military aircraft of Korean Airlines Flight No. 007. We have expressed our deepest sympathy to the families of the 269 passengers and crew aboard that ill-fated aircraft who were killed in this incident. As we know, from sad experience, the attack on KAL 007 was not the first time that a civilian passenger airliner has been intercepted and destroyed. This Soviet action constitutes a grave threat to the safety of the international civil aviation system requiring urgent remedial measures.

The civilized world cannot permit this type of incident to recur. This extraordinary session of the ICAO Council must take action to initiate an investigation of this incident, condemn those responsible, and clearly reaffirm that such use of force against civil aircraft is prohibited.

Mr. President, I need not remind this distinguished audience of aviation experts that a previous incident involving a Soviet interception of a Korean Airlines Boeing 707 in 1978 prompted ICAO to revise its material in Annex 2 governing the interception of civil aircraft.

This latest event and the apparent repudiation by the U.S.S.R. of internationally accepted legal and humanitarian norms for dealing with civil aircraft has shattered the confidence in the safety and security of air travel that this new guidance, in effect only two years, was designed to restore. We deplore the failure of the Soviet Union in its official statements to acknowledge the paramount importance of the safety and lives of passengers and crew when dealing with a civil aircraft in or near its territorial airspace. The Soviet Union has told the world that it would take the same action again. The International civil aviation community must categorically reject the appalling threat of similar action in future instances.

The world must insist that the Soviet Union offer a formal apology, provide full and complete information regarding this incident, comply with its obligation under international law to make appropriate compensation, and give credible guarantees to refrain from similar action in the future. Elementary considerations of humanity dictate that the Soviet Union assist the bereaved families to visit the site of the incident and to return the bodies of the victims and their belongings promptly.

Such threats can only further weaken the international community's confidence in the safety of flight. We have a right to expect the Soviet Union to join in an endeavor to ensure that such a tragic incident never occurs again. In this regard, the United States is prepared to join with other members of this Council in putting forward a resolution which we believe could make a constructive contribution to preventing such use of force against civilian aviation in the future. We believe that the Soviet Union should be strongly condemned for this senseless and irresponsible violation of international law which resulted in the destruction of a civil aircraft—an action that is an established fact. An investigation must be conducted. The Air Navigation Commission should study ways to facilitate coordination between civilian and military aircraft and their respective air traffic control systems.

As one of the founders of the International Civil Aviation Organization, the United States looks to this organization as the recognized international forum for promoting the safe and orderly growth of civil aviation. Under the umbrella of ICAO's rules and procedures, civil aviation has become a singularly important factor in international commerce, tourism and other kinds of travel. More than 750 million passengers travelled to their international destinations in 1982. Each of the 151 members of ICAO has agreed to respect certain principles and obligations, as codified in the Convention on International Civil Aviation of 1944 and its annexes, to facilitate this travel.

The Soviet Union must, as an ICAO member, also respect these principles and obligations. It is clear to my delegation that the Soviet Union not only failed to carry out its responsibilities with regard to KAL 007 but failed in a consistent and comprehensive fashion. Let us look at the record in detail.

PRINCIPLES AND OBLIGATIONS UNDER THE CONVENTION ON INTERNATIONAL CIVIL AVIATION AND ITS ANNEXES

The countries that have joined together as parties to the Convention have agreed that the safety of flight in international air navigation is of the highest priority. To this end, States have agreed, in the exercise of their sovereignty, to work together to foster the safety of civil aircraft traversing national boundaries. It is upon this foundation that the International Civil Aviation Organization was built and it is with this basic premise in mind that the nations of the world have carried out their good work under ICAO auspices. We have recognized the unique vulnerability of the people aboard aircraft engaged in international air navigation and, have promised to conduct our activities as sovereign states accordingly. It has been and continues to be unthinkable that a commercial airliner in time of peace should operate under threat of being shot out of the sky. The world community has labelled this type of behavior from private individuals and organizations as terrorist action. For an ICAO member state to take such action against airliners which stray into their airspace, and to assert their intent to do again sets an ominous example and fundamentally inimal to the aims and objectives of the Convention.

INTERNATIONALLY AGREED UPON INTERCEPT PROCEDURES

The ICAO countries have agreed that they will "have due regard for the safety of navigation of civil aircraft" when issuing regulations for their military aircraft. It is self-evident that intercepts of civil aircraft by military aircraft must be governed by this paramount concern.

The international community has rejected deadly assault on a civil airliner by a military aircraft in time of peace as totally unacceptable. It violates not only the basic principles set forth in the Convention, but

also the fundamental norms of international law enshrined in the Charter of the United Nations and established firmly in the practice of the civilized world. This is clear from the statements and actions of States in response to each time this event has occurred in the past several decades. One example, if I may refresh the memories of my distinguished colleagues, is the position of the Soviet Union when this Council examined an incident involving the interception of a Libyan airliner in 1973. On that occasion the Soviet Union was "convinced that ICAO could not remain aloof" from such a "barbaric act".

The Soviet representative insisted that ICAO, as a specialized agency of the United Nations pledged to the promotion of air safety in all parts of the world, must strongly condemn that act, in accordance with the principles embodied in the Convention on International Civil Aviation and other international legal instruments. The Soviet Union also joined in a unanimous Assembly resolution calling for an investigation of the incident.

As a result of the deplorable attack of a KAL airliner by the USSR in 1978, the ICAO Council, on April 1, 1981, approved new and expanded material for Annex 2 on the interception of civil aircraft. This was a direct effort to ensure that such an act would not recur. The USSR was represented on the Air Navigation Commission and the ICAO Council at the time, and assisted in the preparation of these new guidelines.

The U.S.S.R.'s Airman's Information Publication (AIP) indicates that ICAO intercept signals are to be used by the U.S.S.R. Specifically, the U.S.S.R. AIP states that, at night, a military aircraft will signal the fact that it is intercepting another aircraft by:

1. "Rocking wings from a position in front and normally to the left of the intercepted aircraft", and

2. "Flashing navigational and, if available, landing lights at irregular intervals."

The U.S.S.R. AIP also contains the following:

"An aircraft which is intercepted by another aircraft shall immediately:

"(c) Attempt to establish audiocommunications with the intercepting aircraft or with the appropriate intercept control unit, making a general call on the emergency frequency 121.5 MHz and repeating this call on the emergency frequency 243 MHz, if practicable . . ."

The evidence that we have indicates the U.S.S.R. fighters did not use these intercept signals before destroying KAL 007. It is clear from communications that KAL 007 was unaware that it was being intercepted. We do not know, if the Korean airliner chose to broadcast on 121.5 MHz, that the appropriate U.S.S.R. intercept control unit has that frequency capability or, if so, was using it.

TREATMENT OF CIVIL AIRCRAFT IN PROHIBITED AREAS

States reserve the right under article 9 to restrict or prohibit operations of foreign aircraft over certain areas of their territory for reasons of military necessity or public safety. These prohibited areas must be of "reasonable extent and location so as not to interfere unnecessarily with air navigation." Further, Article 9(c) contemplates that the remedial measure for aircraft entering a prohibited area is a requirement to land within the territory of the state in which the prohibited area is located. By its actions and words, the Soviet Union has declared the right to guard its prohibited areas by the destruction of civil aircraft, even those which have left or are about to leave its airspace. Such actions clearly go far beyond the rights of States contemplated in Article 9, or reflected elsewhere in international law.

THE OBLIGATION TO ASSIST

A commercial airliner found to be flying off course should not be presumed to be hostile. It is likely that such an aircraft is lost and in need of assistance. Under Article 25 of the Convention, each ICAO state has promised "to provide such measures of assistance to aircraft in distress in its territory as it may find practicable, and to permit, subject to control by its own authorities, the owners of the aircraft or authorities of the State in which the aircraft is registered to provide such measures of assistance as may be necessitated by the circumstances."

This obligation to assist is a reaffirmation of basic principles of humanitarian behavior and is also a recognition on the part of the international community that civil aircraft are uniquely vulnerable and should, accordingly, regardless of nationality, be helped when the situation calls for help. From the statements made, it appears that the Soviet Union tracked the straying airliner for at least two hours. Then, apparently without adequate warning and without any known attempt to assist the aircraft back onto its course, the Soviet Union fired on the airliner and its 269 occupants. This action was precisely the opposite of what the Chicago Convention seeks to ensure.

OBLIGATION TO FACILITATE SEARCH AND RESCUE

The precise location of the remains of KAL 007 as of this date is not certain. However, we do know that the airliner went down in either Soviet territorial waters or in that portion of the high seas contained in the Flight Information Region (FIR) around Yuzhno-Sakhalinsk. The U.S.S.R. is assigned responsibility for this FIR under the ICAO regional air navigation plan and has accepted responsibility under annex 12 to provide search and rescue services in this area.

As an ICAO member state, the U.S.S.R. is also obliged to immediately acknowledge receipt of requests by other states to enter Soviet territory for search and rescue purposes. Further the U.S.S.R. has agreed to permit and facilitate, in accordance with such conditions as it may impose, entry into its territory by rescue units from other states for the purpose of searching for the site of an aircraft accident and rescuing any survivors of that accident. To date, the U.S.S.R. has refused to permit search and rescue units from other countries to enter Soviet territorial waters to search for the remains of KAL 007. Moreover, the Soviet Union has blocked access to the likely crash site and has refused to cooperate with other interested parties to ensure prompt recovery of all technical equipment, wreckage, and other material that may facilitate and expedite completion of an investigation.

OBLIGATION TO INVESTIGATE

The Soviet Union destroyed KAL 007 in the early morning hours of September 1. Despite widespread demands on the part of the international community for a confirmation and an explanation, the Soviet Union refused to even acknowledge its action for almost an entire week. Yet the destruction of an aircraft that was engaged in international air navigation has multinational ramifications and is of utmost international concern. Each member of ICAO has agreed under article 26 of the convention to institute an investigation into the circumstances of an aircraft accident occurring in its territory. The international community defines an accident as an occurrence involving an aircraft resulting in death or serious injury. The country in which the accident occurs also has the obligation under the treaty to invite the state of registry to attend the inquiry as an observer. It is self-evident that the Soviet destruction of the Korean airliner has international ramifications. The aircraft was registered in Korea and operated by a Korean air carrier. The aircraft, a Boeing 747, was manufactured in the United States. Two hundred sixty-nine citizens of thirteen countries were on board. The safety of all civil aircraft of countless nations that fly in or near the Soviet Union has been placed in extreme jeopardy. The Soviet Union owes the entire world an accounting as to how and why such an unthinkable event occurred.

NORTH PACIFIC COMPOSITE ROUTE SYSTEM

KAL 007 was flight planned on designated route R20 in the north Pacific composite route system (NOPAC) when for some reason it strayed off course. NOPAC was developed and implemented by the United States and Japan using accepted domestic and international procedures according to annex 11. Since the route is largely in international airspace it was coordinated using normal ICAO procedures for amendment of the regional air navigation plans. All interested states were asked for comments on the route system, including the U.S.S.R. The U.S.S.R. had no objection. On the contrary, during a meeting convened in Montreal November 12–13, 1981, the U.S.S.R. acknowledged R20 and agreed to "provide separation, in accordance with applicable ICAO provisions, between aircraft under their control and the airspace to be protected in respect of ATS routes NOPAC 2/R 20 (proposed), i.e., the airspace bounded by a line 50nm north of the route centre line, and without any coordination of information on or restrictions to flights assigned to operate thereon." By this agreement, the U.S.S.R. acknowledged the existence of R20 and the relatively less precise nature of navigation used on long, over water flights.

RADIO COMMUNICATIONS ON THE EMERGENCY FREQUENCY

Requirements in annex 10 indicate that KAL 007 should have been monitoring 121.5. Was there any attempt by the U.S.S.R. to contact KAL 007? (The United States can find no evidence of such attempts.) If so, what are the details and what is the evidence?

There are many unknowns involved in this tragic occurrence. We do not know, for example, what caused the aircraft to stray off-coursed. Some of these questions may never be answered. Some may be resolved by a technical investigation. It cannot, however, be denied that there is no answer to any of these questions that could possibly justify, under international legal and humanitarian norms, the wanton destruction of KAL 007.

U.S. RESPECT FOR ICAO

In contrast to the procedures employed by the Soviet Union in the KAL incident, the United States and other ICAO members do not use deadly force against off-course civilian airlines of other countries. The U.S.S.R has alleged in its communication to the president of ICAO that "Soviet civil air crews always comply religiously with the international standards and regulations of

ICAO when engaged in international flights." This Soviet claim is not supported by the facts. Soviet airliners have strayed from their assigned paths and over flown sensitive U.S. military installations. I have here in my hand a detailed list of Aeroflot violations in U.S. airspace, showing the date and the aircraft. Our response to these violations has been to assist the offending aircraft back to its assigned flight path, to lodge formal protests through diplomatic channels with the Soviet authorities, and apply an appropriate penalty—the suspension of Aeroflot services for a reasonable period of time. We certainly have never shot such an aircraft down.

The United States has firmly supported measures to prevent the unjustified use of force against civil aviation operations. We have actively worked to institute procedures to reduce threats from terrorists. Likewise, we have joined ICAO in responding to downing of civil aircraft in 1973 and again in 1978.

The perpetrators of this most recent tragedy have attempted to downplay their action by alleging that they were victims of a provocation. They have suggested that their military forces may have mistaken the Korean airliner for an American reconnaissance aircraft. My government has acknowledged that a RC-135 aircraft was conducting a routine reconnaissance mission in international air space off the Kamchatka Peninsula to monitor compliance with the SALT treaties. There was no connection between the RC-135 mission and the KAL flight.

The closest point of approach of the two aircraft was 75 nm. At the moment of actual interception of KAL 007, the RC-135 had been at its base in Alaska for more than an hour. Thus it is absurd to suggest that the RC 135 was there to monitor the KAL flight, or that the planes flew together for ten minutes. This group of aviation experts knows well that the silhoutte of the RC-135 is different from that of the Boeing 747, you must also share our conclusion that no military pilot using accepted intercept procedures, could fail to recognize the Boeing 747 with its distinctive features.

A majority of the members of the United Nations Security Council supported a full investigation into the circumstances of this tragedy. But a veto by the Soviet Union prevented adoption of this resolution.

This extraordinary session of the council has the most important duty of reaffirming the principles on which civil aviation has developed in an orderly and safe manner over the past four decades. We cannot shirk that responsibility. To preserve and protect those principles we must condemn this violation. We must also, through an impartial investigation, establish as clear a record as we can of the relevant facts. Each of ICAO's 151 members has subscribed to promoting a system of safe and secure international civil aviation. We can strengthen that system by taking steps to repudiate that violation and prevent recurrences. Unless we do so, we will have failed to meet our obligation to international civil aviation.

I call on this council to ensure that the "spirit of the Chicago convention" endures. That spirit requires that violators be warned, and the travelling public assured, that transgressions against the international norms of civil aviation will not be tolerated. Our success in making the airlines safe from such threat of force will be an important contribution to international peace and security. In that task, the United States is pleased to join our colleagues.

CHRONOLOGY OF REPORTED HOSTILITIES IN LEBANON

Mr. BYRD. Mr. President, in order that we may all have a clear picture of the situation in Lebanon as it has been developing during the past few weeks and in particular as it has affected the U.S. Armed Forces, I ask unanimous consent that there be printed in the RECORD at this point a chronology of some of the more significant reports of events in which our troops have been involved in that country beginning on August 28, 1983, and continuing until the present time.

There being no objection, the material was ordered to be printed in the RECORD as follows:

CHRONOLOGY

August 28, 1983.—Marines in Lebanon in fire fight at Beirut Airport for first time. "United States Marines fought a 90-minute battle with militiamen thought to be Shiite Moslems, a Marine spokesman said. There were no Marine casualties." (N.Y. Times, August 29, 1983)

August 29, 1983.—2 Marines killed in Lebanon and 14 others are wounded as Beirut fighting spreads. "Two American marines were killed and 14 wounded this morning as fierce fighting between the Lebanese Army and Moslem militiamen turned this city into an arena of exploding shells, machine-gun fire and snipers' bullets." (N.Y. Times, August 30, 1983)

August 30, 1983.—New battles rage in Beirut; 4 in France's force killed; marines again in fire fight. "Late this afternoon, American marines came under attack at all three of the positions they maintain near Beirut International Airport and were returning fire, a Marine spokesman said." (N.Y. Times, August 31, 1983)

September 1, 1983.—U.S. positioning 2,000 marines off Beirut coast. "President Reagan today ordered a 2,000-member Marine force into the Mediterranean to position itself off Beirut so 'that all necessary measures' could be taken to 'assure the safety' of the 1,370 marines already on shore." (N.Y. Times, September 2, 1983)

September 4, 1983.—Militias in Beirut battle for land vacated by Israel. "Heavy fighting erupted in the mountains overlooking the Lebanese capital today as Christian and Druse militias scrambled for positions evacuated hours earlier by Israeli troops pulling back from the Beirut area." (N.Y. Times, September 5, 1983)

September 6, 1983.—Fierce battles continue around Beirut's airport: 2 more U.S. marines killed and 3 wounded. ". . . Other Druse groups battled Lebanese Army soldiers south of the capital after two United States marines were killed and three wounded at dawn when rockets, mortars and artillery shells landed in an around the Marine base at Beirut International Airport." (N.Y. Times, September 7, 1983)

September 7, 1983.—2 French soldiers killed as shells pound on Beirut. ". . . Tonight United States Marine positions near Beirut International Airport came under artillery fire, and the marines responded with six 155-millimeter artillery rounds." (N.Y. Times, September 8, 1983)

September 8, 1983.—U.S. Navy enters Lebanon fighting shelling hill site. "A United States warship shelled an artillery emplacement in hills southeast of this capital today after gunners, presumed to be Druse militiamen, had fired at American Marine positions at the Beirut International Airport." (N.Y. Times, September 9, 1983)

September 11, 1983.—Druse militiamen battering troops of Lebanese Army. ". . . shells landed near the United States marine peacekeeping contingent deployed by Beirut International Airport, and the marines went into their highest state of alert." (N.Y. Times, September 12, 1983)

September 12, 1983.—3 marines injured in mortar attack at Beirut airport. "A new contingent of 2,000 United States marines arrived off the coast of Lebanon today. Hours later, three more marines ashore were wounded when their positions at the Beirut airport came under renewed shellfire." (N.Y. Times, September 13, 1983)

September 13, 1983.—Reagan to let marines give some aid to Lebanese Army and European Peace Forces. "The Reagan Administration announced today that the Marines in Lebanon were now authorized to call on American naval and air power not only to defend themselves but also to aid other Western forces and the Lebanese Army in certain circumstances." (N.Y. Times, September 14, 1983)

September 17, 1983.—U.S. warships fire on Lebanon area held by Syrians. "Two American Naval vessels bombarded artillery positions belonging to anti-Government forces deep inside Syrian-controlled areas of Lebanon today. The Syrians responded by saying they would retaliate against American forces if their positions were attacked." (N.Y. Times, September 18, 1983)

September 19, 1983.—U.S. warships fire in direct support of Lebanese Army. "Two United States Navy ships off Beirut fired dozens of shells today in support of Lebanese Army units defending the town of Suk al Gharb on a ridge overlooking Beirut. It was the first direct military support of the Lebanese Army by United States forces." (N.Y. Times, September 20, 1983)

Mr. BYRD. Mr. President, I also ask unanimous consent to have printed in the RECORD two items from the New York Times. The first is an article which appeared in the Saturday, September 17, issue, by Hedrick Smith, entitled "War Powers Dispute." The second is an article which appeared in Monday's edition, by Anthony Lewis, entitled "Flouting the Law."

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Sept. 17, 1983]

WAR POWERS DISPUTE

(By Hedrick Smith)

WASHINGTON, September 16.—The political stalemate over keeping American marines in Lebanon springs from a determined effort by Congressional leaders to establish an important legal precedent that President Reagan wants to avoid.

There's almost perfect unanimity on policy and the mission of the marines," said one White House official. "It's all a question of institutional pride, but it has big foreign policy implications."

Congressional leaders, and even many of President Reagan's frequent critics in Congress, concede that there is general agreement on the substance of policy but they insist that in the present case form is at least as important as substance.

From the legislature's perspective, the fundamental issue is whether Congress will

be accepted by President Reagan as a partner in the decision to put American troops into combat situations overseas or, as in this case, in the decision to keep them there once hostilities develop.

WHITE HOUSE VIEW

From the perspective of the White House, the basic issue is whether the President will be allowed enough flexibility in the use of American troops or whether Congress will dangerously tie his hands in ways that foreign adversaries can exploit.

The immediate legal issue concerns the War Powers Resolution of 1973 and whether, under its provisions, the President is required to seek Congressional authority to extend the Marine Corps presence in Lebanon. That act grew out of Congressional frustration over the longer American military involvement in the Vietnam War without any explicit war vote by Congress.

But historically, the dispute has roots in what some see as a Constitutional ambiguity that makes the President the Commander in Chief of the armed forces but which also gives Congress the power "to declare war" and "to raise armies." The constitutionally divided war powers have many times before in American history seen the executive and legislative branches jealously guarding prerogatives and reluctant to cede any portion of its share of the war power to the other.

"There are few issues of greater importance than the issue confronting us—the balance of powers between the legislative and executive branches," Robert C. Byrd, the Senate minority leader, told the Senate in debate Thursday. "This issue is bigger than political parties, bigger than personalities, bigger than any particular office of the United States."

THREAT TO POWERS OF CONGRESS

More concretely, Congressional Democrats joined by many Republicans contend that if they do not now force President Reagan to seek their concurrence, it will be a dangerous precedent, diminishing the powers of Congress.

"If we don't trigger the War Powers Act now, it will be a precedent that will make that legislation a dead letter," said Representative Stephen J. Solarz, a Brooklyn Democrat. "What is at stake here is the ability of Congress to exercise any control over the dispatch of American forces into combat situations."

The White House fears the opposite danger. If the President too openly accepts the basic premise of the War Powers Resolution, officials say, he will lose flexibility and be left naked to foreign military pressures in such delicate situations as Lebanon today.

A GUN TO OUR OWN HEAD

Specificially, the White House concern in centered on those sections of the War Powers Resolution that Congress wants to use that require the President to report to Congress in case American forces are involved in hostilities or face imminent hostilities and also require him to withdraw the troops within 60 days unless Congress explicitly extends their stay.

"What that means," said one White House official, "is that some foreign party, merely by shooting at your troops, can force you to withdraw them within 60 days if Congress fails to act, and there are lots of ways in which Congress can fail to act. If that's true, then we've put a gun to our own head in a whole host of difficult negotiating situations abroad."

After days of fairly cautious maneuvering, the debate sharpened when Senate Democrats demanded on Thursday that President Reagan explicitly accept the War Powers Resolution by sending Congress a message that invokes its provisions and seeks Congressional authority to keep the marines in Lebanon. The White House balked.

To try to force the President's hand, Senate Democrats introduced their own resolution to trigger the 60-day time limit in the War Powers Resolution. If the resolution is passed, it could technically force the withdrawal of the Marine force within 60 days, but it is currently being held in committee.

The Speaker of the House, Representative Thomas P. O'Neill Jr., has been trying a softer sell, hoping to lure the President into a political bargain by offering to endorse Administration policy and authorizing the marines to stay in Beirut another 18 months. Mr. O'Neill has not demanded that President Reagan take the initiative.

HOUSE DEMOCRATS' RESOLUTION

Instead, House Democrats drafted their own joint resolution, replete with references to key provisions of the War Power Resolution that would score constitutional points for Congress in their view once the President signed it.

This resolution would give the President much of what he wants. It would authorize the use of offshore air and naval firepower to protect the peace-keeping force in Lebanon and would let the marines stay in Lebanon indefinitely if there were a cease-fire.

But if there were hostilities after 18 months, this resolution would require another report from the President to Congress and another Congressional vote to extend their stay.

So far the Administration has refused to accept that and there are reports of internal divisions. White House negotiators led by James A. Baker 3d, the Chief of Staff, and Secretary of State George P. Shultz are said to favor striking a compromise with Congress. But the Secretary of Defense, Caspar W. Weinberger, and William P. Clark, the national security adviser, and Justice Department lawyers have taken a tougher stand.

Many Republicans as well as Democrats believe the Administration so badly needs Congressional support that the President will have to give some ground. If so, the consensus here is that Congress will have affected the balance of power on the delicate issue of war and peace and the gray situations in between.

The exchange between the White House and Mr. Byrd introduced a new note of contentiousness into the delicate negotiations to achieve some form of legislative authorization for the troops that met the institutional demands of Congress and the White House.

Mr. Byrd and other Democrats, as well as some Republicans, feel that the requirement for Congressional approval came into effect last month when the first of our four marines was killed in shelling by Syrian-backed Druse militiamen outside Beirut.

THE WHITE HOUSE VIEW

The White House argues that despite the onset of more violence, there is no requirement under the War Powers Resolution that Mr. Reagan seek Congressional approval to keep about 1,300 marines committed to the multinational force in Lebanon.

Because both sides agree with the principle that the Marines should be there, a battle has emerged over institutional prerogatives and constitutional questions.

Today the White House seemed to be trying to sweep aside the complicated questions of prerogatives and assert that, in general, requirements for Congressional authorization for the troops damage American interests in the Middle East.

Meanwhile, negotiations continued today between the White House and Senate leaders on compromise language in a possible Congressional resolution backing the use of the troops.

Mr. Reagan seemed to signal today what White House aides had said before, that the Administration would be able to accept some form of resolution as long as it did not embody the idea that the troops were in Lebanon under Congressional authorization.

Asked by a reporter in the Oval Office whether he could "live with" some sort of war powers resolution, Mr. Reagan said, "I am sure I can." Asked to be more specific, he said, "I can't get into that while it's being discussed."

He was apparently alluding to the talks on Capitol Hill today involving James A. Baker 3d, the White House chief of staff, as well as Senator Byrd and Senator Howard H. Baker Jr., the Tennessee Republican who is the Senate majority leader.

Mr. Reagan's comments came at a picture-taking session in the Oval Office before a meeting with supporters of tuition tax credits.

NO PROGRESS REPORTED

The meeting with Senator Baker, Senator Byrd and Mr. Baker of the White House broke up this evening with no apparent progress in achieving a compromise.

Aides indicated that Senator Byrd was still insisting that the President acknowledge that the troops' presence in Lebanon is subject to Congressional approval.

An aide to Senator Baker said the Senator was "tired of shoveling smoke" and getting bogged down in a battle of prerogatives, and would try to break the impasse by introducing his own version of a compromise on Monday.

There were few details tonight of that compromise, which the Baker aide said would be drafted over the weekend. The aide said Senator Baker wanted to "precipitate Senate action" by coming up with a resolution simply authorizing the President to continue to keep the troops in Lebanon for a period of time.

THE ZABLOCKI APPROACH

This has been basically the approach of Democrats in the House of Representatives led by Representative Clement J. Zablocki, the Wisconsin Democrat who is chairman of the Foreign Affairs Committee. Mr. Zablocki favors a resolution that would permit the troops to remain in Lebanon for up to 18 months.

The White House has objected even to Mr. Zablocki's approach because it would make explicit reference to the legitimacy of the War Powers Resolution's requirement that the President have Congressional approval to keep the troops there.

It is not clear tonight whether Senator Baker's proposal would have the same features, which would presumably also make it objectionable to the White House.

At the center of the struggle between the White House and the Congress are interpretations of a 1973 statute that says the President must notify Congress when American troops face a combat situation, and must then withdraw the troops within 60 days

unless Congress authorizes them to remain. The 60-day period can be extended by 30 days.

The White House official, in addressing the consequences of requiring Congressional approval for the presence of the Marines, emphasized that he was not trying to "impugn the motives of Congress."

[From the New York Times, Sept. 19, 1983]

FLOUTING THE LAW

(By Anthony Lewis)

BOSTON, September 18.—In the growing struggle between Congress and the White House over the War Powers Resolution, few have noticed a curious and important fact. President Reagan has so far offered no defense—not in fact, not in law—for his failure to follow the rules in Lebanon.

He and his aides have produced no legal brief or other document justifying their refusal to comply with the resolution. And the reason is simple: They have none. There is talk in the newspapers, for example, to the effect that Congress is demanding something "unconstitutional"; but we have seen no Opinion of the Attorney General reaching that conclusion. And the Administration in another instance has conceded Congress's authority in the Lebanese situation.

The War Powers Resolution was passed by Congress over President Nixon's veto in 1973. Its central provisions trigger certain consequences when "United States forces are introduced into hostilities."

Are U.S. forces in Lebanon involved in "hostilities" today? It is hard to make a serious argument that they are not when 4 marines have been killed and another 25 wounded, when U.S. Navy ships offshore are firing into the hills of Lebanon, when the official reason for shooting has been expanded far beyond "self-defense" in its usual meaning.

On the facts, then, the War Powers Resolution applies. What about the law? Is there some constitutional or other way for the Administration to escape the demand for compliance?

The resolution gives Congress two ways to limit the Presidential use of the armed forces. First, it says that the President "shall terminate" their use 90 days after "hostilities" trigger the act unless Congress has authorized him to carry on. Second, it provides that Congress may at any time direct the President to withdraw forces by passing a form of resolution that does not require Presidential approval.

The second of those provisions was effectively held unconstitutional by the Supreme Court in June in the legislative veto case. The Court said that Congress had to act in such matters through regular legislation, subject to a President's veto.

But the first war powers provision is a very different matter, legally. It simply sets a time limit on what a President may do with the armed forces until he has Congressional authority. That has all kinds of precedent behind it in "sunset laws" and statutes giving Presidents scope to take certain actions within a limited period. And the provision is supported by Congress's explicit constitutional power to declare war.

As that war powers provision is applied to particular facts, it might run up against a President's power as Commander in Chief—and be unconstitutional as applied. A President could make that argument convincingly, for instance, if the provision called on him to remove forces under emergency circumstances threatening them or the nation. But that is very different from saying that a time limit as such is unconstitutional.

President Reagan really conceded the principle of Congressional authority in Lebanon on June 27, when he signed into law the Lebanon Emergency Assistance Act. Section 4(a) of the act says "the President shall obtain statutory authorization from the Congress with respect to any substantial expansion in the number or role in Lebanon by the United States Armed Forces."

Before that language became law the Deputy Secretary of State, Kenneth W. Dam, wrote a letter to Senator Charles Percy saying it was "acceptable to us." He said it described "what this Administration intends to do," namely "seek authorization from Congress" for the force in Lebanon. And, he said, the language gave flexibility for emergencies by allowing the President to begin introducing forces, "if circumstances urgently required, while Congress is considering his request for statutory authorization."

In short, the Reagan Administration has already agreed to a formal Congressional role in sending U.S. forces into Lebanon. It has deferred to an assertion of authority consistent with the War Powers Resolution.

There is strong reason in democratic theory and in our recent history to favor that Congressional role. Senator Roger Jepsen of Iowa, a conservative Republican, put it: "If the deployment of the marines in the very volatile environment in Lebanon is to have the full support of the American people, they must have a voice through their elected representatives in Congress."

As Senator Jepsen's words show, Republicans as well as Democrats in Congress are pressing Mr. Reagan to comply with the War Powers Resolution. Yet he continues to evade it: without legal or factual argument. Not since Richard Nixon has there been such a case of stonewalling by the White House.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, the Senator has time remaining. I wonder if we could do some housekeeping items at this point.

Mr. BYRD. Yes.

Mr. BAKER. Mr. President, does the Senator have time remaining?

The PRESIDENT pro tempore. The Senator has about one-half minute.

Mr. BAKER. I ask unanimous consent that we have 2 additional minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE CALENDAR

Mr. BAKER. Mr. President, there are several items marked on the calendar for action by unanimous consent on this side. I will identify them for the minority leader and ask if he is in a position to consider all or any of them at this time. They are calendar Nos. 370, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, and 385.

Mr. BYRD. Mr. President, there is no objection on this side. Those items have been cleared, I am pleased to state.

Mr. BAKER. I thank the minority leader.

The PRESIDING OFFICER (Mr. HUMPHREY). Without objection, it is so ordered.

DESIGNATING THE SQUARE DANCE AS THE FOLK DANCE OF THE UNITED STATES

The bill (S. 1448) to designate the square dance as the national folk dance of the United States was considered.

Mr. BYRD. Mr. President, this week square dancers from across America will be coming to Washington to celebrate National Square Dance Week.

This is an appropriate time, therefore, to bring before the Senate my bill, S. 1448, to designate the square dance as the National Folk Dance, in perpetuity.

In so doing, allow me to remark that the square dance embodies the evolution of dance in our country since colonial times. Nearly every ethnic group can recognize a contribution of its own to the many steps and movements of the modern square dance.

Although the square dance has changed with the growth of our Nation, the basic character of the dance has continued to uphold the spirit of equality, chivalry, precision, joy—qualities highly valued in the American way, and as a creed for square dancers. Thousands of young, middle aged, and elderly belong to clubs and associations as devotees and students of the square dance. These Americans are to be applauded for keeping alive a colorful heritage which belongs solely to our country. I hope that all of my colleagues in the Senate will support my bill, and that they will give their unanimous consent to the passage of S. 1448, to designate the square dance as the "National Folk Dance of the United States."

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1448

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) square dancing has been a popular tradition in America since early colonial times;

(2) square dancing is a joyful expression of the vibrant spirit of the people of the United States;

(3) the American people value the display of etiquette among men and women which is a major element of square dancing;

(4) square dancing is a traditional form of family recreation which symbolizes a basic strength of this country, namely, the unity of the family;

(5) square dancing epitomizes democracy because it dissolves arbitrary social distinctions; and

(6) it is fitting that the square dance be added to the array of symbols of our national character and pride.

SEC. 2. The square dance is designated as the national folk dance of the United States.

SEC. 3. This Act shall take effect January 1, 1984.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DIABETES MONTH

The Senate proceeded to consider the joint resolution (S.J. Res. 121) to designate November 1983 as National Diabetes Month.

Mr. ABDNOR. Mr. President, I am pleased to note that 36 Senators have joined me in sponsoring Senate Joint Resolution 121, to designate the month of November 1983, as "National Diabetes Month." I would like to thank the distinguished chairman of the Judiciary Committee, Mr. THURMOND, and his colleagues for acting expeditiously on this important legislation.

Mr. President, I trust that this initiative will promote a greater understanding of the effects this disease has on the 11 million Americans who suffer from diabetes—and their loved ones, together with a recognition of the importance of sustaining our commitment to develop more effective methods of treating diabetes.

To date, Representative HOYER has obtained 145 cosponsors for the companion measure (H.J. Res. 307) he introduced in the House of Representatives. Mr. President, I urge our colleagues in the House to act on this vital resolution in a timely manner.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 121

Whereas diabetes kills more than all other diseases except cancer and cardiovascular diseases;

Whereas eleven million Americans suffer from diabetes and five million seven hundred thousand of such Americans are not aware of their illness;

Whereas $9,700,000,000 annually are used for health care costs, disability payments, and premature mortality costs due to diabetes;

Whereas up to 85 per centum of all cases of noninsulin-dependent diabetes may be controllable through greater public understanding, awareness, and education; and

Whereas diabetes is a leading cause of blindness, kidney disease, heart disease, stroke, birth defects, and lower life expectancy, which complications may be reduced through greater patient and public understanding, awareness, and education: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1983 is designated as "National Diabetes Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

METROPOLITAN OPERA DAY

The joint resolution (S.J. Res. 128) to designate the day of October 22, 1983, as "Metropolitan Opera Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 128

Whereas the Metropolitan Opera is one of the world's premier performing arts organizations and has an audience larger than that of any other such organization in the world;

Whereas the Metropolitan Opera, since its first performance one hundred years ago on October 22, 1883, has provided the finest quality in opera to audiences throughout the Nation;

Whereas the Metropolitan Opera pioneered radio presentations of live opera, performing on radio for more than forty years and more recently on television;

Whereas the Metropolitan Opera has toured the United States since its founding in 1883;

Whereas the Metropolitan Opera provides educational services to the people of the United States by generously encouraging and training young artists and by providing technical and managerial assistance to other opera companies in the Nation;

Whereas the Metropolitan Opera has presented renowned performing arts companies from all over the world at the Opera House;

Whereas the Metropolitan Opera House, which is maintained by the company, is one of the Nation's treasures and one of the greatest performing arts theaters in the world; and

Whereas, throughout its long history, the Metropolitan Opera Company has fostered generations of music lovers and has enriched and inspired this Nation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating October 22, 1983, the one hundredth anniversary of its first performance, as "Metropolitan Opera Day" throughout these United States.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ENTOMOLOGY WEEK

The joint resolution (S.J. Res. 134) to provide for the designation of the week of November 27, through December 3, 1983, as "National Entomology Week," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 134

Whereas the study of entomology continually yields advances in our knowledge of the ecology, behavior, and dynamics of insects;

Whereas entomologists make significant contributions to the production and protection of food, clothing, and shelter and in the preservation of human health and the environment;

Whereas advancements in entomology contribute substantially to the national welfare and improvements in the daily lives of our Nation's citizens;

Whereas entomological research is being undertaken in all fifty states—in the Federal, State, and private sectors; in colleges, universities, and museums; in Government, commercial, and private laboratories; and in experiment stations;

Whereas 1983 marks the thirtieth anniversary of the founding of the Entomological Society of America; and

Whereas the Entomological Society of America will hold its annual meeting on November 28 through December 2, 1983, in Detroit, Michigan, and approximately two thousand five hundred leading entomologists from around the world will gather at the meeting to share their research findings and discuss developments in entomology: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of November 27 through December 3, 1983, is designated as "National Entomology Week" and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such week with appropriate activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MYASTHENIA GRAVIS AWARENESS WEEK

The joint resolution (S.J. Res. 140) to provide for the designation of the week of October 2 through October 8, 1983, as "Myasthenia Gravis Awareness Week," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 140

Whereas the incidence and prevalence of myasthenia gravis present a significant health problem in the United States;

Whereas myasthenia gravis is a severe neuromuscular disorder, characterized by weakness of the voluntary muscles of the body;

Whereas an estimated one hundred thousand to two hundred thousand diagnosed,

and over one hundred thousand undiagnosed, Americans of both sexes, and all races and ages, are afflicted with the disease;

Whereas the Nation faces a continuing need to support innovative research into the causes, treatment, and cure of myasthenia gravis; and

Whereas it is appropriate to focus the Nation's attention upon the problem of myasthenia gravis: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 2 through October 8, 1983, is designated as "Myasthenia Gravis Awareness Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL PRODUCTIVITY IMPROVEMENT WEEK

The joint resolution (S.J. Res. 142) designating the week of October 3 through October 9, 1983, as "National Productivity Improvement Week," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble are as follows:

S.J. RES. 142

Whereas the economic stability and growth of this Nation relies largely on the collective industry and endeavor of its working citizens;

Whereas the time-honored tradition of American leadership in work-related ingenuity and know-how has brought about great strides in productivity;

Whereas growth in productivity in turn improves the standard of living of United States citizens;

Whereas public awareness of the economic importance of productivity will promote individual and collective ideas and innovations for productivity improvements; and

Whereas a conscientious effort to improve productivity will foster a better standard of living for all citizens and reduce the level of inflation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of providing for a better understanding of the need for productivity growth and of encouraging the development of methods to improve individual and collective productivity in the public and private sectors, the week of October 3 through October 9, 1983, is designated "National Productivity Improvement Week". The President is requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ENERGY EDUCATION DAY

The joint resolution (S.J. Res. 146) to designate March 23, 1984, as "National Energy Education Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 146

Whereas an adequate and competitively priced energy supply is essential for a strong economy in the United States;

Whereas affordable energy resources are required to fuel the economic growth which will provide new jobs and employment opportunities so that all people of our society may enjoy a higher standard of living and greater prosperity;

Whereas the developments needed for the future will require greater attention to the scientific laws in the areas of physics and chemistry as they relate to the development, distribution, and efficient use of our energy for transportation, communication, manufacturing, and personal use;

Whereas people are striving to make energy work more efficiently in their homes, transportation systems, and workplaces;

Whereas fundamental changes in the United States energy future requires the United States educational system at all grade levels to prepare our youth for the new demands and challenges which lie ahead;

Whereas the celebration of a National Energy Education Day (NEED) will bring together students, teachers, school officials, and community members to focus attention on the need for a greater understanding of energy issues; and

Whereas such celebration should be conducted in a manner which encourages a deeper understanding of the efficient ways energy works for the United States: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to promote and enhance energy education programs at all grade levels of public and private schools throughout the United States, March 23, 1984, is designated "National Energy Education Day". The President is requested to issue a proclamation calling upon the people and educational institutions of the United States to observe such day with appropriate ceremonies and activities, and directing all Federal agencies to participate in the observance of such day and to cooperate with persons and institutions conducting such ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COAST GUARD DAY

The joint resolution (S.J. Res. 150) to designate August 4, 1984, as "Coast Guard Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 150

Whereas the United States Coast Guard is the oldest continuous seagoing service, its history tracing back to 1790;

Whereas the United States Coast Guard has made valuable contributions to our Nation in the areas of boating safety, search and rescue, aids to navigation, merchant marine safety, environmental protection, maritime law enforcement and port safety;

Whereas the military and civilian personnel of the United States Coast Guard and its predecessors have displayed enthusiasm, excellence and courage since 1790 in serving the people of this Nation; and

Whereas the Nation relies on the readiness of the nearly one hundred thousand active duty and reserve military officers and enlisted personnel, cadets, civilian employees, and auxiliary volunteers of the United States Coast Guard to rescue victims, protect our environment, and defend our Nation if the need arises: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating August 4, 1984, as "Coast Guard Day", and calling upon all Federal, State and local government agencies and people of the United States to observe the day with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL RETIRED TEACHERS DAY

The joint resolution (S.J. Res. 157) designating November 13, 1983, as "National Retired Teachers' Day," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution and the preamble are as follows:

S.J. RES. 157

Whereas education is the surest foundation for the preservation of freedom, justice, and happiness in our American democracy;

Whereas education transmits not only knowledge but the values of a society;

Whereas America has always placed its major hopes for the future on education as a means of improving and developing the potentialities of the individual and the society;

Whereas, as Henry Adams said, "a teacher affects eternity; no one can tell where his influence stops";

Whereas the approximately one million five hundred thousand retired teachers of America chose what should be recognized as the most important profession in the world, dedicating their working lives to the battle against prejudice, greed, and ignorance and receiving in return very little material remuneration for their dedication; and

Whereas it is fitting to acknowledge a debt of gratitude to these former teachers, who gave the country the most important gift of all, the instruction of its youth: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 14, 1983, is designated as "National Retired Teachers Day" and the President is authorized and requested to issue a proclamation calling on the people of the United States to observe such day with appropriate ceremonies and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL SEWING MONTH

The joint resolution (H.J. Res. 218) to designate the month of September of 1983 as "National Sewing Month," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ORGAN DONATION AWARENESS WEEK

The joint resolution (H.J. Res. 229) to authorize and request the President to issue a proclamation designating April 22 through April 28, 1984, as "National Organ Donation Awareness Week," was considered, ordered to a third reading, read the third time, and passed.

The preamble was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. GORTON. Mr. President, it is with great pride and pleasure that I rise in support of House Joint Resolution 229, which asks the President to declare April 22 through 29, 1984, as "National Organ Donation Awareness Week." I thank my Senate colleagues for their approval in April of a similar resolution, Senate Joint Resolution 78; and I thank the Members of the House and especially Congressman FORD for their support of House Joint Resolution 229. I am especially appreciative of Congressman SID MORRISON's efforts in this regard.

Mr. President, many people whose kidneys, eyes, skin, or human growth are unable to sustain them can be helped or cured through organ transplants. For example, there are presently 4,800 kidney transplants performed each year but approximately 10,000 medically eligible patients do not receive one because of a lack of suitable donors.

Through organ donation, those who care and have foresight may, when they die, give the gift of life and living to those in need. Every State of the Union supports the organ donation program, in hopes that its citizens will make an anatomical gift upon death, as Mrs. Gorton and I have pledged to do. A donor may pledge any needed organs or parts; only specified organs or parts; or may donate his or her body for anatomical study.

It is my hope that proclamation of "National Organ Donation Awareness Week" will create for the people of our Nation an awareness of the need and opportunity for organ donation; and I invite all citizens to consider giving this great gift of themselves to those who are less fortunate.

CONTRACT MEDICAL SERVICES IN PUERTO RICO AND THE VIRGIN ISLANDS

The bill (S. 1850) to amend title 38, United States Code, to extend for 1 year the authority of the Veterans' Administration to provide certain contract services in Puerto Rico and the Virgin Islands, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1850

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 601(4)(C)(v) of title 38, United States Code, is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1084".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ADULT DAY CARE CENTER WEEK

Mr. BAKER. Mr. President, I say to the minority leader that I propose to call up House Joint Resolution 132, if the Senator will concur in that.

Mr. BYRD. That is Calendar No. 389?

Mr. BAKER. Yes.

Mr. BYRD. I have no objection.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 389, House Joint Resolution 132.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 132) designating the week beginning September 25, 1983, as "National Adult Day Care Center Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SENATE JOINT RESOLUTION 50 INDEFINITELY POSTPONED

Mr. BAKER. Mr. President, I ask unanimous consent that Calendar No. 371, Senate Joint Resolution 50, a companion measure, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEQUENTIAL REFERRAL OF S. 1683

Mr. BAKER. Mr. President, I have a request on a sequential referral, and I will state it for the consideration of the minority leader.

I ask unanimous consent that once S. 1683, a bill to facilitate the use of barter to trade Government-owned agriculture surplus commodities for national defense stockpile materials, is reported out of the Committee on Agriculture, Nutrition, and Forestry, it be sequentially referred to the Armed Services Committee for a period not to exceed 30 calendar days.

Mr. BYRD. There is no objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I understand that the distinguished minority leader wishes to present a resolution at this time on behalf of another Senator.

Is that correct?

Mr. BYRD. Yes. I thank the majority leader.

COMMENDATION OF VIRGINIA P. BOBO

Mr. BYRD. Mr. President, I send to the desk a resolution and ask that it be stated by the clerk, after which I will ask unanimous consent that it be

given immediate consideration. I do this on behalf of Senator HOLLINGS.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 224) to commend Virginia P. Bobo for her exemplary service to the U.S. Senate and the Nation.

Mr. BYRD. Mr. President, on behalf of Mr. HOLLINGS, I ask for the immediate consideration of the resolution.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

● Mr. HOLLINGS. Mr. President, today I take great pleasure in introducing a sense of the Senate resolution to recognize the distinguished career of Mrs. Virginia P. Bobo and the valued service she has provided to the Capitol Guide Service. Mrs. Bobo, from Spartanburg, S.C., is currently in charge of the Service's Congressional Ticket Office. She will be ending her career on September 30, 1983, after 22 years of devoted duty.

Virginia Bobo began working for the Capitol Guide Service on September 7, 1961. Originally employed as a Capitol guide, her dedication and competent service elevated her to her present position. As head clerk of the Congressional Ticket Office, she has had the unenviable responsibility of arranging not only congressional tours for Members, but accommodating constituents who visit Washington and express a desire to tour the Capitol. As so many of my colleagues personally know, these are duties that Virginia has performed cheerfully and with great skill. The favorable impression that many take home with them from their visit to the Nation's Capitol is due in large measure to the abilities of individuals like Virginia.

Mr. President, Virginia P. Bobo has been a tremendous asset to Congress during her tenure with the Capitol Guide Service. While her exemplary skills will be greatly missed, I am confident that the high standards she has set will be maintained and will guide others in this important job.

Mr. President, let me, on behalf of the many who have benefited from Virginia's dedicated performance of her responsibilities, wish her well in her retirement and thank her for a job very well done.●

The resolution was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 224

Whereas Virginia P. Bobo, the principal congressional tour clerk of Capitol Guide Service, is retiring after having served the Senate for more than twenty-two years;

Whereas Virginia P. Bobo, has, at all times, discharged the difficult duties and responsibilities of the office with high efficiency and abiding devotion; and

Whereas the unsurpassed fidelity and unfailing dedication to her career have earned for Virginia P. Bobo the affection and esteem of the Senate: Now, therefore, be it

Resolved, That the Senate of the United States extends its appreciation and gratitude to Virginia P. Bobo for her long, faithful, and exemplary service to the United States Senate and the Nation.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to Virginia P. Bobo.

Mr. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I say to the minority leader that on today's Executive Calendar, I am cleared to consider the nominations on page 1 under "The Judiciary," on page 2 under "Department of Justice," and on page 3, "Nominations Placed on the Secretary's Desk in the Foreign Service."

Mr. BYRD. Mr. President, I say to the distinguished majority leader that those items have been cleared on this side.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. BAKER. Mr. President, if the minority leader does not object, I ask unanimous consent that the nominations so identified be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

Kenneth W. Starr, of Virginia, to be U.S. Circuit Judge for the District of Columbia Circuit.

John F. Keenan, of New York, to be U.S. District Judge for the Southern District of New York.

John P. Vukasin, Jr., of California, to be U.S. District Judge for the Northern District of California.

DEPARTMENT OF JUSTICE

James B. Roche III, of Massachusetts, to be U.S. Marshal for the District of Massachusetts for the term of 4 years.

Thomas C. Rapone, of Pennsylvania, to be U.S. Marshal for the Eastern District of Pennsylvania for the term of 4 years.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE FOREIGN SERVICE

Foreign Service nominations beginnings James E. Sarn, and ending John F. Cannon, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of July 25, 1983.

JOHN S. KEENAN

● Mr. MOYNIHAN. Mr. President, I should like to bring to the attention of my colleagues the nomination of John F. Keenan, currently the criminal justice coordinator of New York City, to be U.S. District Judge for the Southern District of New York. The American Bar Association endorses the nomination of Mr. Keenan.

Following his graduation from Fordham Law School in 1954, Mr. Keenan was admitted to the bar in New York State. His career began with the law firm of Halpin, Keogh, & St. John. After serving in the District Attorney's Offices of New York and Queens Counties, Mr. Keenan became special prosecutor for the investigation into corruption in the Criminal Justice System of New York City. Before accepting his current position, he was chairman and president of the New York City Off-Track Betting Corporation.

Mr. Keenan is an able and experienced member of the legal profession and is to be congratulated on his nomination.●

Mr. BAKER. Mr. President, I move to reconsider the votes by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I thank the minority leader for his time and indulgence, and I apologize to the holder of the special order, Mr. SPECTER, for taking this time. We do appreciate it.

I now yield the floor.

RECOGNITION OF SENATOR SPECTER

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania (Mr. SPECTER) is recognized for not to exceed 15 minutes.

PEACE VERSUS NUCLEAR WAR

Mr. SPECTER. Mr. President, I take the floor this morning to speak about the most important issue of our era: peace versus nuclear war.

I am personally more concerned about the threat of nuclear war today than at any time in the past because I believe that the world is now confronted with the most perilous threat in its entire history, including the 1962 Cuban missile crisis.

I am very much concerned about two recent actions, taken not by the President or Congress, which enormously undermine the previous strength of the U.S. position in achieving world condemnation of the Soviet action in shooting down the unarmed Korean airliner.

In my judgment, the United States has an unassailable position as it seeks to achieve world condemnation of the Soviet action. The evidence is clear and unequivocal that the Korean airliner was a civilian aircraft and that there was absolutely no justification for the Soviet action in shooting it down with the attendant loss of 269 lives. Almost equally inexplicable has been the failure of the Soviet leadership to respond in an appropriate way to that egregious act.

During the course of the last few days, however, two actions have occurred which undermine the position of the United States. I supported the President in his reaction to the Korean airliner massacre, and I supported the senior Senator from North Carolina (Mr. HELMS) on six of his seven amendments, which the Senate considered last week, to make a somewhat tougher response to the Soviet action.

Nevertheless, in my judgment we have to be very careful lest we equate toughness with action which will only deprive the United States of the best forum to assert its position and with an important channel to continue the dialog with the Soviet Union which I consider to be indispensable.

The first action which I consider to materially weaken the U.S. position and to be inappropriate, was taken by the States of New York and New Jersey in restricting Foreign Minister Gromyko's plane from landing at either Kennedy or Newark International Airports. I take this position, not because of the personal convenience of Mr. Gromyko but because of the very important interests of the United States—the national interests of the United States—which are jeopardized by those actions.

The actions of the States of New York and New Jersey, in my legal judgment, are directly violative of the Host Country Agreement which provides: "Federal, State, or local authorities of the United States shall not impose any impediments to transit to or from" the United Nations.

That language on its face is unequivocal, and those who seek to interpret away that clear mandate resort to the argument that no impediment to the travel by Foreign Minister Gromyko arises if his plane is compelled to land at McGuire Air Force Base or some locale other than Kennedy or Newark International Airports.

A contention that such action does not constitute an "impediment" is simply not legally sound.

We should not be giving Mr. Gromyko an excuse not to come to the United Nations so that he may avoid the condemnation which his nation would face. And we should not create a situation where Mr. Gromyko is not present because of the importance to our own interests of dealing with the Soviet Union at the highest possible levels in a continuing dialog addressing the very tough problems which confront the world and the two superpowers—the United States and the Soviet Union—which must coexist if the planet is to stay intact.

The other action which I believe seriously undermines the position of the United States was the comment yesterday by the American delegate, a Mr. Charles M. Lichenstein, when he stated in the United Nations:

> If in the judicious determination of the members of the United Nations they feel they were not welcome and treated with the hostly consideration that is their due, the United States strongly encourages member states to seriously consider removing themselves and this organization from the soil of the United States.

I am pleased that there has been a prompt repudiation from the White House by the spokesman for President Reagan of that statement as official U.S. policy because it obviously adds to the controversy now confronting the United States an ingredient which very seriously weakens our position.

Instead of debating the condemnation of the Soviet Union for destroying the Korean airliner, the attention of the United Nations and the attention of the world has been diverted to the propriety of the States of New York and New Jersey violating the Host Country Agreement and an unauthorized statement by the American delegate in the United Nations which puts the United States on substantially weaker ground in trying to secure the support of the other nations of the world since those nations have been invited to leave the United States as has the United Nations itself.

The history of the founding of the United Nations is a long and tortuous one, dating from the days of the League of Nations and President Wilson's efforts and the refusal of this body to ratify the League of Nations and including the efforts to approve the U.N. Charter, and the United States of America remains in the United Nations today because the United States considers it in our national interest to be there for good and sufficient reason.

Now there may come a time when the United States will choose not to remain in the United Nations. Frankly I doubt it, but that time may come. Or there may come a time when the United States will determine that it no longer wishes to have the U.N. Headquarters in New York City. Again, I doubt that that time will come. But if either of those situations should occur, then it is within the province of the duly constituted lawful authorities, Congress and the President, to make those determinations. It certainly is not a matter to be pronounced by a delegate of the United Nations as his own personal reaction as it has to be denominated.

These actions that weaken our position may be interpreted by the State of New York and the State of New Jersey and Mr. Lichenstein as being tough actions. But I suggest that they are not tough at all but are misdirected. While I do believe that the United States has every right to be tough, I believe it is conclusively in our national interest to continue to talk with the Soviet Union.

Since April 1982, I have urged that there be a summit between our President and the Chief of the Soviet Union because of my personal view that such a dialog is indispensable if we are to move ahead on the important subject of nuclear arms reduction. Now I have fully backed President Reagan in his position on strength as evidenced by my vote in support of the Department of Defense measures, and I also support the President's two-track approach which emphasizes strength but also emphasizes the importance of talks on nuclear arms reduction.

I believe it is now going to be more difficult than ever to have such a summit, but I do not believe that we should lose sight of its importance even though extra groundwork must now be completed in view of the Korean airliner incident and the tensions which exist in the world.

But the prospects of such dialog ultimately leading to a summit are hindered materially by actions which keep away the ranking Soviet foreign policy official, since talks with him may provide the basis leading to such summit discussions.

The Senate prayer this morning by Chaplain Richard Halverson I thought was most appropriate, when he said ". . . in these critical hours, when the world could explode in a conflagration, guide the Senators and the President as they face this momentous burden;" and when the Chaplain said, ". . .when the discussion and debate are finalized, when everything that can be said has been said, the time for

decision has come, and the buck stops with Congress and the White House."

We are the duly constituted bodies to deal with these crucial questions, not the State of New Jersey, not the State of New York, and not the American delegate to the United Nations.

The difficulty that I see, Mr. President, is that as these tensions escalate and as there appears to be a premium on who, however unauthorized he may be, speaks with extra toughness, the U.S. position is being very materially weakened. It escalates the situation so that some pilot trailing a Korean airliner thinks that he has to be strong and he "shoots from the hip" and that some American delegate thinks that he has to be strong and he, so to speak, "shoots from the lip," and as the tensions mount we face the increasing risk somewhere down the line of someone making a grievous mistake which could trigger a nuclear war.

That is why I speak out today on the subject and in doing so I am well aware of the tremendous complexities of the issues which are involved and am aware of the high level of tension which is presented in so many parts of the world, in Central America, in El Salvador, in Honduras, in Nicaragua, in Lebanon, where reports are that Soviet officers are in charge of Syrian-backed forces, and where by Presidential order, the United States is taking a strong and, I think, appropriate position.

But we are so close to the kind of spark which could light an irreversible fuse toward nuclear holocaust.

That is why I would be hopeful that appropriate action would be taken to remove the impediment of the closing of the Kennedy and Newark International Airports. Then if Mr. Gromyko chooses not to come, so be it, that is his decision. There is no ground for blaming the United States and there is no excuse for his not coming. And the statement is plain and unequivocal just as the White House has said it, and let it come from this body as well, that we do not support a statement that the United Nations should leave U.S. soil or that the delegates should be encouraged to leave.

In our discussions with the Soviet Union, when our Secretary of State, who is distinguished and able, carries on negotiations, however tough he is—and he should be very tough—there should be a clear-cut delineation between his condemnation of Soviet action on the Korean airliner and the other business which he has to transact in the interests of the United States because our fundamental responsibility is to protect, preserve, and defend this great country.

It is in our national interest to have Andrei Gromyko available so that we can talk to him and not at him. It is in our interest to have the United Nations in New York so that we can have a dialog which may set the scene for a summit meeting between our President and the chief of state of the Soviet Union, a summit which I submit is more important now than ever when we see that lower ranking representatives of our nations, be they Soviet pilots or American delegates to the United Nations, are taking unto themselves action which could ignite a nuclear holocaust. If we can maintain the dialog, there is ground for improvement in the relations which we have with the Soviet Union, which are vital since we have no choice about occupying the same planet.

If this kind of mature, responsible, reflective position is to be maintained, then we must discourage the kind of conduct which has threatened the ability of our national leaders to carry on a constructive dialog.

I thank the Chair and I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a brief period for the transaction of routine morning business.

FLIGHT 007—ANOTHER TRAGIC CASE OF INHUMANITY

Mr. PROXMIRE. Mr. President, 3 weeks ago, 269 innocent passengers aboard Korean Air Lines flight 007 died senselessly at the hands of the Soviets. This violent and barbaric act shocked and outraged the world, and reminded us that human rights violations are an ever-present fact of international life. Even here in the United States we cannot be lulled into a false sense of security that human rights tragedies are only a province of the past or some renegade country. For that reason, we must ratify the Genocide Treaty.

Some Members of the Senate would rather overlook the possibility of another genocide. They claim that experience will be our teacher, that past atrocities will prevent future ones. But I have demonstrated time after time in speech after speech that history repeats itself, that inhumanity continues, and that genocide is a potential, looming threat to all people. It is time we recognize and accept that fact. It is time we let the world know that we support every effort to deter and punish the ultimate crime against humanity—genocide. It is time we put substance behind our words of anger and outrage by ratifying the Genocide Treaty.

This treaty will not necessarily prevent another tragedy like the Korean incident. It might not even prevent another act of genocide. But it will serve as a rallying cry for humanity. The Korean tragedy has demonstrated that an aroused public opinion can be influential and we should make use of that force to help deter genocide. Only by taking world opinion and giving it the status of law can we hope to halt the spread of barbarism.

As a world leader and a proponent of human rights, we in the United States must not let the other nations of the world who have already ratified the Genocide Treaty share that responsibility alone. I only hope that the recent outrageous tragedy that hit so close to home will spur us on to ratify the Genocide Treaty.

As one man who lost a friend on that ill-fated Korean flight stated in the New York Times:

> I can only hope it will help us to remember what has happened and reflect on what we can do in the future so that this senseless loss shall not be swallowed up in time as so many other international tragedies are.

Mr. President, let us learn from these tragedies and ratify the Genocide Treaty.

SENATOR HENRY M. JACKSON

Mr. JOHNSTON. Mr. President, virtually every one of us who recently paid tribute to Scoop Jackson made mention of his special relationship with his staff. One of the most moving tributes to Scoop that I have seen comes from his longtime friend and chief counsel on the Senate Energy Committee, Mike Harvey. I ask unanimous consent that those remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

SCOOP

(By Mike Harvey)

His life was noble, and the elements so mixed in him that Nature might stand up and say to all the world: "This was a man."

And when he shall die, Take him and cut him out in little stars, And he will make the face of heaven so fine That all the world will be in love with night And pay no worship to the garish sun.

Henry Martin Jackson, United States Senator from Washington State, died last Thursday. Those of us who had the privilege and the joy of working with Scoop Jackson learned a lot about him and even more from him.

Short, grey-haired, youthful and vigorous at 71, and frequent wearer of the "Jackson uniform" (blue blazer, grey slacks, blue button-down shirt, stripped tie, and black penny loafers), Scoop dearly loved his wife Helen and his children, Anna Marie and Peter. he took great pride in his children's accomplishments. he also practiced diagnostic medicine without a license.

Scoop taught us how to remember things we had to do by writing them on many little slips of paper that are kept folded together in your pocket. He taught us how to maintain a quick retrieval file system using brown manila envelopes that are kept stacked on your desk and chairs. He regularly demonstrated that it was possible to hold, simultaneously, three different meetings and two telephone conversations—each

about different subjects—and achieve remarkably coherent results all around.

Scoop believed that the study of history and English literature were the best preparation for a political career. As he once put it: "History teaches us how things got the way they are, and the great writers give us insight into human nature and behavior. Both help us make better public policy."

He consistently reminded us of the need for thorough professionalism in an all too often hurried and slapdash world. When we performed well, he gave us the ultimate Jackson accolade: "Good work, troops!"

His national reputation came from his magnificent record on defense, foreign policy, economic, environmental, human rights, energy and natural resources issues, and two tries for the Democratic Presidential nomination. But when asked what he regarded as his single most important accomplishment, Scoop said it was when in 1960 as Democratic National chairman for John F. Kennedy's successful Presidential campaign, "We put an end to religious bigotry as a major factor in American politics."

Scoop was not our boss, he was our leader, our teacher, and above all our friend. He showed us how to disagree without being disagreeable. He believed that civility is not a sign of weakness, and that character is as important as competence. He taught us to lower the level of rhetoric and raise the level of reason. That willingness to compromise is not capitulation.

He demonstrated that one can accomplish more by openness, patience, and persistence than by cunning and surprise. He taught us that in government good people are even more important than good policy, and that idealism is still a viable force in the frequently cynical world.

Most importantly, he reminded us that honor and decency are essential ingredients of a truly civilized society. That each man and woman, regardless of his or her station in life, is entitled to be treated with dignity on the basis of our fundamental equality as human beings.

Our work with him exemplified John Kennedy's view of public service as "a proud and lively career." We respected him, we admired him, and we loved him. When he died, we cried, not for Scoop, but for ourselves and for our country.

From now on in whatever we do, if we follow the lessons Scoop taught us, we may not always be winners, but we will never be losers. And, from time to time when we have done our professional best, I'm willing to bet that we will hear a distant, but still penetrating voice saying a cheery: "Good work, troops!"

WHAT WOULD A NUCLEAR FREEZE IN 1983 ACCOMPLISH?

Mr. PROXMIRE. Mr. President, by far the most critical need for the prevention of nuclear war is to stop the onrush of nuclear arms technology that will, as time goes on, enable virtually every country on Earth and even terrorist groups to build their own nuclear arsenals. My fellow Senators, look at your children or grandchildren and then ask yourself, "Do you really believe that unless we stop this arms race our children will have any real chance to live out their lives?" Do I? No. I do not think they will have a prayer without comprehensive nuclear arms control action by us. With each passing year, the technology advances. Nuclear explosive devices become cheaper. They become smaller and lighter. They become more reliable. They become more widely available. Think what that means. Within a few years, a terrorist or a foreign agent could carry a nuclear device weighing a pound or two in his pocket. He could drop it just outside the White House grounds or in bushes near the Pentagon or in a trash can in the heart of New York City. He could detonate it by remote control. What deterrent do we have to stop this kind of nuclear devestation? One of the hardest crimes to detect and prevent today is arson. With miniaturization of nuclear weapons, we could suffer a series of nuclear explosions in each of our crucial cities or in the heart of our critical military facilities without any basis for knowing the perpetrator. And how would we then deter a catastrophic series of attacks on the United States. How would we even know where or how the attack originated or what foreign agent or terrorist did it? And without knowing the perpetrator we could not respond with the kind of swift and sure retaliation that constitutes the heart of our deterrent against the Soviet Union.

Here is why it is essential that we freeze the arms race. Is this possible? Yes. How? For the answer. Consider what is the heart—the essential element—of any successful nuclear arms research project? It is testing. Without an ability to test theoretical advances or improvements in nuclear weapons, research scientists can not have any assurance that they will work. Stop testing and we stop effective research. Nine years ago in 1974 both the United States and the Soviet Union agreed to stop testing nuclear devices with explosive power that exceeded 150 kilotons. We have not ratified that treaty. But both the Soviets and this country have abided by it. We should ratify that treaty, and we should work to steadily reduce the maximum permissible kiloton level to the minimum level monitoring would permit us to detect.

Would this assure us that the nuclear arms race would not continue? No. And for two reasons. First without any further research or testing both the United States and the Soviet Union as well as at least four other countries now possess nuclear arsenals in being. Other countries may be moving rapidly to acquire nuclear capability and they can use the well established technology to produce and deploy nuclear weapons without further research or testing.

Second, the limit of 150 kilotons would permit a sufficient explosive level of testing to permit continued advances in nuclear weapons particularly in the miniaturization of weapons. Nuclear devices small enough to be concealed, transported and easily deployed at the very heart of the target add with a 150 kiloton explosive power could—in sufficient numbers—utterly devastate this country's most vital facilities and totally demolish its leadership. Meanwhile already developed multimegaton bombs exploded at an altitude of 300 miles above the center of the country would without killing any human beings, set off an electro magnetic pulse that would knock out the Nation's electricity, its radios, its television, its computers. It could strike the country in a sense dumb and blind and even prevent many of our cars from starting.

So, in addition to stopping testing, we urgently need to halt the proliferation of the present technology by the strictest possible compliance with nonproliferation agreements, and we must begin the reduction of the present nuclear arsenals as Senators PERCY, NUNN, and COHEN have called for.

No proposition that has come forward would even try to do these things except for a mutual verifiable and comprehensive nuclear freeze. It would stop testing. It would stop production. It would stop deployment. It would stop proliferation. Sure it would constitute an immense challenge to develop and negotiate an effective system of verification. Could we verify such a freeze? It would require satellite monitoring, buttressed by on-site inspection—without notice. It would also need vigorous enforcement of present nonproliferation agreements. Does it involve risk? Of course. Any course involves risk. But it alone would give the survival of our children and grandchildren a fighting chance in this increasingly dangerous nuclear world.

DRUG ABUSE OF YOUNGER STUDENTS

Mrs. HAWKINS. Mr. President, no one has yet done a study on what kind of person the 10-year-old smoker in the fourth grade grows up to be in 20 years. I can only imagine that the results would be shocking.

The sad fact, Mr. President, is that there are no drug-free schools in this country anymore. And the drug users are getting younger and younger—junior high school students and grade school students, from the inner-city day schools to the affluent suburban private boarding schools. According to a school survey by the Weekly Reader, children as early as the fourth grade report significant peer pressure to try drugs. Those not experimenting with drugs feel isolated from their classmates. Pills and pot seem to be the ellicit drugs favored by younger students.

A poll taken at a junior high school in San Francisco indicated that 65 percent of the seventh and eighth graders had used marihuana, 11 percent had tried cocaine, 11 percent had used "uppers" and "downers." Drug abuse in the schools has gotten so bad that parents are actually relieved when they hear that their kids are drinking alcohol instead of taking drugs. Nearly 66 percent of the Nation's high school seniors have used an illicit drug, and 40 percent have used an illicit drug other than marihuana. More than 50 percent of the student marihuana smokers tried the drug between the ages of 11 and 15.

Mr. President, prepubescent children suffer greater health hazards from drugs than older children—danger to their endocrine systems and their bodies' fragile hormone balance. Drug abuse in school also etches into the student a behavior pattern of failure and escapism that will persist into adulthood. The student drug abuser's inevitable personality changes may alter his life forever.

Many youngsters report that taking drugs makes them do better in school. But that is only an illusion. Their grades do not bear that out. Witness the steady decline in SAT scores in this country. From 1967 to 1983, years in which high school drug use soared, average verbal SAT scores fell over 50 points, and math scores dropped by 40 points. Maybe one of the main reasons that kids today are having trouble reading and writing is that they are high most of the time. Chronic marihuana users have short-term memories and are ususally so lethargic that they cannot cope with academic demands.

Mr. President, the current jargon for child drug abusers is "garbage can kids," because I believe they not only ingest every kind of junk drug into their systems, but also because they are literally throwing their lives away. We have to get these kids off drugs now, and keep them off. Otherwise, we are throwing away in the garbage can everything that has ever given meaning and purpose to our own lives.

I ask unanimous consent that two articles on the subject of drug abuse in younger students be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

PRESSURE TO TRY DRUGS STARTS IN EARLY GRADES

Grade school children report substantial peer pressure to try drugs and alcohol as early as fourth grade, according to a survey of U.S. school children by the classroom publication *Weekly Reader.*

The readership poll, said to be the first major national survey of young children on the subject of drugs and alcohol, was distributed to 3.7 million students in grades four through twelve. Five hundred thousand children responded.

The results show that in grades four and five children receive their education about the dangers of drugs and drinking about equally from family and movies-television. Not until grade six does school become an equal source of information, and not until grade seven does school become the major source.

And yet, as early as fourth grade about 25 percent say that children in their age-group feel "some" to "a lot" of peer pressure to try beer, wine, liquor, or marijuana. By the time they are in seventh grade, about 60 percent feel pressure to try alcohol; and about 50 percent to try marijuana.

The motivation for trying drugs and liquor in the lower grades appeared to be a desire to "feel older"; and then as the children progressed through the middle grades, to "fit in with other kids"; and finally in grades nine through twelve, "to have a good time."

About 75 percent of children in fourth grade saw "some" or "great" risk posed to children their age who had one alchoholic drink or smoked one marijuana cigarette daily, while about 20 percent saw "no risk." The percentage seeing "some" or "great" risk for daily use of alcohol or marijuana rose slightly from fourth to seventh grade, and then dropped slightly in high school.

Another significant finding was the school children's beliefs concerning experiments with hard drugs by their peers. In grade four, about 50 percent of the students estimated that no "kids your age" in "your town or city" had tried cocaine, and about 60 percent said that no students had tried angel dust or LSD.

[From the Los Angeles Time, May 4, 1983]

CHILDREN KNOW DRUGS' LURE AND DANGER

(By Alan Thompson)

WASHINGTON.—One of every four fourth-graders says children their age feel "some" to "a lot" of pressure to try drugs or alcohol, a survey by "The Weekly Reader" says.

Three of four fourth-graders say they perceive "some" or "great" risk to themselves if they have one daily drink or beer, wine or liquor or if they smoke one marijuana cigarette daily.

And more than 30 percent of those youngsters say they get most of their information about drugs and drinking from their families and from watching TV and movies, while 16 percent cite school as the main source of information.

It is not until the sixth grade that school draws even with the family, TV and movies as a source of information about drugs and drinking, and not until seventh grade that the classroom becomes the foremost source of information.

"It isn't until the seventh grade that most of the (anti-drug and alcohol-abuse) programs begin to crank up," said Dr. Terry Borton, editor-in-chief of Xerox Education Publications, which publishes "The Weekly Reader." "There is a lot of evidence that that is too late."

The survey was distributed to 3.7 million students in grades four through 12. Answers were received from 500,000 children, then adjusted to reflect the total U.S. population distribution. Results of the poll, believed to be the first of its kind, were released at a White House news conference.

Borton said the survey revealed three major themes:

There is a "fairly significant pressure" to try alcohol or drugs at a very young age; youngsters do not see their schools as a "significant counterforce" until well into their school carers; they do understand there are risks involved in using drugs or alcohol.

Other findings of the survey include:

From fourth through sixth grades, other children, TV and movies run about equal when children are asked where they have learned what might make drugs or drinking fun. But from grade six through 12, other children become a much more important factor. That suggests that drug—and alcohol-abuse programs might be more effective at a younger age before peer pressure becomes stronger.

Nine of 10 youngsters believe marijuana should be called a drug, while roughly three of 10 think alcohol should be so classified and two out of 10 think cigarettes should be.

"Fitting in with other kids" is the main reason youths of all ages try marijuana. About one-third of children in grades four through eight believe drinking alcohol is "a big problem" among children their age and 40 percent believe smoking drugs are a big problem. The percentages rise as children get older.

The survey also reported that girls are more likely than boys to say other children try drugs or liquor to "fit in" and are more apt to believe drugs and drinking are a big problem among their classmates.

More children in urban areas report pressures to try drugs and alcohol, and children on both coasts report more involvement with drugs of all sorts.

AMI CALLS FOR REDUCED NITRITES IN BACON

Mr. EAGLETON. Mr. President, I would like to salute a recent effort by the American meat industry to respond to consumer concerns about food additives. Acting on behalf of its member companies and U.S. meat processors in general, the American Meat Institute has petitioned the U.S. Department of Agriculture to reduce the quantity of nitrite used in curing bacon.

Meat processors have found that by taking advantage of new bacon processing technology and techniques and through improved plant quality control, further reductions in the use of nitrites are possible.

The only bar to a voluntary reduction on the part of the industry is the fact that nitrite levels in bacon inspected by the U.S. Government are set by regulation. Thus, the American Meat Institute's petition is necessary.

I believe this effort is clear evidence of the meat industry's increased awareness of and responsiveness to consumer concerns and deserves recognition.

I ask that the text of the American Meat Institute's nitrite petition be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMI PETITION TO REDUCE SODIUM NITRITE IN BACON FROM 120 TO 100 PPM

The petitioner requests a change in the regulations to reduce the quantity of sodium (potassium) nitrite for curing

pumped bacon from 120 parts per million (PPM) to 100 PPM. As produced today, bacon is not a health hazard. It is possible, however, to reduce the formation of nitrosamines in fried bacon by lowering the amounts of sodium (potassium) nitrite and the industry has been encouraged to do so.

The American Meat Institute (AMI) is a national trade association representing more than 300 meat packers and processors. The safety and acceptance of bacon is important to the welfare of the industry. AMI has continued to search for practical procedures which will approach the goal of eliminating potential health hazards from meat products. The requested change will aid the industry in accomplishing this objective.

I. ACTION REQUESTED

The current regulation [9 CFR 318.7(b)(1)] states in part, "Sodium nitrite should be used at 120 parts per million (PPM) ingoing or an equivalent amount of potassium nitrite shall be used (148 PPM ingoing); and 550 PPM of sodium ascorbate or sodium erythorbate (isoascorbate) shall be used." The petitioner requests that this regulation be changed to read "100 PPM of sodium nitrite" and "123 PPM of potassium nitrite." Hereafter, the petition will hereafter address only sodium nitrite, with the understanding that potassium nitrite would be affected on an equivalent basis.

II. STATEMENT OF GROUNDS

A. Concern for safety

In October 1969 meat industry scientists met with the Assistant Secretary of Agriculture to discuss the possibility of nitrosamine formation in cured meat products. This concern led immediately to extensive collaborative studies with FDA and USDA to determine the extent of the problem and to evaluate possible solutions. In 1973 the Secretary of Agriculture appointed an Expert Panel on Nitrite and Nitrosamines to assess the available data, determine the public health significance, and to investigate alternate methods of processing. This panel's recommendation regarding bacon, made in 1977, were the basis of the regulation under discussion.

The 15 meetings of the Expert Panel, focused attention on nitrite's protective effect against botulism and the concern that residual nitrite could contribute to preformed nitrosamines. Data were developed showing clearly that, of the range of cured meat products, fried bacon was the only product with preformed nitrosamines present (Ref. 1415, Harvey, Gray). This evidence, in combination with the reassurance of the UAREP study that nitrite was not a carcinogen, made bacon the central concern of both the Expert Panel and the USDA. In the final analysis, only the bacon regulation was changed, lowering ingoing sodium nitrite from 156 PPM to 120 PPM.

In a response to the Hearing Clerk (March 17, 1978), AMI commented that this was a first step toward eliminating nitrosamines. But the industry was equally concerned about the possible consequence of reduced nitrite on the control of C. botulinum in cured products. The safety record of cured meats has been commendable and the role of nitrite has never been seriously challenged, but there is an uncertainty about the minimum level required to control botulism during normal distribution patterns. The safety of 156 PPM in bacon has a historical basis; and the level of 120 PPM, combined with 550 PPM of ascorbate, has proven safe for the past five years, when an estimated 8 billion pounds of bacon were consumed safely.

B. National Academy of Sciences

In 1980 the National Academy of Sciences (NAS) contracted with USDA and FDA to examine the health effects of dietary nitrate and nitrite and to evaluate possible alternatives to those substances. NAS addressed these subjects in two separate reports.

1. The first reaffirmed the conclusion of the UAREP report that nitrite was not a carcinogen, but recommended that exposure to nitrite should be reduced to the extent that protection against botulism is not compromised. This petition is consistent with the NAS recommendation.

2. The second NAS report failed to identify any individual compound with nitrite's unique properties. Although the report described processes effective in inhibiting nitrosation in bacon or which would effectively control botulism growth, all are deficient in some way that prevents their use today. USDA has, however, sanctioned the use of bacteriological starter cultures and acid phosphates in the curing process. The effectiveness of these procedures is largely related to the product's increased acidity and the instability of nitrite under these conditions. Such processes meet all regulatory requirements but effectively reduce the ingoing level of nitrite and the likelihood of violative levels of nitrosamines. A direct formulation reduction would be as effective and offer the advantage of positive control.

C. Response from industry

Early investigations by industry revealed poor process control in many operations. to alleviate this problem, the USDA conducted seminars where processors could acquaint themselves with improved processing techniques. An industry coalition supplemented these workshops with a Good Manufacturing Practice bulletin. In many situations, large investments were made in new equipment. The inherent variability in pork bellies and the restrictions placed on the process by dimensional requirements are not readily overcome but, as will be illustrated later, industry was able to reduce both the quantity and variability of the nitrosamine in the fried bacon.

D. Summary

In 1969, industry realized the need to alter bacon processing procedures in a manner which would continue to protect consumers from the threat of botulism and would reduce both the quantity and variability of the nitrosamine content of the fried product. With the encouragement and advice of the scientific community, the industry moved toward these goals by petitioning the USDA to reduce ingoing sodium nitrite to 120 PPM. Since then, industry has brought processing procedures under tighter control and has provided the opportunity for a much more critical evaluation of the use of a nitrite in bacon. The proposed regulatory change is an important second step in assuring the consumer of the safety of bacon.

III. REASONS FOR PETITION

The desirability of keeping nitrite at the lowest practical level has been recomended frequently by scientific advisory groups. The Expert Panel described this approach as an appropriate goal throughout its deliberations. The NAS report, "The Health Effects of Nitrate, Nitrite and Nitroso Compounds," recommended that "exposure to nitrite should be reduced to the extent that protection against botulism is not compromised." The same advice was repeated in the second part of the study, "Alternatives to the Current Use of Nitrite in Foods."

The incidence of presumptive violative nitrosamines dropped significantly when the industry first learned of the potential threat. Generally speaking, the nitrosamine level has remained low, but USDA's weekly monitoring report continues to identify plants which are presumptively out of compliance. Although nitrite level is but one factor correlated with nitrosamine content in bacon, it is the primary one; any general reduction should be expected to reduce the overall level of nirosamines in bacon and also reduce the incidence of presumptive violations.

This petition is restricted to pumped bacon because a comprehensive survey demonstrated that all other commercially cured meat products were free of nitrosamines (Nitrite Safety Council report, Food-Technology, July 1980). Dry cured bacon has been excluded because of a continuing investigation of curing methods and because the dry cure method does not lend itself to the control provided in pumped product. Furthermore, dry cured bacon is a specialty product representing a very minor portion of total bacon production.

The indispensable role of sodium nitrite in controlling the growth of C. botulinum was the primary concern when the 1977 decision was made to reduce the level of nitrite in bacon below 156 ppm. That concern remains, but industry can now more closely control processes and provide equal protection at a reduced average nitrite level (i.e., 100 ppm). The Expert Panel was presented extensive data on the effect of reduced nitrite on the growth of C. botulinum in innoculated products, but at no point did the panel discuss minimum values required to provide anticlostridial activity. Rather, most of the panel regarded the reduction to 120 PPM as a safe first step which would assure product safety and reduce nitrosamine formation. It is of note "that the Panel viewed these levels as interim until more information is developed or other alternatives found." (FR 3, p. 20994) At least three panelists believed that a reduction to 100 PPM was appropriate at the time. On another occasion, two panelists recommended a standard of 100±20 PPM.

IV. TECHNICAL SUPPORT

A. Nitrosamines related to ingoing sodium nitrite

The nitrosamine level found in fried bacon is controlled by a wide array of product characteristics, curing formulations, processing conditions and method of preparation. However, experience has shown that sodium nitrite at the time of frying is the most significant single factor in bacon produced by most processors. This relationship has been documented in several controlled experiments and was demonstrated in the early 1970's, when the industry began voluntarily to reduce the quantity of sodium nitrite in pump pickles (1976 Symposium at Zeist). FDA laboratories also showed a reduction of 75 percent in nitrosamines between 1971–74 and 1975–76 (Table 1) corresponding to a period of reduced usage of nitrite. The USDA weekly monitoring program, initiated in 1978, also indicated a reduced nitrosamine level as industry process control improved (Table 1). These results also suggest that further reduction in nitrosamine levels cannot be expected with existing technology; hence the need to again lower the amount of added nitrite.

B. Sodium Nitrite Needed for Botulism Protection

The importance of sodium nitrite for controlling the growth of C. botulinum is documented abundantly, but the exact quantity required in any particular prepared product under practical processing and distribution conditions remains uncertain (Expert Panel).

During the deliberations of the Expert Panel only a few studies had been conducted showing the relationship between nitrite and the prevention of growth in bacon. Since that time, additional research has been performed. Recently, a comprehensive assessment of the botulism hazards from cured meat products was presented by Housechild (Food Technology, December 1982). He summarized the data of 11 reports of inoculated pack studies using a method which allowed a comparison of all results. His evaluation prompted the statement that "it appears that no compensation would be necessary if nitrite input were to be reduced to 40 PPM." However, in his conclusions, he did not recommend major across-the-board reductions in nitrite, but rather that "Selective reductions in nitrite could be made safely, provided that the basic product formulations remain the same with respect to brine, carbohydrates and erythorbate."

Charges in processing procedure since 1978 have not altered the relationship between nitrite levels and nitrosamine formation in bacon, but they have made it less likely that very low levels of nitrite, which were of concern in establishing the 120 PPM standard, will be encountered in pumped bacon today. Although there is no way to determine that tightened processing controls have reduced the possiblity of botulinal growth in bacon, this would be anticipated.

The AMI believes it is timely and appropriate to heed the directives to reduce nitrite by taking advantage of the technological improvements which allow a modest reduction in nitrite without compromising safety. By integrating the two effects of nitrite concentration, it is possible to arrive at an estimate which maximizes the usefulness of nitrite in bacon. A reduction to 90-100 PPM is indicated.

V. SUMMARY AND CONCLULSION

The contribution of cured meat products to the total dietary load of nitrosamines has been reduced to less than 3 percent, but both consumer and industry want further reductions when they can be accomplished safely.

The safety of bacon has been maintained at 120 PPM nitrite and there is every indication that this safety would be maintained under normal commercial and household conditions at significantly lower levels. However, there is nothing compelling a reduction on the order adapted in 1978 and the more conservative approach of a moderate reduction seems appropriate at this time. The voluntary reduction of sodium seems appropriate at this time. The voluntary reduction of sodium nitrite in pumped bacon is part of an ongoing industry commitment to supply the consumer with the safest possible meat and meat products.

NATIONAL OSTEOPATHIC MEDICINE WEEK

Mr. LEVIN. Mr. President, each September, one week is set aside to honor the profession that emphasizes wholistic health care—osteopathic medicine. This year, the week beginning September 18, 1983, has been designated as "National Osteopathic Medicine Week."

Osteopathic medicine, which has been practiced in the United States since 1874, is based upon the theory that every patient should receive complete health care. This approach to treatment stresses care to the entire person, not just the symptom or illness, because what happens to one part of the body can affect other parts of the body. Physical, mental, and emotional well-being, as well as nutritional needs and environmental factors, are all important considerations in a doctor of osteopathic medicine's (DO's) diagnosis and treatment of a patient. Furthermore, a DO pays particular attention to the musculoskeletal system. The DO recognizes that muscles, bones, and joints make up over 60 percent of the total body mass, playing a vital role in every person's physical and mental health.

The osteopathic profession is dedicated to providing health services to entire families. More than 20,000 osteopathic physicians practice throughout the United States, caring for more than 20 million Americans. Nearly 40 percent of these DO's work in communities of less than 20,000 people, bringing health care to families in small towns and rural areas. More than 90 percent of all practicing DO's provide primary care. Most are general practitioners who are family-practice-oriented, but many DO's specialize in various areas such as surgery, pediatrics, obstetrics, and radiology.

In addition to the private practitioners, there are over 200 osteopathic hospitals located in 31 States which provide vital health care services to Americans. With more than 25,000 beds, these medical centers provide treatment for approximately 877,000 patients. Each year, osteopathic hospitals account for some 6.5 million patient-days of care. Osteopathic hospitals also treat roughly 3.8 million outpatients per year, providing emergency and ambulatory care.

Mr. President, I am proud to represent a State that has been a pioneer in the practice of osteopathic medicine. Sixteen percent of all DO's practice in my own State of Michigan. We have more than 30 of the Nation's 200 osteopathic hospitals located in Michigan—more than any other State in the country.

The Nation's first freestanding osteopathic hospital for children and adolescents in need of psychiatric treatment is located in the State of Michigan. We are also proud to be the home of the Michigan State University College of Osteopathic Medicine—a leading national medical school.

Americans continue to turn to osteopathic physicians for the total health care needs of their families. In short, osteopathic medicine offers something more for those who seek medical treatment that emphasizes the whole person.

I want to take this opportunity to salute the osteopathic medical profession and to commend individual DO's, hospital administrators, and their staffs, and health care practitioners throughout the Nation and the 15 osteopathic medical schools, for the remarkable contribution they have made to improving the quality of health care for all Americans.

Mr. President, I ask unanimous consent that an article entitled "Competition Within the Physicians' Service Industry: Osteopaths and Allopaths," which appeared in the American Journal of Law and Medicine during the summer of 1982, appear in the RECORD following my statement.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMPETITION WITHIN THE PHYSICIANS' SERVICES INDUSTRY: OSTEOPATHS AND ALLOPATHS

(By Erwin A. Blackstone, Associate Professor of Economics, Temple University)

ABSTRACT

Within the physicians' services industry, doctors of osteopathy are the only "full line" competitors of medical doctors.[1] Given the current interest in merger of the two schools of practice, this Article examines the benefits of having an independent osteopathic school. These benefits include: (1) reduction of the monopoly power of medical doctors in malpractice litigation, fee negotiations with third party payors and the formulation of health policy; (2) greater satisfaction of consumer desires; and (3) diversity and innovation in physicians' training and methods of practice. The Article concludes that society has an interest in discouraging merger of the two groups; osteopathy should be maintained as an independent school of practice. To this end, society should carefully consider the impact of legislation and regulatory policies that may have the unintended effect of eliminating osteopathy as an independent competitor.

I. INTRODUCTION

For a variety of reasons, the physicians' services industry has been somewhat unresponsive to the market forces of supply and demand.[2] Because of this unresponsiveness, regulation rather than competition has been relied on to allocate resources in the health care industry.[3] Now, because of a growing disenchantment with regulation, competition is emphasized wherever feasible.[4] It is frequently lamented that the physicians' services segment of the health care industry lacks competition.[5] A closer look at this segment, however, reveals that substantial competition does exist and provides an opportunity to examine both the impact of and appropriate role for such competition.

There are two competing groups of physicians in the United States—doctors of osteopathy (D.O.s or osteopaths) and doctors of medicine (M.D.s or allopaths). Osteopaths, like allopaths, are licensed to practice all healing modalities.[6] D.O.s graduate from osteopathic medical colleges and currently

[1] Footnotes at end of article.

comprise about four percent of all physicians.[7] Although osteopaths have emphasized general and family practice, they do offer a full line of medical services including specialties such as neurosurgery.[8]

The American Osteopathic Association (A.O.A.) is similar in structure to the American Medical Association (A.M.A). The A.O.A.'s control over osteopathy is similar to the A.M.A.'s control over allopathy. Graduation from an A.O.A.-approved osteopathic medical school is generally required for state licensure of osteopathic physicians.[9] Osteopathic medical schools teach both the standard medical curriculum and osteopathic principles and practice. Teaching of the latter comprises only three to five percent of the total curriculum.[10]

There have been important changes in allopaths' attitude toward osteopaths. Originally osteopaths were labelled "cultists." Now D.O.s can be accepted into A.M.A.-approved internship and residency programs, can become staff members at allopathic hospitals, and can join allopathic medical societies.[11] While allopathy previously tried to inhibit osteopathy's ability to compete, it now tries to gain control over osteopathy by merger of the two schools.[12] Because the gains from achieving monopoly are substantial,[13] it is not surprising that allopaths would want to acquire control over their only competitors. Even a single competitor can significantly constrain the behavior of the dominant firm.[14]

A monopoly exists when one seller produces the entire output of an industry.[15] In an effort to maximize profits, a monopoly controls output to produce less than what would be produced by a competitive industry that faced the same cost and demand conditions.[16] Without a competitive spur, a monopolist is not forced to tap all segments of the market. This absence of competition can lead to a lack of product variation and a lessening of consumer satisfaction.[17] Competition is often induced in monopoly situations to alleviate these problems.[18]

Allopaths comprise approximately 96 percent of all physicians. As a group they enjoy substantial monopoly power. Their power over accreditation of both medical schools and graduate training programs provides them significant control over the supply of allopathic physicians.[19] Unification of osteopathy and allopathy would give the A.M.A. control over production of all physicians.

The existence of osteopathy as a competitor provides significant gains for society, such as increased innovation and responsiveness to unmet consumer desires. Competition between the two groups will likely occur on a service rather than a price level, because consumers have little incentive to shop for health care services.[20] First, third-party insurers reimburse insureds with little regard to fees charged,[21] which tends to blunt consumers' interest in cost containment. Although most osteopaths are general practitioners, they do perform substantial hospital work, usually under insurance coverage.[22] Second, "comparative shopping" among health care providers on the basis of price is virtually unknown.[23] No one wants to skimp on health care; when an individual is sick, he seeks the best care possible, regardless of cost.[24]

While an independent osteopathic school benefits society, threats to its continued existence are manifest. This Article points out the traditional benefits of competition found in the physicians' services market despite the presence of only two competitors. The Article will describe certain aspects of the operation of the physicians' services market to show that significant benefits accrue to society as a result of the independent existence of the osteopathic school of medicine. Finally, it will suggest public policies aimed at maintaining that competition.

II. CURRENT THREATS TO DUOPOLISTIC COMPETITION

Osteopaths face several impediments to their continued existence as competitors with allopaths. The first major impediment to the realization of the benefits of osteopathic rivalry is osteopathy's minority position. In some areas of the country, there are too few osteopaths to provide consumers with a meaningful choice of service.[25] In 1979, for example, five states had fewer than ten osteopaths providing patient care; thirteen states had fewer than twenty osteopaths.[26] Similarly, in some areas there are very few osteopathic hospitals. In the early 1970's, the entire New England region had only five.[27] Further, while more and more osteopaths enjoy staff privileges at allopathic hospitals, many still face substantial difficulty gaining such access.[28]

Osteopathy may also face a shortage of training positions for osteopathic physicians.[29] A study by the Task Force on Graduate Osteopathic Medical Education projects that within ten years there will be over 1800 osteopathic graduates to fill approximately 1100 osteopathic internship positions.[30] There are relatively few osteopathic hospitals, and of these, slightly less than half are approved for graduate training.[31] Most osteopathic hospitals are relatively small[32] and have insufficient patient volume to train many sub-specialty osteopaths.

The second major impediment to osteopathy's continued existence as an independent school is the discriminatory effect of some health planning regulation. Some osteopaths have alleged intentional discrimination by regulators.[33] For example, the American Osteopathic Hospital Association charged that approval of a plan for merger of three osteopathic hospitals, which would result in a reduction of surplus beds, was delayed for two and one-half months just after a similar plan involving three allopathic hospitals had been routinely approved in four weeks.[34]

Generally, however, discrimination by health planning agencies against osteopaths is unintentional. For instance, certificate-of-need controls instituted under the National Health Planning and Resource Development Act[35] have threatened the existence of the osteopathic hospital systems.[36] A West Michigan Health System Agency proposal illustrates this threat.[37] The Agency proposed that hospital obstetrical departments in population centers of 100,000 or more should have a minimum of 1500 deliveries per year.[38] The Chairman of the Board of Directors of the Grand Rapids Osteopathic Hospital noted that only one osteopathic hospital in the United States could meet this standard.[39] He also noted that closure of osteopathic obstetrical units would effectively eliminate graduate osteopathic education in its present form, since obstetric experience is required as part of the osteopathic rotating internship.[40]

These problems were brought to the attention of Congress by the A.O.A. and in 1979 the Health Planning and Resources Development Act was amended to require that consideration be given osteopathy's unique situation.[41] The amendment mandates that state agencies reviewing an application for a certificate of need shall consider "the need for and the availability in the community of services and facilities for osteopathic and allopathic physicians and their patients."[42] It also requires consideration of an application's "impact on existing and proposed institutional training programs for doctors of osteopathy and medicine at the student, internship, and residency training levels."[43] Despite the amendment, the potential for discrimination against osteopathy still exists.[44]

The impediments to osteopathy's continued existence as an independent minority school of physicians are significant. Osteopathy must deal with problems resulting from its minority position in the physicians' services market and government policies aimed at reducing the cost of health care which discriminate against osteopathy. Against this background, the following discussion examines ways in which osteopathy's existence as an independent school benefits society.

IV. BENEFITS OF DUOPOLY

Although osteopaths account for only a small percentage of physicians in the United States, their continued existence as an independent school of medicine has provided, and should continue to provide, a competitive spur to the physicians' services industry. They are an important source of expert testimony in malpractice litigation against allopaths, which can help break the "conspiracy of silence" that exists among allopaths. They can intervene in negotiations with third-party payors to reduce the leverage that allopaths could otherwise exert on the establishment of reimbursement rates. Osteopaths fill otherwise untapped segments of the physicians' services market, such as rural and inner-city areas. Finally, they innovate in their methods of training and practice, providing possible alternatives to allopaths seeking to contain costs.

A. Reducing monopoly power

I. Malpractice Litigation.—By raising the cost of poor performance, the threat of malpractice litigation may induce a higher quality and care.[45] Most physicians view malpractice liability as detrimental to their individual interests. In addition, malpractice liability diminishes the respectability of the profession. This loss of respect translates into reduced physicians' earning power. To the extent that physicians take reasonable measures to avoid malpractice liability, the quality of their service will necessarily improve.

Few would argue that a patient harmed by a clear case of physician malpractice should be unable to obtain recovery. Nevertheless, in some instances, allopathy's monopoly power could lead to precisely this result.[46] That a "conspiracy of silence" exists among allopaths is well-established.[47] Allopaths often refuse to testify against one another on behalf of a plaintiff who seeks to establish by expert medical testimony[48] that a departure from the prevailing standard of care occurred. Physicians may be discouraged from testifying against one another for fear of ostracism and "disciplinary action," such as loss of referrals from other physicians, inability to obtain or maintain hospital staff privileges, or cancellation of malpractice insurance.[49]

Osteopaths can be a key source of expert testimony against allopaths. Treatments used by osteopaths and allopaths are frequently the same or similar; therefore, osteopaths are generally competent to testify as to the prevailing standard of care.[50] Further, since osteopaths generally rely on re-

ferrals from other osteopaths, they can testify against allopaths without fear of reprisal. The availability of osteopaths to testify against allopaths is especially important when a plaintiff is unable to procure any other source of expert medical testimony.[51] In *Morrill* v. *Komasinski*, for example, the plaintiff consulted several allopaths who advised her that while the defendant allopaths' diagnosis and treatment was "faulty," they would not testify. The plaintiff subsequently secured the testimony of two osteopaths and ultimately prevailed against the defendant.[52]

The independent existence of osteopathy is beneficial in malpractice litigation. The growing number of osteopathic specialists and the greater acceptance of osteopaths as full-fledged physicians will make it easier to overcome allopaths' ability to avoid malpractice litigations.[53] Even if there is a "conspiracy of silence" among allopaths, a "conspiracy" between the two competing schools of physicians is unlikely.

2. Third-Party Payors.—Allopaths possess substantial power over standardized rates of reimbursement established by third-party payors for medical services. Their influence is especially evident in a program such as Medicaid,[54] which is designed to make health care affordable to low-income persons.[55] The viability of Medicaid depends on physicians' voluntary acceptance of government established fees.[56] If allopaths could maintain monopoly control here, they would have tremendous power and incentive to "walk" if not satisfied with the prescribed fees.

With the separate osteopathic school, allopaths must be aware that a concerted refusal to participate in this program may provide an opportunity for osteopathy to expand its share of the market. The D.O.s' ability to intervene in these negotiations benefits society. First, it keeps fees reasonable. Second, since the money available for Medicaid reimbursement is finite, lower costs mean more treatment can be provided for a given amount of government money. Finally, if M.D.s choose not to participate in the Medicaid program, the poor can turn to D.O.s.

Osteopaths may have helped overcome allopaths' opposition to a temporary reduction of Medicaid reimbursement levels in New Jersey. In 1975, the New Jersey Department of Human Services instituted a ten percent reduction in Medicaid fees in an attempt to balance the state's budget.[57] The Board of Trustees of the New Jersey Medical Society recommended withdrawal of support from the Medicaid program in an apparent attempt to force the state to rescind the cut in fees.[58] In contrast, the New Jersey Association of Osteopathic Physicians indicated that, despite its displeasure with the fee reductions, its members would continue to serve Medicaid patients.[59] The New Jersey example suggests that the existence of an independent osteopathic school may reduce the power of allopaths to influence or control third party payor reimbursement rates.

3. Health Care Legislation and Policy.—The advantages of diversity extend to the legislative arena where the two medical groups, because of their different types of practice, may take divergent positions on government activities. While other groups may offer testimony on proposed health care legislation, osteopaths, as physicians, have potentially greater power to counter the views presented by allopaths.

There are numerous examples of osteopaths and allopaths presenting differing views on legislative proposals. In 1961, the A.M.A. stated its opposition to the proposal that the federal government take major responsibility for the provision of health care to the elderly, labeling the proposal "socialized medicine."[60] The A.O.A. supported the bill.[61] Osteopaths and allopaths presented different views on Professional Standards Review Organizations (PSROs).[62] After the PSRO law was passed, the A.M.A. recommended nineteen amendments.[63] The osteopathic statement given before a House subcommittee acknowledged some problems in the PSRO program, but cautioned against major changes that would reduce the program's effectiveness, noting that "[t]here are those who would have you amend this program to death."[64] Another subject on which the A.M.A. and A.O.A. have advocated different positions is malpractice liability insurance. The A.O.A. advocated federally funded "no fault" insurance to compensate victims of malpractice,[65] while the A.M.A. advocated limitations on damage awards and attorneys' fees and a shorter statute of limitations.[66]

While the extent of osteopathy's influence on the legislative process is unknown, its presentation of views different from allopathy's serves to increase Congress' awareness of alternative solutions to problems in health care. Congress' recognition of osteopathy's special needs in the 1979 amendments to the National Health Planning and Resources Development Act indicates that osteopathy's voice is not unheard.[67]

B. Responsiveness to consumers' desires

Osteopathy has helped to improve the responsiveness of the physicians' services industry to consumers' desires in two ways. First, in certain areas where lack of competition has resulted in "gaps" in allopaths' provision of services, osteopaths have helped to increase the availability of physicians' services in terms of geographic distribution and type of practice. Second, osteopaths have competed with allopaths to a limited extent by providing services different from those offered by allopaths.

For a variety of reasons, allopaths have been relatively free from normal market forces.[68] One result is that relatively few allopaths practice in rural areas.[69] In contrast, in 1979, thirty-nine percent of all D.O.s practiced in communities with populations of less than twenty thousand.[70] Allopaths' unresponsiveness to the demand for physicians' services in these areas has provided the opportunity for osteopaths to establish their practices. Osteopaths are also relatively over-represented in the core areas of many cities. In 1970, they comprised twenty-two percent of the three thousand practicing general physicians in metropolitan Philadelphia and thirty-seven percent of those in West Philadelphia, an inner-city area.[71]

Osteopaths have also helped fill the gaps left by the exodus of allopaths from general practice into the specialities.[72] Osteopathy emphasizes primary care in the training of its physicians[73] and consequently produces a relatively high percentage of general practitioners. In 1975, eighty-two percent of Philadelphia's osteopaths and only forty percent of its allopaths were generalists.[74]

In addition to filling gaps left by allopaths, osteopaths have been able to compete directly with allopaths to a limited extent. Osteopaths satisfy consumers' demand for a type of physician different from an M.D. It has been suggested that because the role of "doctor" in our culture does not enjoy the esteem it used to, many patients seek a "less doctorly" doctor, a desire fulfilled by osteopaths.[75] For those patients who seek medical care, but choose not to consult an M.D., osteopathy provides at least one alternative to reliance on self-treatment or an unqualified practitioner.[76]

C. Diversity and innovation in methods of training and practice

Innovation and diversity often result when a competitor tries to capture some of the dominant firm's market share. Osteopaths have been forced to be innovative because of their minority position, their desire to compete with allopaths, and their lack of reliance on government funding. Innovation has been apparent in osteopaths' methods of training and practice, in quality control, and in continuing medical education. As osteopaths become more competitive, as costs rise, and as government funding decreases, allopaths may adopt some of osteopathy's innovations.

Osteopathic schools do not receive as much outside aid as do allopathic schools.[77] They must rely on tuition to cover expenses, and thus have a great incentive to make innovations that will reduce their training costs. While allopathic schools may share this incentive to reduce their training costs, they have been slow to innovate. Entry of new allopathic schools that varied from the traditional curriculum has been discouraged by the majority of allopaths.[78] Competition between the two schools of medicine, however, may lead to a departure from the rigid M.D. structure.[79]

One major point of diversity between the two schools is the time required for training. The standard osteopathic curriculum is four years plus one year of internship, considerably shorter than the standard allopathic program. Required post-doctoral education for M.D.s and D.O.s also differs. Osteopathy utilizes a rotating internship with exposure to all major fields of medicine over the course of one year.[80] Allopaths, on the other hand, generally spend one year in an internship in either internal medicine or surgery and then enter a residency program for further specialization. The shorter training period for osteopaths reflects osteopathy's concerns with keeping education costs low and educating physicians as generalists. If and when cost constraints give allopathic schools incentive to reduce training costs, the D.O. model is an alternative means of training that they can adopt.

Philosophical differences between the two schools have led to innovations in practice. For example, osteopaths claims that their practice of manipulative therapy and interest in holistic medicine have now been adopted by M.D.s, as evidenced by allopaths' current interest in biomechanics.[81]

Osteopathy has been innovative in the area of quality control. As part of their effort to obtain a greater market share, osteopaths have instituted measures demonstrating their concern with the quality of medical care provided. The existence of the quality-conscious competitor to allopathic medicine forces allopaths to provide high quality service; relatively low quality could lead to a loss of patients to osteopaths.

For example, continuing medical education illustrates the benefits provided by a competitive osteopathic school. In 1967, twelve states required that D.O.s receive continuing medical education in order to obtain relicensure.[82] These provisions were "unique among licensure laws for health personnel [and] were enacted at the insistence of state osteopathic associations.[83] At

that time, no state required that M.D.s receive continuing education.[84] Following the lead of osteopaths, however, allopaths established continuing medical education as a condition for licensure. By 1978, nineteen states' M.D. licensing boards had adopted this requirement.[85]

Osteopathy's presence as a competitor reduces allopathic monopolization of the physicians' services market, particularly in the areas of malpractice litigation, negotiations with third-party payors, and the formulation of legislative health care policy. In addition, osteopathy responds to gaps in the provision of physicians' services that result from allopathy's monopoly power in certain areas. Finally, the existence of the osteopathic school provides diversity and innovation in methods of training and practice within the health care industry.

V. RECOMMENDATIONS FOR THE MAINTENANCE OF COMPETITION BETWEEN SCHOOLS

The major benefit of rivalry between osteopathy and allopathy is the greater likelihood that the diverse demands of society will be met. Consequently, it is important to ensure that osteopathy remain a distinct school. To maintain and possibly increase the significance of osteopathic rivalry, a number of policy recommendations are in order.

First, a separate licensing board for osteopathic physicians is desirable to prevent M.D.s from gaining control over the licensure and output of osteopathic physicians. In 1977, nonosteopaths were in the majority on boards that license osteopaths in twenty-seven states, and in many of these states M.D.s evidently comprised the majority of board members.[86] Medical licensing boards might try to gain control of osteopathic licensure by offering to provide M.D. degrees to D.O.s. Such an offer was recently made in California, but was withdrawn after threats of litigation by osteopaths.[87]

Second, separate osteopathic hospitals should be maintained. They play an important role in providing full medical and surgical care. In addition, graduate medical education occurs largely within the hospital context. Benefits from having separate osteopathic hospitals, which accrue directly to osteopaths but result in indirect benefits to society, include: (1) assurance of a number of programs and positions for graduate education for osteopaths; (2) assurance for the opportunity for clinical hospital practice by many osteopathic physicians; and (3) diversity and innovation in treatment methods, hospital management, and accreditation standards for hospitals. It is therefore important for osteopaths to have access to and control over hospitals. The existence of a sufficient number of separate osteopathic hospitals is essential to maintain the benefits of having separate schools and philosophical bases for medical practice.

Third, regulatory bodies such as Health Systems Agencies, in setting policies to control costs, should carefully consider the impact that their regulations may have on osteopathic competition. Even if the actions of hospital regulatory agencies economized significantly on the use of resources [88] (and it is not clear they do),[89] the loss of the benefits from competition in the physicians' services segment of the industry might well outweigh any resource savings in the hospitals.

VI. CONCLUSION

Osteopathic-allopathic rivalry has already provided substantial benefits to society. It promises to provide even more benefits in the future. Public policy requires that osteopathic competition continue. Given the benefits from competition between the osteopathic and allopathic disciplines, society has a strong interest in resisting the pressures for merger of the two disciplines and instead should try to maintain their separate, though cooperative, existence. Accordingly, osteopaths should have sufficient access to hospitals, a separate licensing board, and freedom from discriminatory regulatory treatment. These policies will ensure that society will continue to benefit from the "second opinion" represented by osteopathy.

FOOTNOTES

[1] This article uses the term "allopaths" to refer to doctors of medicine (M.D.'s). The term is used, as a matter of convenience, to distinguish conventional medical doctors from osteopaths. There is some dispute as to whether this usage is correct. The term has been used to refer to conventional medical practice in general *See e.g.*, WEBSTER'S THIRD NEW INTERNATIONAL DICTIONARY 57 (1976). On the other hand, allopath is understood by some to refer to a type of doctor different from a medical doctor. Thus, a medical dictionary includes under its definition of allopath: "2. Erroneously, a physician of the rational or regular school, as distinguished from eclectic or homeopathic practitioners." STEDMAN'S MEDICAL DICTIONARY 45 (4th Lawyer's ed. 1976). The term is used in this article in the sense of the former definition.

[2] Some factors contributing to this unresponsiveness are that: (1) health care services are generally paid for by third-party insurers; (2) consumers are often unable to evaluate and compare physicians' services; (3) consumers are often inactive in creating demand; and (4) consumer's traditional respect for the medical profession inhibits their questioning physicians' judgment. CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. The time for routine morning business has expired.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The PRESIDING OFFICER. The Chair will lay before the Senate the unfinished business, which the clerk will state.

The legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The Senate resumed consideration of the bill.

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

The PRESIDING OFFICER. The Chair, in his capacity as the Senator from New Hampshire, asks unanimous consent that the order for the quorum call be rescinded.

Without objection, it is so ordered.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Pursuant to the previous order, the Senate will stand in recess until 2 p.m.

Thereupon, the Senate recessed at 12 noon until 2 p.m.; whereupon, the Senate reconvened when called to order by the Presiding Officer (Mr. MATTINGLY).

ORDER OF PROCEDURE

Mr. GOLDWATER. Mr. President, I wonder if I may ask the Senator from Idaho to yield me 5 minutes.

Mr. McCLURE. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is H.R. 3363 and the committee amendment on page 42.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Senator from Arizona may proceed for not to exceed 10 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arizona.

NO TIME FOR PARTISANSHIP IN FOREIGN AFFAIRS

Mr. GOLDWATER. Mr. President, I rise today in support of the Baker resolution.

While I do not agree with any declaratory provisions of the resolution that imply the war powers resolution is a binding law, I do agree that we must find a way out of any potential impasse in foreign affairs between the executive and legislative branches.

It would be the height of folly for us to stand here debating legal technicalities and political theory while, in Lebanon, the marines are getting shot at. What we need at this moment of crisis in Lebanon is support for a bipartisan foreign policy, not a constitutional confrontation between the Congress and the President.

This is no time for our Nation to be fighting internally over the interpretation of the war powers resolution, a legislative measure that uses general, undefined terms, and is probably the most unconstitutional measure Congress has ever passed.

Mr. President, Congress should never attempt to impose an artificial time limit on the deployment of U.S. military units. Marine Corps Commandant General Kelley has explained why. He warned last week that Congress should not "start an artificial timetable that signals to anyone that we are about to withdraw within a certain period of time." His advice was that "a withdrawal should be based on a series of circumstances and not on a timetable."

General Kelley is quoted in the Washington Times as warning that by starting an arbitrary timeclock moving for withdrawal of the marines, "it could lead to movement on the part of forces hostile to our marines, to increase harassing fires against the marines." Of course, General Kelley is right. It is the height of nonsense to tell forces who are shooting at you that, no matter what they do, you will pull out by a date certain.

The Democratic Caucus resolution stands in contrast with the position

taken by a Democratic President, Harry Truman, who, in June 1950, sent American troops to try and hold the area around Pusan after South Korean forces collapsed under a massive attack by North Korea. The late Dean Acheson, then Secretary of State, has reported President Truman briefly considered asking for a congressional resolution approving what the United States was doing in Korea.

Dean Acheson advised the President not to go to Congress and the President agreed that this should not be done. Mr. Acheson gave the following explanation:

> It seemed to me if, at this time, action was pending before the Congress, by which hearings might be held, and long inquiries were being entered into as to whether or not this was the right thing to do, or whether the President had the authority to do it, or whether he needed congressional authority for matters of that sort—we would be doing about the worst thing we could possibly do for the support of our troops and for their morale.

Mr. Acheson's advice is relevant to our debate today. I wish my Democratic friends in the Senate would heed the counsel that a Democratic Secretary of State gave to his President at an important moment of history, when fast decisions, not an impasse, were required.

Also, we might examine how the interpretation proposed by the Democratic Caucus would have impeded the actions of an earlier Democratic President, Franklin Roosevelt, when he moved independently of Congress to support the opponents of Nazi Germany before the declaration of war of December 11, 1941. If the war powers resolution has been in effect in the 1940's, President Roosevelt would have stood in violation of the law after April 15, 1941, when he placed troops in Greenland. President Roosevelt would have violated the war powers resolution after July 7, 1941, when he stationed over 8,000 marines in Iceland with orders to defend what was then a British base, being operated by the British against the Nazis.

If these actions did not reach the level of the deployment of American forces into hostilities, then most certainly what happened on September 6, 1941, would have started a clock moving for the withdrawal of American naval units from hostile waters, under the interpretation used by the Democratic Caucus today. On September 6, the American destroyer *Greer* was traveling through the American defense zone on a mail run to Iceland when it encountered a German U-boat, which launched two or three torpedos at the *Greer*. The *Greer* dodged them and dropped a circle of depth charges around the U-boat.

On September 11, 1941, President Roosevelt made a radio broadcast to the Nation in which he told the American people that shots had been fired in anger between an American destroyer and German submarine. He did not report, however, that the *Greer* had first trailed the U-boat and reported its exact position to a British control plane which had dropped several depth charges on the submarine.

President Roosevelt announced that the "time for active defense is now" and said that: "From now on, if German or Italian vessels of war enter the waters, the protection of which is necessary for American defense, they do so at their own peril." His biographer, James MacGregor Burns, writes that Roosevelt was in effect declaring naval war on Germany with a policy of "shoot on sight." To clear up any doubt, Secretary of the Navy Knox declared publicly on September 15, 1941, that "the Navy is ordered to capture or destroy by every means at its disposal Axis-controlled submarines or surface raiders in these waters."

Now, what would have happened if Congress decided to vote on each of these actions by the President? Do you think the Congress would have approved American participation with Great Britain in a military alliance to resist Nazi aggression?

Not at all. If the matter of Presidential authority had come before Congress for debate, Congress would likely have listened to the voices of appeasement and defeatist elements who would not unite, who would not rearm, and who would not consider sacrifices of any kind for our individual or collective security.

Robert Sherwood, who at this time was a Presidential aide, has reported that advisers close to the Roosevelt White House were convinced that his military defense measures before Pearl Harbor represented suicide for Roosevelt and possibly for this Nation.

Remember that in 1936 and 1937, Congress had passed two neutrality laws. Remember that in 1940, Congress had passed two statutes expressly prohibiting the President from deploying U.S. military forces anywhere outside the Western Hemisphere, laws which we have seen that President Roosevelt violated in 1941. And we must remember that, in 1941, Congress, by only a single vote, passed an extension of the Selective Service Act, thereby saving the Army.

In the summer of 1941, public opinion polls had revealed a decrease in support for aid to Britain. A vast majority of Americans thought that doing anything to aid Britain was pouring it down the sink.

No, the President could not have looked to Congress for the vision to understand that democracies must honestly confront threats to their survival and that democracies will avoid disaster only by maintaining their defenses.

In other words, history proves that we can have no assurance Congress will act when a firm response is needed. History shows it is wrong for Congress to interefere with tactical military decisions of the President. It is wrong for Congress to usurp the President's direction of the day-to-day operations of foreign policy.

Mr. President, it is useless for us to get into a technical discussion of what each word of the war powers resolution means. We need not and should not be getting into a fight with the President over the allocation of the war powers at a time when the marines are being shot at.

Mr. President, the constitutional issue is not the real issue before us today. Whatever powers Congress may or may not possess, we should not use these powers to impose an artificial timetable on the presence of U.S. forces in Lebanon or any other area of the world. It is unwise and dangerous for the Congress to lay down artificial rules telling our potential enemies how long our forces can remain within a given area.

The effective conduct of foreign policy requires a degree of flexibility in order to meet unforeseen events. The war powers resolution attempts to take away that flexibility from the President and, in doing so, it harms the national security and puts at risk the freedoms of 230 million American citizens.

Mr. President, I urge that we adopt the resolution by the majority leader and reject the resolution offered by the Democratic Party Caucus. This is no time for partisanship in foreign affairs.

Mr. BUMPERS addressed the Chair.

Mr. BAKER. Mr. President, this will not take more than a moment.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, may I ask the distinguished manager of this bill (Mr. McCLURE) if he will yield to me as in morning business for not to exceed 3 minutes?

Mr. McCLURE. Mr. President, I have no objection. I ask unanimous consent that I may do so.

The PRESIDING OFFICER. Without objection, it is so ordered.

MULTINATIONAL FORCE IN LEBANON RESOLUTION

Mr. BAKER. Mr. President, for some time now Members, I think, on both sides of the aisle have been aware of the fact that negotiations have been underway to try to resolve the issues involved in the War Powers Act vis-a-vis the situation in Lebanon. I am about to introduce a joint resolution which is being introduced today in the House of Representatives in identical form. I intend to discuss this with as many Senators as possible. I have advised the minority leader that I intend to introduce this resolution. It will be introduced for reference.

Mr. President, I send the joint resolution to the desk and ask that it be appropriately referred.

The PRESIDING OFFICER. The joint resolution will be received and appropriately referred.

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 166

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This joint resolution may be cited as the "Multinational Force in Lebanon Resolution".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) the removal of all foreign forces from Lebanon is an essential United States foreign policy objective in the Middle East;

(2) in order to restore full control by the Government of Lebanon over its own territory, the United States is currently participating in the multinational peacekeeping force (hereafter in this resolution referred to as the "Multinational Force in Lebanon") which was established in accordance with the exchange of letters between the Governments of the United States and Lebanon dated September 25, 1982;

(3) the Multinational Force in Lebanon better enables the Government of Lebanon to establish its unity, independence, and territorial integrity;

(4) progress toward national political reconciliation in Lebanon is necessary; and

(5) United States Armed Forces participating in the Multinational Force in Lebanon are now in hostilities requiring authorization of their continued presence under the War Powers Resolution.

(b) The Congress determines that the requirements of section 4(a)(1) of the War Powers Resolution became operative on August 29, 1983. Consistent with section 5(b) of the War Powers Resolution, the purpose of this resolution is to authorize the continued participation of United States Armed Forces in the Multinational Force in Lebanon.

(c) The Congress intends this joint resolution to constitute the necessary specific statutory authorization under the War Powers Resolution for continued participation by United States Armed Forces in the Multinational Force in Lebanon.

AUTHORIZATION FOR CONTINUED PARTICIPATION OF UNITED STATES ARMED FORCES IN THE MULTINATIONAL FORCE IN LEBANON

SEC. 3. The President is authorized, for purposes of section 5(b) of the War Powers Resolution, to continue participation by United States Armed Forces in the Multinational Force in Lebanon, subject to the provisions of section 6 of this joint resolution. Such participation shall be limited to performance of the functions, and shall be subject to the limitations, specified in the agreement establishing the Multinational Force in Lebanon as set forth in the exchange of letters between the Governments of the United States and Lebanon dated September 25, 1982, except that this shall not preclude such protective measures as may be necessary to ensure the safety of the Multinational Force in Lebanon.

REPORTS TO THE CONGRESS

SEC. 4. As required by section 4(c) of the War Powers Resolution, the President shall report periodically to the Congress with respect to the situation in Lebanon, but in no event shall he report less often than once every six months. In addition to providing the information required by that section on the status, scope, and duration of hostilities involving United States Armed Forces, such reports shall describe in detail—

(1) the activities being performed by the Multinational Force in Lebanon;

(2) the present composition of the Multinational Force in Lebanon, including a description of the responsibilities and deployment of the armed forces of each participating country;

(3) the results of efforts to reduce and eventually eliminate the Multinational Force in Lebanon;

(4) how continued United States participation in the Multinational Force in Lebanon is advancing United States foreign policy interests in the Middle East; and

(5) what progress has occurred toward national political reconciliation among all Lebanese groups.

STATEMENTS OF POLICY

SEC. 5. (a) The Congress declares that the participation of the armed forces of other countries in the Multinational Force in Lebanon is essential to maintain the international character of the peacekeeping function in Lebanon.

(b) The Congress believes that it should continue to be the policy of the United States to promote continuing discussions with Israel, Syria, and Lebanon with the objective of bringing about the withdrawal of all foreign troops from Lebanon and establishing an environment which will permit the Lebanese armed forces to carry out their responsibilities in the Beruit area.

(c) It is the sense of the Congress that, not later than one year after the date of enactment of this resolution and at least once a year thereafter, the United States should discuss with the other members of the Security Council of the United Nations the establishment of a United Nations peacekeeping force to assume the responsibilities of the Multinational Force in Lebanon. An analysis of the implications of the response to such discussions for the continuation of the Multinational Force in Lebanon shall be included in the reports required under paragraph (3) of section 4 of this resolution.

DURATION OF AUTHORIZATION FOR UNITED STATES PARTICIPATION IN THE MULTINATIONAL FORCE IN LEBANON

SEC. 6. The participation of United States Armed Forces in the Multinational Force in Lebanon shall be authorized for purposes of the War Powers Resolution until the end of the 18-month period beginning on the date of enactment of this resolution unless the Congress extends such authorization, except that such authorization shall terminate sooner upon the occurrence of any one of the following:

(1) the withdrawal of all foreign forces from Lebanon, unless the President determines and certifies to the Congress that continued United States Armed Forces participation in the Multinational Force in Lebanon is required after such withdrawal in order to accomplish the purposes specified in the September 25, 1982, exchange of letters providing for the establishment of the Multinational Force in Lebanon; or

(2) the assumption by the United Nations or the Government of Lebanon of the responsibilities of the Multinational Force in Lebanon; or

(3) the implementation of other effective security arrangements in the area.

INTERPRETATION OF THIS RESOLUTION

SEC. 7. (a) Nothing in this joint resolution shall preclude the President from withdrawing United States Armed Forces participation in the Multinational Force in Lebanon if circumstances warrant, and nothing in this joint resolution shall preclude the Congress by joint resolution from directing such a withdrawal.

(b) Nothing in this joint resolution modifies, limits, or supersedes any provision of the War Powers Resolution or the requirement of section 4(a) of the Lebanon Emergency Assistance Act of 1983, relating to congressional authorization for any substantial expansion in the number or role of United States Armed Forces in Lebanon.

Mr. BAKER. Mr. President, I will have more to say on this subject later, because it obviously deserves a great deal of thoughtful debate and consideration by all Members on both sides of the aisle. But in order to make sure that everyone has a copy of this joint resolution, I want to take this step today, that is, to introduce the resolution, have it printed in the RECORD and in due course I will consult with the minority leader, with the ranking minority member of the Foreign Relations Committee, and other members of the Foreign Relations Committee and such other Senators as I can manage to talk to about it.

I conclude only with this, Mr. President. I think it is time we get on with the business at hand and get rid of at least the questions involved in the War Powers Act and get on with the questions of what is our policy in the Middle East.

So I indicated to the minority leader and will repeat here, it is my intention to ask that we expedite the proceedings under the War Powers Act in respect to this resolution.

Mr. President, I thank the distinguished manager for yielding.

Mr. PERCY. Mr. President, I join with the majority leader in introducing this joint resolution authorizing the continued participation of U.S. Armed Forces in the multinational force in Lebanon. This resolution is presented in accordance with our responsibilities under the Constitution of the U.S. to approve the commitment of our Armed Forces to hostilities abroad. It is fully consistent with, and in fulfillment of, the terms and the intent of the war powers resolution of 1973.

U.S. MARINES IN HOSTILITIES

This resolution makes clear the determination of the Congress that our Marine contingent in Lebanon has been involved in actual or imminent hostilities since August 29, when the first hostile exchanges of fire occurred resulting in the death of two of our

men. Such exchanges and casualties have continued since that time, reaching the point yesterday that hundreds of rounds were fired from U.S. vessels off the coast of Lebanon in response to a series of provocative attacks on U.S. personnel and positions. There can be no doubt that the standard of section 4(a)(1) of the war powers resolution applies to this situation and that the Congress is now charged with debating and deciding the question of authorizing the continued participation of U.S. forces in Lebanon. Specifically, it is our responsibility as Members of Congress to decide whether the risks and sacrifices of our Armed Forces are justified by the interests we have at stake in Lebanon and the Middle East. At this point, I ask to have included in the RECORD a memorandum prepared by the Chief Counsel of the Foreign Relations Committee on the applicability of the war powers resolution to the situation in Lebanon.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., September 14, 1983.

MEMORANDUM

To: Senator Charles H. Percy, Chairman.
From: Frederick S. Tipson, Chief Counsel.
Subject: Lebanon and War Powers.

At your request, this memorandum summarizes my views on the applicability of the War Powers Resolution of 1973 to the current situation of our Marines in Lebanon. The Lebanon Emergency Assistance Act of 1983 is also central to this issue.

The following conclusions are drawn:

(1) The circumstances of our Marines in Lebanon recently reached the point where "imminent involvement in hostilities is clearly indicated," as intended by Congress in the War Powers Resolution. This judgment is not a simple one, but the conclusion seems justified.

(2) This hostile situation began with the shelling of Marine positions on August 29, resulting in the deaths of two Marines and significant return fire, followed by sporadic but continuing exchanges and further casualties since that time. There appears to be little likelihood of a significant reduction in the imminence of hostilities in the near future.

(3) The significance of these facts under the War Powers Resolution is that they call into play the requirements of Section 5(b) of that Resolution: the President must remove United States Armed Forces from the hostile situation (if he cannot otherwise alleviate the conditions which have created it), unless he obtains either a specific authorization from Congress to keep them there or an extension of the sixty-limit on his emergency authority. The requirements of Section 5(b) for Congressional authorization apply whether or not the President has submitted a report under Section 4 certifying that the hostilities threshold has been crossed.

(4) As the Mathias Resolution (S.J. Res. 159) indicates, the sixty-day period is measured from the date at which such a report was due (August 31), meaning that the deadline for Congressional authorization would be October 30. Consideration of the Mathias Resolution would be carried on in accordance with the expedited procedures of Section 6 of the War Powers Resolution.

(5) Authorization would otherwise be required by the Lebanon Emergency Assistance Act of 1983 if the President should initiate "any substantial expansion in the number or role in Lebanon of United States Armed Forces."

I will try to explain each of these conclusions and add some final points on the issue of constitutionality.

(1) Hostile situation

In enacting the War Powers Resolution, Congress made little effort to go beyond the "plain meaning" of the key terms "hostilities" and "situations where imminent involvement in hostilities is clearly indicated by the circumstances." These terms originated in the early Senate versions of the Resolution and prompted little subsequent discussion. The House Foreign Affairs Committee later substituted them for its original phrase, "armed conflict," because the term "hostilities" was considered "somewhat broader in scope." "In addition to a situation in which fighting actually has begun," the Committee wrote, "hostilities also encompasses a state of confrontation in which no shots have been fired but where there is a clear and present danger of armed conflict."

In short, the exchange of fire with hostile forces would indicate an outbreak of hostilities, and a high probability of such exchanges would suggest "imminent involvement." Brief, non-recurring situations such as occasional sniper fire would not suggest the continuing dangers associated with an ongoing set of hostile circumstances.

Arguments might be made that a hostile situation is not indicated by the present circumstances because the Marines:

(a) only return rather than initiate fire;
(b) act only in self-defense;
(c) remain essentially in one location;
(d) perform a mission of "peacekeeping," "presence," or "interposition".

However, there is nothing in the legislative history of the War Powers Act (or the recollection of several key participants) to indicate that any of these considerations would alter the fact that "hostilities" are indicated. For the same reason, it is also not conclusive that a battalion commander may have decided, as in the present situation, to make his men eligible for "hostile fire pay." Whether or not the standard should have been defined differently, it was the one which governed Congressional assumptions throughout the debate over the Resolution.

The broader point, of course, is that for the Resolution to be workable, this standard cannot be so narrowly interpreted as to be invoked only when its applicability is beyond all reasonable doubt. Unless he rejects the constitutionality of the entire provision, a President should presumably seek such authorization before the question of applicability becomes a contentious one, thereby diverting attention from the central issues.

(2) August 29 outbreak

The President's report to the Congress describes the circumstances surrounding the initial exchanges of fire on August 29:

On August 28, sporadic fighting between Lebanese Armed Forces and various armed factions took place in South Beirut; from time to time during the course of this fighting, positions in the vicinity of the Beirut airport manned by U.S. Marines of the MNF came under small-arms fire (without injury to U.S. personnel), and this fire was returned. On August 29, fighting erupted again. Marine positions came under mortar, rocket, and small-arms fire, with the result that two Marines were killed and fourteen wounded. In addition, several artillery rounds fell near the U.S.S. *Iwo Jima* (an amphibious support vessel lying offshore), with no resulting damage or injuries. As contemplated by their rules of engagement, U.S. Marines returned fire with artillery, small arms, and, in one instance, rocket fire from a helicopter gunship. There were additional exchanges of fire earlier today, August 30, without injury to U.S. personnel.

Such exchanges have continued, with additional casualties and fatalities, until the present. Although there have been continuing efforts to arrange a ceasefire and to achieve a broader, more permanent arrangement which would reduce the occurrence or imminence of hostilities, there is no immediate indication that this situation will soon change significantly. Therefore, the hostile situation would appear to be a continuous and continuing one.

It is conceivable, and certainly highly desirable, that the circumstances could change so substantially as to remove the "imminence" of hostilities. If that clearly becomes the case, the "sixty-day clock" would then presumably stop running and the requirement for further authorization would be removed for so long as that remains the case.

(3) Need for authorization or extension

The requirements of Section 5(b) speak for themselves:

"(b) Within sixty calendar days after a report is submitted or is required to be submitted pursuant to section 4(a)(1), whichever is earlier, the President shall terminate any use of United States Armed Forces with respect to which such report was submitted (or required to be submitted), unless the Congress (1) has declared war or has enacted a specific authorization for such use of United States Armed Forces, (2) has extended by law such sixty-day period, or (3) is physically unable to meet as a result of an armed attack upon the United States. Such sixty-day period shall be extended for not more than an additional thirty days if the President determines and certifies to the Congress in writing that unavoidable military necessity respecting the safety of United States Armed Forces requires the continued use of such armed forces in the course of bringing about a prompt removal of such forces."

Two points about this language should be emphasized, however. First, the actual submission of a report by the President is not a prerequisite to the operation of the requirement for authorization. The language "submitted or is required to be submitted" is obviously intended to cover situations in which the required report is either not submitted at all or is submitted late. In other words, the President does not need to certify that a hostile situation is involved under Section 4 in order to be bound by the requirement for an authorization in Section 5.

Second, the available thirty-day extension of the deadline is not simply a matter of Presidential discretion. The President must certify in advance that he is in the course of withdrawing U.S. forces and needs the extra time in order to do so safely because of "unavoidable military necessity."

(4) October 30 deadline

Assuming that hostilities involving U.S. forces can be said to have begun on August 29, the sixty-day period would begin on August 31, since that is when the report would have been due. (It also happens to be when the President's report of August 30 was actually submitted, which is the alternative starting point.) In other words, the War Powers Resolution actually prescribes a 62-day period from the outbreak of hostilities. Counting forward sixty days from August 31 takes us to October 30.

Under Section 6 of the War Powers Resolution, the Mathias Resolution should be considered by the Foreign Relations Committee, along with any comparable authorizations, no later than October 6, when the Committee is required to report a resolution with its recommendations. It then becomes the pending business in the Senate, which has up to three calendar days to vote on it. Further procedures are prescribed to assure Committee and floor consideration by the House and a House-Senate Conference prior to the sixty-day deadline. If the House should pass such a provision first, it would be referred to Committee for action prior to October 16, followed by Senate floor action within three calendar days.

(5) Lebanon Emergency Assistance Act restriction

On June 27, 1983, the President signed into law Public Law 98-43, the Lebanon Emergency Assistance Act of 1983. Section 4 of that legislation contains the following language:

UNITED STATES ARMED FORCES IN LEBANON

"SEC. 4. (a) The President shall obtain statutory authorization from the Congress with respect to any substantial expansion in the number or role in Lebanon of United States Armed Forces, including any introduction of United States Armed Forces into Lebanon in conjunction with agreements providing for the withdrawal of all foreign troops from Lebanon and for the creation of a new multinational peace-keeping force in Lebanon.

"(b) Nothing in this section is intended to modify, limit, or suspend any of the standards and procedures prescribed by the War Powers Resolution of 1973."

Given the strictures of this language, the President might wish to have an authorization for U.S. forces in the near future regardless of whether it is otherwise required by the War Powers Resolution.

Constitutionality

Both Presidents Nixon (in his veto message) and Ford (after leaving office) made clear their views that Sections 5(b), the sixty-day limitation, and 5(c), the legislative veto, were unconstitutional. Although President Carter made some statements which indicated his acceptance of the Resolution, his Counsel circulated a position paper following the Iran rescue mission which implied that the Section 3 consulting requirements might be unconstitutional.

Both Secretaries of State Haig and Shultz paid their ritual respects to the "letter and spirit" of the Resolution during their confirmation hearings. The Supreme Court's decision in June, of course, removed all vitality from the 5(c) legislative veto provision. It is likely that various high officials of the Reagan Administration question the constitutionality of the remainder of Section 5 as well. In speaking for the Administration on the Supreme Court's legislative veto decision, Deputy Secretary of State Kenneth Dam indicated as much. While accepting the severability of the legislative veto provision and acknowledging the continuing requirements for consultation and reporting, Secretary Dam recalled the traditional concerns of the Executive Branch about the 60-day limitation and suggested that no "purpose would be served by debating these questions here, in the abstract."

Several Congressional supporters of the War Powers Resolution, as well as its opponents, expressed concerns about the constitutionality of this requirement at the time it was passed. Nevertheless, the concept of temporary emergency authority in the President, during which time Congress should decide the matter, was fundamental to the Senate version of the Resolution and an integral part of the final version approved by both Houses and passed over the President's veto.

Undoubtedly, some of the reluctance of Administration officials to accept the characterization of the current situation as a hostile one results from a determination not to concede the constitutionality of the Section 5(b) requirement for further authority. However, given the restrictions of the Lebanon Emergency Assistance Act, it would seem desirable for the President to obtain a specific authorization with a somewhat broader definition of his authority whether or not he concedes the constitutionality of the War Powers Resolution.

It would be impossible, and probably pointless, to reiterate the entire debate which preceded passage of the Resolution in 1973. The dilemma was how Congress could perform its most solemn responsibilities under the Constitution, regarding decisions for peace or war and the provision and regulation of the armed forces, under the conditions of modern times. Professor Alexander Bickel referred to the "ambiguity bred by years of Presidential assertiveness and congressional inertia." "The upshot," he told the Committee "is that Congress does not know its place, so to speak; it has lost its bearings in this area. If Congress is ever again to take meaningful specific measures in matters of war and peace, it is apparent to me that it must first perform some quasi-constitutive act, an act of standing forth before the people as responsible, of declaring its responsibilities to itself and to the country with some clarity."

The War Powers Resolution was such a "quasi-constitutive act", but taken in the spirit of fulfilling constitutional responsibilities, not of altering the Constitution. Now that the Supreme Court has for all practical purposes removed the possible operation of the legislative veto in this area, the requirement for authorization beyond sixty days is the essence of the Resolution. If it is not applied in a case where the facts clearly indicate it was meant to apply, then Congress is clearly back to the starting line.

COMMENDATION OF MARINES

Mr. PERCY. Mr. President, I believe that the continuation of the current mandate of the Multinational Force should be extended. But whether or not every Senator agrees with me on this question, we can all agree that our Marines have earned a special debt of gratitude for their extraordinary service in Lebanon. We know what enormous pride and spirit it takes to be a U.S. marine. But it takes a special kind of courage, when you are trained and imbued with the skills and spirit of combat to sit tight day after day, week after week, and endure the attacks and provocations which have become a daily fact of life for the Multinational Force. As the Marine Commandant, Gen. P. X. Kelley, testified before the Foreign Relations Committee last week, Marines are trained not just to hold ground but to take it. Their restraint and steadfastness in the performance of this new and unaccustomed role has added a new dimension to our pride in the U.S. Marine Corps.

MULTINATIONAL FORCE

The task the Marines have undertaken, in combination with forces from France, Italy, and Great Britain, is to lend political and limited military support to the efforts of the Government of Lebanon to restore its independence. This is not a task we should ask them to undertake without the most searching consideration of our interests in that part of the world. Their mission is a restricted one, as set forth in the agreement which established and now governs the role of the Multinational Force. That agreement was concluded in an exchange of letters last September 25 between our Ambassador, Robert Dillon, and the Lebanese Foreign Minister. I ask unanimous consent that the text of these letters, accompanied by the State Department's background statement submitted under the Case Act, but included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BEIRUT,
September 25, 1982.

[9. Agreement between the United States and Lebanon on United States participation in a multinational force in Beirut. Effected by exchange of notes at Beirut September 25, 1982. Entered into force September 25, 1982.] (No. 100)

His Excellency FOUAD BUTRUS,
Deputy Prime Minister and Minister of Foreign Affairs, Beirut

YOUR EXCELLENCY: I have the honor to refer to Your Excellency's note of 25 September 1982 requesting the deployment of an American Force to the Beirut area. I am pleased to inform you on behalf of my Government that the United States is prepared to deploy temporarily a force of approximately 1200 personnel as part of a Multinational Force (MNF) to establish an environment which will permit the Lebanese Armed Forces (LAF) to carry out their responsibilities in the Beirut area. It is understood that the presence of such an American Force will facilitate the restoration of Lebanese Government sovereignty and authority over the Beirut area, an objective which is fully shared by my Government, and thereby further efforts of the Government of Lebanon to assure the safety of persons in the area and bring to an end the violence which has tragically recurred.

I have the further honor to inform Your Excellency that my Government accepts the terms and conditions concerning the presence of the American Force in the Beirut

area as set forth in your note, and that Your Excellency's note and this reply accordingly constitute an agreement between our two Governments.

BEIRUT,
September, 25 1982.

His Excellency ROBERT DILLON,
Ambassador of the United States.

YOUR EXCELLENCY: I have the honor to refer to the urgent discussions between representatives of our two governments concerning the recent tragic events which have occurred in the Beirut area, and to consultations between my government and the Secretary General of the United Nations pursuant to United Nations Security Council Resolution 521. On behalf of the Republic of Lebanon, I wish to inform Your Excellency's Government of the determination of the Government of Lebanon to restore its sovereignty and authority over the Beirut area and thereby to assure the safety of persons in the area and bring and end to violence that has recurred. To this end, Israeli forces will withdraw from the Beirut area.

In its consultations with the Secretary General, the Government of Lebanon has noted that the urgency of the situation requires immediate action, and the Government of Lebanon, therefore, is, in conformity with the objectives in U.N. Security Council Resolution 521, proposing to several nations that they contribute forces to serve as a temporary Multinational Force (MNF) in the Beirut area. The mandate of the MNF will be to provide an interposition force at agreed locations and thereby provide the Multinational presence requested by the Lebanese Government to assist it and the Lebanese Armed Forces (LAF) in the Beirut area. This presence will facilitate the restoration of Lebanese Government sovereignty and authority over the Beirut area, and thereby further efforts of my government to assure the safety of persons in the area and bring to an end the violence which has tragically recurred. The MNF may undertake other functions only by mutual agreement.

In the foregoing context, I have the honor to propose that the United States of America deploy a force of approximately 1200 personnel to Beirut, subject to the following terms and conditions:

The American military force shall carry out appropriate activities consistent with the mandate of the MNF.

Command authority over the American Force will be exercised exclusively by the United States Government through existing American military channels.

The LAF and MNF will form a liaison and coordination Committee, composed of representatives of the MNF participating governments and chaired by the representatives of my Government. The Liaison and Coordination Committee will have two essential components: (A) Supervisory liaison; and (B) Military and technical liaison and coordiation.

The American Force will operate in close coordination with the LAF. To assure effective coordination with the LAF, the American Force will assign liaison officers to the LAF and the Government of Lebanon will assign liaison officers to the American Force. The LAF liaison officers to the American Force will, inter alia, perform liaison with the civilian population and with the U.N. observers and manifest the authority of the Lebanese Government in all appropriate situations. The American Force will provide security for LAF personnel operating with the U.S. contingent.

In carrying out its mission, the American Force will not engage in combat. In may, however, exercise the right of self-defense.

It is understood that the presence of the American Force will be needed only for a limited period to meet the urgent requirements posed by the current situation. The MNF contributors and the Government of Lebanon will consult fully concerning the duration of the MNF presence. Arrangements for the departure of the MNF will be the subject of special consultations between the Government of Lebanon and the MNF participating governments. The American Force will depart Lebanon upon any request of the President of Lebanon or upon the decision of the President of the United States.

The Government of Lebanon and the LAF will take all measures necessary to ensure the protection of the American Force's personnel, to include securing assurances from all armed elements not now under the authority of the Lebanese Government that they will refrain from hostilities and not interfere with any activities of the MNF.

The American Force will enjoy both the degree of freedom and movement and the right to undertake those activities deemed necessary for the performance of its mission for the support of its personnel. Accordingly, it shall enjoy the privileges and immunities accorded the administrative and technical staff of the American Embassy in Beirut, and shall be exempt from immigration and customs requirements, and restrictions on entering or departing Lebanon. Personnel, property and equipment of the American Force introduced into Lebanon shall be exempt from any or of tax, duty, charge or levy.

I have the further honor to propose if the foregoing is acceptable to Your Excellency's Government, that Your Excellency's reply to that effect, together with this Note, shall constitute an agreement between our two governments.

Please accent, Your Excellency, the assurances of my highest consideration.

FOUAD BOUTROS,
Deputy-Prime Minister,
Minister of Foreign Affairs.

BACKGROUND STATEMENTS

Background statements:

1. Agreement between the United States and Lebanon on United States participation in a multinational force in Beirut. Effected by exchange of notes at Beirut September 25, 1982. Entered into force September 25, 1982.

Agreement was sent under cover of the Department's letter of November 10, 1982.

STATEMENT REGARDING AGREEMENT BETWEEN THE UNITED STATES AND LEBANON ON U.S. PARTICIPATION IN A MULTINATIONAL FORCE IN BEIRUT, EFFECTED BY EXCHANGE OF NOTES IN BEIRUT, SEPTEMBER 25, 1982

EXPLANATION OF AGREEMENT

In response to a request from the Government of Lebanon (GOL), the U.S. agreed in an exchange of notes to deploy temporarily a force of approximately 1,200 personnel as part of a Multinational Force (MNF) to establish an environment which will permit the Lebanese Armed Forces (LAF) to carry out their responsibilities in the Beirut area. The presence of such an American force will facilitate the restoration of Lebanese Government sovereignty and authority over the Beirut area, an objective fully shared by the U.S. government, and thereby will further efforts of the GOL to assure the safety of persons in the area and bring to an end the violence which has tragically recurred.

The U.S. agreement to deploy a contingent to the MNF was in the wake of a tragic massacre during the period September 16–18 of Palestinian civilians in the Sabra and Shatila refugee camp areas of Beirut. The GOL informed the U.S. that it was determined to restore its sovereignty and authority over the Beirut area and thereby to assure the safety of persons in the area. To this end, Israeli forces were to have withdrawn from the Beirut area.

The urgency of the situation in Beirut required immediate action in response to the GOL's request. The mandate of the MNF is to provide an interposition force at agreed locations and thereby provide the international presence requested by the GOL to assist it and the LAF in the Beirut area. The U.S. deployment was subject to the following terms and conditions:

The American military force shall carry out appropriate activities consistent with the mandate of the MNF.

Command authority over the American Force will be exercised exclusively by the United States Government through existing American military channels.

The LAF and MNF will form a Liaison and Coordination Committee, composed of representatives of the MNF participating governments and chaired by the representatives of the GOL. The Liaison and Coordination Committee will have two essential components: (A) Supervisory liaison; and (B) Military and technical liaison and coordination.

The American Force will operate in close coordination with the LAF. To assure effective coordination, the American Force will assign liaison officers to the LAF and the GOL will assign liaison officers to the American Force. The LAF liaison officers to the American Force will, inter alia, perform liaison with the civilian population and with the U.N. observers and manifest the authority of the Lebanese Government in all appropriate situations. The American Force will provide security for LAF personnel operating with the U.S. contingent.

In carrying out its mission, the American Force will not engage in combat. It may, however, exercise the right of self-defense.

It is understood that the presence of the American Force will be needed only for a limited period to meet the urgent requirements posed by the current situation. The MNF contributors and the Government of Lebanon will consult fully concerning the duration of the MNF presence. Arrangements for the departure of the MNF will be the subject of special consultations between the Government of Lebanon and the MNF participating governments. The American Force will depart Lebanon upon request of the President of Lebanon or upon the decision of the President of the United States.

The Government of Lebanon and the LAF will take all measures necessary to ensure the protection of the American Force's personnel, to include securing assurances from all armed elements not now under the authority of the Lebanese Government that they will refrain from hostilities and not interfere with any activities of the MNF.

In addition, the GOL and the U.S. Government agreed on certain rights to freedom of movement, facilities, and privileges and immunities for the U.S. force.

BACKGROUND INFORMATION ON NEGOTIATIONS

On September 14, 1982, the President-elect of Lebanon, Bashir Gemayel, was as-

sassinated. On September 15, Israel Defense Forces moved to take over the city of Beirut. During the period September 16-18, while Israeli forces were in control of the West Beirut area, a tragic massacre of Palestinian civilians occurred in the Palestinian refugee camps of Sabra and Shatila. To avert a recurrance of this violence, the GOL requested that the contributors to the Multinational Force in August agree to contribute to another MNF for deployment in the Beirut area. This request was also pursuant to consultations between Lebanon and the United Nations Secretary General.

EFFECT OF AGREEMENT

This agreement was to provide appropriate assistance to the GOL's effort to restore order, safety and control in Beirut. Most importantly, it was necessary to prevent by all available and agreed means a recurrence of the tragic massacre of innocent civilians. Concurrent with the entry of the MNF into Beirut, Israeli Forces moved out of the City of Beirut.

LEGAL AUTHORITY

Article II, sections 1 and 2 of the Constitution of the United States.

U.S. INTERESTS IN LEBANON

Mr. PERCY. Mr. President, our goals remain the same as they were when the marines entered Lebanon a year ago. They are:

The withdrawal of all foreign forces from Lebanon, including Syrian, Israeli, Palestinian, and others; the reassertion of Lebanese sovereignty throughout that nation; the protection of the civilian population in areas in which the Multinational Force operates; and a secure northern border for Israel.

Progress in achieving these goals has not been as rapid as we had hoped. Nevertheless, we should not overlook what has been accomplished. The Lebanese Parliament elected a new President. An overwhelming majority of Muslims as well as Christian deputies support the President. The Lebanese Government has reasserted central control throughout the capital and in most of the surrounding suburbs. Warring factions which had for years dominated the thoroughfares and alleys of Beirut have been removed. The port, for the first time in nearly a decade, is controlled by the Central Government. Most importantly, a national army has been formed and has performed better than almost all observers have anticipated. Finally, an agreement on the withdrawal of Israeli forces has been reached between the Lebanese and Israeli Governments.

Despite this progress, much has yet to be accomplished. The Government of Syria has refused to negotiate the terms of its withdrawal or to even admit that they intend to withdraw.

In addition, the Lebanese people are still deeply divided, although I do not believe the divisions are as deep as some would have us believe. In the past week representatives of the Shi'ite, Sunni, Maronite, Melkite, and Aremenian communities have come to my office asking that the United States continue its participation in the Multinational Force and its support for the Government of Lebanon. This resolution assures our continued assistance to the Lebanese so that they will have time to strengthen their national institutions and develop a political arrangement so that all the communities in Lebanon believe they are fully represented and fully protected in Lebanon. The task of reconciliation rests with the Lebanese. The Multinational Force can only help create the climate in which the Lebanese can resolve their own problems.

If the marines are withdrawn at this time, Lebanon once again could be overwhelmed by internal divisions fomented by outside sources. This could well lead to regional confrontations which would impact adversely on American interests in the entire region.

NATURE OF AUTHORIZATION

Therefore, Mr. President, I have joined with the majority leader in supporting this joint resolution authorizing the continued participation of U.S. Forces in the Multinational Force in Lebanon. Its principal elements are the following:

First, a congressional determination that our Marines have been involved in actual or imminent hostilities since August 29, as contemplated by section 4(a)(1) of the war powers resolution;

Second, an 18-month authorization for the continuation of American participation, as required by section 5(b) of war powers, which is limited to the current mandate of the Multinational Force as set forth in the original September 25 agreement but also recognizes the need for defensive actions to protect the force itself;

Third, a commitment to continuing review of the situation during the interim, to be facilitated by periodic reports from the President, which may lead to possible future amendments of the original authorization.

Mr. President, attention will no doubt be focused on the 18-month duration of this authorization. I, myself, would prefer not to have a specified time limitation in this authorization. I have heard it said by some Members that they fear such an authorization will be taken as a blank check for our military involvement over an extensive period. The press has even referred to analogies with the Tonkin Gulf resolution of 1964.

Mr. President, I think such analogies are simply not well-founded. First, this authorization is keyed to the limited mandate of the Multinational Force as set out in the agreements last year. Let me quote from Ambassador Dillon's letter of September 25 on behalf of the U.S. Government. Our commitment was:

To deploy temporarily a force of approximately 1200 personnel as part of a Multinational Force (MNF) to establish an environment which will permit the Lebanese Armed Forces (LAF) to carry out their responsibilities in the Beirut area.

The further stipulations in the Lebanese Foreign Minister's letter also include the understanding that—

The American Force will not engage in combat. It may, however, exercise the right of self-defense.

Mr. President, I fully recognize that the Senate and the House will want to discuss our understanding of these terms and conditions, and some of the uncertainties which are undoubtedly present in implementing the language on protective measures. However, I think all Members will have to agree that this authorization is not an open-ended blank check.

Second, there is already in law a provision of the Lebanon Emergency Assistance Act which effectively places a lid on the level of U.S. involvement. It requires that any substantial expansion in the number or role in Lebanon of U.S. Armed Forces would require a further authorization. That requirement is not affected by the resolution being introduced today and would continue to apply. The President has said that he does not seek to go to beyond the present level of U.S. involvement in any case.

Finally, Mr. President, I want to emphasize that in providing an authorization for an 18-month period, we are not simply dropping out of the picture until the spring of 1985. The resolution itself provides for continuing reporting and consultations to assure that we will follow the situation carefully. We may, at some point, want to consider amendments to this authorization if the circumstances should justify it. That is why I would prefer no deadlines for such an authorization, because they have a tendency to confuse the ongoing nature of our responsibilities. But I support the basic elements of this authorization and I think it deserves the support of my colleagues in the Senate.

MATHIAS RESOLUTION

Mr. President, last week Senator MATHIAS introduced Senate Joint Resolution 159, which also provides an authorization for the continuation of U.S. participation in the Multinational Force. I made clear on the floor that day, September 12, that I fully supported the thrust of the Senator's resolution and agreed with him that his initiative would, and should, trigger the expedited procedures for the war powers resolution. I also presented at that time some of the background to the consideration of this issue by the Foreign Relations Committee, which I will not repeat at this time. However, I would like to make clear that I continue to support the purpose of the Mathias resolution and commend him for assuring that the Congress would take the necessary steps under the war powers resolution to consider the ques-

tion of an authorization. I simply felt then, as I do now, that the 6-month limitation in that resolution would send an unfortunate and misleading message about the intentions of Congress in this matter.

Both the Mathias resolution and the present resolution will be considered in the Foreign Relations Committee in accordance with the stipulations of the war powers resolution.

COMMITTEE ACTION

It would be my intention, at the urging of the majority leader, to seek final committee action on the matter at the earliest possible time, recognizing that it is a matter of great urgency, but also recognizing that there are difficult issues to discuss and that many members of the committee and the Senate will take a deep personal interest in them.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

AMENDMENT NO. 2165

(Purpose: To establish a commission to evaluate the Department of the Interior's coal leasing procedures and to postpone new leasing during that evaluation periods)

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair informs the Senator from Arkansas that a committee amendment is pending

Mr. BUMPERS. Parliamentary inquiry, Mr. President, What amendment is pending?

The PRESIDING OFFICER. The committee amendment on page 42 striking lines 13 through 25.

Mr. BUMPERS. Is my amendment not keyed to the committee amendment?

This is an amendment to the committee amendment.

The PRESIDING OFFICER. The amendment is not correctly drafted as such.

Mr. BUMPERS. Mr. President, I withdraw the amendment temporarily then so we can work it out.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BUMPERS. Will the Senator withhold that?

Mr. McCLURE. I will be happy to withhold that request.

Mr. BUMPERS. I ask unanimous consent that the amendment be considered in order.

Mr. McCLURE. Mr. President, I ask unanimous consent that the amendment as submitted by the Senator from Arkansas be conformed as an amendment to the committee amendment so that it would qualify.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, may we have the amendment reported?

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself and Mr. DIXON, proposes an amendment numbered 2165.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be stricken, on page 42, lines 13 through 25, insert the following:

SEC. 112. None of the funds in this Act shall be expended for the sale or lease of coal on public lands, except for emergency leasing as defined in 43 CFR 3425.1-4, lease modifications as defined in 43 CFR 3432, and lease exchanges as defined in 43 CFR 3435, until the Secretary has appointed a Commission to review the Department's coal leasing and valuation procedures to ensure receipt of fair market value and the development of coal leases in an environmentally compatible manner; the Commission has submitted its report to the Congress within six months after appointment; and ninety days have elapsed after the report is submitted to Congress."

Mr. BUMPERS. Mr. President, Members of the Senate will recall that our dear departed friend, Senator Jackson, and I offered an amendment similar to this back in July to the fiscal year 1983 supplemental appropriations bill that would have placed a moratorium on Secretary Watt's continued leasing of coal lands until the end of this fiscal year, which occurs at the end of this month.

Recently, the House passed a bill, the 1984 Interior bill, that required the Secretary to appoint a commission to study how we could best get what we call the fair market value for Federal coal leases.

For those who were not paying that close attention, let me just recount the history of this issue.

Secretary Watt last year leased 1.6 billion tons of coal, and the price he received for the coal was so ridiculously low it raised a lot of eyebrows.

One of the committees of the House found that the leases had brought $60 million less than the fair market value. A subsequent investigation by the General Accounting Office which presumably has no ax to grind—the GAO does not have that built-in bias against James Watt that I have—looked at the Power River basis coal sale presumably objectively and dispassionately, and found that that 1.6 billion tons of coal had been leased for $100 million less than the fair market value. When you look down the list of sale results, some of the coal brought 0.7 cents per ton.

Now, when you look at the sizable amounts of coal that are owned by the people of the United States—admittedly, it is located mostly in the Western States but it is actually owned by all the people of the country—when you look at substantial blocks of coal being sold for such ridiculous amounts, you have to ask yourself: Why are we leasing it at all?

Senator Jackson and I lost by a vote of 51 to 48, so here I am back today, without the services of our beloved colleague, asking the Senate again in light of a totally new absurdity on the part of James Watt to please look again at this matter.

The other day Secretary Watt announced that he had 540 million tons of coal in the Fort Union region that he wanted to lease, and even though the House Interior Committee had asked him to postpone this lease sale until a Commission had reported back to them and told them how they might better get fair market value for coal, he says, "That is not binding on me. I don't have to do that, and I am going ahead with the lease sale."

I think Secretary Watt probably had a right to do that. That is a grudging admission on my part. I always hate to see the Congress or particular committees of the Congress and members of the executive branch in that kind of a fight. But we all know that Secretary Watt is an arrogant man, and unless he is really brought to bay, he is like a rogue elephant.

So the Secretary went ahead and offered the leases on the 540 million tons of coal for sale on September 14. And the bids came in. Eight tracts were offered, five of which are what we call maintenance tracts, that is, expansion of existing operations or leases, and three of which were new tracts. The five maintenance leases brought 0.79 cent per ton, less than 1 penny a ton. And on how much of the 540 million tons originally offered for sale? About 110 million tons. The coal companies did not even offer a bid on over 400 million tons.

I think most of this was lignite, as I said earlier. But surely even the most ardent proponent of coal leasing, the most ardent fan of James Watt, has to ask why this man is insisting on leasing this country's resources when he cannot even give it away?

Second, why is this man insisting on going forward and literally doubling the amount of coal on Federal lands under lease in this country while a commission that he himself has appointed to study the problem has hardly begun its study? It is a real curiosity, is it not?

Even the coal companies are beginning to wonder if this is right. What if you are a coal company and you had enough coal leased right now for your needs for the next 20 or 30 years and you said, "I'm not going to bid a tenth of a cent a ton; I'm not going to use it; I can't sell what I have"? Everybody knows coal is a drag on the market right now. We have excessive capacity; we have excessive stockpiles.

However, if you were a coal operator out here and you were operating a lease and you had no interest in this because you had more coal than you could possibly mine for the next 30 years, in the back of your mind you might think, "You know, one of my competitors is going to get this coal for some ridiculously low sum, and later on when coal becomes much more in demand and I'm going to need it, the price is going to be up, and the guy who is bidding today will have an advantage over me. I may wind up having to pay a dollar a ton and he's going to be getting his for a half-cent a ton, and I am going to be at a competitive disadvantage."

That is one reason why some of the coal companies in this country are beginning to question the coal-leasing policies of James Watt.

My amendment is not difficult to understand. It simply allows the Commission that has been appointed to do its work.

There are Members of the U.S. Senate who are going to be asked to testify before that Commission and express their objections or their acquiescence to our existing coal-leasing policies. Let the Commission do its job, as it has been appointed to do, and make its recommendations, which it will do in January 1984, and then wait 90 days.

My amendment does not require that Congress has to approve or disapprove the Commission's report. It simply says that we will not lease any more coal until 90 days after the Commission reports.

The 90-day period is provided for a very specific purpose. If the Commission comes up with recommendations that are totally unsatisfactory, Congress will at least have an opportunity to deal with them. The 90-day period will provide a sufficient length of time to allow Congress to act on those recommendations if it chooses.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. BUMPERS. I yield.

Mr. MELCHER. I read the amendment at the desk, and I hope I am correct. The Senator's amendment exempts or allows maintenance tracts or bypass tracts.

Mr. BUMPERS. It certainly does.

I am pleased that the Senator brought that up, because there are a couple of Senators who are always concerned about that. The Secretary has the specific authority under the amendment to continue leasing bypass and maintenance leases.

Mr. MELCHER. It seems to me that some of the statements the Senator has made might be misconstrued.

First of all, the maintenance for the coal that he has described is a bid on the tract itself. Yet, the bulk of the return to the Federal Government on any coal operation in the West is from the amount paid on the royalty, is it not?

Mr. BUMPERS. The royalty, of course, is the bigger item.

Mr. MELCHER. Second, the Senator has described a reluctance by coal companies to put a bid on this lignite coal. There are two points. The Senator does recognize that there is a coal glut and that if they did bid and did get it, they would have to follow the due diligence requirements of the Mineral Leasing Act.

Mr. BUMPERS. The Senator is correct. As he properly points out, we have this giant glut of coal right now. We have the production capacity to produce much more than we can use. The last time I checked, we had 75,000 coal miners unemployed in this country.

Mr. MELCHER. I thank the Senator for yielding.

I intend to support this amendment. If there is any problem that the coal companies can find with the maintenance tracts or the so-called bypass tracts not being available for bid, I trust that there is plenty of time between now and conference for them to suggest different language which would better suit their purpose.

Mr. BUMPERS. Every point the Senator has made is well taken, and I appreciate his questions and his participation and his support of this amendment.

Mr. President, I want to make three points, because this matter has been debated here before.

The point I want to make is that there is a whole new set of circumstances since Senator Jackson and I offered this amendment about 3 months ago.

No. 1, Secretary Watt is thumbing his nose at the House, flouting the law, and saying, "I do not care what you think. I am going to proceed with the leasing of this coal." He then proceeds with the Fort Union coal lease sale and only gets bids of any kind on about 20 percent of the coal offered, and on that, the bid averaged only $^{7}\%_{100}$ of 1 cent.

However, here is the real clinker—and I hope that if every Senator is listening, he will listen carefully, and if he is not, I hope his aide, wherever he or she may be, will communicate this: The leases let on September 14, 6 days ago, brought $911,000, and the administrative costs associated with holding the sale were over $880,000.

When you pay 50 percent of that $911,000 to the States, which we are required to do, the United States comes up with a net loss of about $400,000. Talk about pennywise and pound foolish! This sale is the epitome of it.

Then, Mr. President, as the distinguished Senator from Montana just pointed out, we have a coal glut. But how much Federal coal do you think we already have under lease, when Secretary Watt is proposing to double that amount? We have 18 billion tons of coal under lease. That is Federal coal. That does not include the coal in Pennsylvania and Kentucky and Virginia and West Virginia. This is just Federal coal—18 billion tons under lease.

How much of it do you think we are producing a year? Last year, we produced 104 million tons from Federal coal leases. At that rate, we have between 170 and 180 years' supply under lease now.

I do not know whether James Watt is planning on being around 170 or 180 years from now; but if he is not, I cannot imagine why he wants to add another 170 years' supply.

Why are we leasing more coal, when you have to show due diligence within 10 years of the time you lease the coal, and we have 170 years' supply on hand right now, less than 50 percent of which is under development? I will tell you why. James Watt simply wants to get as much coal as he can under lease. It is a shame, in my opinion, that he has to even take bids, when he would like to give it away so badly.

Before the Powder River Basin sale last year, the Interior Department got the distinct impression that nobody was going to bid what they determined the fair market value of those tracts to be. What did the Department do? It downgraded the fair market value of the tracts to entry level bids and cut the price by about $60 million. So the bids came in close to the entry level bids, and the Department went ahead and executed the leases.

My amendment does not interfere with the coal program's environmental work. It does not prohibit the Department from going ahead with planning and environmental assessment work in 1984. Only the sale or lease of new leases will be prohibited until 90 days after the Commission reports to Congress.

If we do not care what the Commission says, and if we do not care about receiving fair market value for coal leases, then we should defeat this amendment and follow it with another to dissolve the Commission; because if we do not care what the work of the Commission is going to show, why appoint a Commission at all? But if Senators do care, if they care about the American people getting fair market

value for their finite resources, then they will vote for this amendment.

Mr. President, I yield the floor.

(Mr. WARNER assumed the chair.)

Mr. WALLOP. Mr. President, I will not be long. The arguments have been made in the past, as the Senator from Arkansas has stated.

One of the things that has happened since the past argument is the sale of the Fort Union leases. That sale is raised by the Senator in his own behalf, but is one of the best arguments against his amendment.

It is amazing to me that the Senator thinks that the Secretary of the Interior is putting coal on the market at less than fair market value, but finds that the fair market assessment of the Department of Interior's coal experts is higher in the case of new tracts, than any company in the country cared to pay.

The fact is, it is an argument that says that the Secretary is right on track with his assessment.

He says there is a whole new set of circumstances that took place since we argued this before. He is dead right. The Department has changed a number of the processes by which it handles leasing. They have not changed the means by which they assess the value of coal, but rather the means in which they handle the bids afterward.

They have done a number of things which have been reasonably suggested. I will enumerate those if the Senator does not know them—I think he does, and I would be happy to enumerate them for other Senators, should they ask for it. But suffice to say that they have significantly tightened up on the means by which they handle the bidding procedures.

The use of oral bidding has been eliminated so that bids received might be a truer reflection of a tract's value. The minimum bid for any tract must be at least $100 an acre. Presale estimate of fair market will be prepared, but the final fair market appraisal will be completed after the sale using competition at the sale as a factor. There are other changes as well. There is a new, responsible, and accountable set of processes within the Department.

But let us go the Senator's argument which he has raised time and time again. That is the findings of the GAO report which is, on its face, a preposterous argument.

The GAO reached its conclusions by changing assumptions that had long been in place through Democratic and Republican Secretaries of the Interior. By changing assumptions, anyone in the economic field can come up with different conclusions. Their most significant conclusion was that no production rate adjustment was legitimate. The GAO said that the Department could not document that each variable, namely the production rate and stripping ratio, has an independent impact on tract value. However, the Department has demonstrated that they do in fact have an independent impact on tract value.

There was an assumption that noncoal fiscal wizards, who know nothing about mining and nothing about production of minerals, came up with, out of their own heads. However, they said, if it were in fact independent and could be so demonstrated, that it was legitimate. This the Department has done. That was $73 million out of their $100 million so-called undersale assessment.

Let us look at another argument that the Senator from Arkansas continues to raise. It amazes me that he continues to do so. He confuses what the royalty bonus is with the principal interest that the public has, not in the bonus bid, but in the royalty production.

In those tracts on which he said we only got $900,000 and had to give half of that to the States, let us look at the rest of the public interests—a Federal royalty of $86 million, State severance taxes of $115 million, employment of 930 people, and a signicant addition to added mine life in all of these. The public's basic interest is not the bonus payment but the royalties that they receive.

If you wish to have experts other than I to justify that, let us just read from the Congressional Research Service report on the policy of leasing the less costly Federal reserves.

It could conceivably lower the market price of coal—

I am quoting from it now—

because of increased competition in coal supply markets and the elimination of the market's effect on Government monopoly power, assuming that adequate amounts of Government least cost reserves are not currently being leased.

The bonus bids on both Federal and privately owned higher cost reserves would decline. These lower bonus bids would still incorporate a return from economic rent but any revenue from the bonus bid attributable to higher market price of coal caused by the Government's failure to offer adequate amounts of its less cost coal reserves would be eliminated over time.

Now note well what I am about to say from this report.

Income would be transferred to consumers in the form of lower prices and away from the Government and private resource owners.

In effect, this interrelationship of Federal leasing policy and market price for coal demonstrates that a larger bonus bid is not necessarily consistent with the leased policy that is functioning efficiently and in the public interest.

Let us put this into some perspective here. The Senator says there is a coal glut. The last "temporary" moratorium that was put in place lasted a decade.

Let us just take a look at the chart which I have over here, which I will move to and demonstrate how long it takes to put together a coal mine under present Federal procedures.

Let us just take the chronology of events in the Fort Union region alone. In 1979, the region was established by Secretary Andrus. In 1980, in April, the regional coal team was established and activity planning was initiated.

In 1981, in December, the leasing target was established of 0.8 to 1.2 billion tons. Mind you, established—the figure that the Senator now finds so easily to criticize—was not established by Secretary Watt, but by Secretary Andrus.

In 1982, the draft EIS was completed. In 1983, the final regional EIS was completed. In September of this year there was the first Fort Union lease sale.

Let us take a look at what has happened. Five years have already passed. On top of that, it is going to be 10 years before the mine gets established by virtue of the Federal Surface Mining Control Act and State laws, and probably 40 years after that in terms of mine life.

Is the Senator prepared to say that he knows the economics of a bonus bid of 45 years of production and development any better than anyone else does?

I think the country has gotten fair market value on the Fort Union leases by the fact that there were bids on some leases and not on others that were offered at the same time.

Let us take a look at how badly abused the Federal interest in the Fort Union region is. There are 225 billion tons of total reserves in the region, of which 90 billion are Federal reserves.

Out of that, only 9.3 billion have been cleared through land use plans, 2.2 bilion was nominated by industry, and only 1.9 billion was studied in the EIS. A decision to offer 1.1 billion was made. On September 14, only 0.54 billion tons were offered and only 114 million tons received bids. We do not yet know how much will actually be sold.

I tell you, my friends, there is benefit in having predictability in coal life.

One of the reasons why we have so much trouble in the coal business is that the Federal Government's exercise of its monopoly power has been outrageously irresponsible.

I return to my desk for just a second to talk about the value for the coal that the Senator from Arkansas questioned so strongly.

The Senator made the claim that the Department received only seventy-nine one-hundredths of a cent on lease coal and criticizes it so roundly, in a time when as he states the market for coal is not very high. But let me tell you that that price was approximately 3½ times as much as Secretary Andrus

got for North Dakota lease sales during the time of the highest coal prices in this country's history.

From 1978 through 1980, he got twenty-seven one-hundredths of a cent. This was that Sectretary of the Interior who was responsible when it came to the public purse; the one who is now irresponsible got three times as much.

The agruments do not flow.

Now why lease when things are a drag on the market? You lease when the market is slow and you lease when the market is good. You lease in an orderly manner to eliminate what has been the consumer's greatest enemy, the Federal Government's exercise of its coal monopoly.

The decade moratorium cost the public endlessly more in the cost of their energy than anything that has happened under Secretary Watt's brief tenure.

That happened under both Democrats and Republicans, but it was what cost the consumers.

I would just suggest that many of these agruments do not need to be hashed and rehashed. The fact is that the orderly process of leasing the Federal Government's monopoly holding of coal is the public's, the consumers', and the taxpayers' greatest interest. Bonus payments account for precious little of the public's interest. The cost of $900,000 which the Senator raised is a one-time cost. Should these tracts be leased and not produce, guess who is the beneficiary? The taxpayer and the public purse. If they do not get any development within the diligence requirement of 10 years, the leases revert to the public and can be leased again for another bonus payment.

What we have is a continuation of a leasing program and plan that is far more modest than that, that was initiated and comptemplated by Secretary Andrus, but is is orderly; it is progressing responsibly and accountably. They have established a commission to make further recommedations for improvements. Everything is on track and being accounted for properly. The public does not need another decade of moratorium. Even though this one is said to last only 90 days after the commission report, the Senator and I know how well those 90-day limits appear to work.

In fact, what Congress does is what it always does so brilliantly. It decides not to make up its mind and extend it until it can. That decision ends up lasting a decade and costing the Nation more than it ever should. We tell the people we are doing something for them, but in time we are doing something to them. I urge Senators on both sides of the aisle to reject the arguments of the Senator from Arkansas and vote to defeat his amendment.

● Mr. MURKOWSKI. Mr. President, I rise in opposition to the amendment by the Senator from Arkansas.

It is no secret that the United States is the "Persian Gulf of coal." Our vast coal resources should be able to provide a significant portion of our energy needs well into the next century. Sadly, however, a number of factors have been keeping these resources from reaching its true supply potential. These factors include transportation bottlenecks, fluctuating demand, environmental concerns, and even some Federal coal leasing policies of the past. In the face of these impediments to coal development, we should ask ourselves what kind of coal leasing policy should be embraced in an effort to move more coal into production.

Because the Federal Government controls in excess of 80 percent of western coal, our approach toward Federal coal leasing holds at least a few of the answers. We could adopt an approach aimed at maximizing our financial return from Federal coal properties. The Federal Government could, by virtue of its extensive control over the resource, behave in a monopolistic fashion. But I think we can see the consequences of that approach. Higher lease acquisition costs would result in reduced leasing, reduced tax and royalty income, reduced employment, increased dependence on foreign fuels, and higher consumer prices.

On the other hand, we could adopt an approach where ample supplies of coal could be leased, developed, and utilized for the Nation's benefit.

The Federal Coal Leasing Amendments of 1976 mandate that no Federal coal lease can be sold for less than its fair market value. In recent months the Department of the Interior has come under fire for allegedly offering coal in the Powder River lease sale at "bargain basement, fire sale prices." Now I will readily admit that it is not clear what constitutes fair market value for much of this coal. Nor do I believe that you can look at a figure of 6, 8, or 10 cents per ton in bonuse payments and conclude that the Government received or did not receive fair market value. Indeed, there are a number of factors which must be considered.

For instance, at what price should coal be offered in order to insure national economic efficiency in the development of the resource, provide for the timely development of the resource; promote competition in the coal industry, counter rising energy prices and inflation, provide for an equitable sharing of Federal coal value of production between the public and the producers, provide for socio-economic responsibility, and maximize national energy supply? A Federal coal leasing policy must balance all these goals. The maximization of bonus revenues at the expense of all other factors would be irresponsible and counterproductive.

Regardless of one's conception of fair market value and appropriate levels of bonus bidding, it is an indisputable fact that a lease in production will yield higher Federal revenues in the form of royalties and taxes than will a lease that is never produced. In one key indicator of success, the Department of Interior has made tremendous progress in bringing more Federal coal under lease. In the decade prior to 1981, the Department leased virtually no coal. I, for one, would like to commend Secretary Watt for his ability to turn that situation around.

I believe it is safe to say that the Federal coal leasing program is not without its flaws. But a moritorium is not the answer. Secretary Watt has created a special blue-ribbon citizens' panel headed by David Linowes to investigate the shortcomings of the coal leasing program and to provide suggestions for change where change is needed, but to go a step beyond and cease Federal coal leasing activities completely simply does not make sense. When we discovered that the Federal mineral royalties mangement program contained flaws, we did not cease oil and gas leasing, we heeded the advice of a special commission and enacted legislation to correct the problems.

The Federal coal leasing program, like the mineral royalty management program is a complex, difficult program to manage. Improvements can be made which will "fine tune" the program, but these improvements can be made without shutting it down.

We have recently emerged from a 10-year leasing moritorium. I would urge my colleagues to reject the "moritorium mentality" and vote against this amendment.

Thank you, Mr President.●

● Mr. HART. Mr. President, I urge my colleagues to support the amendment by the Senator from Arkansas, Senator BUMPERS, to prohibit additional coal leasing until the newly established independent review commission completes its evaluation of the coal leasing program and submits its report to Congress.

The Senate has twice before come very close to passing similar amendments. Last December, an amendment to the fiscal year 1983 Interior appropriations bill, to prohibit additional leasing during the current fiscal year, failed by a single vote. Earlier this year, the same amendment failed by three votes. These close votes in this Chamber, and the votes in the House of Representatives, clearly demonstrate the strong concern in Congress about the continuing efforts of the Reagan administration to give away

the public's coal resources at far less than their true value.

That congressional concern should be even stronger now than it was when the Senate considered the two previous proposals to limit additional coal leasing. Two recent developments have occurred which should persuade Senators who previously voted against similar amendments to support the amendment offered today by Senator BUMPERS.

First, Congress has established an independent commission which is now at work evaluating the Department of the Interior's procedures and practices for insuring a fair market value for sales of Federal coal. That commission is required to submit its report and recommendations to Congress by next January. The existence of this commission should reassure any Senators who previously were skeptical that a moratorium on coal leasing will in fact accomplish the goal claimed by myself and other supporters of the two previous amendments: Providing an opportunity for meaningful reforms in the Department's procedures, after which leasing would be resumed. The Bumpers amendment is not an amendment to prevent any future coal leasing. It is an amendment to insure that future leasing is carried out in a way that protects the public interest. We know now that the independent commission will submit its report to Congress and that Congress will consider that report. The Bumpers amendment simply allows that to take place before the Department issues additional leases, not after the Department has issued other leases under its obviously inadequate current practices.

The second recent development that should influence the Senate is the Department's recent issuance of additional leases in the Fort Union region of North Dakota and Montana. These leases clearly demonstrate that the Department intends to continue the practices that the General Accounting Office concluded involve "deficiencies in its valuation, leasing, and fair market value procedures." Of the eight tracts offered for lease, only five received any bids, and each of those tracts received only a single bid. With this little industry interest and this little competition, the Department's return for more than 100 million tons of coal will only barely cover the administrative costs of issuing the leases. If any Senator previously doubted that Secretary Watt and other Interior Department officials are currently and actively engaged in a deliberate campaign to give away our public resources, this latest lease should have dispelled that doubt.

Mr. President, when Secretary Watt has gone too far in overleasing our public lands—as he repeatedly has—Congress has blocked him. We have stopped the leasing of portions of the Outer Continental Shelf off California, where environmental values clearly outweigh energy values. We have blocked the leasing of our wilderness areas. Now it is time to block additional coal leasing, until reforms can be adopted to guarantee an adequate return for these public resources.●

● Mr. GLENN. Mr. President, I rise in support of the Bumpers amendment which would restrict coal leasing until the Congress has a chance to review the recommendations of the Linowes Commission on Fair Trade Value.

Coming from a major coal-producing State, I know full well the importance of coal to our economic vitality. Industry access to the billions of tons of federally owned reserves located in the West may prove eventually to be crucial to our long-term energy policy objectives. However, unlike the present administration, and in particular Secretary Watt, I sincerely believe that we can lease and mine coal consistent with maintaining stringent protections to safeguard our citizens and our environment.

Prudent management of these plentiful reserves is essential. Blind adherence to ideological purity for the sake of expediency and in the name of public policy too often entails sacrificing elements of the public welfare. This is exactly what we have witnessed as a result of Secretary Watt's determination to sell an unprecedented amount of public lands at "fire sale" rates.

Earlier this year, the General Accounting Office estimated that the Department of Interior's Powder River basin coal lease sale, at prices lower than the fair market value, cost the public over $100 million. Even more disturbing, there have been allegations that Department of the Interior officials intentionally engaged in activities designed to tilt the leasing process toward a handful of favored bidders. These charges must be fully investigated and the necessary reforms made in the coal leasing program to insure proper, impartial management that will obtain the full, fair return for our Nation's valuable resources. I find it ironic that this administration, which strongly proclaims its faithfulness to the free market system, has attempted to impede the workings of the marketplace.

There are, at present, over 18 billion tons of recoverable Federal coal under lease—175 years supply at current production rates. In fiscal year 1981, only 104 million tons of coal were produced from these leases. Moreover, out of the 616 existing Federal coal leases in fiscal year 1981, only 105 produced coal. Indeed, there certainly is no "coal rush" on. Just last week, in a highly controversial sale centered on the Fort Union region in North Dakota and Montana, the Interior Department sold only 114 million tons of Federal coal leases out of a possible 542 million tons.

Given these facts, it is now time to impose a temporary moratorium on these sales until the advisory committee's recommendations can be reviewed by Congress. It is in the best interests of our Nation, from an economic, environmental, and energy standpoint to establish effective safeguards in the coal leasing program. Prudent management is absolutely essential to restore public confidence in this program. In my judgment, leasing should only proceed when the value of the resources clearly outweighs the estimated environmental damages, including the damage to wildlife that might result from development. Procedures must be followed to insure that the Government, as required by law, receives a fair market value. And finally, strict environmental protections must be afforded when exploration or production occur.

It is for these reasons that I support the Bumpers amendment and urge my colleagues to accept it.●

● Mr. BINGAMAN. Mr. President, the administration has proposed leasing up to 16 billion tons of coal in the United States by 1985, part of a plan to accelerate energy development on public lands. In New Mexico, the Department of the Interior is planning to lease 3 billion tons of San Juan Basin coal in the northwestern part of the State.

Considerable controversy has surrounded this planned leasing program especially since a review of the first major sale last year in the Powder River basin of Wyoming raised significant problems with the process. This controversy continues with the recent Fort Union sale that drew low bids and few bidders.

The major issue in dispute is in providing an adequate return to the public for the release of these public resources at this time.

Fair market value for coal is the process by which the Department of the Interior estimates the value of a coal lease and/or assesses whether a given high bid offered for the lease is adequate. This is not an easy task, especially when coal is sold in a market that has experienced decades of noncompetitive leasing and speculation and where current land use and coal activity processes may not match the Government's leasing needs.

The amendment we consider today will suspend, temporarily, further Federal coal leasing pending review by Congress of the recommendations of the Commission on Fair Market Value Policy for Federal Coal Leasing, established to review the procedures under which the program is conducted, especially the issue of fair market value.

The public deserves fair and equitable remuneration for the use of its

lands. Determining this fair market value is one of the major problems that must be resolved if we are to have public confidence in this program. The amendment offered today provides the opportunity for the American public and the Congress to know that the Department of the Interior is receiving fair market value. It is my hope that the Commission could complete its work and report to the Congress before the 6-month deadline and that we could proceed with the national coal leasing program.

People may question why we cannot allow leasing to continue while the Commission reviews the procedures of the program. I think it both prudent and reasonable to defer new sales until these issues are resolved and the Congress has the opportunity to review the Commission recommendations. Hopefully, this temporary suspension will insure that the Commission's work receives priority attention by the Department of the Interior which has been slow to accept the recommendations of the GAO, with regard to fair market value.

I think it is important for the integrity of the program that we clear up any questions or concerns relating to its administration. We want to insure confidence among the public and potential investors that this program will provide a steady and reliable supply of Federal coal.

This amendment should in no way delay or defer the planning activities leading up to a proposed sale, including preparation of environmental impact statements. It places the responsibility with Congress now to review the Commission's work and allow a fair and equitable program to proceed.

The coal leasing program in recent days has become embroiled in a dispute of the Secretary of the Interior with the Congress over the issue of legislative veto. That is unfortunate. It is neither fair nor in the industry's best interests to be caught in the middle of this conflict. I would hope now that the Secretary can focus his efforts on improving the coal leasing program rather than seeking a confrontation with the Congress.

New Mexico is a major contributor to the coal resources of our country and I am vitally interested in making sure that we have a national coal program. I think it is important to our long-term energy needs and future energy security.

Our Nation needs a coal program. Our citizens deserve a fair return for the use of its coal resources. I think this amendment will help provide that assurance.●

● Mr. BAUCUS. Mr. President, I wish to thank the Senator from Arkansas for offering this amendment. I endorse this amendment. I represent a State richly endowed with vast coal resources, and I am deeply concerned about the current direction of Federal coal leasing policy.

It is time that Uncle Sam becomes a prudent businessman. It makes no sense to continue to give away the Federal estate.

In my part of the country, the administration proposes to lease up to 6 billion tons of coal. This includes 4.8 billion tons in the Powder River coal region, which straddles the Montana-Wyoming border, and 1.2 billion tons in the Fort Union region, an area including eastern Montana and western North Dakota.

The target set by the Department of the Interior is greater than the amount recommended to be leased by the regional coal team and Montana's Gov. Ted Schwinden. These leases, coupled with the 1.6 billion tons of coal leased in April 1982, are roughly equal to 76 years of Federal coal production nationally at current rates of production. I caution you that these coal leases encompass only two of the six Federal coal regions in the West.

The recent Fort Union Federal coal lease sale held in my State demonstrates the accuracy of many of the major criticisms that have been leveled at the Department of the Interior's coal program. In that sale, the Department offered 542 million tons of Federal coal for lease. Only one-fifth, 114 million tons, received any bids. There was only one bidder per tract. The average bonus bid was less than 0.8 cents per ton, a figure that is only nominally above the level set by the Department to discourage nuisance bidders. The Federal Government's share of the bonus bids does not even come close to covering the administrative costs of holding the lease sale.

Let us take a moment to look at the total amount of coal leasing. Nationwide, the coal industry now holds 616 Federal coal leases which include 18 billion tons of coal. The coal already under lease would meet our needs for the next 180 years.

Imprudent Federal coal leasing policies threaten to wreak havoc on the economy of a State like Montana. Montana is a major coal producing State. We want coal production and mining to continue to occur, both to benefit Montana and the entire country.

But we are concerned that leases be fair to Montana, to producers, and to the U.S. Government, and the taxpayers.

Senator BUMPERS has called for a cautious evaluation of the entire coal leasing process. The proposed Commission is not a moratorium on leasing. I, for one, do not support a moratorium.

This pause in leasing would only apply to the leasing of new production areas. It is my understanding that it would not affect first, maintenance leasing, second, bypass leasing or emergency leasing. In other words, the legitimate needs of the mining industry will not be affected. Even new leasing will not be halted since the Commission will formulate its recommendations within 6 months and the Department of Interior does not propose any leases within this time period. This amendment allows for a pause to deal with this important problem; and the adoption of adequate modification to insure that future energy needs are met in a manner which provides the highest benefit to Montana, the producers, the U.S. Government, and the American taxpayer.

I am not alone in the West in my support of this amendment.

The Governor of Montana supports this action, but it is an issue which affects not just Montana, but the entire West. A resolution was recently passed at the Western Governor's Conference held in Montana.

This resolution was signed by Governor Lamm of Colorado, Governor Schwinden of Montana, Governor Anaya of New Mexico, Governor Matheson of Utah, and Governor Herscher of Wyoming. I believe that this resolution demonstrates the desire of the Western States to have a workable Federal coal leasing program. This resolution states:

FEDERAL COAL LEASING PROGRAM: RESOLUTION ADOPTED AT WESTERN GOVERNORS CONFERENCE, JUNE 16, 1983

The Western coal state Governors want federal coal leasing to continue. Whatever problems may have arisen in the recent lease sales, we feel the program is fundamentally sound. In the words of Governor Herschler; "Don't shoot the horse because the jockey is causing a problem."

However, we recognize that serious questions have been raised with regard to obtaining a fair return for publicly-owned coal. These questions undermine public and Congressional confidence in the coal leasing program and should be expeditiously addressed. Western coal states have a very real interest in obtaining a fair return.

Congress should direct the Department of the Interior to resolve these concerns by preparing new procedures and policies concerning fair return. The Secretary should:

(a) develop a detailed analysis of the economic and geographic variables affecting the value of each Federal coal lease, including a comparison of the effect of changing variables;

(b) prepare and publish in the Federal Register new internal procedures for conducting coal lease valuations (including criteria for comparable sales analyses), refining the technique used to develop original minimum acceptable bids for the Powder River Basin lease sale held in April 1982;

(c) develop and publish in the Federal Register guidelines for additional and experimental bidding systems for regional coal sales (including entry level and intertract bidding and limits on the percentage of leasing target permitted under such experimentation);

(d) consider establishing minimum regulatory selling prices for coal leases in each Federal coal region on a cents per ton basis;

(e) revise the procedures for determining fair market value so as to include specific quantitative tests which (1) are applicable whether or not adequate bidding competition is present at the lease sale, and (2) place greater reliance on prior comparable sales and on recent bona fide sales in the absence of bidding competition at the lease sale; and,

(f) establish written internal procedures for safeguarding coal lease pricing, economic valuation and other proprietary data against unauthorized disclosures.

A draft report should be prepared by September 30, 1983, for review and comment by the GAO, affected states, and the public. Interior should submit a final report to Congress by December 31, 1983. This will give Congress, affected states and the public sufficient time to review these new policies and procedures before the coal lease sales scheduled to take place in fiscal year 1984.

In the interim,

(a) the schedule for pending lease sales should be determined by the affected states. For example, New Mexico has requested a year's delay in the San Juan lease sale. We support that request. Similarly, Montana has sought a deferral of the Montana tracts in the Fort Union sale. That request should be honored. The North Dakota portion of the sale should proceed consistent with Governor Olson's wishes;

(b) the regional coal teams should review bids after the sale and before lease issuance, offering recommendations to the Secretary on the acceptance of those bids; and,

(c) Interior should use the proven procedures for setting fair market value and for bidding that were used prior to the 1982 Powder River lease sale.●

Mr. President, in conclusion, I believe it is unwise to continue to charge recklessly ahead when leases will not be developed for years to come. It is absurd to lease up to 12 billion tons of coal in the next 18 months. That would equal the total amount leased by 11 administrations since the Mineral Leasing Act of 1920 was passed. The recent Fort Union coal lease sale demonstrates the folly of these actions. It is common knowledge that worldwide coal markets are depressed. Adequate leased areas exist to insure that prudent coal development can continue. It appears to me that this amendment is in the best interest of all parties concerned.

I urge the adoption of this amendment so that we can look at where we are and make the proper decisions concerning the leasing of Federal coal deposits for the future.

Mr. McCLURE. Mr. President, I know of no others who wish to debate this amendment. I believe we are ready to vote. I assume the Senator from Arkansas desires a rollcall vote.

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, I had promised the Senator from Illinois the opportunity to speak. I think he is on his way to the floor. I would like to make a 3- or 4-minute presentation in response to some of the things the Senator from Wyoming has said. Hopefully, the Senator from Illinois will be here by then. He has a statement of 5 or 10 minutes.

I want to say first of all the Senator from Arkansas does understand the difference between bonus bids and royalties. I do not try to make the case that we ought to be getting as much from bonus bids as we get from royalties. Obviously, that is not the case. We get 12½ percent of the value of all the coal that is mined. If there is a Federal lease in operation in Wyoming and coal is selling for $10, the Federal Government gets $1.25 a ton, and half of that money goes back to the State of Wyoming.

I do not quarrel with that, Mr. President. Wyoming has profited. My own State is importing 11 million tons of coal a year from Wyoming, and we are very pleased. I hope it is as beneficial to Wyoming as it is beneficial to the State of Arkansas.

I might say we are also paying a 17-percent royalty to Wyoming. This is sort of a side question. We have already debated that one. But the State of Wyoming gets a 17-percent royalty at the State and local level on every ton of the 11 million tons that comes to my State, which happens to be next to the lowest per capita income State in the Nation. So we are making a pretty good contribution to Wyoming, roughly $4 per man, woman, and child in Arkansas, money that we export to Wyoming.

But the point I want to make is yes, I do indeed understand the difference between bonus bids and royalties. I have a small cattle farm and I have four oil and gas leases on my farm. I tried to exact the highest bonus bid I could from all the oil companies who wanted to lease that land. If they happened to hit gas, I tried to exact the very highest royalty I could get.

We are indeed talking about two different things. I know that bonus bids are never going to bring as much to the Treasury per ton as royalties bring. But I want to point out that that is no excuse for giving coal away. Non-Federal coal in the State of Wyoming is bringing anywhere from 17 cents to $1.20 a ton in bonus bids, royalties are paid on top of that.

The Senator tells me that James Watt is a very discrete conservator of the natural resources of this country and of the Treasury when he chooses to lease coal that belongs to the taxpayers of this country for anywhere from a very small fraction of 1 cent per ton up to 3 cents a ton, while people in the private sector are leasing their coal for 17 cents to $1.20 a ton.

Does that sound like a great conservative, Mr. President, who really is trying to save the taxpayers of this country money, trying to reduce the deficit from $200 billion to $199,999,000,000?

It sounds exactly like what it is. James Watt is trying to give away our national heritage to whoever happens to show up.

Last week he offered for sale five maintenance tracts and three new production tracts. How many bids do you think each of the maintenance tracts got? You guessed it. One. Only one bid per lease because the lease had been very carefully crafted and orchestrated to accommodate one company and only that company had any interest in the lease. You guessed it. The companies got it for an average of 0.79 of 1 penny per ton.

If we do nothing, James Watt will lease 10 million more tons of coal in 1984. If you do not believe that, pick up the phone and call him and ask him what his plans are. Eighteen billions tons of Federal coal under lease right now, a 170-year supply, and James Watt in fiscal year 1984 plans to add another 100-year supply to the coal industry's reserves.

If Congress did not know the difference between bonuses and royalties, why did it write into the Federal Coal Leasing Amendments Act of 1976, "No bid shall be accepted which is less than the fair market value of the coal subject to the lease"? Congress did not put that in there so James Watt could give away our national heritage. We put it in there because we wanted competitive bidding and we wanted the taxpayers of this country to get fair market value for their resources.

Mr. President, if this were just the Senator from Arkansas or our recently departed colleague, Senator Jackson, that would be one thing. The National Taxpayers Union is a very conservative organization. The National Taxpayers Union has consistently prided itself on trying to save taxes for people and keep the Federal deficits down. It is one of the most conservative organizations in the United States.

What does the National Taxpayers Union say? They say they "support the Bumpers-Jackson amendment to suspend current leasing plans until the commission has convened and Congress has had an opportunity to act upon its recommendations."

All people who read those thousands of polls that different organizations come out with at the end of the year better look out because nobody likes the National Taxpayers Union to get on them, and they are going to get on everybody who votes against this amendment.

The National Taxpayers Union says, "We do not endorse a long-term moratorium on coal leasing, but feel this temporary action is necessary in light of a multibillion dollar problem. It received unanimous bipartisan support from the House subcommittee and full committee which reviewed it. We be-

lieve that the market should not be flooded in the middle of a depression. Prices will be driven down and potential revenues will be lost for years to come."

I would hate to be a Senator from Virginia, West Virginia, Kentucky, or Pennsylvania, and go home and say, "We just authorized the Secretary of the Interior to put another 10 billion tons up for lease. To all of you 75,000 or 80,000 unemployed coal miners, it probably means you will be unemployed for another 100 years."

It is not only conservative organizations like the National Taxpayers Union that support this amendment. The United Mine Workers not only support this amendment, they are absolutely bonkers about it.

The New York Times, the Los Angeles Times, the Baltimore Sun, the Hartford Courant, the Arizona Daily Star have all endorsed the amendment. Everybody in this country who has looked at this situation, from the editorial writers, to the most conservative organizations, to the Sierra Club, all support the amendment.

I yield to the distinguished Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DIXON. Mr. President, I thank my distinguished friend and colleague from Arkansas for yielding to me.

Mr. President, once again, I feel compelled to speak out against the Department of the Interior's misguided and mismanaged coal leasing program. We are all familiar with the facts: a $100 million windfall; bargain basement prices; questionable environmental safeguards. All of these factors operate to the detriment of the American taxpayer.

If we had acted positively last December 14, when I joined my friend from Arkansas, Senator BUMPERS, in voting for an amendment to cut appropriations for the Department of the Interior funding of leasing programs, we could have avoided the costly giveaway leases in the Powder River Basin. Mr. President, the ball is again in our court. We can countenance this bad public policy by ignoring it, or we can stop it now.

The Powder River Basin sale was a monumental mistake, conducted under old planning rules and Secretary Watt's new sales procedures. The planned fiscal year 1984 lease of offerings will see the full implementation of the Secretary's program. These sales are a disaster waiting to happen.

The Department of the Interior anticipates four sales in fiscal year 1984. Each could top 1 billion tons. Why do we continue to add to the potential for flooding an already depressed coal market? Why are we force feeding the market at the expense of the taxpayers?

It is time to stop, step back, and take a long hard look at the Department's coal leasing policies before Secretary Watt gives away billions of more tons of coal at bargain basement prices. These public lands belong to all Americans, and their handling and treatment should redound to the benefit of all of us.

The creation of a commission to study the coal leasing problem was the first step toward a responsible leasing policy. The recent ridiculous sale clearly points out that it makes no sense to continue this program until the commission makes its final report.

It is our duty, Mr. President, to insure that the public gets a fair price for its coal. With 18 billion tons of Federal coal already under lease and coal demand slowing, a temporary sales deferral will have little market impact.

This amendment will not end coal lease planning or environmental analysis, nor will it interfere with ongoing mining operations. It will give us precious time: time to carefully review the Department's policies; time to sort out this mess; and most importantly, time to insure that the taxpayers get a fair return on public lands which are held in trust for all of us, now and in the future.

I am honored to support the amendment by my distinguished friend from Arkansas.

Mr. McCLURE. Mr. President, does the Senator from Wyoming wish to make any further comments?

Mr. WALLOP. No, Mr. President. I just say to my friend from Arkansas that if he wants the contribution of the people of Arkansas to the people of Wyoming to go up, he has only to put in place a system which will make their coal cost a little more. From our perspective, we could probably absorb that increased revenue, but I do not think it will do his people or the country any good.

Let me say to my friend from Illinois that we can in this Chamber and frequently do bandy about all kinds of adjectives to describe events that have taken place. However, the description he used of the Powder River coal sales is simply not borne out by the facts. That is including the GAO's own statement that if these things could be independently verified, they would be acceptable. They have been now and apparently are acceptable to the tune of $73 million of the $100 million which GAO felt was undervalued.

The only other thing I say to Senators is if the fair market value assessment and judgment of the Department of the Interior was too low, then somehow or other some of the best coal-mining minds in the country missed a hell of a boat, because they did not bid on some things that were to be given away.

If, in fact, the fair market value of it was so badly underestimated, it seems only logical that somebody would have come in and picked those up.

One last point of difference. I might say to the Senator from Arkansas that private coal leases do not carry anything like the baggage that public coal leases do, not the least of which is a diligence requirement for development. Private coal ends up being a real property right, not a transient one. The argument has been made before and I salute the Senator from Arkansas, who remains my good friend, but who is in error here.

Mr. BUMPERS. I try to be enlightening as well as entertaining.

Mr. WALLOP. I am always entertained, but I am not sure I am enlightened.

Mr. BUMPERS. Mr. President, let me say Secretary Watt obviously feels the fair market value of this land is zero; therefore anything he gets is above fair market value.

I make one final plea to my colleagues. This is a representative government. When you go to vote on Lebanon and whether to leave the marines there, every person in this body ought to vote just as though one of those marines were his son or her son. When you come onto the floor to vote on this amendment, you ought to assume that this coal belongs to you personally.

Just carve out a 100-acre tract of coal for yourself when you vote and ask yourself, if it were yours, would you be willing to lease it the way James Watt is leasing it? If you believe in representing your Government the way you represent your people, vote that way and I shall appreciate your vote.

Mr. McCLURE. Mr. President, I assume the Senator wants the yeas and nays on the amendment. Is that correct?

Mr. BUMPERS. Yes, Mr. President.

Mr. McCLURE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. NICKLES). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, let me say again to the Senator from Wyoming what a tremendous job he has done, both in the past and today, in marshaling the arguments that need to be presented to the Senate in the consideration of this measure.

I say to my friend from Arkansas in all sincerity that the point he made at the outset is the summary as far as I am concerned. He admits to a prejudice against the Secretary of the Interior. That is a prejudice which he is entitled to have. He stated repeatedly throughout the arguments today that he hopes the Secretary is soon gone.

That is an opinion which he is entitled to have. It is one I do not share.

If as he said the Secretary obviously believes these reserves have zero market value, then why all the process to establish fair market value? Indeed, the latest sales in which there were no bidders indicated that the Department had set a fair market value that was higher than the market judgment of those buying coal leases.

I think it is obvious that not only does he set a fair market value through the procedures within the Department in offering these for bid, but at some time, that judgment is higher than the market value.

We have been trying for years to get the record clear with respect to how much coal is under lease and how much is in economically recoverable reserves and how much of it is committed to specific plants over the life of the plant—20 or 30 years, which is usually the case if it is a utility plant operation. They have to have enough coal committed before they build a plant. But all of that 20- or 30-year supply for a specific plant will show up in the current inventory of some coal company somewhere for their future mining plans, although committed to that plant. So there is some distortion in the record as to how much is under lease, how much is there, and why there is any need to put more on the market.

The Senator from Arkansas also makes one other statement that bothers the Senator from Idaho to a certain degree. That is that there is a single standard by which you look at the uses of resources under public lands, that you should somehow look at it as if you are a private owner.

We do not do that on any of the public lands. The public lands are expected to yield a variety of different uses and we protect a variety of different values in a way which is quite different from that which a private landowner would do on behalf of the national interest. That is quite properly the case.

I do not think it is simply a question of whether I as a taxpayer am going to look at a resource to extract from it every possible dollar I can get at the outset. A bonus bid is a way of getting an orderly coal market established so that that coal can be mined. My interest as a taxpayer is seeing that the land is protected, that the resources are available to the users of this country at the lowest possible cost, not the highest possible cost. We protect the environmental aspects of the land, the air, and the water even though there is a cost. That is not something that is done in order to maximize the return to the taxpayer. It is a way of protecting the values all of us see as citizens in the public land. We need an orderly coal market.

Finally, Mr. President, let me reiterate what was said earlier. Secretary Andrus, in his stewardship as Secretary of the Department of the Interior, had plans to put up for bid and lease for future mining 200 billion tons of coal. That is far more than is in the current inventory of plans of the man who is described by the Senator from Arkansas as somehow pillaging the natural resources of this country.

I do not believe the Senator from Arkansas would say Secretary Andrus was a rape, ruin, and run advocate in the management of public lands.

Somehow we have lost sight of what really is at stake. Might I suggest that perhaps one of the problems here is that those who are out to get Jim Watt, and I mention this only because the Senator from Arkansas did, that there are those within this country who are out to get Jim Watt. I think the Senator from Arkansas would claim with some pride that he is among their number. There are others who do not share that view and the Senator from Idaho, with some pride, would say I am among that number. But there are those who thought they had Jim Watt on coal leasing, that there were improprieties, illegalities, immoralities in the coal leasing program and they made all kinds of reckless charges about this program and about his stewardship of it. The analysis, the investigations, the legal challenges, the factual inquiries have laid all of those charges to rest.

But there is a lagacy of that earlier belief on the part of those who are his critics that they had at least found the smoking gun that would get him, a reluctance to let go of that issue because they were unable to make it fly the way they wanted. And so we have the residuum of that debate in which there is a stubborn insistence that there must be something wrong here in spite of the fact that nothing wrong has been found. So we have a continuation of the battle when really the battle ought not to be continued.

I would hope that the Senate will reaffirm its earlier judgment and will do again what it has done repeatedly in the committee and on the floor—respectfully listen to our friend from Arkansas, recognize with some degree of admiration the diligence and the persistence with which he pursues what he believes is a holy cause, and again make it our judgment that while we respect that we differ in our judgment and reject the amendment.

Mr. BUMPERS. I thank the Senator very much for his closing comment.

I would like to make this point. If Cecil Andrus had gone through with a plan to lease anything like the amount of coal that he may have planned to lease, I promise you I would be standing right where I am standing today.

The Senator from Idaho will remember that since the Bureau of Land Management let a 33,000-acre lease in Fort Chafee, Ark., for $1 an acre for gas exploration, they have never heard the end of it. The Senator will recall that I am the one that demanded hearings. I have been squealing like a pig under a gate ever since that lease was executed. It was one of the most outrageous abuses of power I have ever seen in my life, and I have screamed about it ever since.

Mr. McCLURE. Will the Senator yield?

Mr. BUMPERS. Yes.

Mr. McCLURE. The Senator will remember that the Senator from Idaho stood shoulder to shoulder in helping resolve that problem.

Mr. BUMPERS. I thank him. I want him to stand shoulder to shoulder with me on this now.

The other point I want to make is that when it comes to other Federal resources we demand fair market value. We will not give a timber company the right to cut one tree that does not bring a bid equal to what the Forest Service has already determined the fair market value of that tree to be. We will not even consider leasing offshore oil and gas for less than full value. We will not even, as absurd as the law is, consider leasing oil or gas lands on a known geological structure unless it brings fair market value. Why, the Secretary of the Interior within 2 months after he came to office said he was going to help President Reagan balance the budget by getting $18 billion in bonus bids for offshore oil and gas leases alone in 1982.

Well, of course, that figure just shriveled and shriveled, and I do not know what it turned out to be—I think a little over $2 billion. But why do we demand fair market value for every resource that belongs to the people of this country and insist on giving coal away? What sets it apart? I do not know.

Mr. McCLURE. Mr. President, I am grateful to the Senator from Arkansas for injecting the issue of timber sales, because the timber sales are an excellent case in point to make our case entirely.

There is no bonus bid on timber sales. The value on timber sales is the appraised market value of the timber, and that is what they pay. They bid for it. But there is no bonus bid at all, zero, not 1 penny. Unlike this instance, the fair market value being sought here is what will people pay for the opportunity to enter into a lease upon which then they will have to pay a royalty.

The Secretary, I think quite rightly, is saying that rather than have bureaucrats create an artificial value by withholding resources from utilization, which they have the monopoly power to do, we will try to have

enough resources offered so that the market will establish what that value is.

That is the essential difference between the opinion of the Senator from Arkansas and myself.

Mr. WALLOP. If the Senator will yield, too, there is one additional point that should be made here. The Department will not accept a bid that they think is less than fair market value for that bonus either.

Mr. McCLURE. As was demonstrated in the last sale.

Mr. WALLOP. The fact of it all is that there may be a quarrel that the Senator from Arkansas has with the means by which we arrive at what fair market value is, but apparently the Department of the Interior's means is greater than the coal companies' view of what fair market value is, as they demonstrated in the Fort Union coal sale by not getting a bid. So I believe we are getting fair market value. I believe it is demonstrable on the record. All the arguments the Senator makes are in favor of the defeat of his own amendment.

Mr. BUMPERS. Could we vote?

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Arkansas. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Maryland (Mr. MATHIAS), and the Senator from South Carolina (Mr. THURMOND), are necessarily absent.

I further announce that, if present and voting, the Senator from South Carolina (Mr. THURMOND), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. INOUYE) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 63, nays 33, as follows:

[Roll Call Vote No. 254 Leg.]

YEAS—63

Baucus	Gorton	Metzenbaum
Bentsen	Grassley	Mitchell
Biden	Hart	Moynihan
Bingaman	Hatfield	Nunn
Boschwitz	Hawkins	Packwood
Bradley	Heflin	Pell
Bumpers	Hollings	Percy
Byrd	Huddleston	Proxmire
Chafee	Humphrey	Pryor
Chiles	Jepsen	Quayle
Cohen	Kassebaum	Randolph
Cranston	Kasten	Riegle
D'Amato	Kennedy	Roth
DeConcini	Lautenberg	Rudman
Dixon	Leahy	Sarbanes
Dodd	Levin	Specter
Eagleton	Long	Stafford
Evans	Lugar	Stennis
Exon	Matsunaga	Tsongas
Ford	Mattingly	Warner
Glenn	Melcher	Zorinsky

NAYS—33

Abdnor	East	Nickles
Andrews	Garn	Pressler
Armstrong	Goldwater	Sasser
Boren	Hatch	Simpson
Burdick	Hecht	Stevens
Cochran	Heinz	Symms
Danforth	Helms	Tower
Denton	Johnston	Trible
Dole	Laxalt	Wallop
Domenici	McClure	Weicker
Durenberger	Murkowski	Wilson

NOT VOTING—4

Baker	Mathias
Inouye	Thurmond

So the amendment (No. 2165) was agreed to.

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The adoption of the amendment of the Senator from Arkansas, which is the substitute for the language proposed to be stricken by the committee amendment, renders that amendment moot and is not acted upon.

CORRECTION IN ENROLLMENT OF S. 602

Mr. STEVENS. Mr. President, on behalf of the majority leader I shall in a moment ask to set aside this bill temporarily to offer a resolution on behalf of the majority leader. It has been cleared with the minority. It is a resolution to make a technical correction in a bill, S. 602, that was already enrolled. I make that statement for the information of all Senators.

I now ask unanimous consent that this bill be set aside temporarily in order that I might submit a Senate concurrent resolution on behalf of the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, let me again state to the Senate that this is a resolution to correct a technical error in enrollment of S. 602.

It is simple. The clerk may read it. It changes the word "shall" to "may."

The PRESIDING OFFICER. The concurrent resolution will be stated.

The bill clerk read as follows:

A concurrent resolution (S. Con. Res. 68) to correct the enrollment of S. 602.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its consideration.

The concurrent resolution (S. Con. Res. 68) was considered and agreed to, as follows:

S. CON. RES. 68

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (S. 602) to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes, the Secretary of the Senate is hereby authorized and directed to make the following correction, namely, in section 7(b), in the first sentence, strike out "shall" where it first appears and insert "may".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. I thank the minority leader and thank the distinguished Senator from Idaho for yielding.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The Senate resumed consideration of H.R. 3363.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

AMENDMENT NO. 2166

(Purpose: To provide funding for the Strategic Petroleum Reserve)

Mr. BRADLEY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New Jersey (Mr. BRADLEY) for himself and Mr. MELCHER proposes an amendment numbered 2166.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike lines 16 through line 23 on page 54 and lines 1 through 9 on page 55 and substitute in lieu thereof:

"STRATEGIC PETROLEUM RESERVE AND EMERGENCY PREPAREDNESS

"For expenses necessary to carry out the provisions of sections 151 through 166 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), $528,770,000, to remain available until expended, and for necessary expenses in carrying out emergency preparedness activities, $5,230,000.

"SPR PETROLEUM ACCOUNT

"The aggregate amount that may be obligated under section 167 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), as amended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), for the acquisition and transportation of petroleum, and for other necessary expenses," is $1,310,000,000, in addition to authority provided in fiscal years 1982 and 1983, to remain available until expended."

Mr. BRADLEY. Mr. President, this amendment adds funds to raise the fill rate of the strategic petroleum reserve from 145,000 barrels per day to the congressionally mandated rate of 220,000 barrels per day.

This fill rate requires an additional $1.3 billion to the off-budget oil purchase account and the amendment also adds $370 million to the on-

budget oil facilities account, to begin construction of the permanent oil storage facility at Big Hill, Tex. It was this $370 million for Big Hill that was included in both the Senate and House versions of the supplemental appropriations bill.

The administration convinced the conferees to drop the funding for Big Hill. My amendment restores that cut.

My amendment restores that cut. Since the House interior appropriations bill contains funding for the 220,000 fill rate and for Big Hill construction, my amendment would bring the Senate in line with the House.

Mr. President, the argument for this amendment is simple: We are vulnerable to an oil supply disruption. An oil supply disruption is very likely to occur, perhaps as a result of the Iran-Iraq War. We are not prepared for such a disruption. The strategic petroleum reserve is our best possible preparation.

Mr. President, let us consider just three events in the last several days to try to focus this debate on the real issue.

Last week the Congressional Research Service released a study on our energy supplies and vulnerabilities to disruption, and the study found that other than the strategic petroleum reserve, military force might be the only effective response to the threat of an oil supply disruption.

Mr. President, in the last several days we had reports of the Soviet Union pursuing Afghan rebels into Pakistani territory. We have seen subheadlines of the Soviet Union moving top military personnel to Syria. We have, for a matter of years, seen the Soviet Union massed on the northwest border of Iran. We have, for a matter of years, seen the Soviet Union taking a greater presence among the Iranians.

Mr. President, the noose is tightening. The Soviet noose is tightening around our and the world's oil supply in the Persian Gulf.

The second event: Mr. President, the Washington Post carried an article just yesterday that said the State Department was increasingly concerned about the Iran-Iraq War escalating out of control. A few flashes from the front. Keep in mind that this is a war which has raged since 1980 and in which over 100,000 people have already lost their lives. Throughout the Vietnam war, the total U.S. loss of life was 58,000. One hundred thousand people have lost their life in this war. It is escalating out of control, according to the State Department. Why?

Reports in the Wall Street Journal and the New York Times, from the Persian Gulf, state that the Iranians are preparing to bomb the pipeline through which Iraq moves its oil supply out of Iraq and through Turkey. At the same time, Mr. President, the French are selling Exocet missiles and modern fighting planes to the Iraqis. So if they ever desire to target an oil vessel or an oil facility it would be extremely easy to do so.

So we have a situation in which the Soviet Union is moving to tighten the noose around the Persian Gulf and in the center of that noose there is a war raging that itself could fly out of control and disrupt the oil supply of the Western World.

The third event in the last several days, Mr. President: There was an interview in one of the newspapers with James Aikens, the former Ambassador to Saudi Arabia who, by the way, predicted the Arab oil embargo of 1973, a year before it occurred. He was asked in this interview the chances of a major political disruption in the Middle East. His reply:

> The chances of it not occurring seem about zero. For anybody in Washington to say there is going to be political tranquility among the oil-producing nations would require a degree of naivete we have not seen in decades.
>
> How big a threat is the Iran-Iraq war?
>
> Answer. The threat is very serious.
>
> Question. What would Iran do if the Iraqis used their French Exocet missiles to sink an Iranian tanker?
>
> Answer. I think they would aim their missiles at the people who have financed Iraq, and that means Saudi Arabia and Kuwait. If that happend, panic would break loose in the world market. There could be a serious interruption of oil supplies to the West.
>
> Question. Is the world ready for this?
>
> Answer. No. People tend to consider this kind of disruption too horrible to contemplate. Therefore, they are not contemplating it. But they better start reading the signs.

Mr. President, the analysis of a distinguished former Ambassador of ours to Saudi Arabia, the events in the war between Iran and Iraq escalating out of control, and the Soviet Union tightening the noose about the Persian Gulf, this is a series of events that is ominous to say the least. Our only line of defense against the oil-related threats to our economic and national security is the strategic petroleum reserve.

Mr. President, a little over a year ago the Senate went on record 51 to 44 saying that we wanted a fill rate of 300,000 barrels a day with a minimum of 220,000 barrels a day—220,000 barrels a day.

Mr. President, there is absolutely no reason for the Senate to reverse its commitment to an aggressive fill of the strategic petroleum reserve. We are faced with an ominous situation, and in the face of the those threats the fill rate proposed by the administration and in this bill at the moment is 145,000 barrels a day.

It is not beyond belief that the world oil supply is clearly threatened. But beyond that, assuming that case has been made, if not persuasively at least thoroughly, let us keep in mind that what we have now in stockpile is probably going to be used primarily by the military in a disruption. Recent reports from administration officials consider that we will need a little over 200 million barrels for the military, if there is a serious disruption, a conflict. So what is left? What is left if we have a little over 200 million in stockpile? Very little is left for the civilian economy.

The next point: Oil prices will never be significantly lower. Now is the time to accelerate our oil purchases, not to slow them down.

For the RECORD, I would submit the GAO report which states clearly that a slow fill rate of 145,000 barrels a day will cost us more in the long run, not less. It will cost us more, as we defer purchases of oil until oil becomes more and more expensive.

Next, Mr. President, the Interior Appropriations Committee bill is under the first budget resolution. The addition of $370 million will not bring the bill's total anywhere near the budget resolution limits.

But despite all these arguments for a more rapid fill rate, and despite the President's signature last year on legislation requiring 220,000 barrels per day, the administration now wants to drop that rate to 145,000 barrels. Earlier this year they even wanted to drop it to 100,000 barrels.

Mr. President, the strategic petroleum reserve is not a Federal building that you can delay over this little budget crisis another 6 months, another year or another 2 years. It is not a Federal building. There is much more urgency here, much more urgency. We are buying insurance against an economic disaster that could make the Great Depression look tame. One of the ways we buy that insurance is by putting oil in stockpile.

It is just not good enough to have an adequate strategic petroleum reserve in 1990 if the supply disruption occurs in 1984.

Mr. President, that is the case. It is fairly clear. The crisis is real. Nobody disputes that. the SPR is the only defense. Nothing else is in place in emergency energy preparedness. The oil will never be cheaper. It is within the budget resolution.

So, Mr. President, I hope, on the basis of those simple arguments, the Senate will reaffirm its position of last May and support this amendment.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, the Congress and the administration share a strong commitment to the strategic petroleum reserve as part of our Nation's energy emergency preparedness efforts. Considerable progress has been made during the last year to improve the United States energy emer-

gency preparedness. Recent, and ongoing, tests and exercises by the Department of Energy have documented areas for further improvement in our energy emergency response capability. Some of the areas of improvement were recently outlined in Secretary of Energy Donald Paul Hodel's letter of July 19, 1983. That letter was prepared as part of a two-part agreement negotiated with the administration to save approximately $1 billion annually while ensuring that the United States will be more fully prepared for an international oil supply interruption.

The agreement will, first, provide a strong multiyear commitment by the administration to completion of the strategic petroleum reserve to the full 750 million barrels approved by the Congress and, second, support for the necessary administrative and legislative actions to insure full implementation, in a timely fashion, of the current energy emergency preparedness policy established by the Energy Emergency Preparedness Act of 1983.

Mr. President, I outlined this agreement in some detail on July 25, 1983, when I introduced the Energy Emergency Preparedness Act Amendments of 1983. The initiatives in letters from OMB Director David A. Stockman and from Secretary of Energy Donald Paul Hodel reflect the determination of the administration and the Congress that the United States maintain and improve its defense and national security positions in the event of petroleum supply interruptions.

SPR FILL RATE

The agreement also endorses maintenance of an annual fill rate of approximately 145,000 barrels per day through fiscal year 1988. This will insure a continuous, predictable, and relatively constant filling of the reserve to its full capacity of 750 million barrels, as the construction of permanent storage facilities proceeds. Significant budget savings of approximately $769 million in fiscal year 1984 and $972 million in fiscal year 1985 will result form more realistic fill rates in the near term.

As the quid pro quo for congressional adoption of a fill rate of 145,000 barrels per day, the administration is prepared to support this fill rate until the reserve reaches full capacity. By comparision, in its 1984 budget request, the administration proposed a lower fill rate of 145,000 barrels only during fiscal year 1984, and a lower fill rate of 100,000 barrels per day thereafter. In addition, the administration proposed no funds for construction of the final 150 million barrels of permanent storage, which is now supported by the agreement.

Mr. President, a fill rate of 145,000 barrels per day can be undertaken without any noticeable reduction in the amount of protection provided the United States by the reserve.

I want to stress this:

Look at what happens over time and in periods of time. For example, in 1985 the United States will have the ability to replace all imports with SPR oil for 73 days compared to 82 days supply (or 9 days more of supply) under a fill-rate of 220,000 barrels per day. And the difference in cumulative fill at the end of fiscal year 1984 will be only 27 million barrels, or 6 percent of the total.

That is what the fight is about. That is what this discussion is about.

What do we get in exchange for reducing the cumulative fill rate by 6 percent, at the end of that year?

Under existing economic circumstances, along with improvements in conservation and efficiency in the use of energy in the United States, current import levels are markedly reduced. The world oil market is dramatically changed for the better since establishment of the strategic petroleum reserve. Instead of importing 11 million barrels per day in 1985 as projected in 1977, recent Department of Energy forecasts project United States imports at only 6.1 million barrels per day; this represents a 45-percent reduction from those earlier forecasts. As a consequence, the United States will be provided 73 days of protection instead of the 60 days that would have been provided based upon projections made as recently as 1980.

Moreover, the OPEC share of United States oil imports has declined from a peak of 70 percent in 1977 to 30 percent in 1983. Concurrently, the share of our imports from Arab OPEC countries has declined from 37 percent in 1977 to 10 percent in 1983. The decline in volumes of Arab OPEC oil imports is even more dramatic; imports in 1983 will be 350,000 barrels per day compared to a 1977 peak of 3.2 million barrels per day.

A recent analysis by the Congressional Research Service of the SPR compromise "suggests that, for the next few fiscal years, the difference in available supply from the reserve would probably be too insignificant to have much leveraging effect on price increases during a shortage. In later years, because the reserve becomes a progressively stronger hedge against disruption, the singificance of the low fill rate dims even more except during shortages of greater severity and durations."

SPR CONSTRUCTION

In addition, construction of additional major permanent storage facilities can proceed at a fairly constant and predictable pace which reflects fiscal year national security considerations. Under the agreement, the Big Hill facility will begin construction by mid-fiscal year 1985.

This construction schedule and fill rate will avoid the use of interim storage facilities, thus keeping storage costs to a minimum. This construction schedule and fill rate also will enable the strategic petroleum reserve to provide approximately a constant level of protection of the American economy in the event of a petroleum disruption.

CONCLUSION

The possibility thus exists to reduce the Federal budget deficit by the stretchout of the strategic petroleum reserve completion date without a threat to the health of our economy and national security.

A barrel of oil bought today at $29 costs the Treasury exactly the same as a barrel of oil bought in 1985 for $34; yet, forecasts show that oil is likely to cost only about $30 per barrel in 1985.

When the Senator from New Jersey made reference to the fact that it is going to cost us more to buy the oil later, he was assuming an escalation of oil prices either significantly higher than that or was ignoring the interest on the money invested in that oil between now and the time of that purchase.

This agreement, Mr. President, as I stated on July 25, exemplifies the great and significant potential for cooperation between the Reagan administration and the Congress. By such cooperation we can achieve the dual purpose of urgently needed Federal budget savings while advancing policies and programs which are critical to our Nation's economic and national security.

Finally, Mr. President, I ask unanimous consent that a letter dated September 20, 1983, addressed to me from David Stockman, Director of the Office of Management and Budget, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT, OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., September 20, 1983.

Hon. JAMES A. MCCLURE,
U.S. Senate, Washington, D.C.

DEAR JIM: As the Senate resumes debate on the 1984 Interior and Related Agencies Appropriations bill, I want to reaffirm the Administration's strong opposition to any attempt to increase funding of the Strategic Petroleum Reserve above the level reported by the Appropriations Committee. For the reasons outlined below, any amendment resulting in increased funding for the program would be unacceptable to the Administration.

The Committee, in our view, has adopted a sound plan for development of the Strategic Petroleum Reserve. The Committee's approach balances our energy security concerns and fiscal policy objectives. I would note, for example, that the Committee recommendation for a fill rate of 145,000 barrels per day (B/D) would reduce 1984 outlays by nearly $800 million below that required to attain a 220,000 B/D fill rate, while reducing the level of oil in storage at the end of 1984 by only 6%.

The Administration has taken the steps needed to improve our energy emergency preparedness. In January 1981, the Administration decontrolled oil markets, and in the 2½-year period since, has more than tripled the size of the Strategic Petroleum Reserve. As a result of these and other actions, the level of U.S. energy emergency preparedness, measured in terms of days of protection against a cut-off of imports, has increased from 18 days in January 1981 to over 100 days currently, more than a five-fold increase.

To further improve our Nation's preparedness, the Administration has agreed to work with the Congress to enact legislation to assure the availability and effectiveness of Executive Manpower Reserves, to extend the International Energy Agency anti-trust defense, and to make existing emergency preparedness legislation as effective as possible.

There are additional important reasons for supporting the alternative which we favor. The interest rates on Treasury borrowing are projected to be higher than the rate of increase in oil prices. Consequently, any increase in SPR fill rates would increase the total cost of the SPR to the taxpayer. In addition, these higher fill rates would increase Treasury borrowing requirements, and this would lead to upward pressure on interest rates during a critical period in our economic recovery.

Finally, I understand that an amendment may be offered to add 1984 funding for the SPR storage facility at the Big Hill site. This action would be inconsistent with the intent of both Houses of Congress as expressed during the deliberations on the 1983 Supplemental Appropriations bill. In addition, this action would add $370 million to the budget, providing only 7 million barrels (1 percent) of additional storage capacity in fiscal 1986 rather than fiscal 1987. Under this accelerated construction schedule total costs, including interst on borrowing, would also increase.

For the reasons outlined above, the Administration supports the appropriation level in the Committee bill and opposes any amendments which would further increase 1984 funding for the SPR.

Sincerely,

DAVID A. STOCKMAN,
Director.

(Mr. SPECTER assumed the chair.)

Mr. McCLURE. Mr. President, I want to paraphrase from that letter just a couple of points. Some of them have already been made in part.

One is that the difference between 220,000 barrels per day and 145,000 barrels per day is a difference of accumulated supplies in the SPR of only 6 percent by the end of 1984. So let us aline against that what we got in exchange: a commitment to continue that fill rate until we have achieved 750 million barrels, which was and is the congressional target for SPR. It takes them a little longer to get there, but we will get there under this schedule.

Second, we got a commitment for the completion of Big Hill, which is only a short stretchout from the original construction schedule for Big Hill. That, to me, is not a disproportionate or untenable position to take.

Finally, we got the agreement from the administration to take actions which were outlined in the letters that I made reference to and that I put into the RECORD in July with respect to our capacity to deal with supply interruptions.

Am I concerned about conditions in the Middle East? Of course I am. One would have to be blind, deaf, and dumb not to be concerned about the impact of what may happen there. But let us look not just at SPR but at the total capacity of the United States to respond to supply interruptions. This package of actions which has been agreed upon between myself and others in the administration is a stronger package of response than we enjoyed before that agreement was reached.

I believe, too, as several Members have reminded me in the past debates, when I have stood with the Senator from New Jersey asking for the higher fill rate, there is another threat to the security of United States. That threat lies in economic disruption in this country because of budget deficits. Surely, we have, under the prodding of the distinguished Senator from Louisiana, moved SPR off-budget. It is not reflected in the budget numbers.

The Senator from New Jersey is correct with respect to the aggregate numbers under the budget resolution, but it does have an impact on Federal spending because, whether we denominate it on-budget or off-budget, it still takes the same number of dollars coming from the same sources being expended to the same places, and therefore, does impact Federal borrowing and Federal spending, whether we call it on-budget or not.

For those several reasons, Mr. President, I ask that the Senate support the position taken by the committee in making this recommendation that we accept the fill rate of 145,000 barrels a day and the initial construction of the Big Hill facility stretchout, as was outlined in the prior communications between the administration and the Congress on these subjects.

It is not a bad package. It does not damage the security of the United States. It is not an untenable position, and I believe it is a position which can and should be supported.

Mr. JOHNSTON. Mr. President, we are again at our annual debate on strategic petroleum reserve. It is a deja vu. It happens every year. And while the arguments vary a little bit, the considerations are today the same as they have been, I guess, every year since 1977, since we began to fill this reserve. The arguments are very simple. The administration in control, whether it be President Ford, who started off, or President Carter, or President Reagan, thinks that the strategic petroleum reserve is good in theory. They all back it, except when they get into office they want to slow it down during their term because they do not want to pay for it because, as Mr. Stockman says, it represents only a 6-percent incremental increase. And so it is every year that the administration in power looks at this additional year, and it seems small in relationship to the whole reserve, and so therefore says, "Yes, it is good but not me, not this administration. Put that off for another administration."

Well, sensing that argument and at a time when we thought the Reagan administration was committed to the balanced budget, we put this account off-budget so as to take the consideration of the size of the deficit out of the consideration of the strategic petroleum reserve, because we thought the strategic petroleum reserve was so important that it should not be balanced off by some little increase in the amount of the deficit. And I say some little increase. Maybe it is a big increase in the deficit that this involves, but it is only about one-half of 1 percent the size of today's Federal deficit of $210 billion.

So what you are balancing off is a 6-percent increase in the reserve as opposed to an increase which does not show in the size of the deficit of only one-half of 1 percent or figures of that nature.

And so it is that annual debate, Mr. President, balancing off whether or not we really have a real problem, enough to spend money for the strategic petroleum reserve.

Mr. President, one of those who has been strongest for the strategic petroleum reserve has been the distinguished chairman of this committee, the Senator from Idaho (Mr. McCLURE). He is to be congratulated for having brought it back up to 145,000 barrels a day. I guess that is a victory when you consider that they were not going to build Big Hill at all and were going to cut it down to 100,000 barrels a day.

But, Mr. President, the Bradley amendment, in calling for 220,000 barrels a day, is already down from 300,000 barrels a day, which is the fill rate favored by the committee on a bipartisan basis, so we are down from 300,000 to 220,000 already. There is no need further to reduce the fill rate of the strategic petroleum reserve.

Mr. President, you can make this argument about do not pay for it this year, wait until next year because the interest you pay in the meantime probably will not amount to any increase in price.

You can make that same argument with respect to an insurance policy: You probably will not die this year so wait until next year for your insurance policy and you can buy a bigger policy with the interest you save in the meantime. Do not buy the fire truck

this year; the fire truck will depreciate in the meantime. You will have to pay interest on it. Put off that fire truck purchase until next year.

But, of course, Mr. President, the point is very simply that there may be some need for the fire truck or the insurance policy or, in this case, the strategic petroleum reserve in the meantime. And, indeed, the events in the Middle East underline that danger.

Now, we are really not talking about putting this 6 percent in because of the Iran-Iraq war or the Exocet missile or the events of 1983. We are talking long term, Mr. President. In my view, the political stability in the Middle East in the long term will be no better than it is in the short term, so the 6-percent increase we are talking about added to the 6 percent which we hope to make next year, and 6 percent every year will get us to a total fill of three-quarters of a billion barrels, which is where we ought to be.

The need for foreign oil, for imported oil is not going down, Mr. President. It is going up. It is true that because of conservation we have reduced the total consumption of oil in this country since 1981 and reduced it a lot more than anybody predicted. We are all pleased and happy with that, but we know there is a limit to that which we can conserve. We also know that in every year since 1957, we have gone down in the amount of domestically produced oil. We are producing much less oil today than we were in 1981, or less oil in 1983 than we were in 1982. And in 1990, we will be producing still less, perhaps markedly less than we are today.

Where is that incremental amount going to be filled in? Well, it is not going to be nuclear, because we are not going to start any new nuclear plants. Coal plants are also not being put on line. The chances are that it is going to be filled in with imported oil.

The estimates in which I have most confidence would indicate that we are now probably at a low point at $29 a barrel for Saudi Arabian light. Indeed, the spot market has begun ever so slowly to creep up above that posted price. I do not know whether that forecasts a trend, but it certainly is evidence that that price is holding and that there is not the imminent break that some predicted in the price of foreign crude. So crude will not get cheaper. Crude at very best will hold for a few more months around the $29-a-barrel price and begin its inexorable march up in price as we all expect.

Whether that will happen in 1984 or whether it will be a few months later is anybody's guess. It is clear that if the war starts to involve petroleum between Iran and Iraq the fat is in the fire, that the oil plug is in the bottle and that the price is going up very, very fast. Indeed, it is rather amazing that we have not had oil supplies more directly involved in this Middle Eastern war than we have already. The Saudi Arabians, greatest producers of oil in the world, have been supplying dollars to the Iraqis, and the Iranians thus far have made no raids against the Saudi oil fields. That is rather amazing when you consider it. It is particularly amazing that the Iraqis and the Saudis have not up to this point attacked each other's fields, but when that starts—and the selling of the Exocet missile may well be the first indication of that—then I submit that the supply of oil from the Middle East will be totally unreliable; its price will be up, its supply will be down.

The fact that consumption in this country is temporarily down, that there is a temporary surplus, everyone knows, I believe, is due principally to the fact that we have a recession, due to the fact that factory utilization rates slipped down to as low as 69 percent at one time. As I recall correctly, it is only now at about 74 percent. As that begins to creep up and we begin to use a higher percentage of our industrial capacity, then the need for oil, indeed, the need for natural gas and other fuels, will go up with it. With it will go up the price.

Mr. President, it is the annual argument again whether or not a 6-percent increase is worth an increase in the off-budget account, the equivalent of about one-half of 1 percent the size of the deficit.

Put in that context, Mr. President, and considering the size of the deficit already, I submit that it is worth the price. We are not spending this money. We are not consuming it. We are not burning it up. We are not handing it out. This is no giveaway program. This is an investment in our future, and investment in an insurance policy. The strategic petroleum reserve program as a whole can be the difference between national economic survival and national economic catastrophe. A 6-percent addition to that insurance policy I think is well worth the price.

Mr. ANDREWS. Mr. President, the Senator from Louisiana makes an excellent point. He is talking about an insurance policy. He is really talking about timeliness.

Not only do the Iraqis now have an Exocet missile system that could raise havoc with the exports of oil from a key area of the world, but also, we see in this morning's newspapers and on our television screens two American warships traversing back and forth a few miles off the beach behind which lie the military equipment that could wipe out those ships in the event of a war.

Those kinds of things make you wonder about just what kind of preparedness we have for a disruption in the Middle East and for the need rapidly of taking care of our own energy needs here at home.

Mr. President, I have spoken in behalf of agriculture in rural America and in the energy emergency preparedness debate. Agricultural exports have paid for the imports of oil for the last decade-and-a-half. Agriculture is the industry in this country that is most likely to be incapacitated in the case of an energy shortfall. I was first involved in this matter as a Member of the House and for the past several years as chairman of the Oversight Subcommittee of the Senate Agriculture Committee.

At hearings which I chaired in 1981, it became abundantly clear that, unlike most agricultural goods, petroleum is not the kind of commodity which changes hands freely in the marketplace. There is no free market in the world oil community today. It is rigged by OPEC countries primarily and other traders that do not really have the best interests of the United States at heart.

These findings led me to act as an original cosponsor to comprehensive emergency preparedness legislation. Ultimately, we did secure final enactment of a bitterly fought compromise with the administration. It is the implementation of that law about which I have become most concerned.

It is for that reason that I rise in support of Senator BRADLEY'S amendment.

U.S. agriculture remains dependent upon the world community for much of its energy. We are at the end of the distribution system, and are likely to get hit first and hardest by any future oil disruption. Agriculture is critically dependent upon sufficient fuel supplies on a timely basis. Unlike other industries, an interruption of even short duration can result in lost production for an entire year. Every American consumer, and indeed the world community, would suffer if this were allowed to happen.

Experts agree, and contemporary events all too painfully illustrate, that political instabilities in oil producing regions could lead to another shortage at any time. Let us not be lulled into a false sense of security by present circumstances, as some were just prior to the Iranian revolution.

Mr. President, as the Senator from Louisiana has stated, this is a time to have that insurance policy, given today's events. So let us not be lulled into a false sense of security by present circumstances, as some were just prior to the Iranian revolution. Surplus oil capacity is disappearing as the world economy recovers, and inventories are being maintained at minimum levels.

The strategic petroleum reserve is this Nation's only significant line of defense against future oil emergencies.

The current administration until now has maintained an unprecedented record of filling the SPR. I have consistently supported the building of a strong SPR. However, the contingency plans for utilizing the SPR remain woefully inadequate and fundamentally flawed. I call attention of Senators to the page 1 article in the September 19 Washington Post, entitled "Oil-Crisis Test Yields Economic Disaster." This article reveals that the DOE analysis of a recent test yielded a tripling of oil prices; yet the DOE lauded the exercise as a successful test of the free market, in spite of severe adverse impacts—including farmers being forced to abandon crops in the field.

Most important, the DOE specifically chose not to utilize any oil from the SPR in the face of this simulated crisis. They are taking a look-see at what might happen in the case of a petroleum emergency, and they are not putting into play one of the insurance policy concepts we have. That is not a fair shake in analyzing the situation. To put it mildly, I am appalled by the ineptness revealed by this test.

It has become all too clear to me that the Congress must roll up its sleeves and go to work to provide additional direction on emergency preparedness. I appreciate the initial efforts of Senator McCLURE, as exhibited in S. 1678. But my own analysis has forced me to conclude that other major issues must be addressed. I intend to act further on these concerns at the appropriate time.

Regardless, we can ill afford the double jeopardy which inept planning and sharply reduced SPR fill-rates represent. Until standby plans are improved to an acceptable level, I can see no basis for making any move to reduce the fill-rate below that mandated under current law. Any short-term budget savings are more than offset by future higher costs. And it seems a miniscule price to pay when our national and economic security is at stake.

Mr. President, it is about time some people around here begin to realize the difference between an investment and spending. This is an investment in our economic future. It is an extremely important investment to make. It is time we analyze what is happening in this Interior appropriations bill.

The statement is made that we are not able to put this amount of money in for a strategic petroleum reserve, when the people from the Defense Department come wandering into our offices—those of us who sit on the Defense Subcommittee—and say, "We have to have $22 billion for a rapid deployment force." To deploy where? To deploy in the Middle East. To deploy why? To deploy in order to keep our hands on oil that is not ours.

If they can justify spending $22 billion in military preparedness to keep our hands on somebody else's oil, it makes a lot more sense to invest a few hundreds of million dollars in stockpiling oil for our country to take care of any future emergency.

I ask my colleagues to join me in voting for the pending amendment.

Mr. WARNER. Mr. President, will my distinguished colleague yield for a question?

Mr. ANDREWS. I am happy to yield.

Mr. WARNER. We both serve on the defense committee—I on the authorization and the Senator from North Dakota on the appropriations. As such, we both examine the defense budget, although from a slightly different perspective.

My concern here is that, with the looming deficits facing the country, defense would be the first to be cut, if in fact this body and our colleagues in the House determined that we had to make some quick savings.

In reality, our national defense can be no stronger than the foundation on which it rests, and that foundation is our economy. It is the judgment of those closest to this issue of deficits and the economy that we should try to incur these savings, as reported now by letter from Mr. Stockman, of $800 million in fiscal year 1984 to preserve that economic base and, in turn, to support the national defense.

I wonder if my colleague shares with me the feeling that our defense can be no stronger than the economy and that, indeed, that is the reason for opposing this amendment.

Mr. ANDREWS. Mr. President, the Senator from Virginia makes a wonderful point, and I totally agree with it, but for a reason totally different from that posed by the Senator from Virginia.

I point out that the strongest defense of our freedom is a strong economy. Ours is an energy-based economy. To spend in excess of $200 billion a year for the defense of our freedom and then to allow—for the lack of spending $800 million to fill a strategic petroleum reserve, less than one-half of 1 percent—the economy to collapse, thereby negating our ability to take care of the needs of the defense of this country, reminds me of the story of a battle long gone, where, for want of a nail, the shoe was lost; for want of a shoe, the horse was lost; and for want of a horse, the battle was lost.

Mr. President, I hope my colleagues do not say that they would oppose this amendment because it would require the spending of some $800 million and that that spending might, somehow or other, detract from a $200 billion-plus budget. I think the opposite is really true, and the Senator from Virginia makes an excellent case in support of the amendment.

Mr. WARNER. Mr. President, if I may, I should like to pursue this further with my distinguished colleague.

Does he mean to intimate that the small additional increments to be put in the petroleum reserve, as occasioned by the amendment of the distinguished Senator from New Jersey, might make a difference in the national defense situation?

I would think that the $800 million plus—perhaps even $1 billion—could make a very serious difference as an integral part in the deficit situation that could begin to bring down defense expenditures. But if we were put into a situation in the next 30 days, 60 days, or 90 days in terms of our national defense, the small increment added to the reserves would not be that significant. In other words, I see more sensitivity and more importance to our budget and our defense situation in the next 90, 120, or 365 days than in that small increment in petroleum reserves.

Mr. ANDREWS. Mr. President, let me respond to my good friend this way: If, indeed, we do not spend this $800 million—about which I think we have made the point that it is not spending so much as it is investment—and if, indeed, we do not have it, and 90 days hance or 100 days hence we come into a crisis, and suddenly in this country we have a shortfall on petroleum to heat our homes or plant our crops and we lose a good deal of a crop, or we have some tragedy befall us in the northern tier of States in this country because we cannot heat our homes, yes, the lack of that $800 million investment in an adequate fuel reserve to tide us over some unanticipated shortfall could be far more significant than all the military armaments we could purchase with the same amount of money.

That is the point, Mr. President, I wish to make to my good friend, the Senator from Virginia, because the defense of this country depends on much more than just the armaments. It depends on the strength of our economy, and the cost is not, Mr. President, the $800 million; the cost could well be conceived to be the interest on that $800 million, but even not then because the amount of oil that we put in this strategic stockpile now will be worth two or three times as much when emergency comes and we have to take it out.

Mr. WARNER. Mr. President, in brief reply, and then I will yield the floor to my distinguished colleague, it seems, in summary, Senators must face this issue as follows: Which is the more serious risk, that of unforeseen cutback in our oil supplies or the criticality of the deficit facing us which in turn would require very sharp and swift reductions in the defense budget?

To me, the latter is the more critical issue and based on some experience in the Department of Defense I point out to my distinguished colleague the greatest source of waste in that Department occurs when there are unforeseen and abrupt cancellations of contracts, abrupt retractions in terms of total numbers of manpower and womanpower. Therein begins the waste and if this Congress were forced to go back and try and recoup some money from the Department of Defense budget and precipitate such actions, I think it would be far more disastrous than any possible threat of reduction of oil supplies.

Mr. ANDREWS. Mr. President, my colleague, the Senator from Virginia, has made some excellent points which I frankly interpret more in support than against the thrust of this amendment.

Let me offer to the Senator from Virginia the opportunity to vote as I intend to vote to put some teeth into the budget resolution so we can stick with those figures which would probably have more, shall we say, ability to deal with the shortfall of dollars to the Treasury than this particular amendment on this bill would have. If we can indeed and in fact put some teeth in that budget resolution, and then if we cannot find that that is a sufficient way of cutting the deficits we might even add a little tax on income, I think we can solve this problem.

Let us not run the risk of having this Nation be energy short at some point in the future. We have done it twice. In the upper Midwest, we have had fantastic problems. Our farmers have had to pay through the nose for the amount of diesel fuel to keep those tractors running in the fields. I do not want to do it again.

I think it is prudent and it is wise, and it is an investment that we buy that kind of an insurance policy today to prevent that from happening.

I yield the floor.

Mr. WARNER. Mr. President, I yield the floor.

Mr. BRADLEY. Mr. President, I wish to reassure the distinguished Senator from Virginia, who has been a very significant leader on this issue on strategic petroleum reserve, as he chairs the subcommittee in which the issue is discussed. I recognize he does have a legitimate concern about the very sizable deficits and economic security that that threatens both in the short and in the long term. And as I also know, because of his strong support for the strategic petroleum reserve, he was one of the cosponsors of Senate Resolution 84, which was introduced by Senators McCLURE, JOHNSTON, WARNER, and I and the late Senator JACKSON.

In this resolution, it does specifically call for a fill rate of at least 220,000 barrels per day. So I know of his real commitment to that fill rate.

On the point of reassurance, it is a tradeoff as he so aptly stated, between the added insurance for national security of having the oil in the stockpile at a fill rate of 220,000 versus the economic uncertainty of adding a couple hundred million more to the deficit.

To reassure you from the time that you cosponsored Senate Resolution 84, the deficits due to the robustness of the recovery have turned downward significantly so that if you felt given the level of the deficit in March that 220,000 barrel fill rate would be in our national interest, let me assure you that you should feel quite comfortable with this amendment in a world where the budget deficit is much lower than it was in March, so that I hope Senators would join in support of the amendment.

Mr. DOMENICI addressed the Chair.

Mr. WARNER. Mr. President, I reply to my distinguished colleague from New Jersey. First, he has very accurately given a rendition of the facts. Indeed, I do find myself in something of an awkward position since I must now reject the very strong advocacy of that fill rate that I and others stated by virtue of that resolution in March.

And I appreciate the characterization of the present economy as robust from our distinguished colleague. Unfortunately, that robustness has not recouped the deficit to a point where I am sufficiently confident that this Nation can rest on its laurels, so to speak, with respect to further expenditures in this magnitude.

Therefore, I must join those who support a curtailment of our spending and object to the amendment.

Mr. DOMENICI. Mr. President, first let me apologize to my friend from Virginia. I thought he had finished when I sought recognition.

Mr. President, I will not speak long, but I rise to compliment Senator McCLURE, the distinguished Senator from Idaho and manager of the bill on the floor.

I really did not catch the whole argument here, but I hope I did not hear what I think I heard.

This particular amendment that the distinguished Senator from New Jersey, Senator BRADLEY, seeks to offer will add $1.46 billion in budget authority to this bill, this appropriations measure. That is calculated to spend out at $800 million, but it is $1.46 billion in budget authority.

I hope I did not hear anyone say: "It does not really matter. Our deficits are so high. What does a billion and a half matter?"

I guess last year we were talking about $200 or $300 million not mattering, and I hope we are not to the billion and a half having no significant impact, because the deficits are so high.

I really do not know when we are going to get the deficit under control if a billion and a half does not matter.

Now, from the standpoint of substance, I hear those saying we have to go back to some number and continue to fill because we did it once and to reduce it any is to take great risks. That is to imply that we have not been doing a fantastic job of filling the strategic petroleum reserve since 1981.

I need not tell my friend from New Jersey how well we have done. In the midst of fiscal policies beyond anything we have seen in the past by way of deficits, since January 1981 the size of SPR has tripled. We can now cover a cutoff of imports for 90 days rather than the 18 days which were there in 1981.

Now granted it would be better if we added during the year 6 percent more than we are going to add. But I think the distinguished Senator from Idaho made a tremendous compromise with the administration. They have shown that they want to fill it. They do not find stumbling blocks like the previous administration. They fill it. They do not find excuses. They put the oil in the ground. And it has been tough.

They wanted 100,000 a year and he struck a compromise, if I understand Senator McCLURE, at 145,000, not a little tiny bit; a huge amount.

Now I submit for those who think we should wait around to bite the bullet on some budget resolution that that really is ignoring reality. The place you bite the bullet in real expenditures is on the appropriations bills, not budget resolutions. And, if you like what is in this Interior appropriations bill, and you want us to go to conference and eventually have the President sign a bill, then I gather that you should be concerned about adding $1.46 billion in budget authority to this bill unless you are prepared to take some things out of the bill, and I gather from talking to the chairman that no one wants to take anything out. They think it is about where it should be, and maybe they want even some more.

Where are you going to find the $1.46 billion that is over what the President wants and over this compromise which Senator McCLURE has made with the administration, again I repeat, an administration that obviously from this Senator's standpoint, while they may not understand the significance of planning for an emergency, which my good friend from Louisiana and Senator McCLURE have been telling them they should do, they surely understand we should be putting oil in SPR.

They have been doing it at a rather incredible rate, in a relatively short time.

So I do not think there is a lot to be said in arguing that it ought to be 2, 4, or 6 percent higher. I think we have struck a deal with the administration that has been acted upon in good faith. We will get 145,000 barrels instead of 220,000 added to 90 days, which used to be 18, and we are on the way to doing something real significant, as far as I can tell.

I close by saying I do not disagree that there may be a disaster pending in the Middle East. I do not know when it will come, but we have been talking about it for a long time. It may be more imminent with every day that passes.

On the other hand, I can tell you that the GAO study says it is fiscally prudent to buy oil now because it is cheap, but I can tell you that the flip side is that the interest rates which we are going to pay on the $1.46 billion in budget authority, and the add-ons for the next 3 or 4 years through 1988, from what we can tell, are higher than the expected increases in the cost of oil. As far as fiscal prudence, logic says it is fiscally more prudent not to buy it because the interest rates are too high and we are paying more in increased interest rates than we are going to pay in letting the price of oil go up gradually, if it does, and buy it at the market as it comes onboard.

I cannot prove that, but I tell you GAO cannot prove their position either. I can merely tell you that there are certainly two sides to that argument. When you have past deficits as long as we are having with the debt service, everyone knows something about the interest rates on Treasury bills, short term and long term, which are paying for the $1.46 billion in budget authority and the added ones in the outyears that will go into that total.

I want to compliment the distinguished Senator from Idaho who has been a leader in insisting that we do what we can about SPR and has regularly insisted that the administration do the maximum. He took the lead in the past in asking that they do more than they wanted to do. I compliment him for getting the compromise before us that I think will lead to an Interior bill which will be signed by the President and which contains many of the things that many of us want, with a rather prudent SPR policy, as I see it.

Senator BRADLEY says oil prices will never be lower and therefore we should buy oil now when oil is a bargain.

Prices, in fact, have fallen from $34 per barrel last year to $29 per barrel or less today.

Some forecasters see the possibility of prices falling still further to $23 per barrel in the next year or so. Oil-producing countries—Mexico, Indonesia, Nigeria, and others—are under pressure to produce more to earn more and this can ony work to our advantage.

Right now, prices are expected to hold steady for the next several years. DOE forecasts support his view. We assume as much in the Congressional Budget Resolution. But if we rush to fill the SPR, we must borrow to pay our bills. When interest charges are added to flat oil prices, it turns out that it is cheaper to fill the SPR later rather than sooner.

Mr. BINGAMAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I commend Senator BRADLEY for his leadership in directing the Senate's attention to the needs of the strategic petroleum reserve at this time.

I think the real issue before the Senate is whether energy security is going to be on the national agenda or whether it is not.

His amendment today will provide sufficient funding to maintain the fill rate of the reserve at 220,000 barrels per day in fiscal year 1984. Current world events, including the continuing turmoil in the Middle East, and the war between Iraq and Iran that threatens to spill over to other Persian Gulf oil producers, make it imperative that we prepare our best defense against oil-related threats to our economic and national security. That defense is the strategic petroleum reserve.

There may have been some arrangement or some deal made between some Members of the Congress and the administration to arrive at a 145,000-barrel-per-day rate of fill.

While I recognize the need to reduce our Federal budget deficits, I do not believe the long-term interests of our Nation are served by seeking short-term-deficit reductions that compromise our energy security.

We should not forget it has only been 10 years since the United States and the world were thrown into economic turmoil with the Arab OPEC oil embargo. We all remember the long lines at the gas pumps and the sudden dramatic price increases for gasoline and home heating fuel. We cannot and should not forget the chaos of that time. It was a lesson in energy preparedness that we should have learned well. If we did not learn the lesson in 1973, we had another opportunity in 1979 with the Khomeni revolution in Iran to see how vulnerable we remain to oil supply disruptions. Again, that spring we faced long lines to gasoline pumps, sharply increased prices, and rationing in many areas.

Many argue that with more than 355 million barrels in the reserve currently, and with a worldwide glut the SPR is now sufficient to meet our needs. However, we know that the first 200-300 million barrels should—and probably will—be reserved for use in case of military action. This means that we are only now beginning to put oil in the reserve that would be used to moderate the economic damage otherwise resulting from an oil supply disruption. The current excess capacity to produce oil will not last long. It is no time to slow down our oil purchases, especially if oil prices are likely to rise in the future with the economic recovery.

As Senator BRADLEY has pointed out, if we had rapidly filled the reserve in 1977, we would have bought oil at $13 per barrel. Today it costs us $29-$30 per barrel. Delay not only prolongs our vulnerability, it most probably increases the total cost of the reserve. This view is shared by the General Accounting Office. The GAO has concluded that the administration's proposed slower fill-rate schedule results in the highest expenditures of all oil fill-rate options included in their analysis, if oil prices rise over time.

Buying oil now for the SPR is an important investment in our energy security which we would be ill advised not to make.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, the question is whether we want to reduce the rate at which we are filling the strategic petroleum reserve. My understanding is that the existing fill rate is 220,000 barrels per day, that is the actual fill rate. In May of 1982 the Senate voted against reducing the authority of the President to fill the SPR at a rate less than 300,000 barrels per day.

I think the most important statistic is this: The actual average fill rate during fiscal year 1983 was 220,000 barrels per day. That is the rate that the Bradley amendment would preserve. Without the Bradley amendment, if we adopt the approach that the committee is proposing, we would reduce the 220,000-barrel figure to 145,000 barrels.

I am on the Armed Services Committee as is my good friend from Virginia. I believe that if this Nation enters into a military conflict, the great likelihood is that it is going to be over energy. It is clearly in the interest of protecting our military security that we make this amendment, which is a rather modest investment compared to the amount of money that we have adopted for the overall defense budget.

Mr. President, the need for an adequately filled SPR is shown by a Congressional Research Service study that I requested and which was just recently released. The study is entitled "Western Vulnerability to a Disruption of Persian Gulf Oil Supply." Their study, which was just released yesterday, shows that the United

States would be badly hurt by a cutoff of oil from the Persian Gulf and that the administration's policies to avert or to deal with such a crisis are inadequate at best and potentially highly dangerous. The report states:

If Western nations react to the currently more favorable situation by relaxing efforts to conserve energy, encourage development of alternative energy sources and build petroleum reserves, the future could find the West once again vulnerable to the effects of a disruption of Persian Gulf oil supplies.

Mr. President, that is exactly what we will be doing if we do not adopt the Bradley amendment. We will be relaxing efforts to build petroleum reserves from the current average rate for fiscal year 1983 of 220,000 barrels per day to the proposed 145,000 barrels per day.

This study comes at a time when events are demonstrating all too dramatically the persistent instability of the Persian Gulf. Despite efforts we have made to reduce our vulnerabilities in that region, the CRS study concludes that the United States is still unable to avoid an economic crisis except by military means, should the West be denied access to Persian Gulf energy sources. By slowing down the fill rate of SPR, and that is what we are doing if we do not adopt this amendment, we would have to depend on a catch-as-catch-can policy in case of an oil embargo. That would only exacerbate the economic dislocation resulting from the phenomenal increase in prices expected after an oil cutoff. The CRS report shows that in the event of a cutoff of Persian Gulf oil the U.S. economy would be hurt about as much as our allies' economies. Previously, it was assumed that our economy would not suffer as much as our allies because of our domestic energy supplies. The interdependencies of modern international trade have changed that. The CRS report analyzed what the impact of a cutoff would have been in 1980 and then in 1982. In 1980 production of all goods and services would have fallen between 12 and 27 percent for all seven countries including the United States combined. It was estimated that the U.S. GNP would have dropped by 11 to 29 percent in the event of a cutoff in 1980.

The conclusions of this study also underscore the need to improve our military capabilities and those of our allies in the Middle East and Southwest Asia. That is why we should support the military improvements connected with the Rapid Deployment Force. But I am concerned that our focus not be one-dimensional, ignoring nonmilitary policies like the strategic petroleum reserve. Indeed, the administration's free market approach has negative military repercussions because the CRS report states that:

U.S. adoption of a go-it-alone policy would constitute a critical blow to the collective security arrangements established with West European countries and Japan. The United States could well be hard put to reassure allies of the credibility of its defense guarantees after announcing an emergency oil sharing plan of which it was the principal architect.

So I commend Senator BRADLEY for offering this amendment. I hope that our colleagues will join him in supporting the funding necessary just to maintain the present fill rate of the strategic petroleum reserve.

Again, that is the issue: Do we want to reduce the fill rate of the strategic petroleum reserve? Delay can only cause higher costs—and that is the best case. It could lead to military activity in the Persian Gulf under scenarios that unfortunately may well occur in the worst case. Delay also subjects us to political pressure from the oil-producing nations that thereby jeopardize an independent foreign policy.

I commend my friend from New Jersey, and I yield the floor.

The PRESIDING OFFICER. The Senator from Idaho.

Mr. McCLURE. Mr. President, I think there is reason to try to expedite the passage of this bill. We had earlier said to Members that we had thought we could complete this bill by 6 o'clock. I remind Members that there are some dozen other amendments that have to be disposed of yet this evening. I shall attempt to expedite each of those. The rest will not, of course, take very much time individually. They can be disposed of expeditiously. I know of only one other amendment that has the potential for requiring any extended debate or a rollcall vote. I hope that is the way it develops.

We still have hopes of completing this bill on or near that schedule. It is still my intention and hope that we can do that.

Allow me for just a few minutes, Mr. President, to put into perspective some of the arguments that have been made.

I hear various Members saying we must pass the amendment because we have to have an insurance policy. The question is not whether we have an insurance policy; the question is how large are the benefits and what is the premium? We have an insurance policy in a strategic petroleum reserve and we are paying a premium for that coverage.

I would say again, in the same analogy to an insurance policy, our emergency capacity to respond is part of the coverage of that insurance policy. And we are broadening the coverage of this policy by other actions which the administration has agreed to take as we balance this particular part of the coverage against other parts of the coverage against emergency.

It has been suggested that indeed, there is increased danger that the hostilities in the Middle East may spread in such a fashion as to interrupt the supply of oil. It is expressed in terms of urgency: This is something that is new and it is different; therefore, it may happen almost any time. Indeed, that is perhaps true. But let us put that into perspective.

The difference between a fill rate of 145,000 barrels a day and 220,000 barrels a day is the difference between the end of 1984 of having in the strategic reserve 411 million barrels of oil or 439 million barrels of oil—measurable, important, but not earth shaking by itself. If we look at it in the timeframe of the urgency of the current critical conditions in the Middle East, indeed, it washes out. As a matter of fact, it is less significant if you look at what the administration has agreed to do with respect to the balanced package which we have tried to put together and of which this is just a part.

I hope that Members remember—I certainly do—the struggles we have had in the past to try to forge emergency responses. We passed a Standby Petroleum Allocation Act that was hard fought. I was a sponsor of that act; I fought for it; I argued with the administration about it. We lost that argument. The President vetoed the bill and that veto was sustained by Congress. I suggest to my colleagues, too, that what we got back as a part of the overall package of coverage under this insurance policy we call emergency response is a significant gain from where we were at the time of the veto of that particular measure. So we have made some progress, we in the Congress and in the administration, working together.

I cannot help but think, as the Senator from New Mexico (Mr. DOMENICI) was talking about: Have we gotten to the point where a billion dollars does not make any difference anymore? We are talking about $1.4 billion in budget authority. Not the appropriations or outlays, but $1.4 billion in budget authority. That is what we will be measured against. It is there, at that point, that the Office of Management and Budget will make a recommendation to the President with respect to a veto.

I stress, too, and I do not mean to overstress this, but I think it is important for us to remember that every dollar we add by way of amendment here puts stress on every other appropriation in this bill. I say to Members on both sides of the aisle, no threats involved but just realism, if you add $1 billion or $1.4 billion in budget authority here what do I do to try to get that bill down to a size the President will sign? I start looking around at other things that we can pare out of it. So if you have any favorite things in this bill, you had better look carefully

before you add $1.4 billion more, because indeed, something else is going to have to give.

I know from the contacts I have had with various and sundry Members on both sides of the aisle of their very great concern about several different items within the bill. We have been adding amendments or colloquies with respect to spending all day yesterday and we shall do some more today as Members express their concern about the priority of spending. All I can say is $1.4 billion added here makes it a lot tougher for me to be accommodating everywhere else in the bill. That is no threat. It is a statement of fact.

I hope people will keep that in mind before they exercise what really is a symbolic gesture of who is most in favor of the strategic reserve.

Let me say to my friend from New Jersey that I compliment him for the fight he has made. I have been with him. But I think we also must recognize that whether it is 145,000 barrels per day or 220,000 barrels per day or 300,000 barrels per day, it is an arbitrary figure. It is an arbitrary figure because certainly, if the difference between 145,000 barrels per day and 220,000 barrels per day is going to destroy or jeopardize national security, then for heaven's sake, let us make it 300,000 barrels a day because that extra 80,000 barrels per day is also threatening to national security. So we make a judgment of what is the right balance and that is subjective.

I hope the Members of the Senate will stay with the subcommittee and support the administration in this particular instance so that evaluation of what is the proper balance between various aspects of emergency preparedness, of a response capability, and of the balance required between spending and restraint in spending is properly struck at the figure which the committee had adopted.

Mr. NICKLES. Mr. President, I support my good friend and colleague (Mr. McCLURE) in opposing the amendment that I know the Senator from New Jersey offered in all sincerity. We have worked with the Senator from New Jersey on this issue for the last couple of years. He repeatedly has shown his desire and support for the strategic petroleum reserve. However, I think we have some other considerations that need to be taken in mind in light of this amendment.

First and foremost, is the effect this would have on the budget. We are talking about $1.4 billion that will be added on, that will be money spent regardless of whether it is on budget or off budget. Either way it is going to have the exact same effect. We are looking at budget deficits this year of over $200 billion. This bill that we are looking at today, if my figures are correct, I think is already $929 million over the budget estimate for 1984. So it is almost a billion dollars over. If we are going to add another $1.4 billion, I think this bill would certainly be veto bait. I do not really plan on voting for it in the first place, with its being $929 million over the original budget estimate.

I was also pleased during discussion of this amendment to hear some Senators stand up and make strong statements for energy independence and for a need to have a strong energy policy to protect us against a possible energy embargo. However, I have a hard time reconciling that with the vote that occurred earlier, which calls for a moratorium on coal leasing. If we want to insure our independence from OPEC, we should be trying, as much as possible, to increase the production of domestic energy resources, certainly including coal, which would decrease the demand for oil.

I think this is one argument which could be made and should be made that I have not heard my colleagues address. Again and again, we have heard "yes, we need to increase the size of the SPR." I think Senator McCLURE was exactly correct when he said whether we are talking about 145,000 barrels per day or 220,000 barrels per day, those two particular numbers are not that significant; the significant point is that we are talking about dollar—cash—outlays that will affect the budget this year and will aggravate a very, very serious problem that I think we are all wrestling with. We do need economic recovery. If we continue to spend money we do not have, we are going to be further postponing and aggravating the recovery that we all want to see.

One thing more: in the oil industry particularly, I think there is a tendency, as the stockpile of SPR increases, it is also recognized that it somewhat diminishes the likelihood for increased stockpile held in the private sector. I think our colleagues should be aware of that. It is an argument that can be made quite forcefully and probably quite correctly. I personally have some questions about the need for SPR in the first place.

I compliment Senator McCLURE for his effort in working this out with the administration. I think they have come up with a workable solution, one that makes it unnecessary to adopt the Bradley amendment and add this additional $1.4 billion.

● Mr. DURENBERGER. Mr. President, I rise to speak in favor of the amendment by the Senator from New Jersey. It is clear to me that the strategic petroleum reserve is the one thing standing between this Nation and economic disaster should we ever suffer a severe and sustained loss of our oil supplies from the Mideast. We need to keep the SPR fill rate at 220,000 barrels a day.

On yesterday I had the opportunity to read an interesting article in the Washington Post on a recent simulation conducted by the Department of Energy on the effects of an oil emergency. I shall include that article for the RECORD.

The article notes that under the conditions expected, the price of oil would rise to $98 a barrel, that farmers would be forced to abandon their crops in the field, that elderly Americans by the tens of thousands would once again face the "heat or eat" decision, and that several State agencies who participated in the exercise were frightened by the impacts projected.

But the most frightening aspect of the whole article was a single sentence, a quotation attributed to the Assistant Secretary for Emergency Preparedness at DOE. He said, and I quote:

> This is a significant achievement and reaffirms the validity of President Reagan's market-based approach to energy emergency preparedness.

If the time ever comes when the American public thinks $98 a barrel oil a significant achievement, this Senator will be greatly surprised. If the article is accurate, the Assistant Secretary was apparently alone in his optimism.

Some of us have been fighting this mentality for a long time now. Many longer than I. One Member, recently taken from us, had the foresight many years ago to start an insurance policy for the Nation, the strategic petroleum reserve. Although I hope the day never comes, in the end the petroleum reserve and our continuing efforts to get it filled may be Scoop Jackson's most important contribution to the security of his Nation.

The one thing we have not been able to accomplish, however, is to decide how the SPR oil should be used. We have spend more than $8 billion filling the salt caverns, we are more than one-third of the way toward the goal of protection against even the worst disruption, but should an emergency occur tomorrow there would be no consensus how to put that oil to use. How much do we draw down? How soon? Who has access? How can the oil be used?

One possibility—one steadfastly endorsed by this administration—is to sell the oil to the highest bidder. I am not for that policy. It has many flaws. How would the American public react, if the oil was shipped to foreign nations to meet their shortages? What would be the response, if the buyers made substantial profits in resale or stored the oil in their own facilities until the price went higher?

I have always believed that any strategy for drawing down the reserve must contemplate early use to avoid economic disruption, must look first to

the needs of the American economy, and must assure that the oil is used to keep essential industries and services in operation. In time of economic calamity, I do not want people taking cross-country vacations in RV's simply because they can afford to when a farmer cannot afford to bring in his crop or a senior citizen heat his home.

These considerations prompted me to author the Petroleum Disruption Management Act in 1981. I was joined by Senator ANDREWS and other colleagues from the Midwest in that effort. I though it was a good bill, a well-balanced bill. And some of the notions in that legislation eventually made it to the President's desk after passing the Congress by substantial majorities.

The President vetoed that standby oil bill for reasons that I suspect are very similar to those expressed by Mr. Vaughn. Some in this administration consider $98 per barrel oil an achievement.

I must say that Senator MCCLURE has persisted in his efforts to get a balanced drawdown policy in place before the next emergency. His efforts do the country a great service. I want to be helpful in those efforts. But I also want to send a message to those assistant secretaries at DOE who have never beeen able to come to grips with the disruption, suffering and loss that an oil crisis produces.

I hope in the next few weeks to have more to say on this subject. I may offer a new bill, drafted along the lines of the Petroleum Disruption Management Act to reflect the views of this Senator and others from the Midwest region. But, today I have to say I know how they think down at DOE—the plans they make for our future. And with many who participated in the recent exercise, I must say that I am horrified at the prospect and convinced that the Senate has an obligation to continue our commitment to filling the SPR.

The article follows:

OIL-CRISIS TEST YIELDS "ECONOMIC DISASTER"

(By Milton R. Benjamin)

In the most realistic test of how the U.S. government would deal with a new world oil crisis, the Reagan administation's free-market approach turned an oil shortage into a national "economic disaster," according to reports by 10 states that participated.

The type of crisis postulated in the two-month test, coordinated by the International Energy Agency, was very similar to what could occur, government and industry analysts said, if further escalation of the Iran-Iraq war cuts the flow of Persian Gulf oil.

"The threat of such a thing happening is very serious. And I'm not talking about six months from now, I'm talking about six weeks," said James Akins, a Middle East expert and former ambassador to Saudi Arabia, who forecast the 1973 Arab oil embargo.

Since completion of the test June 17, The Washington Post has obtained internal government documents, evaluations by the 10 states that participated and three IEA reports providing the most detailed look to date of how the Reagan administration would deal with a new oil crisis and what the impact would be on the United States.

In the exercise, which hypothesized a partial blockage of oil exported from the Persian Gulf, the Reagan administration took no regulatory action and let the price of crude oil, now $28.63 a barrel, rocket to $98.

This huge increase, which sent the retail price of gasoline and home heating oil soaring to more than $3 and $4 a gallon in some parts of the United States, had the effect of lowering consumption in this country by 18 percent.

The administration contended that the test thus proved that letting the free market determine the price of oil in a crisis would reduce consumer demand sufficiently to eliminate the need for government regulation to restrain prices and consumption or allocate supplies.

"This is a significant achievement and reaffirms the validity of President Reagan's market-based approach to energy emergency preparedness," Assistant Energy Secretary William A. Vaughn declared following completion of the exercise.

But strong disagreement came from states participating in the test, which surveyed widespread business and industrial shutdowns, bankruptcies, massive unemployment, commuters unable to afford gasoline, farmers abandoning their crops and low-income and elderly residents without heat or electricity.

"The administration's refusal to deviate from its allocation-by-price scenario transformed the petroleum crisis into an economic disaster in which petroleum supplies were adequate for those who could afford them," the Vermont State Energy Office said in a post-mortem.

Florida Gov. Robert Graham's Energy Office, criticizing the administration's "general disregard for the enormous and social costs" of its approach, urged that "the federal government's policy of total reliance on the uncontrolled market be reconsidered."

The 20 other nations belonging to the IEA, formed at U.S. urging in 1974 to coordinate efforts of the industrialized world to minimize the impact of future oil emergencies, also were highly critical of the Reagan administration's decision to let the price of oil soar.

"The whole idea behind the IEA is to keep emergencies from resulting in vastly higher oil prices," a Dutch official said. "that can't work if the other 20 countries are trying to restrain demand and hold down prices and the United States allows the price to go through the ceiling."

THE TEST

The IEA's emergency system depends on the willingness of its members—the major European industrial nations plus the United States, Japan, Canada, Australia and New Zealand—to share the pain equally in a major world oil disruption.

If forecasted oil supplies fall short of historical use by more than 12 percent, each member country is required to cut domestic consumption by 10 percent. the IEA then activates a sharing system to ensure that available supplies are distributed equally among members.

To test the system, the IEA periodically notifies members that a hypothetical disruption has taken place. Members then devise a new supply plan based on the amount of oil available, and the IEA calculates which nations should share oil.

The countries and their member oil companies then hypothetically redirect oil supplies to mitigate the crisis.

This test, the fourth since the agency's creation, was to be particularly significant. For the first time, the IEA planned to include the element of price.

But at an IEA Governing Board meeting last Oct. 28, the United States suddenly announced that it opposed any consideration of pricing.

A major reason for the switch, Energy Department official Romulo L. Diaz Jr. explained in a subsequent memorandum, was "concern that a simulated world price would erode support in the Congress for the president's market approach to energy emergencies."

While the other IEA members, according to State Department memos, strongly opposed the switch, the United States, as the most important member of the agency, prevailed. No price information would be generated as part of the test.

Hence, the other countries "expressed shock when, in its first official communication in the test, the Energy Department announced that by its calculations, world oil prices would increase to $98 per barrel in the month following the hypothesized oil supply interruption," Deputy Assistant Secretary of State E. Allan Wendt reported in a memo June 3.

THE FREE MARKET

In addition to the U.S. government, 19 major American oil companies belong to the IEA.

Under a special antitrust exemption, they provide information on world oil supplies and movements to the IEA secretariat. In a crisis, the IEA would rely to a great extent on member oil companies to make the sharing system work.

Each country asks its oil companies to "volunteer" as much oil as can be spared to meet that country's sharing obligations.

Most oil companies have indicated since formation of the IEA, however, that they would not volunteer to divert supplies to other countries—at the risk of not having enough for regular customers—unless guaranteed that all oil companies would be equally disadvantaged.

To achieve this, most member countries established so-called "fair sharing" programs. Until 1981, the United States accomplished this under the domestic crude oil allocation system.

In early 1981, however, the Reagan administration abolished oil allocation and price controls. The oil industry, while generally welcoming deregulation, nevertheless noted that a standby fair-sharing system was needed. The industry also reiterated that it would not volunteer to share oil in an emergency unless such a system was in place.

The Energy Department, however, has not established such an emergency program and did not use the fair-sharing system in the test.

Instead, to meet the U.S. obligation to provide 22 million barrels of oil to other IEA nations, the administration relied heavily for the first time on voluntary pledges from independent oil companies and large industrial users, including U.S. Steel, Monsanto Co., Union Carbide, Burlington Industries, Inc., and Corning Glass Works.

In the opinion of several government officials, the appeal to many of these companies to volunteer oil was blatantly political.

Deputy Assistant Energy Secretary Ronald L. Winkler, in a memo April 29 seeking help from outside companies, said: "If we cannot demonstrate that the free market and voluntary programs work, even during this simulation, that will be turned against us up on the Hill."

Vaughn, in a letter to General Motors Corp. Chairman Roger B. Smith urging him to aid this "important test for the Reagan administration's market-based energy programs," said:

"Your company's participation in making simulated voluntary offers would greatly assist in demonstrating that mandatory and intrusive government regulatory programs are not needed to respond to energy emergency situations and that cooperative and voluntary programs will, indeed, do the job."

Smith, whose company volunteered to surrender some of its oil during this mock emergency, later wrote Energy Secretary Donald P. Hodel declaring: "The success of the test reaffirms our belief that President Reagan's market-based approach is the best way to deal with the issue of emergency preparedness."

While non-IEA member companies volunteered to provide 35.8 million barrels of oil, letting the United States comfortably exceed its sharing commitment, many industry and IEA observers expressed doubt that this oil would be available in a real emergency.

"Oil company representatives participating in the allocation system in Paris found many of these offers dubious," the State Department's Wendt said in the June 3 memo. "Oil was reported in locations where no oil facilities exist, or in vessels too large to enter the specified port or in quantities greater than the United States normally imports.

"In response to IEA questions, DOE acknowledged that, in the press of tight deadlines, they had 'made up' details relating to some of these offers," Wendt added.

"Even as they were playing the game, the Reagan administration manipulated the statistics and tried to manipulate the behavior of the oil companies," Sen. Howard M. Metzenbaum (D-Ohio) charged. "The oil companies involved viewed the administration's role as nothing short of naked political coercion designed to justify their no-controls philosophy."

THE STATES

U.S. allies' concern about how the administration's approach would affect them in a new oil crisis was at least matched by the 10 participating states.

Despite the administration's insistence through most of the test that free-market allocation would move petroleum products to where they are most needed, New York and California each reported a fuel oil shortage on the East Coast and a glut in the West.

Maine's Office of Energy Resources complained that during the test "no administration spokesman confronted the real crisis; the hardship created by the huge increase in oil prices."

"The tourist industry faces a bleak summer. . . . Many schools, hospitals and mills have suffered. Coal prices have also skyrocketed due, we suspect, to hoarding," Maine reported.

"Our utilities have also been hard hit . . . and are seeking emergency rate hikes. We are hearing from many consumers who cannot afford to heat their homes and/or hot water and commute to work," Maine added.

"The impact of the disruption and high energy prices on the low-income group would be devastating," Florida said.

All of the states echoed Wisconsin's complaint that the federal government "had abdicated its responsibilities for formulating a comprehensive economic response package."

In its final hypothetical message to the White House, the Wisconsin Division of State Energy said: "Although Milwaukee's situation is severe, there are several other major U.S. cities in worse shape.

"We hope it will not take the economic collapse of one of these cities, probably ensuing riots and accompanying destruction and death, before the administration realizes that its policies have failed the country and must be changed."

Nor was the hypothetical crisis in the IEA exercise the most severe oil shock possible.

A Congressional Research Service study released yesterday examined two other Persian Gulf disruption scenarios and concluded that they could produce a catastrophic drop in the U.S. Gross National Product of as much as 28 percent.

"Looking at the IEA test results, looking at the comments from our allies, from the oil companies themselves and from the states, the Reagan administration's approach clearly does not pass the test," said Rep. Mike Synar (D-Okla.), whose House Government Operations subcommittee is to open hearings Thursday on U.S. Preparedness for oil emergencies.

"I believe in the free market, but I am a pragmatist," he said. "Reality dictates that something more than the free market is going to be necessary in a crisis."●

● Mr. D'AMATO. Mr. President, today I shall vote for an amendment offered by my distinguished colleague from New Jersey, (Senator BRADLEY), to add funds to the Interior appropriations measure to more swiftly fill the strategic petroleum reserve. I take this action in spite of the large cost because I believe that one of the major sources of concern and trouble for this great country remains the precarious state of dependence on OPEC in which we find ourselves.

Since I came to the Senate in 1981, I have been a consistent supporter of many different initiatives designed to lessen our dependence on unsure sources of energy. Among the foremost methods for achieving this goal is the strategic petroleum reserve. Only by aggressively developing alternative sources of energy can we hope to be freed of the shackles in which the OPEC countries would have us bound. It is imperative, however, that we realize that the day when America will be truly free of the constraints imposed by foreign countries that control our energy supplies has not yet arrived. Therefore, we must remain vigilant in our pursuit of sufficient petroleum stocks to fuel our industrial machine.

I am proud to vote for the Bradley amendment. It is vital that we not allow temporary fiscal constraints to cloud our vision of our strategic interests.●

● Mr. HEINZ. Mr. President, I rise today in support of the amendment offered by my distinguished colleague Senator BRADLEY.

What this amendment is about is the recognition that one of the soundest ways to protect the national security interests of the United States is to insure that this Nation and its allies have at their disposal enough oil in storage to meet the military and diplomatic contingencies which may arise from an oil supply disruption. In short, the best defense policy is an aggressive strategic petroleum reserve acquisition policy.

Mr. President, the Bradley amendment is simply a reaffirmation of law already enacted by the Congress—the Energy Emergency Preparedness Act of 1982, Public Law 97-229.

The law directed the President to fill the strategic petroleum reserve at a rate of 300,000 barrels per day unless he made a finding that such a fill rate would not be in the national security interest of the United States. In such a case the minimum fill rate would be 220,000 barrels per day.

The law specifically states that the minimum fill rate which is acceptable is 220,000 barrels per day.

Before the Senate is appropriations legislation which proposes a fill rate of 145,000 barrels per day—a level clearly contrary to public law. A level which will ignore the very real relationship which exists between national security interests of this Nation and an effective, aggressive program of emergency preparedness.

We are asked in effect to make a good faith agreement with the administration whose original proposed fill rates would have if implemented had the following effect.

First, the administration's program would give our Government no capability to purchase oil on the spot market in fiscal year 1984 to take advantage of favorable oil prices and in effect leave this Nation with some 17 million barrels in unused storage capacity during fiscal year 1984 alone.

Second, it would result by the end of 1986 in 54 million barrels of total unused storage capacity.

Third, it would delay the achievement of 500 million barrel fill level for SPR by more than 2 years and the achievement of a 750 million barrel level by between 3 and 6 years, depending on fill rate assumption.

Finally, according to the General Accounting Office, "If rising oil prices are assumed—the administration's proposed schedule results in the highest total expenditures of all oil rate options available."

Mr. President, we are being asked to accept legislation today in which the administration has promised to in-

crease its fill rate in the outyears from 100,000 barrels to 145,000 barrels per day in return for the promise to take actions to enhance this Nation's energy emergency preparedness which the administration should be taking anyway.

In effect we are being asked to undermine current law and not receive much in return—not much of a deal from this Senator's perspective.

I would ask my distinguished colleagues to think about what has so changed in the international environment to lead us to believe that this Nation is somehow less vulnerable to an oil supply disruption.

Has the war in Lebanon, the Iran-Iraq war, Lybian aggression against Chad, or terrorist activities given any of us a greater sense of security in this regard?

In a recent study conducted by the Congressional Research Service on the impact on seven major industrial countries—United States, Canada, France, West Germany, Italy, Japan, and the United Kingdom—of the elimination of all tanker service through the Strait of Hormuz the following was found:

In 1980 the seven countries in the aggregate would have experienced a shortage of 7.1 to 7.7 million barrels per day, or 20 to 25 percent of their oil requirements. Crude oil prices would have escalated from the base period price of thirty dollars to at least 90 and perhaps as much as $300. Production of all goods and services would have fallen between 12 and 27 percent for the seven countries combined. Employment would have dropped by 15-30 percent. In sum the major industrialized nations would have suffered a dramatic economic decline.

Though these dramatic results would have been somewhat modified had the oil disruption occurred in 1982 the study makes it clear that the same dramatic results could again manifest themselves in the future.

If Western nations react to the currently more favorable situation by relaxing efforts to conserve energy, encourage development of alternative energy sources and build petroleum reserves, the future could find the West once again vulnerable to the effects of a disruption of Persian Gulf oil supplies.

In the short term the United States could suffer economically from a Persian oil disruption in the same approximate range as would our allies in Western Europe and Japan.

With regard to the value of a strategic petroleum reserve the study is very explicit, it states:

Building the public and private strategic petroleum reserves of Western oil importing countries beyond current objectives and careful management of those reserves in a time of crisis could enable the United States and its allies to ride out a disruption for a considerable period of time. Reserves also have important deterrence value in enhancing the perception that the Western industrialized nations are less vulnerable to the effects of petroleum disruptions.

Finally, it has been estimated that the cost of establishing a rapid deployment force—and an integrated Southwest Asian command is on the order of $40 billion.

We continue to justify the need for higher personnel the readiness and procurement dollars specifically the procurement of a 600-ship navy, and air and sea lift capability on the basis of our need to protect our strategic interests in the Middle East.

Well its high time the American taxpayer received the benefit of some very basic cost comparisons—$1 billion spent today to enhance our SPR fill rate may not only save this Nation billions in unnecessary military expenditures but will insure that the equipment and personnel we do invest in, have the time needed to accomplish their missions. I urge my colleagues to support the Bradly amendment. It is a vote for commonsense.●

Mr. BRADLEY. Mr. President, I am prepared to vote in just a few minutes if the distinguished chairman is prepared. First let me say to my distinguished chairman, as I heard him make his case, I do not really think his heart was in it.

I recall all the battles we fought. Just last May, for example, when Senator DOMENICI came on the floor and offered an amendment that would have indeed cut the fill rate of the strategic petroleum reserve to around 200,000, he was there to support a 300,000-barrel fill rate. I think that is the way it has always been with this issue, whether it was back in 1979, when Senator DOLE and I stood and forced the Carter administration to fill, or whether it was in the early phases of this administration when the distinguished chairman and I pushed a 220,000- and a 300,000-barrel fill rate.

It has always been done in a bipartisan way, and that is the way it is being done today. It is being done in a way that says it is the Congress that continually has to define our national security in terms broad enough to actually insure our total national security.

It has always been the Congress, from 1973 when the late Senator Jackson put the SPR amendment in for the first time until today, that has insisted we give ourselves that economic cushion in the strategic petroleum reserve.

As to the chairman's argument about the trade off of a couple hundred million dollars versus 9 days, he said, of additional oil, we really do not know if it is 9 days. That depends on what our import levels are at the time of the disruption. It depends on the size of the disruption. It depends on how long the disruption is going to last. So what we are talking about could be significantly more than 9 days of oil.

I appreciate how hard he has negotiated from that position of support for 300,000 barrels a day that he has consistently advocated since taking over the chairmanship, but I really do not think that we have gotten as much as all of us would like to have gotten for an agreement to fill at 145,000 barrels a day.

Keep in mind the commitment is that there will be a fill of 145,000 barrels a day until you reach 750 million barrels. Well, in 1982, the commitment was fill 220,000 barrels a day until you reach 750 million barrels. So one wonders about the nature of the commitment, not on the part of the distinguished Senator from Idaho but on what is going to translate actually into barrels of oil going into the reserve.

Mr. President, if the Middle East were not so troubled these days, I might buy the argument that 145,000 to 750,000 might be a good enough thing to take. If the Soviet Union was not tightening the noose around the Persian Gulf from the Yemens to Syria to Abidjan to Afghanistan, if the Iranians were not preparing to bomb the pipeline out of Iraq, and if the Iraqis did not have Exocet missiles targeted on Iranian oil facilities, I might be prepared to buy the compromise. If the distinguished former Ambassador to Saudi Arabia did not say anyone is naive who believed there would not be another oil supply disruption in the near term, I might buy the compromise.

But with all that geopolitics aside, if Congress had not spoken on this issue very clearly several times, I might buy the compromise.

That is what this comes down to. It comes down to a question of bipartisan congressional will as to whether we are willing to assert the longer term general interests over the shorter term interests.

I would argue that this is the time to send that message very clearly, because as we look at the problems around our world that message would be more reassuring at no other time.

So I hope my colleagues will join me in support of this amendment, and I am prepared to vote.

Mr. Levin addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. LEVIN. Mr. President, we have heard a lot of figures bandied about, and I am wondering whether or not my friend from Idaho would confirm one figure that I have used which I think is a critical figure. I happen to agree with him. There is a lot of judgment and a lot of subjectivity involved, and we all have to reach our conclusion as to what tradeoffs we will make to fill up this reserve at what rate and how significant it is we achieve independence by what year.

I would like to confirm one figure that I have used with the Senator from Idaho, and that is that the

present average 1983 fill rate, fiscal 1983 fill rate is 220,000 barrels a day.

Mr. McCLURE. The Senator is correct.

Mr. LEVIN. I thank my friend.

Mr. McCLURE. I would also add just one other fact, and that is that the budget submission to us calls for a fill rate during this year, under existing law, of 220,000 barrels a day; by 1984, 145,000 barrels a day, and each year thereafter 100,000 barrels a day. While we are changing downward from current levels, we have a commitment to change upward on future levels.

Mr. LEVIN. That was part of the budget submission itself?

Mr. McCLURE. The Senator is correct.

Mr. LEVIN. The current rate is 220,000.

I thank the Senator.

Mr. BRADLEY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I rise in opposition to the amendment offered by the Senator from New Jersey. The Senator from Kansas has long supported rapid filling of the strategic petroleum reserve. On several occasions during the last administration I stood side by side with the Senator from New Jersey as we attempted to force that administration to live up to the congressional mandate to fill the strategic petroleum reserve. But, despite my support for the Senator's objectives, given the realities of our current budget situation, I must oppose the amendment.

For this fiscal year we are looking at a deficit in the neighborhood of $200 to $210 billion and the estimates for fiscal 1984 do not look much better. In that environment it seems to me we should require extraordinary circumstances to justify the expenditure, be it on or off budget, of an additional $1.3 billion.

Mr. President, this Senator does not believe that extraordinary circumstances exist to justify this expenditure. Since the 1989 fill date target was set much has changed. Our mix of supply sources has changed. We are much less reliant on OPEC for imported crude oil, and consequently, less vulnerable. Additionally, we are importing less crude oil, which further reduces our vulnerability. While I remain firmly committed to completing the 750 million barrel reserve, it does not seem unreasonable to defer completion until fiscal year 1991. By the end of next year the SPR will contain some 411 million barrels and we have a commitment from this administration that the reserve will be completed, and completed in a manner which minimizes temporary storage costs.

The argument has been made that by purchasing at a higher rate now, while oil is as cheap as it will probably ever be, we actually minimize the total cost of the SPR. I am not convinced that argument holds up. If we accept this amendment, the Treasury will be forced into the market next year to borrow an additional $1.3 billion. The interest cost for that borrowing during the first year would in all likelihood exceed $100 million and that is just the first year. This Senator has no reason to believe that we are going to start reducing our accumulated national debt any time in the near future. So we will continue to make those interest payments on the extra $1.3 billion. If you factor in the interest expense of buying now, the price of oil has to go through the roof in the out years before this amendment can be justified on grounds of cost savings.

Additionally, Mr. President, I do not believe that overall cost savings is the proper way to assess this amendment. The distinguished Senator from New Jersey looks on this as a capital budgeting problem.

What we really face is a cash flow problem. Even if we are able to look back during the 1990's and realize we could have saved a few million dollars if we had bought more oil during 1984, the fact will remain that we did not have the money during 1984 to do that. That to buy in 1984 we were forced to borrow more, run up the deficit and threaten recovery. To me that is the way this problem should be analyzed.

Mr. President, much has been made of the fact that SPR expenditures are really national security expenditures. I agree. But I am not sure what that proves. This Senator believes we should have a strong defense and be willing to pay for it. But, that does not mean we give the Pentagon a blank check. Their budget can be trimmed like all the others. Similarly, I believe we should have a strategic petroleum reserve. But not at the expense of another billion or so dollars tacked on to an already enormous deficit. We simply cannot justify every imaginable expenditure on grounds of national security and expect to ever put our fiscal house in order.

For these reasons, Mr. President, I oppose the amendment. The Senator's objectives are admirable. It is unfortunate that we cannot accommodate them.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from New Jersey. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER) and the Senator from South Carolina (Mr. THURMOND) are necessarily absent.

I further announce that, if present and voting, the Senator from South Carolina (Mr. THURMOND) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Hawaii (Mr. INOUYE) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 54, nays 43, as follows:

[Rollcall Vote No. 255 Leg.]

YEAS—54

Andrews	Durenberger	Melcher
Baucus	Eagleton	Metzenbaum
Bentsen	Exon	Mitchell
Biden	Ford	Moynihan
Bingaman	Glenn	Nunn
Boren	Hart	Packwood
Bradley	Heflin	Pell
Bumpers	Heinz	Pryor
Burdick	Hollings	Randolph
Byrd	Huddleston	Riegle
Chafee	Johnston	Rudman
Chiles	Kennedy	Sarbanes
Cohen	Lautenberg	Sasser
Cranston	Leahy	Specter
D'Amato	Levin	Stennis
Danforth	Long	Tsongas
DeConcini	Mathias	Weicker
Dodd	Matsunaga	Zorinsky

NAYS—43

Abdnor	Hatfield	Pressler
Armstrong	Hawkins	Proxmire
Boschwitz	Hecht	Quayle
Cochran	Helms	Roth
Denton	Humphrey	Simpson
Dixon	Jepsen	Stafford
Dole	Kassebaum	Stevens
Domenici	Kasten	Symms
East	Laxalt	Tower
Evans	Lugar	Trible
Garn	Mattingly	Wallop
Goldwater	McClure	Warner
Gorton	Murkowski	Wilson
Grassley	Nickles	
Hatch	Percy	

NOT VOTING—3

Baker	Inouye	Thurmond

So the amendment (No. 2166) was agreed to.

Mr. JOHNSTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Senator TSONGAS addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, before yielding to the Senator, may I ask this question, because a number of Senators have suggested that they have some concern about how late we are going to go tonight. Let me say now that I know of only one matter that may require a vote. Senator TSONGAS has an amendment which I think we are in a position now to agree upon.

There are a number of others who have amendments that will not require a vote but will require just a little bit of time to get them done in the RECORD.

Senator DOMENICI has an amendment which I understand the distinguished Senator from Montana has some exception to and may require a vote on a procedural matter with respect to that amendment.

The remainder of them, aside from final passage, I do not believe will require any vote at all.

I ask our distinguished colleague, the Senator from Alaska, the acting majority leader, if he would have any objection, and I ask Senator BYRD, the minority leader, if it would be possible for us to take the Domenici amendment, do whatever we have to do with respect to the procedural or substantive vote with respect to that amendment, agree that all other amendments that we have listed now would be the only remaining amendments, and under those circumstances then to ask that the vote on final passage occur on tomorrow?

Mr. BYRD. I would have to run that on my hotline.

Mr. McCLURE. I understand.

Mr. BYRD. I will be glad to do it and get back.

Mr. McCLURE. It seems to me that we might in that manner allow the managers of the bill to work our way through remaining matters that have to be dealt with and the other Members would not have to be held here.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield.

Mr. STEVENS. Mr. President, it is my understanding, then, if we can run and we will run a hotline similarly, it would be the plan of the distinguished managers of the bill that we go through the Domenici amendment, which may require a vote, and then go to these other amendments which can be apparently accepted or worked out.

Mr. McCLURE. Without vote.

Mr. STEVENS. And carry the vote on final passage over until tomorrow. It would be sometime around noon, if we can work it out.

Mr. McCLURE. That would be my suggestion, and I am not making that as a unanimous-consent request at this time, but I think we could list then the amendments that we know of that we think we can work out and we could accommodate all Members in that fashion.

Mr. STEVENS. It is our desire to finish all amendments tonight.

Mr. McCLURE. It is.

Mr. STEVENS. So the only thing that would take place tomorrow would be final passage.

Mr. McCLURE. The Senator is correct.

Mr. STEVENS. There would be no debate or further amendments.

Mr. McCLURE. The Senator is correct.

Mr. BYRD. I have to clear through my cloakroom line two things: One, that there would be no additional amendments tomorrow; further, that there would be a vote which would occur at, say, 12 noon?

Mr. McCLURE. That would be fine with me.

Mr. JOHNSTON. Mr. President, if I may ask the distinguished chairman of the committee, does he have confidence that there is nothing that requires a vote other than the Domenici amendment?

Mr. STEVENS. That is why we are running the hotlines. We will be able to answer that in a few minutes.

Mr. JOHNSTON. I had an indication from the Senator from Ohio that he may require a vote on the slant-hole drilling.

Mr. METZENBAUM. It is my understanding that Senator DECONCINI indicated some concern about that amendment and would take a position in opposition to it. I indicated that if he did not, I very well may.

I also want to make it clear that Senator HATFIELD and I are still in some discussions with respect to the matter concerning the postponement of the timber leases which the administration seems to want to take on.

I do not know whether or not this procedure the Senator is talking about would work out. I would like to find out from Senator DECONCINI, and I will do that on my own, as to where he stands on that particular subject. I do not see him on the floor and I do not know whether he has a position.

In connection with the Domenici amendment, it is not impossible that that would require two votes.

Mr. FORD. We have a procedural vote which may occur.

Mr. McCLURE. There could be two votes, one on a procedural question and the other on the substance of the amendment.

With respect to the slant-hole drilling, the staff has informed me that Senator DECONCINI is still discussing that at the staff level. I think that can be worked out. I would be happy to discuss that with the Senator from Ohio.

Mr. METZENBAUM. Has the amendment with respect to the carbon process funding been accepted?

Mr. McCLURE. It has not been accepted.

Mr. METZENBAUM. I believe the Senator from Idaho and I are to engage in a colloquy as well with reference to another matter.

Mr. McCLURE. With respect to the Great Plains project?

Mr. METZENBAUM. Yes.

Mr. McCLURE. The Senator is correct.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, I wish to advise the managers of the bill that I am prepared to send an amendment forward which is a technical amendment to an amendment agreed to yesterday. The proponent of the amendment was the Senator from North Carolina. Since it is in the nature of a technical amendment, I would hope that the amendment would be acceptable. It would not take more than a minute.

Mr. METZENBAUM. Would the Senator from Virginia enlighten us as to what the amendment is?

Mr. TSONGAS. Will the Senator yield?

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Virginia still has the floor.

Mr. WARNER. The amendment of the Senator from North Carolina enables a certain number of North Carolina residents to transit Backbay Wildlife Refuge in Virginia if necessary to maintain their livelihood and in certain other very limited circumstances. At the time the amendment was put forward, there was no indication of the number of persons who might be affected.

Upon closer review of the amendment by myself, the Governor of my State, Mr. Robb, and environmental advocates, it is desirable to cap the number of individuals at a figure not to exceed 25.

Mr. METZENBAUM. I thank the Senator from Virginia. I see no problems with that.

Mr. WARNER. I thank my colleague from Ohio.

AMENDMENT NO. 2167

(Purpose: To restore certain energy conservation programs to fiscal year 1983 levels.)

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I believe we have worked out an accommodation on my amendment.

I am offering an amendment to the Interior appropriations bill to add $27.2 million to the energy conservation subfunction. The purpose of the amendment is to restore funding for certain energy conservation programs closer to the fiscal year 1983 levels. The funds added by the amendments would be broken down as follows: $11.5 million for the schools and hospital programs——

The PRESIDING OFFICER. Would the Senator send his amendment to the desk?

Mr. TSONGAS. Let me read this and then I will send the amendment forward: $3.8 million for buildings and community systems; $4.5 million for the energy policy and conservation grants; $5 million for the Energy Extension Services, and $2.4 million for multisector.

These additions would bring these programs half way to last year's funding levels. Without these additions,

these programs would be 41 percent below last year's level. With this amendment they will still be 20 percent lower.

This amendment would not "bust the budget." The Interior appropriations bill would still be approximately $1 billion below the levels allocated in the first concurrent budget resolution for 1984. It would also be $661 million below the Appropriations Committee's own allocation for Interior. The conservation budget would also still be over $105 million below the assumption for energy conservation contained in the budget resolution.

This amendment would permit all existing programs to continue at levels closer to current level of effort and avoid eliminating any existing program elements.

I would like to describe the areas to which funds would be restored under this amendment:

Schools and hospitals program provides matching grants for conservation activities to schools and hospitals. It provides financial assistance to overcome unique barriers to energy conservation that exists in the nonprofit sector. During the life of this program, thousands of schools and hospitals have benefited from the implementation of energy savings measures. This program was funded at $150 million in fiscal year 1981. Last year in fiscal year 1983 it was only $48 million—excluding jobs bill money. The Interior appropriations bill includes only $25 million. This amendment would raise it to $36.5 million for fiscal year 1984.

Buildings and community systems support a range of research and development programs aimed at increasing the energy efficiency of the building sector. DOE's Energy Research Advisory Board has found that the building industry is one of the most fragmented sectors of the economy and thus has no focus for an industrial research program. A strong and steady program emphasizing basic and applied research and measures to encourage the transfer of such results to the private sector is an important priority.

In fiscal year 1981, this program was funded at $91 million. In fiscal year 1983, it was only $39.1 million. This Interior appropriation bill provides only $31.5 million. This amendment would add $3.8 million in order to maintain almost current general level of effort and avoid eliminating any existing program elements.

This increase would provide continued support for: research in indoor air quality; building performance prediction, monitoring and modeling; developing a data base on energy performance of buildings and appliances; monitoring voluntary compliance of building energy performance standards; research into institutional factors that influence energy consumption and adoption of efficient techniques; monitoring, evaluation, and technical assistance to States in providing residential, commercial, and multifamily audit services; research into urban waste, including efforts to develop, demonstrate, and disseminate technology and information on new separation, preparation, and conversion techniques; and technical assistance to communities in developing and implementing district heating projects.

In addition to supporting the excellent work of the Lawrence Berkely Laboratory at Princeton, I would hope that the Department could extend its support to other collaborative efforts involving industry participation such as the National Institute of Building Sciences and MIT's joint program for energy efficient buildings and systems.

Energy policy and conservation grants provide support to State energy offices for a range of energy conservation activities. These activities have resulted in significant energy savings through programs that reflect the unique energy problems and resources at the State level. State energy grants were funded at $48 million in fiscal year 1981 and $24 million in fiscal year 1983. The Interior appropriations bill would cut this to $15 million in fiscal year 1984. This amendment would bring the program up to $19.5 million.

Energy extension service funds support State outreach programs for public institutions, small businesses, and individuals. This has been a very successful program that DOE reports to have leveraged $16 of private investment for every Federal dollar spent. In fiscal year 1981, this program was funded at $25 million. In fiscal year 1983, it was at $10 million. In the Interior appropriations bill, the program is eliminated. This amendment would restore $5 million to keep the program going.

Multisector programs consist of the energy conversion technology program, inventors program, and the National Appropriate Technology Assistance Service.

The energy conversion technology program supports basic and applied research on advanced concepts for energy efficiency in areas such as engine combustion, thermal science, materials, and lubrication. This program supports generic research to insure a strong technology base. In fiscal year 1983, it was funded at $9 million. The Interior appropriation provides only $6 million.

The inventors program provides evaluations of inventions submitted to the National Bureau of Standards and, through DOE, provides technical assistance and financial support for development and demonstration of inventions that receive a favorable review. Several studies have shown that a significant number of valuable ideas have come out of this program. It is one of the very few channels through which inventors can obtain an objective hearing. In fiscal year 1981, this program received $5.8 million. In fiscal year 1983, there was $2 million. In the Interior appropriations bill, there is $1.5 million for evaluations by NBS only. This amendment would provide funds to provide technical assistance and support to inventors that receive a favorable review. A modest program to help inventors develop a business plan or obtain venture capital would provide considerable help in transferring these inventions to the private sector.

The National Appropriate Technology Assistance Service (NATAS) is a follow on program to the appropriate technology grants program which provided thousands of grants to individuals and small businesses to develop and demonstrate small-scale renewable energy and energy conservation technologies. This program amply demonstrated the usefulness and reliability of several new technologies such as passive solar greenhouses, solar water heaters, methane gas production from animal wastes, and waste heat recovery. NATAS will focus on disseminating information and providing technical assistance to individuals and organizations interested in appropriate technologies.

This program was funded at $1.5 million in fiscal year 1983, but because of delays by DOE, a contractor to run the program will not be selected until September. The Interior appropriations bill provides only $100,000 because of the delay in starting the program. However, DOE has indicated that it will award the contract for 18 months. Thus, additional funds would be necessary to maintain the program's intended fiscal year 1983 level over a longer period.

This amendment would add $2.4 million to multisector and thus provide funds to maintain levels closer to current level of effort in the energy conversion technology program, provide technical assistance and support for inventors who receive favorable review, and provide additional support for the National Appropriate Technology Assistance Service to maintain activity over the length of the contract.

Mr. President, the programs supported by this amendment are not new untried proposals. They are proven programs with a long history of accomplishment and energy savings. This is true despite the fact that these programs have already been seriously eroded by repeated budget cuts. In fiscal year 1983, these five programs were just 40 percent of their fiscal year 1981 levels. The Interior appropriations bill would cut them to 24 percent of their fiscal year 1981 levels. By what logic have these invaluable programs been so drastically cut back? At the levels in this bill, several of

these programs would be eliminated and others would drop below levels at which a minimal program could be administered.

Energy conservation is still a critical national priority. We have already let our commitment to energy efficiency slip so significantly. I urge my colleagues not to let these programs fall any further.

In these times of large budget deficits, the Senate has accepted the principle of level funding for energy programs. This amendment would merely keep these programs at this year's level. When the energy crisis is revisited upon this country in the years ahead, we will be very glad that we did not let our commitment to energy conservation fade away, that we held the line and saved these critical programs.

I send the amendment to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts (Mr. TSONGAS), for himself, Mr. HEINZ, Mr. SARBANES, Mr. PELL, Mr. RIEGLE, Mr. GLENN, Mr. EAGLETON, Mr. DODD, Mr. PERCY, Mr. CRANSTON, Mr. MELCHER, Mr. DIXON, Mr. MATTINGLY, and Mr. BOSCHWITZ proposes an amendment numbered 2167.

On page 53, line 11, strike the number "$333,481,000" and insert "$360,681,000".

Mr. TSONGAS. Mr. President, these additions would bring these programs halfway to last year's funding levels. Without these additions the programs would be 41 percent below last year's level and with the amendment then would still be 20.6 percent lower.

I would say that my original amendment brought all of these programs up to last year's funding levels. In the spirit of accommodation, we have cut these numbers in half. The chairman has indicated that he would look favorably upon this and try to have these approved in conference.

Mr. McCLURE. Will the Senator yield for a comment?

Mr. TSONGAS. I yield.

Mr. McCLURE. The Senator has indeed discussed this matter with me and I am aware of both the substance of the requests contained in the amendment and the figures which the Senator has offered to the Senate in this amendment. The House figures are different. The matters will be in conference. It is my expectation when the conference has been completed that the original desires that the Senator has expressed are likely to be accommodated. It is certainly my intention in going to the conference to try to accommodate these figures in that manner.

Mr. TSONGAS. I thank the chairman. I ask unanimous consent that the groups in favor of the Tsongas-Heinz amendment be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

GROUPS IN FAVOR OF TSONGAS-HEINZ AMENDMENT

Energy Conservation Coalition.
Alliance To Save Energy.
Solar Lobby.
National Center for Appropriate Technology.
Federation of American Scientists.
National Governors Association.
U.S. Conference of Mayors.
National League of Cities.
National Association of Counties.
American Association of School Administrators.
American Hospital Association.
Higher Education Energy Task Force.
National Audubon Society.
Conservation Foundation.
Environmental Policy Center.
Environmental Defense Fund.
National Resources Defense Council.
League of Women Voters.
Citizen/Labor Energy Coalition.
Critical Mass Energy Project.
Baltimore Jobs in Energy Project.
United Methodist Church—Board of Church and Society.

Mr. TSONGAS. I yield to the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I rise today in support of the amendment offered by my distinguished colleague from Massachusetts, Senator TSONGAS.

It is a mistake to believe that this Nation no longer finds itself in an energy crisis. Though we have made progress toward achieving energy independence, that progress can be instantly wiped out by an unexpected act in the Middle East.

The question is: How can we seek to protect this Nation from the consequences of such a tragic event?

The answer: By maintaining a balanced energy policy.

Mr. President, that is what this amendment is all about—balance.

Without the $27.2 million Senator TSONGAS and I seek to add to the conservation budget, the programs in question will be funded at 41 percent below the fiscal year 1983 level and 76 percent below the fiscal year 1981 level.

Our objective is simply to keep these very important programs at their fiscal year 1983 levels—nothing more, nothing less.

This amendment supports programs that work—programs which have not only reduced our energy costs but also created jobs and most important have stimulated the emergence of a vibrant private sector to produce, market, and install successful conservation technologies.

The programs impacted by this amendment have a tremendous impact on State governments all across this Nation. A majority of States, according to the National Governor's Association receive 80 percent or more of the support from their State energy offices from Federal funds—Federal funds channeled through the State energy conservation program (SECP) account in the Federal conservation budget.

SECP has established the States as the major delivery mechanisms of energy conservation programs. It has resulted in the implementation of specially tailored energy conservation programs to meet the specific needs of States and localities. It has spawned the growth of industries sensitive to specific energy needs and the design of products to meet those needs.

It has been estimated that between 1976 and 1980 federally supported State energy conservation programs have produced cumulative energy savings worth $22 billion—30 times more than they cost.

From 1976 through 1981 the core State energy conservation programs have saved the Commonwealth of Pennsylvania 46,930,000 barrels of oil, resulting in $1.4 billion in energy savings.

A very important program, the energy extension service (EES) whose goal it is to bring the latest personalized renewable energy and conservation information and assistance to small energy users have been entirely deleted from the Interior appropriations bill.

EES participants in 10 pilot States surveyed have saved the equivalent of 6,400 barrels of oil per day. Beyond what they would have saved without the program and invested $59.9 million more in energy conservation measures than did comparable nonparticipants. The private sector invested approximately $16 for every 1 Federal dollar expended.

The cost to the program to participants achieving these additional energy savings averaged $8.50 per barrel of oil equivalent. Compared to the cost of buying a barrel of imported oil—approximately $30. The approach of the EES is clearly cost effective.

For the last year figures were available—1980—the EES program generated enough energy savings to equal 6.9 million barrels of oil equivalent.

Is there any possible reason to eliminate such highly leveraged Federal activities? Clearly not if we are attempting to become an energy independent nation.

The list of accomplishments does not end with the energy extension service.

The schools and hospital program which provides matching grants to institutions to encourage implementation of conservation measures has thus far through the award of over 22,000 technical assistance grants achieved 17.8 million barrels of oil equivalent. It is expected that these savings should be realized each year since they resulted from permanent capital improvements to buildings and equipment.

This program saves Federal dollars that otherwise would be spent on hospital energy costs through medicare

and medicaid reimbursements. The hospital energy bill paid by medicare and medicaid amounted to approximately $3.4 billion in 1982.

As a result of the fact that over 125,000 buildings in the program have received energy audits, State and local governments have saved dollars that would otherwise be spent on energy bills in public schools—the energy bill for public schools and colleages amounted to approximately $7.6 billion in 1982.

Despite the fact that this program has been cut by 68 percent from its fiscal year 1981 level, demand for the program remains strong. Many States have a huge backlog of applications that would be funded if Federal money were available. New York has $110 million worth of applications that meet funding criteria, Florida has a $81 million backlog, Pennsylvania a $35.7 million backlog, Massachusetts a $31 million backlog.

The list of accomplishments in program areas affected by this amendment is a long one. They include the following:

During the fiscal years 1978 to 1981, 42 district waste-to-energy technologies were investigated to find ways of improving economic, technical and environmental performance. Of the 25 feasibility studies initiated in fiscal 1978, 20 resulted in projects that are proceeding to construction. Through an investment of just over $7 million, more than $1 billion in private capital has been attracted to those projected which are expected to provide 15,000 barrels of oil equivalent.

Joint research and development with the private sector led to the development of prototype window systems which are 65 percent to 85 percent more energy efficient than existing ones. As a result the energy savings potential of "daylight" in office buildings was identified.

The energy related inventions program has evaluated over 10,000 energy savings inventions; 115 inventions have been awarded grants at a cost of approximately $3.8 million. A study by the Massachusetts Institute of Technology concluded that the inventions program provides one of the few funding channels through which inventors can receive an objective hearing.

Mr. President, these are just some examples of how Federal dollars have worked to erase the image that conservation is somehow to be equated with energy denial. On the contrary, the programs impacted by this amendment proves that placing a greater responsibility on State and local governments and the private sector has had a tremendous energy and economic impact on this Nation. This is no time to stifle the advances which have been made. I urge my colleagues to support the amendment which Senator TSONGAS and I offer today.

Mr. President, I commend the Senator from Massachusetts for having offered this amendment. I am privileged to be a cosponsor of it. I believe we have made great progress here, thanks to the chairman of the committee, Senator MCCLURE, in restoring approximately half of what we lost in the previous year.

I have listened very carefully to the comments about the conference. I understand his concern and his strategy.

I want to compliment him for understanding the need for a balanced energy policy. I appreciate my chairman's support of the Tsongas-Heinz amendment.

Mr. JOHNSTON. Mr. President, we support the amendment.

FAIRNESS FOR ENERGY CONSERVATION

Mr. DIXON. Mr. President, I rise as a cosponsor of the amendment from the Senator from Massachusetts (Mr. TSONGAS).

During the 1970's, Congress and the Nation wrestled with the appropriate response to the energy crisis. After much debate, legislation was passed that helped insure adequate supplies of crude oil, stabilized future natural gas supplies, promoted alternative energy sources, and encouraged conservation wherever possible.

Today there is movement to break that agreement and knock out energy conservation programs. Since entering the Senate in 1981, I have seen continued assaults on energy conservation programs. If we fail here today, then energy conservation programs will be cut 41 percent below last year's funding and 76 percent below fiscal year 1981.

What we are asking for today is fairness. Let us be fair to our national energy program. Let us be fair to the Nation. Let us be fair to American citizens.

This amendment will not bust the budget. If passed, this amendment will still be more than $100 million below the budget levels we set for ourselves in June. Energy conservation programs will not bankrupt the country. Instead conservation preserves it.

In my home State of Illinois, energy savings have been staggering. Illinois consumers have saved over $2.5 billion in energy costs since 1978. The savings have come in the form of energy audits done by the utilities and coordinated by the State Residential Conservation Service to help homeowners receive constructive advice on insulating their homes. The savings have been fostered by the State energy clearinghouse, which has provided 55,000 Illinoisans per year with conservation information to help businesses, industry, and homeowners. The savings have come in the form of the State community energy management planning assistance program, which has provided the communities of Evanston, Jacksonville, Peoria, and all of DuPage County with help in setting up local initiatives to combat rising energy bills. Without Federal assistance, these valuable programs will be discontinued.

Equally important, the State of Illinois, without this amendment, will be unable to carry out its statutory requirements under title II, part I of the National Energy Act of 1977.

Conservation programs are not run by and for the benefit of Federal agencies. Rather, the programs are run for the benefit of local communities and more importantly, for the consumer.

Conservation is the best alternative energy source currently available for the Midwest for several reasons. First, the energy savings are immediately realized by consumers who conserve our nonrenewable resources. Second, conservation can occur without rewriting the Natural Gas Policy Act, with the possibility of raising the cost to consumers. Third, it does not require the heavy capital investment cost that synthetic fuels need to become operational. Fourth, it allows a sensible Federal program to continue.

Who will be helped by this amendment? The answer is simple: schools, hospitals, homeowners, farmers, small businesses, industry, and churches are its benefactors.

Let us recognize, as past Congresses have, that our energy resources are precious and that conservation is the best recognized and most effective response.

Mr. SASSER. Mr. President, I rise in support of the Tsongas-Heinz amendment to the Interior appropriations bill. In this time of escalating energy prices, this amendment is vital to achieving energy efficiency. This amendment is not only timely, but it is crucial toward getting this Nation back to a level of energy responsibility.

Mr. President, over the last few months, indeed, over the last few years, Americans have been asked to tighten their energy belts. All too often, energy consumers throughout this Nation have been hit by a steady, unrelenting onslaught to their energy budgets.

Americans are sick and tired of these energy price hikes. The time has arrived such that Americans cannot afford their electric bills, they cannot afford their gas expenditures. Indeed, many Americans cannot afford the ordinary necessities of life.

The present administration, through its budget proposals, has demonstrated a callous indifference to the plight of the average American. The administration's fiscal year 1984 energy conservation budget slashed some $184 million from schools and hospitals, the energy extension service, State energy conservation programs, and building research programs alike.

Energy conservation, contrary to the administration's budget proposals, is not merely an arrangement of words and figures in a budget book. Energy conservation represents hope for the poor, the elderly, the unemployed, and the young school aged children of this Nation. Americans of all walks of life depend daily upon the vital programs administered as a result of the energy conservation budget.

Mr. President, I join my colleagues, Mr. TSONGAS and Mr. HEINZ, in supporting an effective and responsible energy conservation budget. I believe that the addition of this $54 million to the energy conservation account is a small price to pay toward advancing that effort. I urge my colleagues to accept this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2167) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TSONGAS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2168

(Purpose: To appropriate funds to reimburse private litigants in a water adjudication suit involving Indians where the United States is required to hire private counsel for individual Indian Tribes)

Mr. DOMENICI. Mr. President, I send an unprinted amendment to the desk for myself and for my distinguished junior colleague, Senator BINGAMAN, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI) for himself and Mr. BINGAMAN, proposes an amendment numbered 2168.

Mr. DOMENICI. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike line 23 on page 23 through line 8 on page 25 and insert in lieu thereof the following: "in field offices, $819,710,000 of which not to exceed $53,735,000 for higher education scholarships and assistance to public schools under the Act of April 16, 1934 (48 Stat. 596), as amended (25 U.S.C. 452 et seq.), shall remain available for obligation until September 30, 1985, and the funds made available to tribes and tribal organizations through contracts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2203; 25 U.S.C. 450 et seq.) shall remain available until September 30, 1985: *Provided*, That this carryover authority does not extend to programs directly operated by the Bureau of Indian Affairs; and includes expenses necessary to carry out the provisions of section 19(a) of Public Law 93-531 (25 U.S.C. 640(d)-18(a)), $3,951,000, to remain available until expended: *Provided further*, That none of these funds shall be expended as matching funds for programs funded under section 103(a)(1)(B)(iii) of the Vocational Education Act of 1963, as amended (20 U.S.C. 2303(a)(1)(B)(iii): *Provided further*, That in addition, moneys received by grant to the Bureau of Indian Affairs from other Federal agencies to carry out various programs for elementary and secondary education, handicapped programs, bilingual education, and other specific programs shall be deposited into this account and remain available as otherwise provided by law: *Provided further*, That $450,000 shall be made available until expended for transfer by the Secretary of the Interior to the Attorney General to reimburse private litigants for legal fees incurred in the *State of New Mexico ex rel. Reynolds* v. *Aamodt* water adjudication suit: *Provided further*, That any cost of".

Mr. DOMENICI. I understand the Senator from Ohio (Mr. METZENBAUM) may be opposed to this amendment. Since I have revised it slightly after conferring with Senator MELCHER, I will send a copy of this amendment to him.

Mr. METZENBAUM. I thank the Senator.

Mr. DOMENICI. Mr. President, in simple terms this amendment provides for $450,000 to be made available until expended for transfer by the Secretary of the Interior to the Attorney General to reimburse litigants for legal services incurred in the State of New Mexico ex rel. Reynolds versus Aamodt, a water adjudication case.

The money cannot be made available to the State of New Mexico which is a party to this suit. They will spend their own money. But in a nutshell, Mr. President, here is where we are in this case: The case has been in some stages of adjudication for 17 years. But in the last few years there has been a circuit court decision that basically says the U.S. Government has to pay attorneys fees for the four Indian Pueblos involved, to permit them to hire their own legal counsel, pay for that counsel and for experts of various and sundry types that might be required for them to prove their particular premise in terms of water rights that they claim in this area of New Mexico.

I want to make it clear that this is different in that respect, in that not only is the Department of Justice defending the four Indian pueblos in their water rights contentions and assessments, but to this point the U.S. Government has paid $2.9 million, and it is rising all the time, to the four pueblos to pay their own private lawyers and for payment of experts in the field of anthropology, modeling of water, and the like, so that they can adequately present their version, including the Winters doctrine version, of what rights they are entitled to.

The dilemma, Mr. President, and I say this to the Members of the Senate who are here and who will vote on this amendment, is very simple: While there are some non-Indians who can afford legal counsel, I think I can say without fear of being proved wrong that collectively the 800-plus defendants cannot possibility afford lawyers and expert witness fees so as to present a fair case to the Federal master and judge when you compare their ability to pay with four sets of legal counsel and all the experts that can be found in the country to present the Indians' case.

I have met with the leaders of the Indian pueblos involved in my State. In my State, Pueblos are small Indian tribes generally found along rivers where they have built their communities called pueblos.

I told them that, basically, I was not going to oppose attorneys fees to them at this point, but I wanted them to understand that, in the interest of fairness, I had to seek some money for expert witness fees and adequate counsel for the non-Indians—for they will proceed through this complicated litigation assuming that they are not being dealt with fairly by the court system, which will only make it more difficult as we attempt to resolve these very complicated water litigations in New Mexico. This is one of five cases and I do not seek money in the others just now, just this one.

If there is anything sure about our jurisprudence, it is that you have to have legal counsel and experts in a suit as complicated as this one. The State cannot represent the non-Indians because they may have a different version of water law than the Indians. Both the Indians and the non-Indians have good title, have a good basis upon which to argue their particular ideas, premises, and theories of water law.

I am convinced that if we are going to pay anything like $2.9 million for the attorneys for the Indian people, we had better help the non-Indians with some resources or we are going to end up not only adjudicating but having those who cannot win the case—and everyone cannot win—assuming that they did not lose because of the law, but rather that they lost these very important issues because they could not match or even come close to matching the resources that the Indians had in this case.

Some will argue that perhaps the Indian people will oppose this and think it is dealing unfairly with them. I am convinced as to this case that they are not going to argue that.

Mr. JOHNSTON. Will the Senator yield for a question?

Mr. DOMENICI. I shall yield in just a moment.

Theoretically, they might, but in this case, they really cannot, and I am convinced they will not. There may be some Senator who wants to argue that this is not fair to the Indian people. I do not know if it is fair theoretically

or philosophically, but I can tell you in this case, it is fair: $2.9 million and growing in terms of attorneys' fees for those four pueblos and nobody here on the floor is saying, do not pay their attorneys' fees. We are merely saying, be fair and set some aside for adequate representation so this tremendous issue involving the winners doctrine for Pueblo Indians in the United States is fairly adjudicated by the master and Federal court and ultimately, the circuit and perhaps even Supreme Court.

I shall be happy to yield to my friend from Louisiana for a question.

Mr. JOHNSTON. It seems to me the Senator's arguments are compelling. My problem is with the precedent-setting nature of this amendment. Is this distinguishable so it does not necessarily set a precedent for future actions, or does it set a precedent?

Mr. DOMENICI. I say to my good friend, from the standpoint of the Senator from New Mexico, I cannot stand here and say it would set no precedent. I do think it is limited, however. For those who would say in every Indian adjudication, every water case out there that has Indian claims, that this is a precedent to put in on the opposite side, I do not think it is a question of that because, in most cases, the courts have not ordered private legal counsel for each of the Indian entities representing their position.

In fact, some of the Senators who have asked me about it have had cases where the Department of Justice under the trust doctrine represents the Indians. That is not the case here. Here, we have a circuit court case, and nobody took it all the way up to the Supreme Court, that said you have to pay private counsel in addition. I am not sure that is the law any more, with some recent Supreme Court decisions on the trust doctrine and durality of representation. In this case it is.

So, Mr. President, let me say if it is precedent, it is limited to that kind of case where, in addition to Department of Justice counsel, you have the U.S. Government paying private counsel for the adjudication of trustee water rights such as the Indian people against non-Indians, many of whom cannot afford it.

Mr. JOHNSTON. I thank the Senator.

Mr. DOMENICI. Mr. President, I understand my good friend and colleague, Senator BINGAMAN, who joins me as cosponsor, would like to address the Senate on this issue. Then I shall yield the floor to the Senator from Ohio, who wants to discuss the matter.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. I thank my colleague.

Mr. President, I support the amendment which my colleague has offered and which I cosponsor. I do think the issue is very clearly an issue of equity or fairness in this case. Many of my constituents have talked to me about this problem.

The Federal Government, through the greatest desire to come to a good resolution of the issues being litigated, has provided very substantial resources to the Indian tribes to see that their position is properly presented in the Federal litigation. The problem is that the other side of the argument may not be properly presented if something is not done by Congress to see that resources are provided as well to the non-Indians. That is the issue that is before us.

There is some precedential effect of what we are doing, but clearly, this case is a unique case in the history of New Mexico. As the senior Senator from New Mexico stated, the case has been pending for 17 years. It involves the water rights of many individual small landowners throughout northern New Mexico, in particular on the tributaries of the Rio Grande throughout northern New Mexico. It is crucial to the fairness and to the perception of fairness among the people involved in that case that that case be properly argued to the court on both sides and that, whatever decision the Federal court comes out with, it be a decision that is based on the full record of argument of the case and presentation of the various points of view.

Here, I believe, we need to support a departure, perhaps, from the usual and provide this relatively small amount of funding so that the non-Indians can see to it that their case is properly litigated.

Mr. President, I commend the senior Senator from New Mexico for taking the initiative and bringing this issue to the Senate. I support him fully in his efforts.

I thank the Chair.

Mr. DOMENICI. Mr. President, I see the distinguished Senator from Montana (Mr. MELCHER) has arrived on the floor. I was not going to speak any further and I will not on the substantive issue. I might say to the Senator that what I have done is offer an amendment which would have put this money in a different section of the bill if that would have helped with the problem he has. I did not hear from him and I gathered that he would oppose it in any event.

Let me just say that we have put this in the same section with the Indian reimbursement money.

I have checked with the Parliamentarian. While it may be subject to a point of order, it is germane. I say this to the Senator: If he intends to raise a point of order, I shall raise the issue on the question of germaneness and we can vote on that. Senators know they are going to have a vote here tonight. I hope we will do it on substance, but I did not want to surprise the Senator. I just wanted to tell him how I arrived at the decision. I thank him for his efforts to cooperate with me today and I thank him for his concern.

Mr. MELCHER. Mr. President, I do not know where this amendment came from, but I am going to acquaint myself. I thank my friend from New Mexico for his remarks about the germaneness and the point of order that might be raised about legislation on an appropriation bill.

I really welcome this discussion because there is something of merit in what the two Senators from New Mexico have said about trying to capture some money out of the Treasury to help the litigant in a major water suit. We have had these suits in Montana for a number of years.

This generation and the generation before us has known that there is going to be a tremendous amount of water litigation, and when they are faced with that it is a natural, ordinary thing to reach out for money to pay the lawyers.

This amendment—no matter where it is attached, in whatever part of the bill it is—reduced to what it means is that the United States is being required, if this amendment were passed, to pay for the legal services, the lawyers, on both sides of the suit. We may come to that at some point. We may come to that, but I do not think there is any authorization in present law that says that that can be done.

Now, present law, based on the treaties and based on some statutes that Congress has enacted, requires that the United States defend the rights of the property of Indians, including water. And there is no real getting around that. That is the way it is and I believe it is right.

I believe it is proper that whatever is left to the tribes, that the defense of that in court will be made by the United States, because it is the United States itself that has placed the Indian tribes in the position they are in, in terms of the reservations, in terms of what the area of the reservation is, in terms of how they acquaint and adapt themselves to this modern society of ours.

Now there are many times when it is true that individual tribes can afford to procure and pay for their own counsel, and they do in many instances. But the obligation remains; the trust responsibility remains. And that trust responsibility will be defended by the United States through the Department of the Interior and the Department of Justice.

So now we have this proposal that has come up on the floor. We were advised that it would. We were not ad-

vised where it would be attached and how it would be molded into this bill.

So we have a situation where, in order to avoid the issue of whether or not it is legislation on an appropriation and subject to a point of order, it has been drafted this way. I am a little bit surprised that it has been. But I can understand that, realizing the difficulty it is for the Senate to set a precedent of legislating on an appropriation bill—that is no precedent; we have done that before—set a precedent that says that we are going to appropriate some money out of the Treasury from the taxpayers to pay for some lawyer's fees, some court costs, of private litigants against the Indian tribes, which means, in effect, that they are confronted with the Justice Department in court.

Let me explain. I have a sympathy for discussing and having Congress consider the quantification of water where there is a mixture of claims of Indians, the United States—meaning the Federal agencies themselves—and private individuals. I have a sympathy for those court costs and how long it takes to get a resolution of that problem. And if it takes forever to get a resolution, I have a sympathy for discussing and for trying to develop some policy on whether or not it is proper for Congress to enter into paying part or all of the litigant's fees, even the private people.

So when I oppose this amendment, I do not oppose what these two Senators from New Mexico are describing as a serious situation. I oppose it because this is the wrong place to do it. The policy should be developed first by legislation. We have not done that. We have not done that at all.

As far as I can tell, there is absolutely nothing in the United States Code that authorizes this type of expenditure for this purpose, because it puts the United States in a weird position of both defending the trust responsibilities that they must for the Indians and then paying for the plaintiff's costs, in this instance, of non-Indian, private individuals, for their lawyer's fees.

I believe that it is time the Congress should address some of the ramifications of the Winters doctrine and the 1962 Arizona against California case which, as far as I can tell, are the two leading cases that establish what might be the proper mode of settlement of Indian water claims versus other people. But I am not in favor of doing it in this piecemeal fashion, starting with a half million dollars here or a million and a half next week, or three or four different amendments on the next appropriation bill that comes along for the supplemental.

We had our cases starting in the early 1970's where we thought of the fact and amended the fact that in Montana we had not established any clear policy by law and brought up to date the concept of the Winters doctrine and the Arizona against California case to make it simpler to satisfy the water claims of the Indian tribes versus the non-Indians who were getting water from the same source and from the same drainage.

I do not have much feeling, however, that this should be proposed at this time.

Despite the attachment of the amendment at this point, I think we ought to do the ordinary thing in the ordinary way that is devised by the laws of the United States and by the rules of the Senate and consider this on its merits. The first and ordinary thing to do, to be consistent and to have a mode of operation in this body that follows the laws of the United States and the rules of the Senate, would be to raise a point of order against the amendment under rule XVI.

Mr. President, I make that point of order.

Mr. METZENBAUM. Just a moment before the Senator does that.

Mr. DOMENICI. Mr. President, I raise the question of germaneness.

The PRESIDING OFFICER. Does the Senator from Montana withhold?

Mr. MELCHER. I will withhold.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, I rise in connection with this matter now because I think it is a major matter, but I think there is a great matter of principle involved. We are only talking about $450,000. I think it is a matter of concern to the Senate that the Congress should consider paying both sides their legal fees in connection with litigation that is pending in the courts. I am wondering how far a matter of this kind can go. As a matter of fact, I think the manager on the minority side made the point well as to whether this does not set a precedent. In all fairness to the author of the amendment, he indicated, that, indeed, it does set a precedent. I wonder whether we are using good judgment just to see who has the most number of votes on the question of germaneness, because, frankly speaking, it is not germane, regardless of what the vote count might be. It is legislation on an appropriations bill. But all of that has to do with the procedural aspects.

What really bothers me about the amendment is that it is offered by the chairman of the Budget Committee, and the chairman of the Budget Committee is more aware than probably any Member of this Senate as to the problems we have in attempting to reach a balanced budget.

I am the first one to stand on this floor and agree to stipulate that $450,000 is not the difference between balancing the budget, or is it even a drop in the bucket, or does it even become a line item when we are dealing with a budget that does not take note of items less than $50 million. But it seems to me that there is a principle involved, a principle of establishing a new precedent, paying both sides in a legal matter and then picking up $450,000. The next time it will be $1,250,000, and the next time it will be $3 million or $4 million or $8 million.

I question my good friend from New Mexico pushing this amendment on an appropriations bill. If there is that much merit to it, he is a very important member of the Energy Committee, which would be the authorizing committee. He would certainly have no difficulty making his case before that committee and certainly would have no difficulty getting the matter scheduled for a hearing. He may prevail this afternoon, and my guess is that he will, but in prevailing I think that he sets back the Senate and the congressional procedures more than I would consider to be a worthy objective.

I am not positive about the merits of the objection. I think there is some argument that can be made as to the question of paying people who are not in a position to pay their own legal costs under the Indian trust fund where they can pay something over $2 million for lawyers and the other side has to pay for their own lawyers. I think that kind of matter ought to be handled in the authorizing committee.

I really wish the Senator from New Mexico had not offered this amendment. I am not going to be very exercised about it. I am not going to toss and lose any sleep as to whether this amendment does or does not pass. But I think he knows as well as any Member of this body that this is not the road that he ought to be taking; that this is a bad precedent; that this is not the kind of an amendment the chairman of the Budget Committee ought to be attaching to an appropriations measure.

I will not raise the point of order. That has been done by the Senator from Montana. Before doing that I would very strongly urge my friend from New Mexico to withdraw his amendment. This is not really the right way to proceed on this appropriations bill.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from New Mexico is recognized.

Mr. DOMENICI. I will be very brief because I am most appreciative of the remarks of the distinguished Senator from Ohio. The implications of his remarks make me feel very good. I think he implies that I have a great deal of

respect for the Senate processes, and I do. If this was the only legislation in this appropriation bill, I would lose today because if I win it will be on germaneness, which is predicated upon the fact that it has legislative language in it; that I am adding an amendment to provide some fairness for some people in New Mexico that desperately need it and cannot wait very long.

So I am not worried about it harming this institution and its processes, nor am I the least bit worried, I say to my good friend, about harming the appropriations process by adding this language.

I have long since learned that if you look at these appropriation bills that come over from the House, you will be amazed at the amount of legislation that is there. I am not suggesting that is all so good in the long run, but I am suggesting that I am doing no violence to it today that bothers me one bit.

The Senator from Ohio says that we ought to wait, my good friend, Senator BINGAMAN, who I am pleased is supporting me on this and my cosponsor, because we can take our time going through the authorizing process. Let me tell the Senator that he would not feel that way if he was one of the 700 or 800 rather poor Hispanics who are getting notices from all over the place to go to big trials about their water rights when they think they have owned them for 80, 90, 100 years, one I think for 160 years. They are told they are going to probably have nothing left. Altogether they have raised $50,000 or $60,000 for lawyers and they read $2.9 million has gone to four of the best law firms in New Mexico, already having hired the best anthropologists and theoreticians about what happened 200 years ago, all going to court shortly with reference to water that their small orchard or little farm or ranch that barely makes its needs. Their titles are now in jeopardy. We do not even know if you can sell property anymore in this adjudication. It is so notorious that I assume those preparing title insurance and abstracts are writing in "We don't have any assurance that you have any water."

The Senator says let us wait. Well, I am for waiting but not when we are only talking about $450,000, when it might make the difference between a fair adjudication, or at least as my good friend, Senator BINGAMAN, said, the perception that at least fairness can be done here today without doing any violence.

I am going to work very hard to win, even though it is not very much, because it means an awful lot to a lot of people who are very worried in New Mexico. It also means a lot to the continued reasonably good relationship between Indians and non-Indians in that part of my State, which I am not so sure is going to continue in any event.

But if you think there are not going to be worse situations where they have no money to defend themselves and the Indians have this kind of money, then I am not reading human nature right, and I do not want that to happen.

So, while this may be subject to a point of order, I am confident that the Senate will find germaneness; and I am saying that it is plenty germane, in the way we vote in this body, and we are doing violence to nobody by voting for this and permitting these people to be represented in a fair manner.

Mr. MELCHER. Mr. President, this amendment for a half million dollars sets a kind of precedent which involves sort of an open-door invitation to get the Federal Government to pay for the attorneys' fees. It is a tough precedent to establish.

There are 52 cases pending right now in 10 different States. I recall in 1972, 1973, or 1974 when the northern Cheyenne case was started in Montana; 4 of 500—maybe 600 or 700—individuals, non-Indians, were made part of the case. They were served with summonses and answered. It was with respect to a claim about water.

This is not the only one in New Mexico. There are others in New Mexico. What is being described as a New Mexico case is not different from that in other States or different from other cases in New Mexico.

There is only one reason to raise a point of order, and that is just to keep this in the proper sequence and to emphasize that it is setting a precedent, and probably a dangerous precedent, for the Government to be paying the lawyers on both sides of a case, in a case in which the Government is involved, in representing the trust responsibility of the tribes.

I do not know what the Indian tribes think about this, but that is beside the point. It is what Congress—the Senate and the House—thinks about it.

The real situation we are facing here is that if the Senate finds that the language in the amendment is germane, we are nowhere anyway. We still have to debate the amendment, because it is a question of whether or not it is proper to add the language, the last five or six lines at the tail end of this section that is already in the bill. So we will be in the situation of debating the amendment until we are satisfied that we have done our utmost on it.

The amendment will be subject to a tabling motion, for example. If the tabling motion is agreed to, does that strike the language dealing with $53 million for higher education, scholarships, and assistance to public schools under the act of April 16, 1934? No. If the tabling motion is successful, that language will remain in the bill because it is in the bill.

So what are we doing here? We do not get away from the issue of whether or not this was offered for just the last five or six lines, the precedent-setting lines. We are not getting away from anything. I think the regular procedures should be followed.

Therefore, Mr. President, I raise the point of order under rule XVI against the amendment.

Mr. DOMENICI. Mr. President, I raise the question of germaneness, and I ask for the yeas and nays.

The PRESIDING OFFICER. Under rule XVI, the defense of germaneness is submitted to the Senate.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from South Carolina (Mr. THURMOND) are necessarily absent.

I further announce that, if present and voting, the Senator from South Carolina (Mr. THURMOND) would vote "yea."

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Colorado (Mr. HART), the Senator from Hawaii (Mr. INOUYE), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. (Mr. COCHRAN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 77, nays 16, as follows:

[Rollcall Vote No. 256 Leg.]

YEAS—77

Abdnor	Hatch	Murkowski
Andrews	Hatfield	Nickles
Armstrong	Hawkins	Packwood
Bentsen	Hecht	Pell
Bingaman	Heflin	Percy
Boren	Heinz	Pressler
Boschwitz	Helms	Pryor
Chafee	Hollings	Quayle
Chiles	Huddleston	Randolph

Bradley	Glenn	Sasser
Bumpers	Matsunaga	Zorinsky
Burdick	Melcher	
Byrd	Metzenbaum	

NOT VOTING—7

Baker	Hart	Thurmond
Cranston	Inouye	
Goldwater	Stennis	

The PRESIDING OFFICER. The amendment is germane; the point of order falls.

Mr. DOMENICI. I move to reconsider the vote.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MELCHER. Mr. President, I want to tell my colleagues that in just a few moments, the leadership will announce a schedule that is quite pleasing to me and, I think, will be pleasing to all of us for this evening, finishing this matter sometime tomorrow.

I want to say I have no objection to the Senate voting germaneness on such a proposition as this, because I have done the same in many instances. Germaneness is what the Senate says it is. What I am interested in is that every Member of the Senate consider the precedent that is established by paying the lawyers who represent plaintiffs in a suit against the United States, to consider what that invites, certainly to consider the part that the trust responsibility for the Federal Government for the Indians mandates: That they shall have proper legal representation in any suit brought against them.

Mr. President, when we vote on the merits of the amendment, I hope Senators will consider that. There are numerous cases that could be brought into Federal court involving water. There are 52 cases pending right now. There are other cases that could be brought into Federal court involving other Indian claims where the plaintiffs might well desire one of us or one of the Members of the House to bring into an appropriation bill the funds to pay the lawyers to defend the non-Indians.

That is a very dangerous precedent. I only ask my colleagues to consider that before we vote on the merits of the amendment itself.

Mr. McCLURE. Mr. President, I wonder if I may have the attention of all Members.

The PRESIDING OFFICER. The Senator will suspend until the Senate comes to order.

The Senator from Idaho.

Mr. McCLURE. I thank the Chair.

Mr. President, a good many Members have been asking what the order will be for tonight. Let me outline where I think we are.

We have the Domenici amendment pending. It is my hope that we can reach an agreement under which that amendment would be displaced temporarily, to be considered tomorrow under a time limitation, with a vote up or down at the expiration of that time.

We have an amendment by Senator PERCY, one by Senators NUNN and HOLLINGS, and one by Senator METZENBAUM dealing with Forest Service timber relief. I understand he wishes that to be deferred until tomorrow.

There is an amendment by Senator GARN, upon which there is no disagreement; a Stevens-DeConcini amendment which can be disposed of tonight; an amendment by myself with respect to visitors facility funds; one by Senator TOWER on the national wildlife refuge in the Rio Grande Valley; one by myself with respect to wilderness study areas; and an amendment by Senator WARNER with respect to Fish and Wildlife Service at Back Bay National Wildlife Refuge.

Those are the only amendments of which I am aware and I have consulted with Members on the other side of the aisle. I understand they are not aware of any other amendments, either.

It would be my hope that in setting aside the Domenici amendment, we could then get a unanimous-consent agreement that it would be pending under a time limitation tomorrow; that the amendment by Senator METZENBAUM would be eligible for consideration under a time limitation tomorrow; and that all other matters would be handled tonight.

In that manner, we would then dispose of this in an expeditious manner on tomorrow, and we could assure all Members that there would be no further rollcalls tonight. That consent is being circulated on both sides, and I hope we can come to that agreement.

I think that conforms to the requirements of which Senator JOHNSTON is aware, if I understand it correctly.

Mr. JOHNSTON. That is suitable, so far as I know. I see the minority leader on the floor. We have put out a hotline to confirm that, and he can speak to the results of that hotline.

Mr. BYRD. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. McCLURE. Mr. President, I am happy to yield to the distinguished minority leader.

Mr. BYRD. Mr. President, may I say to the distinguished manager of the bill that I am not in a position to enter into a time agreement at this time.

Mr. STEVENS. Mr. President, will the Senator yield to me?

Mr. McCLURE. I am happy to yield to the acting majority leader.

Mr. STEVENS. Mr. President, I might state that the request of the majority leader was to finish the bill, if possible, this evening. Under the circumstances, I do not think we can make that determination yet. I would like to continue with the amendments that the Senator has outlined and attempt to reach an agreement in a few minutes, if that is possible. But I do think we are going to have to try and see if we can finish tonight.

We do have the revenue sharing bill ready to go tomorrow, as I understand it. We would like to get to that bill, if it is at all possible, early enough tomorrow to see to it that we could finish that within a reasonable time. I do not know if it is possible to finish tomorrow, but certainly we ought to be able to finish it by Thursday.

We had intended to start on that bill tomorrow at noon. I am hopeful that we can still have the possibility of starting the bill early in the afternoon, at least. Under the agreement as outlined by the Senator from Idaho that might have been possible. But, under the circumstances, if we cannot get an agreement now, I think we should continue to proceed. I suggest, however, that it might be possible to set aside the Domenici amendment temporarily and proceed to some of these noncontroversial amendments that we can dispose of, since there is an agreement I understand the Senator from Montana is willing to make concerning an hour and a half of time for debate on the Domenici amendment tomorrow.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Mr. President, reserving the right to object, could we do that with a little more specificity? If it is for some amendments the Senator wants to list, that would be fine with me.

Mr. McCLURE. Let me rephrase it. Mr. President, I ask unanimous consent that the pending amendment be set aside so that we can consider the amendment to which I just referred.

Mr. DOMENICI. I have no objection.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 2170

Mr. NUNN. Mr. President, on behalf of myself, Senator HOLLINGS, Senator MATTINGLY, and Senator JOHNSTON, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Georgia (Mr. NUNN), for himself, Mr. HOLLINGS, Mr. MATTINGLY, and Mr. JOHNSTON, proposes an amendment numbered 2170.

Mr. NUNN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 25, strike out all beginning with "608,202,000" through "(16 U.S.C.

451)" on page 13 and insert in lieu thereof "608,302,000 without regard to the Act of August 24, 1912, as amended (16 U.S.C. 451) of which $100,000 shall be made available upon entering into a cooperative agreement with the Martin Luther King, Jr. Center for Noviolent Social Change, Inc."

Mr. NUNN. Mr. President, I rise to offer an amendment to the fiscal year 1984 Interior Department appropriations measure directing the National Park Service to enter into cooperative agreements with the Martin Luther King, Jr., Center for Nonviolent Social Change for reimbursement of expenses incurred in the maintenance of certain areas located within the Martin Luther King, Jr., National Historic Site in Atlanta, Ga.

In so doing, I hope to clear up the confusion which exists in the minds of some regarding the relationship between the Martin Luther King, Jr., National Historic Site, a designated National Park Service facility, and the privately operated Martin Luther King, Jr., Center for Nonviolent Social Change.

Under the original 1980 legislation, which I cosponsored, establishing this area as a national historic site, the National Park Service was authorized to develop and interpret significant features of the Martin Luther King, Jr., National Historic Site, situated east of Atlanta's central business district. The 23.5-acre historic site covers a two-block area encompassing the birth home of Dr. King, his church, and his memorial gravesite. The preservation district is composed of the commercial and residential sections of the Sweet Auburn community in which Dr. King grew up.

The King gravesite is part of the Freedom Hall complex which was selected for the living memorial to Dr. King. The complex includes interpretive exhibits and the King Library and Archives, and is located on property owned and occupied by the Martin Luther King, Jr., Center for Nonviolent Social Change. The center, under the direction of Coretta Scott King, is a nonprofit corporation funded primarily through private donations which carries on the legacy of Dr. King by continuing to work for nonviolent social change leading to economic and social equality for all.

This historic site is an important asset to the city of Atlanta, to the Nation and, indeed, to the world. It tells much of the history of black urban culture in the South, and provides the background for the story of the civil rights movement. Approximately 500,000 visitors converge on the site each year, not only to pay homage to Dr. King and his work, but to learn more about the struggle for racial equality in America. This number is steadily growing and poses a substantial problem for the Martin Luther King, Jr., Center for Nonviolent Social Change in this way: The center is burdened with the awesome task of maintaining the areas adjacent to the King gravesite and Freedom Hall complex by using its own financial and other resources.

While Federal funds are appropriated each year by Congress for National Park Service staffing and other costs associated with the King site development—and indeed the Senate appropriations bill for fiscal year 1984 contains $200,000 more in operational funds than the administration requested—none of these funds are now used for maintaining the grounds around the crypt and Freedom Hall complex—an area which absorbs most of the visitor traffic. I am informed that the King Center spends in the neighborhood of $7,000 per month of its own resources for operating, clean-up and maintenance expenses. These expenses include utility costs associated with operation of the freedom walkway lighting system and terraced fountain adjacent to Dr. King's crypt; continuous maintenance of the fountain and restroom facilities; and general ground maintenance of the area. Currently, the center receives none of the operation and maintenance funds appropriated by the Congress for these expenses. Mr. President, this is unfair and contrary to congressional intent.

The purpose of the 1980 enacting legislation was to encourage the development of this site and to adequately accommodate the public. It in no way envisioned the imposition of a financial hardship on any private organization for upkeep of this facility.

My amendment adds $100,000 to the Martin Luther King, Jr., National Historic Site's operational budget and directs the National Park Service to use the funds to remunerate the King Center for operation and maintenance costs associated with public visitations to its Freedom Hall complex. In order to facilitate the accomplishment of these tasks, I would propose that the National Park Service and the Martin Luther King, Jr., Center for Nonviolent Social Change negotiate the terms of a performance-based contract for the work involved. I am acutely aware of the current budget difficulties confronting our Nation. I want to reassure my colleagues that this amendment does not create an open-ended grant with no strings attached, but instead offers a quid pro quo: The Federal Government's investment in the national historic site would be protected, and, indeed enhanced, while the Martin Luther King, Jr., Center for Nonviolent Social Change would be made whole for any costs incurred in the operation and maintenance of the facility. I would note, Mr. President, that, even with the addition of this amount, the funding level in the Senate appropriations measure for this park is substantially lower than that contained in the House bill. All we are doing here is correcting an inequity which was neither anticipated nor intended in the original act establishing this national park facility.

Without adequate support and assistance from the Federal Government, the successful development and growth of the Martin Luther King, Jr., National Historic Site will be impossible. The timely development of the site will not only honor the contributions of Dr. King, but will also serve to reduce blight in the Sweet Auburn district in Atlanta. This was the intention of Congress in enacting the authorizing legislation placing this facility under the National Park Service's umbrella, and I hope that we can continue to fulfill the financial requirements necessary to develop the area to its full potential.

Mr. President, I urge the adoption of this amendment.

Mr. HOLLINGS. Mr. President, earlier this year I spent a day at the Martin Luther King, Jr. Center and have had subsequent conversations with Mrs. King. The center now projects 500,000 visitors to both the Martin Luther King, Jr. National Historic Site and the King Center. The Congress has provided for the National Park Service acquisition and operating costs of the site. While these appropriations are barely adequate, they are better than the complete lack of Federal assistance to the center. There is just no way that the King Center can cope with 500,000 visitors a year without Federal assistance.

I asked the officials of the center how much help they required and they replied $300,000. I recommended that amount in a letter to the chairman of the Interior Appropriations Subcommittee. The subcommittee did not provide that amount, but did earmark $100,000 for the development of Park Service exhibits, and $200,000 for the site. The House of Representatives also provided the increase for site maintenance, as well as $300,000 for site construction and $500,000 for site land acquisition.

We have a breakdown of the $300,000 from the center. It provides for a coordinator, 8 to 10 part-time tour guides, information clerks, security, and maintenance personnel, as well as the brochures, utilities, supplies, insurance, repairs, exhibit maintenance, and other necessary expenses of the center in hosting a half million visitors annually.

For those unfamiliar with the center, let me hasten to explain that nobody is going to get fat off this money. The bulk of the people working there are paid subsistence salaries, or poverty levels. The coordinator I mentioned earlier is budgeted at $20,000, but the rest of the positions are budgeted at approximately $8,000

annually. The tour guides are expected to be filled by unemployed senior citizens, while unemployed youth will be hired for the security positions to train them for a career in that field.

For a number of years I served on the Interior Appropriations Subcommittee, and would still be a member except for the loss of Democrat slots after the 1980 election. I recall the initial appropriations to the Kennedy Center and then to the other cultural activities here in Washington. I support those appropriations and commend the subcommittee for their concern for cultural activities in the Nation's Capital.

We need a similar concern for the Martin Luther King, Jr. Center. Not only does the center keep alive the dream of Martin Luther King, Jr., for nonviolent social change, but the other activities it sponsors. For instance, the center sponsors the Kingfest that provides 12 weekends of free musical and cultural programs for the citizens and visitors to Atlanta.

Mr. President, the need is definitely there for a $300,000 appropriation, and I believe we should be fully addressing those needs. However, I am aware of the overall constraints on this bill and join with my distinguished colleague in urging the appropriation of $100,000 to provide the help the Martin Luther King, Jr. Center vitally needs.

Mr. President, we have worked very carefully with the majority, Senator McCLURE and his staff, and the minority, Senator JOHNSTON and his staff. It is my understanding—I hope I am correct in this—that they are prepared to accept the amendment.

Mr. McCLURE. Mr. President, we are prepared to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia (Mr. NUNN).

The amendment (No. 2170) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments?

AMENDMENT NO. 2171

Mr. McCLURE. Mr. President, on behalf of the Senators from Illinois, Mr. PERCY and Mr. DIXON, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), on behalf of Mr. PERCY and Mr. DIXON, proposes an amendment numbered 2171.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, line 18, before the period insert the following: *: Provided further,* That up to $100,000 shall be available for a study to examine the suitability of a site in East St. Louis, in the State of Illinois, for a museum of American culture and anthropology, and to determine the variety and breadth of the collections that might be exhibited in such museum"

Mr. PERCY. Mr. President, I offer this amendment on behalf of my distinguished colleague from Illinois (Mr. DIXON) and myself to provide for a National Park Service study to examine the suitability of a site in East St. Louis, Ill., for a museum of American culture and anthropology, and to determine the variety and breadth of the collections that might be exhibited in such museum.

Communities on both the Illinois and Missouri sides of the Mississippi River have long envisioned the establishment of a national memorial in East St. Louis, opposite the Gateway Memorial Arch. Indeed, the original plans for the Jefferson Expansion Memorial called for such a memorial in East St. Louis. In my judgment, the establishment of a museum of American culture and anthropology in Illinois would constitute a significant step toward the completion of the original plans for the Jefferson Expansion Memorial. Supporters of this project contemplate a museum of national and international significance which would highlight the cultural, religious and ethnic heritage of our Nation.

At the request of Representatives MEL PRICE and PAUL SIMON, the House included $100,000 in the fiscal year 1984 Interior appropriations bill for the Smithsonian Institution to study the feasibility of a museum in East St. Louis. Because the National Park Service presently operates the Jefferson Expansion Memorial as a national historic site and because Representative PRICE has introduced H.R. 2107 to authorize the Secretary of the Interior to enlarge this historic site, I think it is more appropriate for the National Park Service to study the feasibility of such a museum, rather than the Smithsonian. It is for this reason, that the amendment calls for the Park Service to conduct this study.

Mr. DIXON. Mr. President, I am pleased to join my distinguished colleague, Senator PERCY, in offering this amendment to provide a modest amount of funds to underwrite a study of the feasibility of establishing a museum of anthropology on the Illinois side of the Mississippi River opposite the magnificent Gateway Arch at St. Louis.

Specifically, the amendment calls for an expenditure of up to $100,000 of available funds by the National Park Service to examine the suitability of a site in East St. Louis for a museum of American culture and anthropology.

The House, at the request of Congressmen MEL PRICE and PAUL SIMON, has already included this project in the appropriations bill for the Department of the Interior. The dollar amount is the same, but the language calls for a study by the Smithsonian Institution. This matter can easily be resolved by the conference committee. One important factor is that the National Park Service already administers and maintains the Gateway Arch.

The model all of us have in mind, Mr. President, is the outstanding museum of anthropology in Mexico City. The location of this American institution would be on a prime riverfront site in East St. Louis. For several decades, citizens and communities on both sides of the Mississippi have envisioned a major development on the Illinois side of the Gateway Arch to complete the dream of Eero Saarinen, designer of the arch, of a "great green park on both banks of the river." Unfortunately, that dream has yet to be realized.

The proximity of the East St. Louis site to the Gateway Arch and all it symbolizes about our Nation's past and future provides us with a forceful argument, Mr. President, for its use as a suitable location for a museum of American culture and anthropology. Such an institution would spotlight the variety of cultures, and religious and ethnic backgrounds which are central features of our national experience and character.

Those of us who ask your consideration of this undertaking have in mind an institution of national scope and international significance. Completion of the dream of Eero Saarinen on the banks of the Mississippi River would be an accomplishment of which all of us can be proud. I ask for favorable consideration of the amendment.

Mr. McCLURE. Mr. President, it is my understanding that if a study indicates that East St. Louis, Ill. would be a suitable site for a museum of culture and anthropology, then authorization would be sought under the National Park Service for the construction of such a facility.

The House provided the authorization for the study under the Smithsonian Institution as part of the Interior Appropriations bill. If such a study is to be conducted with Federal funds, the National Park Service is the logical bureau as they would be responsible for construction, if authorized.

Mr. President, I hope the amendment can be agreed to. I know of no objection.

Mr. JOHNSTON. Mr. President, the amendment has been cleared on this side.

Mr. PERCY. Mr. President, I wish to thank the managers of the bill very much indeed. Senator DIXON and I feel this is an extraordinarily important amendment. It was added in the House, and it is in the bill from the House standpoint. Symbolically, this will add a lot to East St. Louis, and that is a city that we all want to help right across the Gateway. It will mean a great deal. It is just a study to see what the feasibility is. I appreciate it very much indeed.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2171) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2172

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an amendment numbered 2172.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 51, line 25, delete "$248,714,000" and insert in lieu thereof "$255,714,000"; and

On page 53, line 3, after the word "process" insert the following: ": *Provided further,* That $7,000,000 of the amount provided above shall be used to support research and development of purged carbons technology".

Mr. STEVENS. Mr. President, this amendment adds $7 million to the Department of Energy's Fossil Energy Research and Development programs. This money would be used to support research and development of purged carbons technology. Integrated Carbons Corp. has recently submitted an unsolicited proposal to the Department of Energy proposing a program to develop a pilot plant which would produce 3 tons per day of purged carbon fuel.

Purged carbon is a hydrocarbon fuel derived from coal. It can be used to replace liquid petroleum fuels like No. 6 fuel oil in utility and industrial boilers, in gas turbines and for diesel fuel.

The process involves applying hydrofluoric or hydrochloric acid to sand-sized raw coal and removing the ash. It is expected that the process will be able to remove 99 percent of sulfur dioxide and reduce or eliminate nitrous oxides and particulate emissions. The process can be used with either high- or low-sulfur coal, bituminous and subbituminous coal.

While it is true that the average official crude oil price from OPEC has been just under $29 per barrel since March, we cannot and should not expect the price to remain so low.

It is important that this Nation begin developing alternative sources of fuel to imported crude oil which will be available when we need them. The purged carbons process offers us a way to substantially broaden the way we use our coal resources.

It should be remembered that the United States has over 25 percent of the estimated recoverable reserves of coal according to figures assembled by the Energy Information Administration. It is imperative that we pursue all available options for using our coal resources to protect us from the rise in crude oil prices which are bound to occur.

The development of this technology should be pursued now in partnership with private industry which has already invested over $2 million.

Mr. DeCONCINI. Will the Senator from Alaska yield?

Mr. STEVENS. I yield to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DeCONCINI. Mr. President, this is a very significant amendment, in my opinion. I have talked at some length with the manager of the bill. He has been considerate of it, though not quite as much as I would like to see. I hope we can address this a little more seriously in the supplemental.

The Department has already begun preliminary investigations into the process the Senator from Alaska has pointed out. It is my understanding that the proposal has been submitted to the Department. This coal refining process, which reacts in liquid-like coal powder, could make coal slurry possible without the use of water. To those of us from scarce water States like the State of Arizona, this is very, very significant. If it is successful, this could have a tremendous positive effect on not only the West but numerous other States and the concept of our total water policy, or lack thereof, in this Nation.

I support the amendment. I ask unanimous consent that I be added as a cosponsor. I hope the Senator from Alaska will pursue this to the utmost.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, a product with the potential of purged carbons should be seriously examined, since it could potentially provide the Nation with a coal-based substitute for oil at prices competitive with the current price of oil; it could be used in existing coal, oil, gas, and diesel applications without expensive retrofitting or use of scrubbers and precipitators; and it could substantially eliminate sulfur dioxide and nitrous oxide emissions, and thus contribute to our clean air goals and the reduction of acid rain.

A proposal for further research of this process has been submitted to the Department of Energy. The Department has previously verified the major scientific capability and projected economics of the process. I, therefore, strongly recommend that Congress provide assistance for further research on this process from funds appropriated for 1984 for fossil energy research and development.

Mr. DOMENICI. Mr. President, I concur with the remarks made today by Senators STEVENS and DeCONCINI concerning the purged carbons technology for coal preparation. A product with the potential of purged carbons should be seriously examined, since it could potentially provide the Nation with a coal-based substitute for oil at prices competitive with the current price of oil; it could be used in existing coal, oil, gas, and diesel applications without expensive retrofitting or use of scrubbers and precipitators; and it could substantially eliminate sulfur dioxide and nitrous oxide emissions, and thus contribute to our clean air goals and the reduction of acid rain.

A proposal for further research of this process has been submitted to the Department of Energy. The Department has previously verified the major scientific capability and projected economics of the process. I therefore strongly recommend that the Department provide assistance for further research on this process from funds appropriated for 1984 for fossil energy research and development.

Mr. NICKLES. Mr. President, I concur with the remarks made today by Senator STEVENS on the purged carbon process of coal. This new and developing method to provide an alternative fuel, for use as a substitute to petroleum, has potential merit.

I commend Integrated Carbons Corp. of Tulsa, Okla., for their research in this area. I believe they submitted to the Department of Energy an unsolicited proposal to further the research of this process.

I am confident that the Department will examine the proposal fairly and extensively. If the Department finds merit in the proposal and finds it has potential benefit to our national interest, then I encourage DOE to consider funding the proposal from available funds.

Mr. BYRD. Mr. President, I would like to add my support to the remarks made today by Senators STEVENS, DECONCINI and others regarding the purged carbons coal preparation technology. Purged carbons could potentially provide the Nation with a coal-based substitute for oil at competitive prices.

This product could be used in existing coal, oil, gas, and diesel applications without expensive equipment modifications or use of scrubbers and precipitators; and it could substantially reduce sulfur dioxide and nitrous oxide emissions, and thus contribute to our clean air goals and the reduction of acid rain.

The Department of Energy has performed initial studies to determine the technical capability and projected economics of the process. The Department has a proposal to expand on this research. Mr. President I recommend that the Department continue to examine the viability of this technology in order that the Senate can make an informed judgment on it in connection with our future research needs in the fossil fuel area.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER. The Senator from Idaho is recognized.

Mr. McCLURE. Mr. President, the Senator from Alaska and the Senator from Arizona have indeed been very persuasive in trying to get us to accept this amendment. They have made a very good case that in their belief this is a justified technology. In all honesty, this is a matter which the committee has not had an opportunity to look at sufficiently for me to make a judgment. I have suggested to the Senator from Alaska that rather than pushing the amendment at this time I will commit to him that we will ask the Department to look at it very carefully, give us a recommendation, and we will look at it very carefully ourselves. If it is justified, as both Senators have indicated it is, at the next opportunity we have we would be much more likely to be able to fund it. But in all honesty, I cannot say that we are at the point now where I can recommend that course of action to the Senate. I would hope that the Senators who have offered this recognize the concerns that we have in not having had the opportunity to review this project as carefully as we would like and would not press the matter further at this time.

Mr. STEVENS. Mr. President, I think the Senator from Idaho is correct in his position that we should have presented this to the subcommittee. Those of us who presented it are members of this committee. Neither there nor in the full committee were we in a position to present the matter.

I do think it is a research project that, as I indicated, ought to be in partnership with the private sector because it means so much to the future of the energy industry in this country. We have discussed it not only on the floor but at length off the floor, and I understand what the chairman is saying. We will pursue it at the time the supplemental appropriations bill is before the Senate.

On the basis of the statement made by the chairman and the statement by my colleagues who support the amendment, I think it is the better part of valor to ask the Chair to permit us to withdraw the amendment at this time. I so request.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. McCLURE. Mr. President, let me express my appreciation to the Senator from Alaska. I know how strongly he feels about this. I appreciate the accommodation he has made to me and the committee.

AMENDMENT NO. 2173

Mr. McCLURE. Mr. President, on behalf of the Senator from Utah (Mr. GARN) and myself, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for himself and Mr. GARN, proposes an amendment numbered 2173.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 74, line 25, before the coma insert the following: ", and except to carry out the obligations and responsibilities of the Secretary of Interior under section 17(k)(1) (A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226)"

Mr. GARN. Mr. President, I wish to thank the Senator from Arizona, Mr. DECONCINI, as well as the Senator from Idaho, Mr. McCLURE, for their willingness to help resolve an issue related to the Combined Hydrocarbon Leasing Act of 1981, Public Law 97-78. I was one of the authors of that act, and I know the distinguished chairman of the Energy Committee is very familiar with its provisions, and I appreciate the role he played in its enactment.

The act resolves a very difficult legal controversy which for years prevented the development of the significant deposits of heavy oil and tar sands found on Federal lands in my State. The principal feature of the act is that it imposes a mandatory duty on the Secretary to convert oil and gas leases to combined hydrocarbon leases "upon the filing of an application containing an acceptable plan of operations which assures reasonable protection of the environment and diligent development."

Congress intent in granting the right to convert was to clarify the oil and gas lessee's right to all hydrocarbons, except coal, oil shale, and gilsonite, that may be found in the lands covered by the lease.

A significant concern that I have with the language of section 308 of the bill before us is that it not upset the lease conversion program that the BLM has established under the Combined Hydrocarbon Leasing Act. One of the richest deposits of heavy oil and tar sands in the United States is located in the tar sands triangle area of southeastern Utah, and part of this deposit, as I understand it, is located within a Bureau of Land Management wilderness study area. There are Federal oil and gas leases in this area eligible for conversion to combined hydrocarbon leases under existing valid rights.

Mr. President, the amendment before the Senate will correct what I believe was an unintended consequence of the provision contained in the Interior bill which bans leasing activities in the Bureau of Land Management wilderness study areas.

Specifically, my amendment would uphold the obligation and responsibility of the Secretary of the Interior under Public Law 97-78 to process applications to convert oil and gas leases into combined hydrocarbon leases and issue the converted leases if appropriate even though such leases may be within wilderness study areas. So that there is no misunderstanding of what this amendment would accomplish, let me state it is my understanding that no environmental laws, including the nonimpairment standards in section 603 of the Federal Land Policy and Management Act, Public Law 94-579, would be altered in any way.

Mr. DECONCINI. Mr. President, I have agreed to the amendment offered by my colleague, Senator GARN from Utah, which attempts to clarify the authority of the Secretary of the Interior with regard to the conversion rights of oil and gas lessees.

The purpose of this amendment is to permit the Secretary of the Interior to expend funds to process any applications for combined hydrocarbon leases which fulfill the requirements of section (k)(1)(A) of the Combined Hydrocarbon Leasing Act and its regulations. At the same time, this amendment preserves existing law which requires protection of wilderness values in all wilderness study areas. As recognized and discussed in the May 22, 1983, opinion of the Solicitor of the Department of the Interior in wilderness study areas, the "reasonableness protection of the environment" required by section (k)(1)(A) of the Combined Hydrocarbon Leasing Act is defined by the requirements of section 603(c) of the Federal Land Policy and Manage-

ment Act (43 U.S.C. 1782c). All combined hydrocarbon leases in wilderness study areas are subject to the nonimpairment standard of section 603(c) of FLPMA.

I wish to thank my colleague from Utah for his cooperation in the formulation of this amendment and assure him that it was not the intent of this Senator, by the inclusion of section 308 of this act, to prevent the processing of conversion applications consistent with the provisions of Public Law 97-78.

Mr. McCLURE. Mr. President, I know of no objection to the amendment. I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2173) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MELCHER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. I thank the Senator from Montana.

AMENDMENT NO. 2174

Mr. McCLURE. Mr. President, on behalf of the Senators from Texas (Mr. TOWER and Mr. BENTSEN), I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), on behalf of Mr. TOWER and Mr. BENTSEN, proposes an amendment numbered 2174.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 11, line 8, strike out "$28,600,000" and insert in lieu thereof "$30,100,000".

On page 11, line 9, strike out the period and insert in lieu thereof ": *Provided*, That $1,500,000 shall be available for land acquisition in the Rio Grande Valley National Wildlife Refuge, Texas.".

Mr. TOWER. Mr. President, I offer an amendment today, for myself and Senator BENTSEN, to reinstate $1.5 million to the Department of the Interior fiscal year 1984 budget for the purpose of acquiring land for the Lower Rio Grande Valley National Wildlife Refuge. As you know, the economy of south Texas is still badly damaged as a result of the devaluation of the Mexican peso.

The Lower Rio Grande Valley National Wildlife Refuge may also be affected by this event. Presently, it is the only remaining natural habitat with a subtropical climate in the United States. As such, it shelters over 115 species of wildlife, including 9 species listed as endangered. Its rich animal, bird, and plant populations attract environmental and sports enthusiasts from around the world. Unfortunately, many owners of the estimated 30,000 acres of remaining natural habitiat in the area are under economic pressure to conver their land for agricultural uses. Over 90 percent of the land in the area has already been converted. In fact, Mexico has instituted an intensive land-clearing effort on the southern border of the Rio Grande. Mexico's activity emphasizes the need to preserve the remaining wooded acreage on the U.S. side of the river.

The only remaining native palm grove in this country, a variety of orchids, the Montezuma cypress, and the Texas ebony can be found in the refuge. Endangered species living in the area include the jaguarundi, ocelot, bald eagle, brown pelican, peregrine falcon, Ridley sea turtle, and three varieties of Atlantic green sea turtles, further, the refuge is an extremely important nesting habitat for white-winged doves, which are popular game for sportsmen. The Santa Anna unit of the refuge, about 2,000 acres, host over 325 separate species of birds, which to my knowledge is more than may be found in any other wildlife refuge in the United States.

Authorized in 1979, the refuge, buying, leasing, and accepting donations, has been able to protect about 10,000 acres of natural land. Only half of that property actually has been acquired by the refuge. As I mentioned previously, willing sellers are ready to sell a large portion of the remaining 30,000 acres of natural habitat. However, the severe economic pressures in the area may force these landowners to convert these lands to agricultural uses. In my estimation, it is imperative that we act to preserve the only remaining subtropical wildlife habitat in the continental United States. Therefore, I urge my colleagues to join me in supporting this amendment.

Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague from Texas in offering this amendment to earmark $1.5 million for the acquisition of land for the Rio Grande Valley National Wildlife Refuge. I strongly support this program of land acquisition, and I urge the approval of this amendment.

Mr. President, the Lower Rio Grande Valley National Wildlife Refuge is a unique ecological area, unlike any other in the United States. This south Texas brush country, with its semitropical climate, is used by over 500 species of birds and animals, and it is the principal habitat for an estimated 115 species of wildlife. Many of these birds and animals can be found nowhere else in the country, since the Rio Grande Valley is the northernmost limit of their range.

This ecological niche is tremendously productive. It is the principal nesting habitat for the white-winged dove, which is famed far and wide among sportsmen. A small 10- to 15-acre patch of brush can be host to as many as 1,000 nesting pairs of white-winged doves. The Santa Anna unit, which covers only 2,000 acres, has had more than 300 species of birds identified on it, making it the most productive unit in the entire national wildlife refuge system for birdwatchers.

In addition, this habitat is depended on by nine species which are on the Federal endangered species list—ocelot, jaguarundi, brown pelican, bald eagle, peregrine falcon, ridley turtle, Atlantic green turtle, Atlantic leatherback turtle, and Atlantic hawksbill turtle. It is also home to 30 bird and animal species which the Texas Department of Parks and Wildlife has recommended for protection. Many of the plant species found in these communities are also rare and unique, such as the Texas ebony, the Montezuma cypress, and native palms.

It is critically important that this habitat be protected immediately. This brush country is prime agricultural land when cleared. An estimated 90 percent of this brush habitat has already been cleared on the U.S. side of the river, and it is estimated that if the current trend continues there may be no unprotected brush remaining within 5 years on the U.S. side of the border. In addition, massive land clearing operations have been launched in Mexico in recent years.

Since this refuge was authorized in 1979, less than $3 million has been appropriated for land acquisition. Yet the Fish and Wildlife Service has been able to protect about 10,000 acres through an innovative combination of land purchases, donations, and long-term no-cost leases with public entities such as the Brownsville Navigation District.

Interior Secretary Watt has recognized the importance of early land acquisition efforts at the Lower Rio Grande Valley National Wildlife Refuge. In his letter of July 12, 1983, to Chairman McCLURE regarding the House-passed Interior appropriations bill, Secretary Watt recognized that this refuge has a high priority from a resource management prespective and recommended that the Rio Grande Valley National Wildlife Refuge be included if any funds are appropriated for land acquisition. This land acquisition program is also strongly supported by conservation groups such as the Audubon Society.

Mr. President, we are simply asking that the funding priorities for wildlife refuge land acquisition in this bill be modified to reflect the consensus that the Lower Rio Grande Valley National Wildlife Refuge should be one of the

top-priority projects. If we do not move quickly to protect this key wildlife habitat, then it will be lost forever. I urge my colleagues to support this amendment.

Mr. McCLURE. Mr. President, I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2174) was agreed to.

AMENDMENT NO. 2175

Mr. McCLURE. Mr. President, on behalf of Senator WARNER, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE), for Senator WARNER, proposes an amendment numbered 2175.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amendment No. 2142 is amended by adding the following new section (b):

"(b) No more than 25 additional permits shall be issued pursuant to this amendment."

Mr. McCLURE. Mr. President, this amendment is one to which Senator WARNER made reference earlier today.

The PRESIDING OFFICER. Will the Senator suspend for one moment?

This amendment amends an amendment previously agreed to so it will take unanimous consent to consider the amendment.

Mr. McCLURE. Mr. President, I ask unanimous consent that it be in order to consider this amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. McCLURE. Mr. President, this is the amendment to which Senator WARNER made reference earlier today. It limits the effect of the Helms amendment, which was adopted yesterday, by setting a cap or an upper limit on the number of people affected by the amendment.

I know of no opposition to the amendment. I hope it will be agreed to.

Mr. WARNER. Mr. President, the purpose of this amendment is to cap at 25 the number of permits which can be issued by the Fish and Wildlife Service under Helms amendment No. 2142 which was agreed to by this body yesterday.

The intent of the Helms amendment is to provide vehicular access through the Back Bay Wildlife Refuge in Virginia to permanent, full-time residents of North Carolina as of April 1, 1983, who can substantiate that access is essential to maintaining their livelihood and to a very small number of other residents who do not precisely meet other categories of residents now eligible for permits.

Upon careful review of the Helms amendment, I became concerned about the implications of the provision providing permits if necessary to maintain a livelihood. Depending upon the interpretation of this phrase, vehicular access to the refuge could be substantially increased, possibly resulting in damage to the fragile environment.

Senator HELMS has graciously assured me that this is not his intent and has agreed to modify his amendment to satisfy my concerns. I want to express my appreciation to Senator HELMS for his willingness to cooperate on this issue which is so vital to both Virginia and North Carolina.

I also want to commend Governor Robb and Virginia's secretary of commerce and resources, Betty Diener, and others in Virginia and North Carolina who are working on a bistate agreement relating to access and protection of both False Cape State Park and the Backbay Wildlife Refuge.

Mr. JOHNSTON. We have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2175) was agreed to.

AMENDMENT NO. 2176

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment number 2176.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, between lines 14 and 15, insert the following new appropriation account:

"VISITOR FACILITIES FUND

For grants to the National Park Foundation for reconstruction, rehabilitation, replacement, improvement, relocation, or removal of visitor facilities within the National Park System, and related expenses, as authorized by Public Law 97-433, $5,800,000 to remain available for obligation until September 30, 1989, to be derived from the National Park System Visitor Facilities Fund."

Mr. McCLURE. Mr. President, this amendment deals with the national park system visitor facilities fund and the National Park Foundation and would allow the National Park Foundation to enter into the kind of arrangement which we have been trying to get whereby they actually perform some of the functions that the National Park Service has been doing directly. The National Park Foundation would be allowed to perform some of the repair and rehabilitation of visitor facilities within the National Park System under the conditions outlined in the amendment.

Mr. President, Public Law 97-433 established the National Park System Visitor Facilities Fund, to which is to be credited an amount equal to all national park system concession fees paid to the Government after October 1, 1982, and authorized the appropriation of such receipts to the National Park Service, to be made available to the National Park Foundation for the repair and rehabilitation of visitor facilities within the national park system.

To date, about $5.8 million has been credited to the visitor facilities fund. This amendment appropriates those receipts to be spent on existing selected facilities in five national parks.

In proposing this amendment, I am concerned that the National Park Foundation, which is to be credited with undertaking this extremely valuable task, is careful to limit the use of money provided from the visitor facilities fund to project related activities only. There are a number of these costs identified in the material to be inserted into the RECORD that is appropriate to be charged to the fund. I want it to be clear, however, that the foundation is not having its overall operating cost subsidized by this amendment but instead is merely recovering appropriate costs associated with its functions under the act.

Mr. President, I ask unanimous consent to have printed in the RECORD justification material submitted by the Department of the Interior.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

BUDGET JUSTIFICATION—VISITOR FACILITY FUND—FISCAL 1984

Public Law 97-433, passed on, January 8, 1983, established the National Park System Visitor Facility Fund (VFF). The source of income to the fund is to be national park concessioner franchise and building use fees. Appropriations are authorized to begin in fiscal 1984, though deposits to the fund began on October 1, 1982, as provided for in the act. Estimated income to the fund during fiscal 1983 is $6.0 million. Work to be accomplished under this act includes reconstruction, rehabilitation, replacement, improvement, relocation or removal of concession operated visitor facilities located in the National Park System in which no concessioner has a possessory interest. The Director of the National Park Service is to develop a list of qualifying projects to be submitted to the National Park Foundation. The Foundation is to carry out these projects from amounts appropriated from the fund and granted to them by the Secretary.

With the passage of this law, the National Park Service began to collect specific demographic, architectural, and engineering data on those facilities which qualified for treatment under the act. To date, 1,005 buildings

in all 10 Regions of the country have been indentified as eligible. Forty-three parks are represented with half of the buildings found in five parks alone: Grand Canyon National Park, Olympic National Park, Bryce Canyon National Park, Zion National Park, and Glacier Bay National Park and Reserve. Over half of the buildings are used as public or employee sleeping cabins, while 80 percent of all structures are less than 2,000 square feet in size. Fifteen percent of the buildings have some historic value.

For all eligible structures, the National Park Service has undertaken an inventory and inspection program using a team of professional architects, engineers, and fire protection specialists from the Georgia Institute of Technology and the National Bureau of Standards. Comprehensive building reports are being prepared currently which document the types of building materials present; their quantities and condition; rating them as being good, fair or poor. This report specifies deficiencies in the following nine building systems: site, interior structure, exterior structure, electrical, fire/life safety, handicapped accessibility, heating, ventilating and air conditioning (HVAC), public health, and plumbing. Deficiencies are classified by severity as being either critical, serious or minor. The inspectors use national consensus standards and provide a reference citation to the applicable code violated.

The architects and engineers on the team prepare a work recommendation to correct every problem found during the inspection. Cost estimates are generated by using a nationally recognized repair and rehabilitation guideline which may be modified by the inspection team in each park to reflect any special conditions which would impact on project costs such as remoteness of location or short construction seasons. All eligible buildings have been inspected.

The fiscal 1984 list of projects has been developed, reviewed and approved by the National Park Service and the National Park Foundation. This list is attached with project detail sheets for each.

Visitor facility fund, fiscal year 1984

Park, State, and fiscal year 1984 project description	*Estimated cost*
Olympia, Wash.:	
Rehabilitate 2 lodges and 10 cabins	$1,500,000
Death Valley, Calif.:	
Renovate Stove Pipe Wells concessions buildings, provide replacement dormitory	2,069,000
Crater Lake, Oreg.:	
Phase 1, planning replace lodge and 2 support buildings	100,000
Mammoth Cave, Ky.:	
Repair cabins, Sunset Lodge and provide replacement dormitory	180,000
Glacier Bay, Alaska:	
Phase 1, rehabilitate Glacier Bay lodge and cabins	750,000
Subtotal	4,599,000
15-percent contingency	690,000
Subtotal	5,300,000
Planning, engineering and administration—National Park Foundation [1]	500,000
Total program	5,800,000

[1] The National Park Foundation estimates that approximately $400,000 of this amount will provide for planning, design, and engineering specifications for fiscal 1984 and future year projects and $100,000 for cost of liability insurance, performance bonds, accounting, legal fees, computer time and the Foundation's administrative expenses.

NATIONAL PARK SERVICE

FISCAL 1984 VISITOR FACILITIES FUND PROGRAM

Park: Crater Lake National Park.

Region: Pacific Northwest

Project title: Replace Crater Lake Lodge and two support buildings, Phase 1.

Development limitation amount remaining: N/A.

Project detail:

[In thousands of dollars]

	Fiscal year 1984 (estimate)	Future (estimate)
Planning/design for lodge and support buildings	100	5,500
Total	[1] 100	

[1] Estimate based on Denver Service Center and private consultant reports.

Fiscal year 1984 project schedule:

	Quarter				Fiscal year 1985
	1st	2d	3d	4th	
Design start	X				
Design completion				X	
Construction start				X	

Project justification

Project description: Planning and design for the replacement of Crater Lake Lodge.

Need: The present lodge, with serious fire safety deficiencies and structural problems, must be replaced. Its V shaped plan catches snow and allows drifts over the building's fourth story. Twisting and compression from snow loads cause separation of floors and walls. Consultants estimate that to rehabilitate the lodge into a modern usable hotel and restaurant facility would cost $8 to $10 million, but construction of a new facility could be done for $5.5 million. Planning and design work will be for 25 hotel rooms, dining, meeting, and parking facilities, a ski shop, and 50 guest cabins totalling about 53,000 square feet.

Park: Mammoth Cave National Park.

Region: Southeast.

Project title: Repair 24 public use cabins, Sunset Lodge, and 2 support buildings; replace 1 employee dormitory and 5 employee cabins with 1 dormitory.

Development limitation amount remaining: N/A.

Project detail:

[In thousands of dollars]

	Fiscal year 1984 (estimate)	Future (estimate)
Repair 24 public use cabins, lodge, and 2 support buildings	30	
Replace employee dormitory and 5 employee cabins	150	
Total	[1] 180	

[1] Estimate based on architectural and engineering reports and similar facilities.

Fiscal year 1984 project schedule:

	Quarter				Fiscal year 1985
	1st	2d	3d	4th	
Construction start	X				
Construction completion				X	

Project justification

Project description: (1) Install fire estinguishers and handrails in public use cabins and support buildings, and construct fire stops in Sunset Lodge. (2) Demolish brown dorm and 5 obsolete employee cabins and replace with one central dormitory.

Need: (1) Public use cabins and Sunset Lodge are overnight visitor accommodations and the lack of fire safety equipment presents a serious life safety hazard; support buildings are used to house flammable materials such as linen. (2) Employee dorm and cabins are 1930's construction and suffer from serious structural deterioration and fire safety deficiencies. Their removal and replacement is recommended by architectural and engineering consultants.

Park: Death Valley National Monument.

Region: Western.

Project title: Renovate Stove Pipe Wells concessions; demolish 13 employee cabins and replace with 1 dormitory.

Development limitation amount remaining: N/A.

Project detail:

[In thousands of dollars]

	Fiscal year 1984 (estimate)	Future (estimate)
Renovate 7 motel buildings, 14 support facilities and improve water system	1,069	
Demolish 13 employee cabins and construct 1 dormitory	1,000	
Total	[1] 2,069	

[1] Estimate based on consultant architectural and engineering reports, and park estimates.

Fiscal year 1984 project schedule:

	Quarter				Fiscal year 1985
	1st	2d	3d	4th	
Construction start	X				
Construction completion				X	

Project justification

Project description: Installation of fire safety equipment, heating ventilation and air condition repairs, conversion of saline water system to potable water, demolish obsolete cabins and construct new employee dormitory.

Need: Stove Pipe Wells is a major visitor facility complex for Death Valley. The lack of fire safety equipment presents a serious safety hazard to the visiting public. The use of saline water in mechanical and plumbing systems has accelerated corrosion and deterioration. The employee cabins were initially constructed of substandard materials, have structually deteriorated, and are considered hazardous and obsolete.

Park: Olympic National Park.

Region: Pacific Northwest.

Project title: Rehabilitate Sol Duc Lodge, Lake Cresent Lodge, and 10 public use cabins.

Development limitation amount remaining: N/A.

Project detail:

[In thousands of dollars]

	Fiscal year 1984 (estimate)	Future (estimate)
Renovate Sol Duc Lodge	800	
Renovate Lake Cresent Lodge and 10 public use cabins	700	
Total	[1]1,500	

[1] Estimate based on preliminary plans and specifications.

Fiscal year 1984 project schedule:

	Quarter				Fiscal year 1985
	1st	2d	3d	4th	
Construction start	X				
Construction completion				X	

Project justification

Project description: (1) Complete renovation of electrical, mechanical, plumbing, and fire safety systems at Sol Duc Lodge, including the store, registration, food service, and lounge facilities. (2) Repair deteriorated foundations at Lake Cresent Lodge and in 7 public use cabins, replace obsolete electrical wiring systems in all cabins, and repair/replace heating ventilation and air condition systems in all cabins.

Need: (1) The work at Sol Doc Lodge is the final phase in a major rehabilitation project at the resort and will bring visitor support facilities up to standards. (2) The Lake Crescent Lodge and cabins were built in the years between 1917 and 1947. Obsolete electrical and heating ventilation and air condition systems are a hazard to life safety. Deterioration of the foundations in many of the cabins is causing structural damage. These buildings form the centerpiece of a principal concession facility for the park and are the last remaining visitor facilities at Olympic scheduled for rehabilitation.

Park: Glacier Bay National Monument.

Region: Alaska.

Project title: Rehabilitate Glacier Bay Lodge and 55 cabins, Phase 1.

Development limitation amount remainding: N/A.

Project detail:

[In thousands of dollars]

	Fiscal year 1984 (estimate)	Future (estimate)
Rehabilitate Glacier Bay Lodge, reroof 55 guest cabins and 5 support buildings	750	250
Total	[1] 750	250

[1] Estimate based on similar facilities.

Fiscal year 1984 project schedule:

	Quarter				Fiscal year 1985
	1st	2d	3d	4th	
Construction start	X				
Construction completion				X	

Project justification

Project description: (1) Rebuild auditorium stairs and install second fire stair to 2nd floor, install sprinkler and fire detection systems, relocate boiler room to decrease the fire safety hazard in Lodge. (2) Convert electrical service to 3 phase. (3) Modify toilet facilities and ramps for handicapped access to lodge, and equip 6 cabins for handicapped usage. (4) Reroof 55 guest cabins and 5 support buildings. (5) Enlarge dry storage area in lodge basement.

Need: (1) Previous and proposed expansion to the 2nd floor of the lodge has resulted in increased life safety hazards. The improvements will bring the structure up to code. (2) President electrical system is at capacity, conversion to a three phase system will improve safety, capacity, and efficiency. (3) The lodge and guest cabins are the only public use facilities at the park and as such should provide access to the handicapped. (4) The original roof shingles installed in 1966 are in need of cyclic replacement. (5) Existing dry storage space is too small and results in storage of food stuffs in unexcavated crawl spaces creating a possible health hazard.

Mr. JOHNSTON. Mr. President, the amendment has been cleared and is agreeable.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2176) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO 2177

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an amendment numbered 2177.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 77, line 19 after the word "areas" insert the following: ", any lands designated by Congress as wilderness study areas or any Bureau of Land Management wilderness study areas".

Mr. McCLURE. Mr. President, this amendment deals with the question of how we treat oil and gas exploration, not only within wilderness but also within certain wilderness study areas. It would not deal with RARE II study areas but with congressionally designated study areas and BLM study areas.

The last proviso of section 308 permits the Secretary of the Interior to issue oil and gas leases "for the subsurface of national forests or public land wilderness areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable." Such leases are subject to a "no surface occupancy" stipulation which allows the lessee to enter the lease area only by directional drilling or other nonsurface disturbing methods. This no-surface-occupancy exception to the general leasing prohibition is carried over from the 1983 Interior Appropriations Act.

The language of this proviso appears to limit the exception to designated wilderness areas. There is no logical reason why it should not also apply to the wilderness candidate areas. The same considerations that exist to allow such leasing in wilderness areas apply in the candidate areas.

My amendment, therefore adds the Bureau of Land Management, wilderness-candidate areas to the no-surface-occupancy-leasing exception. Permitting such leasing in the wilderness-candidate areas will not have any effect on our ability to make a wilderness/nonwilderness decision for these areas at some later time. No surface-disturbing activities within the candidate areas are allowed under this exception.

Mr. JOHNSTON. Mr. President, this amendment is now a compromise. It has been cleared and is agreeable.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 2177) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I think there are only three amendments of which I am aware of at this point: The Metzenbaum amendment with respect to Forest Service timber relief; the amendment of the Senator from New Mexico (Mr. DOMENICI), which was discussed and debated earli-

er and upon which the germaneness question was submitted to the Senate and voted upon; and an amendment to be offered by the Senator from Oklahoma (Mr. NICKLES) with respect to the National Park Service funding. I know of no other amendments.

I understand that we are trying to clear a unanimous-consent agreement to deal with those amendments. I believe it is possible to do that.

Mr. METZENBAUM. Mr. President, will the Senator from Idaho yield?

Mr. McCLURE. I am happy to yield.

Mr. METZENBAUM. The Senator from Ohio has indicated that he may have three amendments which could be called up, but I do not anticipate that it will be necessary to call up more than one. However, in any unanimous-consent request, I would want to be protected with respect to all three.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, I rise today to address what I think is the Department of the Interior's hasty and unconsidered oil and gas leasing proposal for huge areas off Florida's shores. I object to this, not because it can do grave harm to our environment—although it can—I object to it because, in Florida, water is big business. Millions of people from all over the world travel specifically to Florida for its pristine and lovely beaches, its spectacular ocean scenery, and its warm, clear, and clean water.

Florida is a peninsular State. Consequently, water is important to us in many ways, and we respect it. We have 730 miles of coast and 2,000 miles of shoreline including islands and bays. The salt waters of the Atlantic Ocean and the Gulf of Mexico surround us, and our so-called dry land is saturated with fresh water. Yes, our water surrounds us and pervades us, and it is the drawing card—like the Sun—for our biggest industry: Tourism. The problem here is that the Department of the Interior is treating Florida as just any old area suitable for oil and gas exploration.

Well, it is not. In Florida, the Atlantic Ocean, the Gulf of Mexico, and the beaches that face them are a unique source of business—and pleasure. Our water is not only a most valuable natural resource, it is one of our greatest assets.

There are over 643,000 people employed in the industries and occupations related to tourism, such as hotels and motels, airlines, tourist agencies, recreation service, and retail sales. Six-hundred forty-three thousand employees out of a total work force of 3,700,000 represents 17 percent of the work force in Florida. Since tourists flock to Florida from all over the world primarily to enjoy its sunny beaches and clear, pure water, it is my responsibility to insure that these waters do not lose their appeal.

Florida commercial and sports fishermen also have a vested interest in the quality of gulf waters. Along our west coast, where drilling is proposed to take place 10 miles from shore, fishermen harvest at least 20 varieties of fish, crabs, lobster, shrimp, and oysters. These valuable culinary assets are worth protecting. In addition, the sports fishing industry also employs over 19,000 people throughout the State of Florida, and earned revenues of $168 million in 1981. Let us keep these most valuable assets employed.

Now Mr. President, those of us in Florida concerned about the possible effects of OCS exploration on the tourist and fishing industries realize that massive oil spills are not the primary concern here, although the Department of Interior's own Environment Impact Statement on the eastern gulf sale indicated that we could expect an upper limit of six spills during the life of the sale—I wonder what the lower limit looks like. No, we have to be more concerned with the daily effects of conventional OCS operations, should they be initiated in areas that are not adequately studied or in areas that are close to coastal areas. Most of our coastal areas support the habitates of animals like Manatees, sea turtles, brown pelicans, bald eagles, and American crocodiles. Formation waters, drilling muds, drill cuttings, all byproducts of every oil production site, have been found to contaminate the surrounding marine environment. Studies on organisms from photoplankton to marine mammals prove many adverse reactions. Some discharges cause disease. Others cause changes in enzyme levels, respiration rates, and excretion rates. Organisms in the larval or spawning stage are the most easily destroyed.

Now, I have been told that the congressional appropriations process should not be used to debate the merits of the Federal OCS exploration program. I have been told that this program is designed to run smoothly and automatically under the 1978 Outer Continental Shelf Lands Act through a cooperative series of negotiations between the Department of Interior and State OCS agencies. If I believed that this were happening as planned, I would not be speaking here today.

The cooperative approach has worked in years past, but many of the ground rules for OCS Federal leasing have changed since then. In the past, the areas selected for leasing were smaller, and the amount of time that State governments spent analyzing proposed lease tracts was much greater. Today, the compressed timeframe for decisionmaking and the greater areas under consideration make close cooperation between the Department and the State governments imperative. It is my understanding that this cooperation has not come about. It is difficult for me to criticize the Department because I know they have the tough task of insuring that our Nation has the petroleum resources necessary to become energy independent. But, I cannot help but notice that negotiation efforts between the Department of Interior and the State of Florida do not really get moving until congressional pressure is brought to bear.

Yes; I have strong feelings on this matter. On the one hand, we have thousands of inadequately studied acres of ocean below the 26th parallel northwest of the Florida Keys. Northward, up the coast, we have environmentally sensitive ocean waters, the big bend seagress beds, and the middle ground coral reefs. Everyone should know that much of this area has been made available for industry nominations before. In fact, industry handed much of this acreage back to the Federal Government after meeting with no drilling success. Since 1974, 33 wells have been approved for drilling, 32 have been dry holes, and 1 is still in progress. To date, there has been no discovery of production hydrocarbons within Florida's OCS areas. Even if this sale were to go forward without restrictions, which I hope it does not, Florida OCS experts do not expect the sale of more than 40 of the 11,000 tracts available.

On the other hand, what are Florida's interests here? They include a $168 million fishing industry, $113 million of that off the west coast, a statewide sport fishery that spends $322 million a year, much of that in our offshore waters, and finally, a $17 billion-a-year tourist industry.

Mr. President, we all come here to Washington faced with sometimes conflicting charges: First, to represent the interests of our Nation as whole, and second, to represent and protect our State's resources and interests the best we can. In this case, I do not find the balancing act difficult. The supposed damage that a moratorium would cause to the Department of Interior's 5-year OCS plan is not so serious to justify putting at risk two of that Florida's primary industries and one of our most valuable assets: our pure, clear waters.

The Department of the Interior must be persuaded to recognize the uniqueness of our State of Florida and work more closely with Florida State OCS experts to insure the protection of our water—priceless, because no one

can put a value on it, and because, once gone, it can never be replaced.

I strongly urge my colleagues who will be serving as conferees on this legislation to consider my remarks here today when considering language in the House version of this bill which calls for a moratorium on the eastern gulf OCS sale.

Mr. President, will Chairman McCLURE agree with me that some States have an inherently higher stake in maintaining the quality of their offshore water and marine resources?

Mr. McCLURE. I would certainly agree that coastal States have unique offshore resources which must be developed and maintained in an environmentally and economically acceptable fashion.

Mrs. HAWKINS. Would the chairman agree with me that cooperation between the Interior Department and State OCS authorities in accordance with the law is indispensable to an effective OCS program?

Mr. McCLURE. There is no question that cooperation is imperative to responsible decision making.

Mrs. HAWKINS. Would the chairman agree that the U.S. Senate, and particularly the Senate Energy Committee, has a responsibility to see that the letter and the spirit of the 1978 OCS Lands Act is carried out so as to facilitate efficient OCS activities?

Mr. McCLURE. We indeed have oversight responsibility for the OCS program.

Mrs. HAWKINS. Then, Mr. President, the chairman will understand why the Senator from Florida will probably vote for this appropriation bill, because it is generally a good bill, but only after acknowledging that she would have preferred to omit from the bill funds necessary to hold OCS lease sales off the west coast of Florida. I urge the chairman and all conferees on this bill to consider my concerns on this matter during their further consideration of this legislation.

Mr. SPECTER. Mr. President, I rise at this time to discuss with the distinguished chairman of the Appropriations Subcommittee on Interior and Related Agencies a matter we briefly discussed at the full committee markup, Centralia.

In the fiscal year 1982 Interior appropriations bill, I offered an amendment, and it was accepted, to appropriate $850,000 to be available to the Bureau of Mines "to define the extent of the subsurface mine fire in Centralia."

As a result, on July 12, 1983, the Department of Interior, Office of Surface Mining, released a detailed engineering analysis which for the first time documented the full scope and severity of the situation occasioned by the fire.

In addition, the analysis contained a review of all possible options for putting out the fire or otherwise controlling the blaze. While none of the options outlined are inexpensive, there are reasonable alternatives that can be implemented without bankrupting the Federal Government.

On August 11, 1983, the citizens of Centralia voted to determine which option was most desirable to them—345 residents voted to relocate to a safe location; 200 people voted to remain. I have been informed by representatives of the Governor's office that many of the people who voted in favor of remaining in Centralia are now reconsidering their position and more people can be expected to support relocation.

Under the leadership of Pennsylvania's Governor Thornburgh and Secretary Watt, a multiagency task force will soon be organized in order to develop a plan for relocating those residents of Centralia who wish to move. The Pennsylvania Department of Environmental Resources has initiated a study to compute relocation cost estimates. The task force will submit its recommendations for funding to the Congress. It is my hope that the task force will complete its work quickly and the Appropriations Committees of the Senate and the House can proceed as soon as possible.

I have spoken with Senator McCLURE about Centralia on a number of occasions and have found him extremely sympathetic to the problems caused by the Centralia mine fire. I very much appreciate Senator McCLURE's help and cooperation on this matter and I look forward to continuing our efforts to find a solution to this persistent problem.

Mr. McCLURE. I thank the Senator from Pennsylvania for his remarks. I look forward to working with him to help resolve this extremely difficult problem experienced by the residents of Centralia and Byrnesville for so many years.

I note that the House addressed this issue in its report accompanying the 1984 Interior appropriations bill, and I know that the House and Senate will also work together closely to find solutions to this 22-year-old tragedy.

I pledge to work with the two Senators from Pennsylvania to address the problems caused by the Centralia mine fire and to find potential solutions in as short a timeframe as possible.

Mr. HEINZ. Mr. President, I rise today to thank the distinguished chairman of the Appropriations Subcommittee on the Interior and Related Agencies for his attention to the concerns of the people of Centralia and to reinforce the statements of my colleague from Pennsylvania requesting prompt action on the mine fire problem in Centralia.

Since May of 1962, the community of Centralia has been disrupted and torn by a spreading underground mine fire. This fire costs many of the residents their livelihood in the mines and now endangers their homes and even their lives.

Last year, I worked to secure a special line item appropriation for the Department of the Interior to study the extent of the Centralia mine fire and outline options for its control. On July 12, 1983, the Office of Surface Mining released the report and the results were certainly significant.

This study found that the Centralia mine fire is more extensive and threatening than originally believed. If this fire is left uncontrolled, it could spread over an area of approximately 3,700 acres and the communities of Centralia, Byrnesville, Germantown are situated within this area and are threatened.

Several fire control options were outlined by the Office of Surface Mining study. Fire control costs range from $103.5 million to $66.3 million. Relocation of the community homes, businesses, and other institutions would cost approximately $50 million.

After the release of the Office of Surface Mining study a poll of Centralia homeowners followed on August 11. This poll indicated that a clear majority prefered to relocate, thereby setting the stage for appropriate Federal and State action.

Last week the Secretary of the Interior agreed to form a task force of eight Federal agencies to analyze and recommend which existing Federal programs should be used to help the residents of Centralia. This task force will report to Congress how much of the total relocation cost can be assumed under existing programs. Having targeted these programs, I believe the Congress can move swiftly to resolve the 21-year-old Centralia tragedy.

Mr. President, the distinguished Senator from Idaho can be assured of cooperation from both Senators from Pennsylvania, the State's delegation, and the Commonwealth of Pennsylvania. Working together I feel confident that the Federal Government can respond promptly and effectively to the wishes of the people of Centralia. Would the distinguished chairman of the Subcommittee on Interior Appropriations agree Congress should stand ready to assist the citizens of Centralia and the State of Pennsylvania in dealing with this problem?

Mr. McCLURE. I thank the distinguished senior Senator from Pennsylvania for his remarks, and I repeat my pledge to work with all concerned to find ways to solve this problem.

● Mr. JOHNSTON. Mr. President, it has recently come to my attention that the Office of the Solicitor at the Department of the Interior has accorded a troublesome interpretation to

bill language included in the fiscal year 1983 Interior appropriations bill, which is repeated again this year in section 312 of H.R. 3363. That language, which is found on page 78 of this bill, reads as follows:

SEC. 312. Funds provided for land acquisition in this Act may not be used to acquire lands for more than the approved appraised value (as addressed in section 301(3) of Public Law 91-646) except for condemnations and declarations of taking, without the written approval of the Committees on Appropriations.

According to the Solicitor's Office, one interpretation of this language in light of the June 23, 1983, Supreme Court decision in *Immigration and Naturalization Service* v. *Chadha*, 51USLW 4907, is that the final clause, "without the written approval of the Committees on Appropriations", would fall in a legal test of its constitutionality. This, the Solicitor's Office believes, would leave the Department without authority to purchase any land "for more than the approved appraised value" except for condemnations and declarations of taking.

Mr. President, I ask unanimous consent that a copy of a memo sent from the Assistant Solicitor, Administrative Law and Legal Services, Division of General Law in the Department of the Interior to the Director, Office of Budget in the Department of the Interior dated July 13, 1983, be printed in the RECORD at this point. This memo outlines the interpretation accorded section 312 by the Department which I have attempted to summarize above.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SOLICITOR,
Washington, D.C., July 13, 1983.

Memorandum to: Director, Office of Budget.

From: Assistant Solicitor, Administrative Law and General Legal Services, Division of General Law.

Subject: Section 312, fiscal year 1983 Appropriations Act.

In a separate memorandum requested by Mike O'Bannon we are opining that § 312 of the fiscal year 1983 Interior and related agencies Appropriations Act contains a legislative veto that will not withstand constitutional scrutiny under the principles announced in *Immigration and Naturalization Service* v. *Chadha*, 51 USLW 4907 (June 23, 1983).

Pursuant to an agreement between Mike and I, the opinion does not address the impact of this conclusion on the authority of the Department to purchase land for more than the approved appraised value. Because the two attached packages involve land purchases in excess of appraised value, and because additional such purchases during the remainder of fiscal year 1983 are possible, the question of our continuing authority does need to be addressed.

Section 312 reads as follows: "Funds provided for land acquisition in this Act may not be used to acquire lands for more than the approved appraised value . . . except for condemnations and declarations of taking, without the written approval of the Committees on Appropriations."

The problem is whether the application of *Chadha* strikes all of § 312 or only the final clause. If only the final clause is struck, the remaining languages leave the Department without authority to make purchases for in excess of approved appraised value.

The key question that a court would look at in resolving this problem is the question of what Congress would have done in § 312 had it known that the legislative veto was to be held unconstitutional. A good argument can be made that Congress would nonetheless have included the restriction on excess cost purchases. Contrary arguments can also be made, however.

Given the legal uncertainty concerning our continued authority, it may be appropriate for a policy decision to be made as to the course to follow through the remainder of the fiscal year. We can support the decision that is made with appropriate legal arguments.

JOHN D. TREZISE.●

Mr. JOHNSTON. Mr. President, I raise this issue because I believe it is important for the Senate to give the Department some needed guidance in interpreting the legislative intent of section 312.

Is it the distinguished floor manager's understanding that the language contained in section 312 is designed to prevent any purchases of land in excess of their appraised value?

Mr. McCLURE. No. The purpose of this language is to increase congressional oversight of land purchases, not to prevent acquisition.

As the Senator is aware, we both have had difficulty in obtaining the information we need from the administration to establish priorities in the land acquisition programs. We have been unable to obtain any meaningful acquisition priority lists from the administration. We have been unable to obtain appraisals of high-priority tracts, and nail down reasonable and justified allocations, prior to congressional budget action. We have thus been forced into the unpalatable position of appropriating funds for land acquisition in a vacuum, based on the best guesstimates of our staff and not on hard data.

Mr. JOHNSTON. Is the Senator saying, then, that there is no objection to purchases in excess of appraisals if these overages are justified to and approved by the Appropriation Committees in advance?

Mr. McCLURE. Yes. If we in the Congress are to exercise effective oversight of Government spending, which is our clear duty and responsibility, we must know why the cost of a particular parcel exceeds the appraisal and by how much. Since we have been unable to obtain this information in any other way, this bill language is included to provide use with the data we must have to exercise our responsibility in seeing that funds appropriated are spent wisely and prudently.

There should be no doubt about the intent of this language. It is not meant to stop any acquisition of any tract in excess of the appraised value. It is simply intended to assure that any such excesses are justified to Congress in advance of the purchase.

Mr. JOHNSTON. I thank the Senator for his thorough, clear explanation. I agree that, given the refusal of the administration to furnish the Congress with adequate information on which to base our acquisition allocations, we need to provide a mechanism for congressional oversight.

However, I am concerned that some in the administration will try to interpret this language to accomplish their own purposes, purposes not shared by the Congress, and will attempt to use this language to stop certain land purchases. I believe the Senator's explanation forcefully clarifies congressional intent and should prevent any attempt, whether deliberate or unintentional, to use this language to halt land acquisition, a proposal which both the House and the Senate have rejected on a bipartisan basis in each of the last 3 years.

Let me pose one final question. If the Department finds that this language, despite congressional intent to the contrary, does in fact prevent acquisitions in excess of the approved appraised value, will the Senator be willing to alter the requirement in a way which will both accommodate the Congress oversight needs and the administration's perceived constitutional conflict by, for example, amending the requirement that written approval be given to a "lay and wait" provision for a specified time of perhaps 60 days which clearly remains constitutional in face of the Chada decision? That is, would the Senator be willing to entertain alternative ways of accomplishing the objective of section 312?

Mr. McCLURE. Yes, and I will explore this issue with the Department as soon as possible in hopes that we can resolve it prior to conference or on the next available vehicle we have.

● Mr. JOHNSTON. I thank the Senator and look forward to working with him to clarify this matter.●

Mr. METZENBAUM. Mr. President, I ask the Senator from Idaho if he will explain his intent in writing the provision dealing with this Great Plains gasification project.

Mr. McCLURE. Our intent was to simply express the judgment of the committee that the conditions for direct negotiation between the SFC and Great Plains have been met.

Mr. METZENBAUM. Precisely what impact does this language have on SFC?

Mr. McCLURE. Its impact should be completely neutral. That is, the SFC is totally free to make its own determination as to whether the conditions

for direct negotiation have, in fact, been met. This language is in no way meant to direct, pressure or otherwise prejudice the SFC's own interpretation of applicable law.

Mr. METZENBAUM. So, if the SFC disagrees with the statement made in this report, it should feel free to follow whatever procedures it believes are appropriate in evaluating whether to enter direct negotiations with Great Plains?

Mr. McCLURE. That is correct. The Board is free to make its own judgment on whether the conditions required by law for direct negotiation with Great Plains have been met.

Mr. METZENBAUM. Public Law 97-100 gives the Department of Energy jurisdiction over the loan guarantee to the Great Plains project. How does the language in the 1983 appropriations bill affect, if at all, the relationship between DOE, SFC and the Great Plains project?

Mr. McCLURE. It has absolutely no relationship. Nothing in this language should in any way be construed as affecting the existing statutes governing DOE's jurisdiction over the loan guarantee to Great Plains project.

Mr. METZENBAUM. So there is no intent in this language to transfer the Great Plains loan guarantee from the DOE to the SFC?

Mr. McCLURE. That is correct.

Mr. METZENBAUM. I thank the Senator.

TISHOMINGO NATIONAL FISH HATCHERY

Mr. BOREN. Mr. President, will the distinguished chairman of the Interior Appropriations Subcommittee yield for a question?

Mr. McCLURE. I yield to the Senator from Oklahoma.

Mr. BOREN. Mr. President, I ask the Senator from Idaho (Mr. McCLURE) if he would consider recommending to the conferees the reinstatement of funding for the Tishomingo Fish Hatchery, by accepting the House position in the joint House-Senate conference committee on H.R. 3363.

As he may be aware, full funding of $190,000 was provided for this facility in the House version. The House committee was persuaded that this 55-year-old facility is an important part of our Nation's fish and wildlife program and is an integral part of the local economy of Johnston County and southern Oklahoma.

I understand that due to the length of service of this facility that substantial repairs will need to be made in the future to bring this facility back up to par with other facilities. But, I believe that the importance of this hatchery is certainly worth the financial commitment and that retention of this facility is fully justified.

Mr. NICKLES. Mr. President, will my good friend from Oklahoma yield?

Mr. BOREN. I am happy to yield to my colleague.

Mr. NICKLES. I should like to echo the Senator's request to Chairman McCLURE that funding for the Tishomingo National Fish Hatchery be accepted by the conferees on H.R. 3363.

I point out that this one hatchery alone supplied over 1.8 million fish in 1982 to Oklahoma, New Mexico, Colorado, and Texas. It also supplies eggs and fry for research purposes to Columbia, Mo., Brigham Young University in Utah, and Stuttgart, Ark. And it was this facility that pioneered the development of mechanical hatching of small mouth bass and channel catfish, methods now being used by other hatcheries all across the country.

It is also important to note that southern Oklahoma and Johnston County have an unemployment rate well in excess of the national average. This facility employs 10 full-time staff as well as high school students in the summer. And it is an important educational facility used by public school groups, Boy Scout troops, and the local college.

For these reasons, I urge our distinguished chairman to retain this facility when the conference committee meets to iron out differences on H.R. 3363.

Mr. McCLURE. I appreciate the comments of both Senators from Oklahoma in support of the Tishomingo National Fish Hatchery in Johnston County, Okla.

The committee considered a number of criteria in developing a list of hatcheries to recommend for closure. Primarily, it considered the reason for the initial establishment of the hatchery; the distribution of the fish produced by these hatcheries into Federal, State, or private waters; the purpose for the Federal use of fish produced; and the future rehabilitation costs of the hatchery.

As both Senators know, I am not prepared at this time to accept an amendment on the Senate floor which would retain money for the Tishomingo Hatchery. However, I am aware of the importance of this hatchery from your comments and I will urge the conferees to give this matter very serious consideration when it comes before the joint House-Senate conference.

Mr. BYRD. Mr. President, I join the distinguished Senator from Oklahoma (Mr. BOREN) in his remarks in support of the Tishomingo Fish Hatchery, located in southeastern Oklahoma. As he has pointed out, the facility has operated for 55 years in Johnston County, Okla.

I speak with firsthand knowledge of the importance of fish hatcheries to local economies, having been deeply involved with similar facilities in West Virginia. I hope that when H.R. 3363 reaches the conference committee, the conferees on the part of the Senate will recede to the House position on this matter, which provides for funding of $190,000 for fiscal 1984 for the Tishomingo Fish Hatchery.

Mr. BOREN. Mr. President, I thank the distinguished Democratic leader and ranking member of the subcommittee for his remarks and especially for his support of our efforts to keep open the Tishomingo Fish Hatchery. His support is welcome and will be of great help.

KETTLE FALLS HOTEL

Mr. BOSCHWITZ. Mr. President, I rise to discuss with my colleague from Minnesota, Senator DURENBERGER, and with the chairman of the Interior Appropriations Subcommittee, Senator McCLURE, a very serious problem that exists in northern Minnesota. The problem is the deterioration of the Kettle Falls Hotel in Voyageurs National Park.

The hotel is located on the Minnesota-Canada border in Voyageurs National Park. It was built in 1913 and was owned and operated by the Williams family from 1918 until it was purchased by the National Park Service in 1977. The Williams family still operates the hotel under a concessions agreement with the National Park Service.

The hotel is a major attraction in Voyageurs National Park, however, it is deteriorating rapidly and in desperate need of repair. There is a serious question as to whether the hotel can even operate next year under these conditions. When the Williams family sold the hotel to the Park Service, it was on the condition that the hotel would be preserved and maintained.

The current problems with this hotel are very serious. The boom logs that serve as the hotel's only foundation are nearly rotted away. This has caused the outside walls to sink, which in turn has caused the floor to buckle throughout the hotel. Literally, the hotel is falling apart. It is extremely important that the Park Service act quickly to make improvements. The Park Service currently has a planning study underway to determine the extent of rehabilitation necessary.

We had considered offering an amendment today to increase funding for the National Park Service to be used to rehabilitate the hotel. However, because the chairman has reservations about such an amendment, at least until the planning is complete, we have decided not to offer such an amendment.

Mr. President, I yield to my colleague from Minnesota.

Mr. DURENBERGER. I thank my colleague for yielding and for describing the problem we face with the Kettle Falls Hotel. This hotel is an important resource to Voyageurs National Park and to northern Minnesota.

The building is listed on the National Register of Historic Places. For many years it was a gathering place for loggers and more recently for anglers and tourists.

Unfortunately, since its acquisition by the Park Service, the Kettle Falls Hotel has not been properly maintained or preserved. The current operators of the hotel owned it prior to its sale. It is clear from statements they made at the time of the sale and now that it would not have been sold if they had known it would not be maintained.

Mr. McCLURE. President, will the Senator yield?

Mr. DURENBERGER. I am happy to yield.

Mr. McCLURE. I am pleased that our colleagues from Minnesota have brought this matter to the attention of the Senate. I appreciate the Senators not offering an amendment at this time. I recognize that a very serious problem exists at the Kettle Falls Hotel. Both of the Minnesota Senators have raised this issue with my staff and me prior to today. I agree with them that the Park Service should make available funds from whatever account is appropriate and available to begin work to stabilize the building and for critical health and safety problems at the Kettle Falls Hotel as soon as possible. For instance, the Park Service receives $3 million each year for emergency and unscheduled projects that could be used for this purpose. Upon completion of the planning study, I will be very interested in working with the Senators from Minnesota to pursue a final solution to this problem.

Mr. BOSCHWITZ. Senator DURENBERGER and I both appreciate the comments of the Senator from Idaho. As he mentioned, this issue has been raised with him prior to today, as it has also been raised with officials of the National Park Service. They made it clear to me that they recognize the serious condition of the Kettle Falls Hotel and that a colloquy such as this would be helpful to them in expressing our intent that funds should be made available for the hotel in fiscal year 1984. I would also like to again urge the Park Service, as I have privately, to complete the planning study quickly so that restoration work can begin as soon as possible.

Mr. LEVIN. I would like to discuss with the manager of the bill a problem that we face in Michigan, a problem that I understand occurs in other States as well. Michigan is the home of Pictured Rocks National Lakeshore, a national park that is long and narrow because it follows the shore of Lake Superior. The road that winds through the park wanders in and out of the park proper because of the meanderings of the boundaries of this unusually shaped park. This road is maintained by the county even though much of the traffic on the road is visitor traffic to the lakeshore rather than residents' traffic.

The general management plan for the development of the lakeshore, which has been approved by the Park Service, calls for the construction of new roads that would be built and maintained by the Park Service. Given the budgetary constraints on the Interior Department, however, we do not expect this construction to be done for many years. In the meantime, the full responsibility for road maintenance rests with the county. The county does not think this is fair and neither do I. The Park Service is not "pulling its weight" and the county resents that. I would suggest that the Park Service should become a good neighbor and pay for part of the cost of maintaining county roads that service Federal properties.

I understand that currently the Park Service is forbidden from entering into such agreements when the Federal Government does not hold title to the road in question. The Forest Service, however, operates differently. The Secretary of Agriculture is permitted to enter into cooperative maintenance agreements with political subdivisions. I think the Secretary of the Interior should be granted similar authority.

Mr. McCLURE. I understand that there is a problem with road maintenance in several units of the Park Service. The arrangements that the Forest Service is authorized to make with local governments is a useful device and I will have the Energy and Natural Resources Committee consider expanding the authority of the Park Service so that they, too, can enter into maintenance agreements with local governments.

Mr. LEVIN. I thank the Senator from Idaho. I would add that such an agreement governing the operation of Pictured Rocks National Lakeshore could end up saving money for the Federal Government because it would be much cheaper to have the Park Service help pay for maintenance for existing roads than to build new roads—which is what the Park Service now intends to do.

Mr. D'AMATO. Mr. Chairman, during the deliberations of the full Appropriations Committee, I intended to offer an amendment to add $1 million to acquire the threatened properties at Saratoga National Historic Park. Instead, at your suggestion, the committee adopted report language specifying that "The committee directs the Secretary of the Interior to complete work on the Saratoga National Historic Park protection plan (IPP) by November 1, 1983. Furthermore, the committee directs the Secretary to expend such funds as are necessary to acquire through a willing seller negotiation those parcels threatened by development without awaiting completion of the LPP, from the current unexpended L&WCF balances." I thank the distinguished chairman for those actions.

Mr. McCLURE. It was a pleasure to be of service to my colleague from New York.

Mr. D'AMATO. Mr. Chairman, I recognize that it is still possible that Congress will agree to add the $1 million provided in the House bill. However, in the event that this does not occur, is my understanding of the actions taken by the committee correct in that I believe it has compelled the Interior Department to submit to the appropriate congressional committees of both Houses a reprograming request from funds appropriated to the L&WCR, but as yet unspent?

Mr. McCLURE. The Senator's understanding is correct.

Mr. D'AMATO. Is my further understanding correct that the committee's direction in this matter is designed to insure that such a request will be received in a timely manner, prior to the completion of the LPP, if necessary, and, thereby, prevent further damage to these historically essential tracts of land?

Mr. McCLURE. That is also correct.

Mr. D'AMATO. I thank the distinguished chairman.

NEOSHO NATIONAL FISH HATCHERY

Mr. DANFORTH. Mr. President, the oldest operating national fish hatchery in the country today is the Neosho National Fish Hatchery in Neosho, Mo. It was established 95 years ago, in 1888. Over the years it has been modernized into a highly efficient and productive trout and smallmouth bass hatchery. Yet, for want of $123,000, it faces extinction on September 30.

The Neosho Hatchery is a source of substantial economic benefit to southwest Missouri, supplying rainbow trout for stocking into Lake Taneycomo in Taney County on the Arkansas border. This has contributed to Lake Taneycomo's reputation as an outstanding trout fishing location and helps draw thousands of anglers to the area each year. A 1980 analysis concluded that the benefit-cost ratio of the fishery to the area is more than 11 to 1. In addition, the fishery itself attracts more than 30,000 vistors a year.

Neosho began stocking Lake Taneycomo to mitigate the results of a Federal project. The Ozark Power & Water Co. built the Ozark Beach hydroelectric project in 1913 to form the lake. In 1958, however, the lake was transformed from a warm water lake to a cold water lake when the U.S. Army Corps of Engineers completed Table Rock Dam, and as a result the Norfork National Fish Hatchery began mitigation efforts. Neosho took over those duties in 1964 and since that

time has put more than 12 million fish into Lake Taneycomo.

This year the hatchery produced 234,500 rainbow trout, 90 percent of which went into Lake Taneycomo. Neosho also produced 100,000 smallmouth bass for use throughout the country, and it is preparing to increase bass production dramatically next year. The hatchery requires just 1.24 pounds of food to produce a pound of fish—one of the lowest food conversion rates in the country.

The Appropriations Committee reports that closing Neosho would save $123,000 in the 1984 fiscal year. Future year rehabilitation costs are put at $270,000, but I understand that figure is derived from a "wish list" development plan; $85,000 would be a more accurate figure.

Mr. President, $123,000 is not going to put a big dent into a deficit of $200,000,000,000. It would result in a reduction in the deficit of sixty-one one-millionths of 1 percent. The impact on southwest Missouri of closing this hatchery would be far greater.

The House of Representatives recognized this fact and provided the funds necessary for next year's operation. The Senate Appropriations Committee, however, deleted these funds from the bill before us today. This action came as a great disappointment to me.

I will not press this matter on the floor today, but I raise the issue to let the Senate know of my interest in the future of Neosho. I sincerely hope that the conference report will reflect the House position.

NEOSHO FISH HATCHERY

Mr. EAGLETON. Mr. President, I am extremely disappointed by the Senate Appropriations Committee's action not to fund the Neosho Fish Hatchery. In my opinion, it is a ludicrous budget saving effort on the part of the committee, and I would hope that the Senate will try and preserve the $123,000 for our Nation's oldest fish hatchery.

The Neosho Fish Hatchery has been serving our Nation since 1880, and still operates as a mitigation hatchery for Lake Taneycomo and other Federal reservoirs in Missouri and Kansas. The U.S. Fish and Wildlife Service has decided that based on its own criteria the fish hatchery does not qualify as a mitigation hatchery. But, the fact remains that for over 18 years the Neosho Fish Hatchery has been providing all the trout production for Lake Taneycomo.

A brief history of the Neosho Fish Hatchery reveals that the hatchery took over the mitigation efforts of the Army Corps of Engineers late in 1958, when the Norfolk National Fish Hatchery identified a serious disease problem at its hatchery and was unable to provide fish for the Lake Taneycomo project. Neosho has stocked more than 12 million catchable fish at the lake over the last 18 years.

The Neosho Hatchery is estimated to be 60 percent more cost efficient than other hatcheries because of its 1,500 gallon per minute water flow capacity. The hatchery also has been virtually disease free.

Like many other fish hatcheries, the Federal dollars spent at the Neosho Fish Hatchery has been a boon to the economy of the areas in whose streams the fish are stocked. The Neosho Hatchery has 33,000 visitors annually and contributes close to $8 million to the economy of Lake Taneycomo.

The State of Missouri and the U.S. Fish and Wildlife Service have been negotiating a cost-share formula. But, the negotiations have been hampered, because of the basic disagreement on Neosho's mitigation status.

I believe that the committee and the Fish and Wildlife Service are dead wrong in trying to close the Neosho Fish Hatchery. I cannot understand the Fish and Wildlife Service's obstinacy in refusing to change the mitigation status, which would then free the hatchery from the budget ax.

Mr. President, I know of the chairman's reluctance to add additional money to the Senate bill, so I will not seek an amendment to add the $123,000, although I feel it certainly would be money well spent. I would hope that the Senate conferees will go to conference knowing of Missouri's strong interest and support for the Neosho Fish Hatchery, and hope that the money can be retained in conference.

OPPOSITION TO THE OCS PROVISIONS OF H.R. 3363

Mr. KENNEDY. Mr. President, I rise to speak in opposition to the provisions in this bill pertaining to the Outer Continental Shelf (OCS) leasing program, and also to urge that when the conference committee convenes on this legislation, that the House provisions in this area be adopted.

Approximately 1 year ago, Secretary of the Interior, James Watt, announced a new, 5-year plan to govern oil and gas leasing on the OCS. That announcement marked the dawn of a radical new policy for the development of our Nation's offshore energy resources.

Under Secretary Watt's plan more than 1 billion acres are slated to be offered for lease—more than 20 times the acreage which has been leased since the Nation's offshore energy plan was instituted over 30 years ago. Huge tracts—some as large as 130 million acres—are being offered in every coastal region of this Nation irrespective of the differing environmental conditions and sensitivities that exist.

Laws enacted by Congress to insure the proper administration of offshore leasing are being effectively ignored. And under the guise of streamlining measures, Secretary Watt has done away with many of the administrative environmental protections which existed in the process. Cooperation among interested parties has been replaced by contentiousness, lawsuits are increasingly common, and a once-balanced offshore energy program has become extremist.

I do not oppose offshore energy development. Indeed as a Senator from Massachusetts I know firsthand the importance of securing new sources of energy. No State has been hit harder by the enormous price increases in oil and gas since 1973. But the effort to increase our energy supply cannot run roughshod over all other priorities. It cannot and must not be achieved at the expense of our local economy and our rich environmental heritage.

Perhaps many of the members of the Senate Appropriations Subcommittee on Interior have never visited the coastal areas of Massachusetts.

If they were to do so, they would see town after town—New Bedford, Chatham, Gloucester, and so many others—whose economies are based in large part on the rich fishing grounds of Georges Bank. They would see a coastline of priceless beauty, which each year attracts millions of visitors from across the Nation and all over the world.

Last year alone, the fishing industry represented more than $1.5 billion in commerce for our State, and coastal tourism accounted for another $1.25 billion. Too many jobs, too many families, and too many communities depend on our coastal resources to permit the kind of risk-taking inherent in Secretary Watt's drilling plan. It does not make environmental sense. It makes no economic sense either.

The provisions in the House-passed bill represent a minor but significant modification in Secretary Watt's plan. Not a single lease sale will be delayed. Not a single planning area will be removed from leasing.

Only a few areas, where the evidence of environmental sensitivity is significant, will be removed from the leasing process for just 1 year. This additional period will provide the opportunity for further study and analysis necessary to assess properly the risks of oil and gas activity.

Mr. President, those of us who have advocated this brief and limited delay have been labeled antienergy and opponents of the OCS program. The basis for this contention is that one has to be for leasing every single acre of the OCS now, whatever the costs or whatever the consequences. I reject that view and that rationale. We can move ahead aggressively to develop new energy sources, and we can respect other priorities and protect other resources at the same time. We

can proceed expeditiously and also cautiously, and with the House provisions we can instill a measure of commonsense and balance in our Nation's offshore drilling program that is now sorely lacking.

FOLLOWING THROUGH ON THE BUDGET RESOLUTION

Mr. MATHIAS. Mr. President, we see signs of economic recovery all around us. Unemployment is falling. Industrial production is up. And inflation is at a 15-year low. Maryland's unemployment rate has dropped several points on a statewide basis but we still have a long way to go. The jobless rates in six Maryland counties are still well above the national average. Nonetheless, the overall economic picture is improving.

With all of this good news around us, I don't want to sound like a crank by reminding you that the recovery is under a cloud.

When Robert Fulton was about to test his steamboat for the first time, a loud-mouth on the dock jeered "It'll never go; it'll never go." At that point, Fulton started up the engine, and the boat pulled slowly, smoothly, away from the dock and out into the river. Without losing a beat, the same loud-mouth cried out "It'll never stop; it'll never stop."

Let us give credit where it is due, but let us not lose sight of the underlying weaknesses that could jeopardize the recovery. We face many challenges in the coming years—educating our children, keeping the peace, and maintaining a strong economy. We cannot do the first two without the last. If our economy falters, no missile system—MX or otherwise—will be powerful enough to protect us from the consequences.

Right now the No. 1 item on our agenda must be to rein in our staggering budget deficit.

This year's deficit will wind up around $200 billion, almost 6.5 percent of the gross national product. Never since World War II has the deficit exceeded even 4 percent of the GNP. The national debt now tops $1.3 trillion—$1.3 trillion—absorbing two-thirds of available capital. This debt keeps staring us in the eye, and we already feel its chilling effect on the economic recovery.

The prime rate has begun to creep up again after a long steady decline from historic highs under President Carter.

And the stock market has been bouncing around erratically in the shadow of the deficit. Wall Street points to the signs of recovery all around us, but it cannot sustain its drumbeat of dogged optimism when investors know that those deficits are down the road, around the next corner, waiting in the bushes.

Just last week one of our most respected economic commentators, Hobart Rowen, addressed the deficit problem. I ask that the article be printed in the RECORD.

The article follows:

REGAN, REAGAN AND THE REALITY DEFICIT

(By Hobart Rowen)

NEW YORK.—In the financial markets here, Treasury Secretary Donald T. Regan is regarded somewhat quizzically. Although Regan made his reputation (and a considerable fortune) on Wall Street running Merrill Lynch, the typical money manager here (Republican or Democrat) shrugs Regan off as "just a salesman," and is skeptical of his innate financial wizardry.

This is somewhat unfair, because Regan was an innovator who shook up the Wall Street establishment, forcing lower commissions. "I have never believed in not rocking the boat," Regan proudly told a group of reporters a few weeks ago in discussing Wall Street.

What riles the financial men at the moment is a speech Regan made Sept. 8 to the Chemical Manufacturers Association in Washington. He not only jawboned bankers to lower their interest rate charges but, more important, denied that the huge budget deficits facing the nation over the next several years are a major cause of high interest rates.

In brief, Regan says that the Treasury has made an "exhaustive study of the subject, and there is simply no empirical evidence that correlates deficits and interest rates. . . . I am not saying deficits are not a serious matter. They cause a lot of problems. It just happens that high interest rates are not one of them."

This view separates Regan not only from most economists, in and out of Wall Street, but from economic council chairman Martin S. Feldstein, who has made at least a dozen speeches in the past few months blaming high interest rates on budget deficits.

In a telephone interview following Regan's speech, Feldstein said he would not comment directly on the secretary's position. But speaking as an economist on the theory Regan outlined, Feldstein put on the record exactly how he feels:

"I can understand why some people say there is no correlation between deficits and interest rates: They are focusing on nominal [market] interest rates, which have come down.

"It's nevertheless true that the interest rates that matter are real interest rates [subtracting inflation from market rates]. Real interest rates are the ones that cause the 'crowding out' of investment. So this discussion about correlations [between interest rates and deficits] is really beside the point."

But the most important thing, Feldstein said, is that the "correlation" theory doesn't take into account the huge anticipated "structural" deficits in the next several years—the kind that won't be reduced by economic recovery.

"Unfortunately," Feldstein said, "the deficits we see for the next half-dozen years are unprecedented. We're looking at numbers on the order of 5 percent to 6 percent of gross national product. There is no emprical evidence of how these huge deficits will affect real interest rates."

Henry Kaufman, interest-rate seer for Salomon Bros, also pooh-poohed Regan's theory. He told me: "There is just no doubt that if the deficits had been lower in the last year of recession, interest rates would have been substantially lower." Like Feldstein, Kaufman stressed that what worries economists and financial men is the pileup of deficits in the future, as far as the eye can see.

"The correlations that Regan talks about are spurious," was the blunt comment of analyst Sam Nakagama of Nakagama and Wallace.

The business-financial community takes Regan's blast as one more piece of worrisome evidence that the Reagan administration is unwilling to face reality: that some combination of tax increase and spending reductions will be necessary to bring down the deficit.

Regan first trotted out his benign theory at the Williamsburg economic summit. He was hooted down by German Economics Minister Otto Lambsdorff and others in one of their private meetings.

In partial proof, Regan cites the fact that Japan and West Germany typically have larger budget deficits than the United States, as a percentage of GNP, and yet have much lower interest rates. What Regan failed to say is that the level of private savings is much higher in Germany and Japan than in the United States. That means those governments can finance deficits without the fierce competition for funds that drives real interest rates higher here.

The common view in New York is that so long as the president and Congress demonstrate no interest in cutting back the deficit, long-term interest rates will remain high, regardless of Regan's Treasury study. They are quite sure that Ronald Reagan and the "pols" in the White House would rather believe Regan on this point than Feldstein.

Regan isn't troubled by his low marks in Wall Street. "[They] like stability and caution," the secretary said on another occasion, "and I have never been stable or cautious, in Wall Street's opinion." But the obvious split with Feldstein on this issue is more significant, and remains to be resolved.

Mr. MATHIAS. Simply stated, to get Americans back to work, and keep them there, we need an expanding economy. And the economy cannot expand if interest rates do not stay down. And interest rates will not stay down unless we cut the deficit.

We cannot ask Members of Congress to sacrifice the programs that have tremendous importance to the American people unless the sacrifice is part of a comprhensive package that includes new revenue as well. The Reconciliation bill as called for by the budget resolution would be just the package we need.

To get the Reconciliation bill we need some inspired political leadership. Right now, there is a lot of finger pointing and political posturing going on, but that is not going to get the deficit under control. Like it or not, even with further budget cuts, we simply have to raise more money; how to do that, without throwing cold water on the recovery will take great finesse. It is time to get on with the job.

Mr. CHAFEE. Mr. President, I am pleased to join my colleagues to dis-

cuss what I consider to be the most pressing economic issue before the Nation: Federal budget deficits.

On June 23, the Senate adopted the conference report on the first concurrent resolution on the budget. That resolution called for spending cuts and revenue increases that would reduce deficits from more than $200 billion in each of the next 3 fiscal years to $170 billion in 1984, $156 billion in 1985, and $127 billion in 1986.

Tomorrow the Finance Committee will begin its markup on a reconciliation bill to implement—at least partially—the budget resolution. I regret that no one expects that the committee will comply fully with the budget resolution and report 3-year revenue increases totaling $73 billion.

Without action of this kind, we can confidently expect that the national debt will double in the next 5 years.

Peter Grace, chairman of the Private Sector Survey on Cost Control, estimates that at current rates of spending, the deficit will reach $600 billion a year in 1990 and $2.5 trillion in the year 2000.

These are simply fantastic numbers, so vast that they tend to lose their relevance to our everyday lives.

What Congress inability to raise revenues and reduce deficits means is simply this: Continued high interest rates, a stifled recovery, an overvalued dollar, weak exports, continued high unemployment and, ultimately ruinous inflation.

The administration is unyieldingly opposed to revenue increases as a means to help reduce deficits.

Perhaps one reason for the willingness of the administration to endanger the recovery through high deficits is the notion that the recovery will prove to be so much stronger than expected, that it will generate revenues sufficient to reduce the deficit sharply.

This is a seriously mistaken idea, in my opinion. A recent Congressional Budget Office report concludes that while revenues have, in fact, increased since the passage of the resolution in June, estimated outlays have also increased.

In short, it would be unwise for any of us to sit back and pass a reconciliation bill that does not meet the revenue target of $73 billion set by the budget resolution, in the vain hope that the recovery will, in and of itself, produce such revenues that the deficit will be driven down.

Mr. President, I believe that the deficit must be reduced. I feel this is Congress top priority, and I believe we should get on with the job.

Mr. WEICKER. Mr. President, I rise today, along with Senators ANDREWS, MATHIAS, and CHAFEE, to urge my colleagues to carry to a conclusion the work begun here in June when we passed the first concurrent resolution on the budget for fiscal year 1984.

That budget resolution was a deficit-conclusion document. And, I would note here, that it was also a bipartisan document. It took into consideration what was cut in previous years, which for the most part was nondefense discretionary spending. It took into consideration what was growing at a wasteful rate, chiefly defense. And it addressed each of these issues head on. It called for $39.6 billion in spending cuts, with most of that coming from a slowdown in the defense buildup, cutting the annual growth rate of the Pentagon's budget from 10 percent to 5 percent. It called for applying the brakes to entitlement spending too, but without salvaging benefits in the least. And then, because when the numbers were added up the projected deficits were still too large, it called for $73 billion in new revenues to help erase them. In short, it was a blueprint for sustainable economic recovery, fair and fiscally sound. And, by a vote of 50 to 49, this blueprint was approved by Congress, with support from both sides of the aisle.

Unfortunately, since it also called for some hard choices in the reconciliation process, architects willing to build along the lines of the blueprint are now in short supply in this Congress. Why? Is it because we no longer need to worry about the deficit? No, according to the CBO, if Congress sees the budget process through, the deficit in fiscal year 1984 will be $183 billion. If not, it will be $196 billion. The dollar gap between action and inaction grows in the outyears, amounting to a difference of $29 billion in fiscal year 1985 and $71 billion in fiscal year 1986.

Is it because deficits have suddenly taken on a new, benign aspect and are not the bane of our economy as we were told during the balanced budget amendment debates? Have we licked the problem of high interest rates and, therefore, no longer need to concern ourselves with the deficits that help spawn them? Or is it that there really is no causal link between deficits and interest rates? Treasury Secretary Regan seems to think so. A few weeks ago, he told reporters:

> I'm not saying deficits are not a serious matter. They cause a lot of problems. It just happens that high interest rates is not one of them.

The cynical view has it that Congress is reluctant to carry out its reconciliation responsibilities because Members of Congress are more fearful for their political futures than for the economic future of our Nation. And, indeed, the fact that our economy is expected to continue on the upswing between now and election day 1984 might be giving some of my colleagues a false sense of security, and might be causing them to conclude that no government is good government. After all, the statistics are impressive. The economy grew at an annual rate of 9.2 percent during the second quarter of this year, surpassing even the most optimistic predictions. After-tax corporate profits climbed 15 percent, the highest gain ever in dollar terms. Inflation is lower than almost anyone anticipated and unemployment is down too, though not nearly enough. The prime rate stands at 11 percent, 2½ percentage points lower than this time last year. And today's New York Times reports that the Fed appears to be on the verge of promoting even lower rates.

So, why bother to make the tough decisions reconciliation will require? To be fair, on the savings side, the committees have not done half bad. Those charged with addressing cost-of-living-adjustments in benefit programs have more or less complied with the budget resolution. We on the Small Business Committee met today to do our part on reconciliation. However, the two tax-writing committees, Finance and Ways and Means, have so far shown little inclination to raise the $73 billion in new taxes for fiscal years 1984 through 1986. Chairmen ROSTENKOWSKI and DOLE said early on that there was no point in doing so without White House cooperation. And I understand their predicament. The fact that Finance has finally scheduled a markup for tomorrow may indicate a new willingness to cooperate on the part of the White House. I certainly hope so for the sake of the economy and for the sake of this institution and its credibility in the eyes of its constituents. Otherwise, writes Hobart Rowen in the Washington Post:

> Financial markets here and abroad must operate on the assumption that at the earliest, it will be some time in 1985 (if at all) before politicians will deal with these critical issues. Until such time as that happens, record-high interest rates that stifle businessmen's incentive to invest will haunt the U.S. and world economies.

Fletcher Byrom, chairman of the Committee for Economic Development, an organization of chief executive officers and university professors, warns that—

> Out-of-control deficits exposed the U.S. to serious risks of rekindled inflation, higher interest rates, a lopsided recovery and a severely crippled competitiveness in world markets.

So, that is what we have to lose, if we fail to act now. And what do we have to gain? Lawrence B. Krause of the Brookings Institution says that—

> If control of the budget deficit is put on track by early 1985, the U.S. could have 3 years of sustainable economic growth.

That is a big if. Here is another, from Robert McNamara:

> If Congress would act before the end of 1983 to raise revenues and/or reduce spending enough to produce a zero structural deficit in 1988, there would be a dramatic drop in interest rates.

Inaction will take us down a dangerous road. Action by this Congress to cut the deficit will put us on the road to a sustainable recovery. Large Federal deficits are costly, and not just in terms of the 1.3 cents of every tax dollar eaten up in interest payments on the national debt. The price they will exact is the very existence of thousands and thousands of small businesses that will be put out of commission when and if interest rates go back through the roof. Have we so quickly forgotten that not so many months ago business failures hit a post-Depression high? Have we forgotten that there are still more than 10 million people unemployed in this country?

There are those who would prefer that we resort to yet another presidential commission to fashion a bipartisan approach to dealing with the deficit. I say to you today: we already have just such a bipartisan approach. It is called the fiscal year 1984 budget resolution, which was the result of weeks of back and forth between Members of Congress of both parties. Its broad outlines are identical to the budget proposed by Senators CHAFEE, HATFIELD, MATHIAS, STAFFORD, and myself. And, along with Senator ANDREWS and other of our colleagues, we are committed to seeing this thing through.

The Finance Committee needs a lot of moral support for the tough task of raising taxes. Members of Congress do not enjoy raising taxes anymore than constituents enjoy paying them. But the alternatives are so frightening that action by Finance and by Congress as a whole is a must. We say to Finance: Give us something to work with. And to our colleagues: let us roll up our sleeves, get to work and fulfill our reconciliation responsibilities. We are in danger, in this country, of allowing the notion of representative government to languish in favor of government by commission. If that is the case, then the relevant point is not that the budget resolution is a dead cat, as one of my colleagues put it, but that the Congress of the United States is a dead institution.

Mr. ANDREWS. Mr. President, the viability of our great Nation in every sector of national and international policy is inescapably linked to the health of our economy. Today I urge my colleagues in the Congress not to destroy the progress we have made in contributing to the Nation's economic well-being through the Congressional budget process. If this body fails to adhere to the budget resolution we approved in June of this year, we will have to share the blame for renewed inflation, higher interest rates and an economic downturn.

In a bipartisan spirit, we agreed in the budget resolution that massive projected deficits must be brought under control in order to sustain the economic recovery. A combination of spending cuts and revenue increases were called for in what I view as a significant move toward congressional fiscal responsibility.

Today, the consensus of the country is even stronger in voicing dismay over Federal deficits. But yet, the Finance and Ways and Means Committees show little progress in raising the $12 billion of revenue called for by the resolution in fiscal year 1984, a relatively small sum by comparison to a $800 billion budget and a $200 billion deficit.

The world is watching and noting our inability to deal with this critical problem, and by denying credibility to our budgetary process, I believe we are endangering our future ability to govern the economy.

REVENUE-SHARING FORMULA CHANGE SHOULD BE DELETED

Mr. LONG. Mr. President, the Senate will soon turn to the consideration of the general revenue-sharing extension reported by the Committee on Finance. The Finance Committee bill includes a formula change that modifies how funds are distributed among the various local governments in each State. The change applies to any increased funds which may be provided for the program now or in the future. When the bill is considered, I intend to offer an amendment to strike this formula change.

The formula change was adopted by the Finance Committee at a time when detailed information about its effects was not available. The Treasury Department has now done a number of computer runs showing how that change would affect the communities in each State under various assumptions as to the amount of funding increase that may be enacted. I am inserting in the RECORD two tables based on these Treasury runs which demonstrate the impact of the formula change proposed by the committee. As these tables show, most of the jurisdictions in the country will get little or no benefit from any increase in revenue-sharing funds if the Finance Committee formula remains in the bill. Moreover, in many instances the Finance Committee formula has the perverse impact of giving large increases to affluent communities at the expense of poorer areas which get nothing.

Shortly after the Finance Committee bill was reported, it was discovered that the committee formula greatly disadvantaged some of the very poorest jurisdictions in the country. It is anticipated that a modification will be offered to alleviate that result. The tables which I am inserting are based on the Finance Committee formula after taking into account that anticipated modification. Even with that modification, many low-income areas are hurt by the Finance Committee formula.

I am placing these tables in the RECORD so that Senators may have some information available as to the impact of these formula changes in their States when my amendment is considered.

I ask unanimous consent that the tables be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

PERCENTAGE OF ALL JURISDICTIONS GETTING NO REVENUE SHARING INCREASE IF FINANCE COMMITTEE FORMULA CHANGE IS RETAINED

[In percent]

HANDLING OF COMMUNIST BLOC VIOLATIONS OF U.S. AIRSPACE

Mr. BYRD. Mr. President, the Soviet destruction of an unarmed Korean airliner on the basis that it violated Soviet airspace, resulting in the murder of 269 innocent people of many nations, violates the basic human rights of all people. It has been rightly condemned worldwide.

Furthermore, it stands in marked contrast to the manner in which the United States has handled unauthorized violations of American airspace and flight plans by Soviet and other Communist bloc nations. I have previously itemized and entered into the CONGRESSIONAL RECORD the long and outrageous history of Soviet military attacks on both civilian and military aircraft of many countries. Some of these resulted from unintended straying into Soviet airspace. Many of them were simply Soviet attacks on aircraft clearly transiting international airspace.

When Communist bloc commercial aircraft have strayed unintended into our airspace, or failed to file flight plans or followed unauthorized routing, the record is clear that we do not shoot them down. Even in cases which have occurred, according to the FAA in a recent compilation, where Soviet Aeroflot aircraft have flown unauthorized routing which has even taken them over U.S. military installations, we have not taken military action.

The compilation follows:

AEROFLOT AIRLINES FLIGHT INCIDENTS IN U.S. AIRSPACE

1979

May 16, Wed: SU 315, IL-62, scheduled to JFK attempted to enter U.S. at Sherbrooke (non-approved entry point) and was routed by Boston Center via Syracuse to JFK. Soviet pilot complained to Boston FAA Center.

Jul 21, Sat: SU 2315, IL-62, charter from JFK to Los Angeles departed from JFK without filing a flight plan. Pan Am took some blame in the foul-up.

November: Aeroflot published their monthly schedule stating four flights per week when the Bilateral Air Transport Agreement provided for only three flights during the winter months. This was reported to State Department.

1980

Jan 11, Fri: SU 315, IL-62, was not cleared to operate into JFK as it requested and was told to divert to Montreal per instructions from Pan Am and Mr. Samourukhov (Aeroflot New York Director).

Jan 16, Wed: SU 315, IL-62, landed at JFK even though Aeroflot was told that Teamsters would not handle flights on ground, and Air Traffic Controllers were protesting their flight operations.

Feb 03, Sun: SU 315, Il-62, made unauthorized landing at JFK after receiving instructions to proceed to Dulles.

Feb 10, Sun: SU 315, IL-62, landed at JFK after assuring State Department that it would operate into Dulles; after being denied support for nearly 1½ hours, it refiled and flew to Dulles as originally expected.

Feb 12, Tue: SY 317, IL-62, scheduled to Dulles flying a visual approach to Runway 30, switched to TWR frequency and landed on Runway 01R; Could have been a serious problem because an Air Virginia Navajo was taxiing to that runway.

Dec 08, Fri: System Error: Soviet Union IL-76 and Eastern B727 approximately 550 miles southeast of Newark, N.J., FL310, 121440L. IL 76 enroute from Gander to Havana, B727 enroute from Bermuda to Newark, N.J. Breakdown in coordination caused aircraft to pass with 16 miles separation in nonradar oceanic area where 90 miles is required.

1981

Mar 01, Sun: SU 339, IL-62, was forced to divert to Montreal because of bad weather at Gander. Then on Mar 02 was cleared across northern Maine (J-55) by Boston Center contrary to normal procedures.

Mar 06, Fri: SU 345, IL-62, ignored clearance from New York OCEANIC Center regarding appropriate altitudes passing off East Coast of U.S. (Third time this has happened.)

Mar 20, Fri: Complaint registered to Hq FAA by New York OCEANIC Control calling for need of a stronger communication link with Aeroflot because of their "antics" on flights passing off the East Coast of the U.S.

Jul 30, Fri: SU 302, IL-62, scheduled departing from Montreal filed across northern Maine on J-509 (not on authorized routing or authorized entry/exit in U.S. airspace) and turned off transponder just inside U.S. airspace. Flight was tracked by Boston Center and NORAD radars and did maintain flight plan routing. Transponder reactivated upon leaving U.S. airspace.

Nov 08, Sun: US 315, IL-62, scheduled to Dulles entered U.S. at unauthorized entry point and continued to fly an unauthorized routing (over Pease AFB and Groton) southbound to Dulles. Then SU 316 departed Dulles and flew similar unauthorized routing northbound. NOTE: A two-flight suspension was imposed.

Nov 10, Tue: US 317, IL-62, scheduled to Dulles filed overhead Boston inbound. (After entering U.S. at a nonsanctioned entry point, Boston Center placed them on correct routing. No problem with SU 318 outbound from Dulles.)

1982

Feb 13, Sat: Soviet IL-62 was forced to land at Bermuda for fuel due to strong headwinds enroute to Havana. Cuba denied overflight clearance to two Braniff flights in anticipation of the arrival of this Soviet flight.

POLISH LOT AIRLINES FLIGHT INCIDENTS IN U.S. AIRSPACE

1978 TO 1981

LOT scheduled and chartered IL-62 flights operating from Warsaw to New York have often stopped at Bangor or Boston for fuel allegedly because they were unable to safely reach JFK.

1980

Apr. 24, Thu: LO 006, IL-62, supposed scheduled flight from Warsaw via Gander to New York, attempted to file via Albany (unauthorized routing) to Montreal. Boston FAA Center indicated that this was a continuous practice on the part of LOT.

Apr 25, Fri: LO 5336, IL-62, charter flight returning from Lima to Montreal requested clearance to change from overwater routing to unauthorized direct routing up the east coast to Montreal. Reason for this request: airsickness on board and no one could speak English well enough to navigate on normal routing.

Apr 30, Wed: LO 006, IL-62, scheduled flight from Warsaw to JFK attempted to enter U.S. at Sherbrooke and fly down unauthorized route through Albany. (See Boston Center comment above.)

Jul 07, Mon: LO 007, IL-62, scheduled flight from New York to Warsaw requested unauthorized routing northbound via Albany to Montreal.

Jul 28, Mon: Problems continuously being encountered with LOT attempts to file unauthorized routes to and from Montreal and JFK.

Sep 04, Fri: Boston ARTCC sent letter to FAA Hq complaining of LOT IL-62 continuous transponder malfunction problems. Specific LOT IL-62s were failing to correct transponder malfunctions though FAA has repeatedly informed them of such. FAA turned the matter over to State Department.

BULGARIAN FLIGHT INCIDENT

On 4 March 1981, a Bulgarian Diplomatic flight transited U.S. airspace from Boston—New York—Washington—Indianapolis—Memphis to Houston on its way to Mexico City, transporting the head of State's daughter. Although a flight plan was filed, and followed with no deviations, (per the previous year's approved FAA flight plan) the Bulgarian Embassy failed to submit a request to State as is required. It was not until the aircraft was exiting the U.S., that the Houston FAA center realized that the flight had not been approved. The Bulgarians apologized to State and said this failure to obtain approval was an oversight.

COMMUNIST CIVIL AIR ACTIVITY IN U.S. AIRSPACE—TRENDS

In recent years, Cubana has been the most aggressive in pursuing overflights of U.S. territory. Not only has it deviated from normal procedures and routes as shown in enclosure 1, but it has also vigorously attempted to expand flight operations into the U.S. One possible explanation is that it is acting as a surrogate for the U.S.S.R., which would have greater difficulty obtaining access to U.S. airspace. Also, it is possible that the proximity of Cuba to the U.S. and its status as one of the more dependent members of the Soviet orbit of nations have been factors leading to it being chosen to cross service Soviet collection and other requirements. Some of Cuba's activities include:

In November 1979, Cuba sought a route over the U.S. to Los Angeles which was strongly opposed by DOD for security reasons. This followed earlier Soviet requests for West Coast destinations.

In spring 1981, Cubana sought landing refueling rights at Kindley Naval Air Station, Bermuda, citing a dubious rationale that it would be advantageous for a northern Europe route, when it appeared that Bermuda would be better suited to facilitate flights to Africa. An interagency group studied this request at some length with DOD strongly objecting, and when no answer was forthcoming, Cuba attempted to circumvent normal diplomatic processes, applying directly for permission to land at Kindley with the Naval Facilities Command, Alexandria, VA. Through inadvertency the request was approved on 12 June 81, and then was rescinded 26 June 81 when higher level officials became aware of the "end run."

In May 1981 after more than 2 years of interagency effort, in response to a DOD request, CAB changed its procedures governing communist charters to the U.S. Under the new rule, at least 14 days advance notice (vice three days) is required to obtain approval for all charter flights, thus allowing a more orderly implementation of DOD defensive security measures with less chance that affected installations will not be notified. Cuba immediately appealed this order (Docket 39613) and also filed a freedom of information act request for staffing documents supporting the new CAB order. The FOIA request was made after CAB told Cuba some documents were classified.

In both January and December 1981, Cubana sought routing over the eastern portion of the United States after an extended FAA/DoD effort had earlier succeeded in forcing them to fly over the Atlantic Ocean for the major poriton of their Havana-Montreal flights.

During 1981, Cuba sought permission from CAB to fly charters to and from Puerto Rico which DoD strongly opposed. Currently DoD is preparing a similar response (to State) in regard to another Cubana request for charters, to Puerto Rico in April 1982.

During 1980, Cubana vigorously attempted to obtain flights to Dulles during a 13 week period.

In 1981, Cubana surreptitiously added the TU 154B to its Operational Specifications without following standard procedures to first obtain approval for flying new types of aircraft in US airspace. This attempt was unsuccessful and inspections will be made later in the year.

The level of Cubana charter flight activity to the U.S. has been high: 1979, 244; 1980, 93; 1981, 52.

During 1979 and 1980 these figures were the highest for all Communist nations. In 1981 only Poland had more charter flights (66). There is also considerable scheduled flight activity.

Finally, DoD records contain references to Cubana attempts, informal or otherwise, to obtain access to New York, Chicago, Key West, Ft Lauderdale, Tampa and St Croix.

While Cuba appears most aggressive, a second generalization evident from DoD records is that all Communist nations with access to US airspace have attempted or are attempting to obtain increased frequencies of flights or new routes.

In March 1981, East Germany made a formal overture to State to obtain overflight rights of the US East Coast on a Montreal-Havana flight, with no valid economic, safety or flight related rational apparent. DoD strongly opposed this. It was interesting that the E. German request came after FAA had advised Cuba its request for the same overland route was disapproved. (East Germany had requested this route previously in July 1978.)

In 1981, Bulgaria sought a Toronto or Montreal—NYC—Mexico City—Havana route, making a "preliminary expression of interest" to State that DoD opposed. The request was refused.

In June 1981, Czechoslovakia requested State to consider allowing "unlimited" charters to the U.S. and 10 extra sections on its flight to NYC. This was not approved. However, the Civil Aviation Agreement with Czechoslovakia was extended as a result of 1981 discussions, but with no changes.

In 1980 (Docket 35385) and in 1981, Poland sought a route to Chicago that would replace its charter operations. These negotiations were overrun by subsequent events. Poland also requested landing rights on Guam, once, in connection with a Warsaw-New Zealand flight.

In Feb. 1981, the Soviet Union sought to extend a "diplomatic" flight to NYC to include a later stop in Washington, D.C. as a charter. This was contrary to a 1974 Presidential Order (74-3-137). While the U.S.S.R. has not been actively seeking expanded access in the last 1-2 years, earlier it had sought extra flights, additional destinations and a transpacific route.

In 1981, the U.S. and Romania renewed the bilateral Civil Aviation Agreement with no changes. During prenegotiation discussions Romania had informally advanced Chicago as a possible new destination, as well as stating a desire for more flights on existing routes.

As noted above at several points, there appears to be a strong desire to overfly the U.S. eastern seaboard on a N-S route. Poland, Cuba, Czechoslovakia and East Germany have each tried to obtain permission to do so which would afford them collection opportunities in regard to the Norfolk complex, Ft. Bragg, and other installations.

In some cases, the increased access to U.S. airspace is as much a result of the U.S. seeking more overseas routes as it is foreign initiatives to obtain more U.S. access. U.S. economic/political interests and the need for a quid pro quo, appear to have been fundamental to the PRC gaining routes to NY and San Francisco. There remains a strong economic pressure to obtain more flights to the PRC which may lead to another U.S. city being serviced by CAAC, as well as another frequency.

Similarly, two U.S. airlines have been attempting to develop a charter program to the U.S.S.R. and a third desires overflights of the Soviet Union. While the current state of international relations may preclude these efforts, future changes and economic interests of U.S. airlines may lead again to Soviet overflights of the U.S. Negotiations, in fact, with Poland were progressing to the point where a quid pro quo might have given LOT flights to NY and/or Washington in return for changes that would have ensured greater profitability for U.S. flights into Poland.

CSA (CZECHOSLOVAK) AIRLINES FLIGHT INCIDENTS IN U.S. AIRSPACE

1979

Mar 01, Thu: OK 598, IL-62, proceeded via Albany instead of approved routing (via Syracuse). No advance notice was received that this flight planned to fly this unauthorized routing, and sector controller did not react in time.

1981

Apr 09, 10, Thu, Fri: Czechs requested a clearance for a special charter flight, OK 1628 (their only one of the year) through Pan Am which, in turn, called Hq FAA. It passed the request to State Department which approved the flight to operate from Montreal to Havana the day before the scheduled launching of the space shuttle

Columbia. On the day of the launch, the flight, utilizing different call signs, OK 1628, OK 1629, OK 2051, and OK 2052, attempted to fly through Miami Center and the launch area. Miami Center offered them routing around the launch area which they refused and returned to Havana to relaunch later after the Columbia also rescheduled.

Apr 10, Fri: OK 1521, IL-62, was a second Czech charter flight departing from Havana and wishing to fly through the launch area. Miami Center offered to route it around but it chose to return to Havana.

Apr 13, Mon: OK 629, IL-62, scheduled overflight from Havana to Montreal attempted to fly over Wilmington (ILM) and Philipsburg (PBS) to Syracuse (SYR) but was denied clearance by Miami Center.

May 12, Tue: OK 628, IL-62, supposed scheduled overflight, Montreal to Havana, actually departed from Gander and diverted into Miami because of weather. It was not known why this flight did not operate through Montreal.

Aug 12, Wed: OK 619, IL-62, supposed Monday or Tuesday scheduled overflight, Havana to Montreal, requested permission (through Canadair) to land at Boston and to operate on unauthorized airways. Permission was denied and flight operated on normal routing to Montreal.

Dec 27, Tue: OK 578, IL-62, enroute from Gander to Havana requested to land at Miami because of bad weather at Havana. Before Miami Center obtained permission, they went on to Nassau, their flight planned weather alternate. Late attempts to fly into Havana prompted OK 578 to request Miami as an alternate again but they did not receive permission.

1982

Feb 14, Sun: OK 598, IL-62, supposed scheduled flight, Prague-Montreal-New York, was operating from Havana to Montreal and requested unauthorized routing entering at Carolina Beach (CLB) and up U.S. airways. Flight was cleared to enter at JFK and up normal routing via Syracuse.

Mar 02, Tue: Through inadvertence, CSA flight OK 578 was approved to fly along the eastern seaboard states on a Montreal to Havana route. After reaching Florida, the local FAA Center rerouted it over water. The Czechs followed the flight plan they filed, but were aware from previous communications that it was FAA policy not to approve such flights.

CUBANA AIRLINES FLIGHT INCIDENTS IN U.S. AIRSPACE

1978

Jan 12, Thu: CU 482, IL-62, deviated off course over Patuxent River going northbound.

Feb 07, Tue: Cu 1209, IL-62, deviated off course going northbound.

Mar. 31, Fri: Cy 481, IL-62, did not contact Washington Center and deviated east of course over Patuxent River restricted areas going southbound.

1979

May 25, Fri: Cuban Cessna 411, CUT 102, arrived at Fort Lauderdale (FLL) with FAA approval though no prior notice or clearance had been given by State Department.

Jul 20, Fri: Unidentified Cuban IL-62 penetrated U.S. ADIZ abeam Langley AFB/Norfolk area, 80 miles west of course from Halifax to Havana. NORAD interceptors were scrambled from Langley AFB.

Sep 11, Tue: Cubana Air Force flew President of Mali from Havana to JFK aboard an IL-62 CU 8228 Special Charter. Yugoslavs were supposed to transport him. This CU 8228 crew argued with Miami Center about dictated overwater routing to JFK. No 72 hour prior notice. No prior approval from CAB.

1980

Mar 23, Sun: CU 480, northbound over Patuxent River violated restricted areas.

Apr 25, Fri: Scheduled overflight CU 481 returning to Havana from Montreal (CYMX) tried to change his call sign to CU 9071 (Charter from Miami to Havana) and attempted to change his routing from overwater to overland.

Sep 06, Sat: CU 1476 requested over U.S. airways routing (ILM-J79-J62-TUK) because of weather off east coast.

Sep 07, Sun: CU 481 filed out of Montreal (CYMX) on J29, J59, PSB. Caught by Washington Center which coordinated with FAA Hq and then routed them down to Wilmington (ILM) and overwater to Havana (MUHA).

Dec 19, Fri: CU 480 slipped through Miami Center and entered U.S. airways at Wilmington (ILM). Washington Center coordinated with Hq FAA to route this flight up old "ALPHA Route" (J40, J14, J37, J36, MSS, CYMX). Later in the day CU 481 (return flight) argued with New York Center for same return routing. New York denied such and they were routed overwater.

1981

Apr 26, Sun: CU 480 was touted as an IL-62, but, in fact, was a TU-154B. The TU-154B is not included on Cubana's FAA Operating Specifications.

Apr 21, Fri: CU 2473, IL-62, deviated from overwater to U.S. airways (STOOL, J150; HTO, J55/121, SIE, J79/121, ORF, J75, ILM) due to weather.—NOTE: Cuban government had repeatedly denied U.S. National Oceanic Atmospheric Agency aircraft from entering Cuban Flight Information Region for weather reconnaissance days before this flight.

1982

Jan 16, Sat: A Cubana flight from Montreal requested but was denied authority to fly over northern Maine on a route to the Atlantic using J-509. It identified itself by an incorrect call sign (CU484) which applies to a Cubana flight inbound to Montreal and incorrectly notified FAA that the aircraft in question was a TU-64, when in fact it was a TU-154.

THE RELATIONSHIP BETWEEN HIGH INTEREST RATES AND DEFICITS

Mr. DECONCINI. Mr. President, the willingness of the Reagan administration to accept high deficits has long amazed me. What is even more incredible is their new contention that there is no relationship between high deficits and high interest rates. In a recent speech to the National Automobile Dealers Association, Secretary Regan cited a Treasury study showing that "there exists no necessary cause-effect link between deficits and interest rates." One hopes that statements such as these are pure posturing on the part of Secretary Regan in preparation for the upcoming Presidential election and not his true sentiment. Secretary Regan ignores basic commonsense and the fundamental principle of supply and demand.

On the same day that Secretary Regan was speaking to the Automobile Dealers, Martin Feldstein, Chairman of the Council of Economic Advisers was flatly contradicting Secretary Regan. In a speech before the U.S. Chamber of Commerce, Feldstein stated:

> The reason for the very high level of long-term real interest rates is undoubtedly the unprecedented level of the budget deficits that are now predicted for the years ahead if no legislative action is taken.

While Feldstein has clearly not endeared himself to the White House, he has simply repeated the obvious facts that most major economists have been citing for years. That is, that high budget deficits substantially contribute to high interest rates.

Very simply put the more competition there is for a limited pool of funds; that is, money available for lending, the more it will cost to borrow that money.

Even President Reagan affirmed this principle in a January 1981 news conference when he said:

> The answer to the interest rates is going to be our program of reducing government spending, tied to the reduction of tax rates
> * * *

Mr. President I urge the President and Secretary Regan to reevaluate their position on the relationship between interest rates and deficits. Surely the future economic health of our Nation deserves better from this administration than self-serving statements designed to persuade the American people that the Reagan administration's outrageous deficits are acceptable from the interest rate perspective.

NATIONAL HISPANIC HERITAGE WEEK

Mr. DECONCINI. Mr. President, I am honored to participate in the celebration of National Hispanic Heritage Week. This week is designed to illuminate the rich contributions of Hispanics to our culture and enlighten us as to the relative deprivation of Hispanic American citizens within the United States.

The United States is the fourth largest Spanish-speaking community in the world. Yet, we continue to treat Hispanics as a group of second-class citizens. We have given Hispanics the name "minority," a term which is reserved for those Americans who do not fully share in the promise of America. Minorities are Americans who do not have equal opportunities or equal justice. They are Americans who are forced to bear a disproportionate share of the unemployment burden. They are Americans who have been

denied the fulfillment of the American dream.

In upholding the ideal of human rights, Americans must insure that all of its citizens enjoy the freedom and the benefits promised by the Constitution and the Declaration of Independence. Our Government has an obligation to provide Hispanic citizens an equal opportunity to succeed in building a truly good life in this country. Today, Hispanic Americans struggle, without adequate education or vocational training, to compete for jobs. Their struggle is made more difficult by an environment of hostility and prejudice.

In meeting the challenge of remedying these problems, our most urgent need is to integrate Hispanics into our political structure. Only through genuine participation in government can Hispanic Americans defend their rights and advance their interests in the policymaking process.

National Hispanic Heritage Week has laudable objectives. Unfortunately, its proclamation is the result of inequality and injustice. It is distressing that as a nation we must remind ourselves that we are not meeting our most fundamental obligations. I look forward to a time when a week such as this is dedicated purely to honoring the accomplishments and contributions of Hispanic Americans and appreciating the varied forms of Hispanic culture.

Meanwhile, there must be a commitment by this administration and the Congress to bring Hispanic leaders into our governmental and political structures. With this commitment, I believe that the poverty, the illiteracy, the poor health and nutrition, the inadequate housing, and the substandard schooling that today plague the Hispanic community will become a relic of the past. We must strive to make every member of our society, regardless of background a recipient of the promise of this great Nation. As we move toward this goal, I believe that we will set an example for the rest of the world that democracy and freedom for all can be a reality for our generation, not a failed experiment of the past.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:56 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 461. An act to extend the authorization of appropriations for the Office of Government Ethics for 5 years.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 559. An act to amend the Securities Exchange Act of 1934 to increase the sanctions against trading in securities while in possession of material nonpublic information;

H.R. 2077. An act to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes; and

H.R. 3222. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

HOUSE MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 559. An act to amend the Securities Exchange Act of 1934 to increase the sanctions against trading in securities while in possession of material nonpublic information; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 2077. An act to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes; to the Committee on Governmental Affairs.

HOUSE MEASURE PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 3222. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1753. A communication from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to withdraw and reserve for the Department of the Air Force certain public lands within the Nellis Air Force Range, within Clark, Nye, and Lincoln counties, Nevada, for use as a training and weapons testing area, and for other purposes; to the Committee on Energy and Natural Resources.

EC-1754. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to amend certain provisions applicable to compensation for the overtime inspectional service of employees of the United States Customs Service and the Immigration and Naturalization Service, and for other purposes; to the Committee on Finance.

EC-1755. A communication from the Director of the Office of Personnel Management, transmitting a draft of proposed legislation to repeal statutory minimum grade levels for certain Federal positions; to the Committee on Governmental Affairs.

EC-1756. A communication from the Acting Comptroller General of the United States, transmitting a draft of proposed legislation to amend 5 U.S.C., 3345, 3346, and 3348 to include the independent establishments in the executive branch within the purview of the Vacancies Act; to the Committee on Governmental Affairs.

EC-1757. A communication from the Assistant Secretary of the Interior (Indian Affairs), transmitting a draft of proposed legislation to provide for the statutory designation of the position of Assistant Secretary of the Interior for Indian Affairs, eliminate the position of Commissioner of Indian Affairs, make conforming amendments, repeal unnecessary provisions of law referring to the Commissioner of Indian Affairs, and for other purposes; to the Select Committee on Indian Affairs.

EC-1758. A communication from the Director of the Office of Management and Budget, transmitting, pursuant to law, the cumulative report on budget rescissions and deferrals dated September 1, 1983; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget, the Committee on Appropriations, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Commerce, Science, and Transportation, the Committee on Labor and Human Resources, the Committee on Banking, Housing, and Urban Affairs, the Committee on Energy and Natural Resources, the Committee on Foreign Relations, the Committee on Armed Services, the Committee on the Judiciary, the Committee on Finance, and the Committee on Veterans' Affairs.

EC-1759. A communication from the Director of the Office of Legislative Affairs, Agency for International Development, transmitting, pursuant to law, a correction to a previously submitted report on funds appropriated by the Supplemental Appropriations Act, 1983; to the Committee on Appropriations.

EC-1760. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Navy's proposed letter of offer to Spain for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-1761. A communication from the Acting Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting, pursuant to law, a report on the conversion of the automatic data processing activity at the U.S. Army Ordnance Center and School, Aberdeen, Maryland to performance by contract; to the Committee on Armed Services.

EC-1762. A communication from the Acting Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on the conversion of the audiovisual services activity at U.S. Army Support Command, Hawaii to performance by contract; to the Committee on Armed Services.

EC-1763. A communication from the Deputy Assistant Secretary of Defense, transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1764. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, the fiscal year 1985 budget request of the Commission, to the Committee on Rules and Administration.

EC-1765. A communication from the Executive Secretary, Office of the Secretary of Defense, transmitting, pursuant to law, a report on Department of Defense procurement from small and other business firms for October 1982 through April 1983; to the Committee on Small Business.

EC-1766. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "States Are Making Good Progress in Implementing the Small Cities Community Development Block Grant Program"; to the Committee on Banking, Housing, and Urban Affairs.

EC-1767. A communication from the Chairman of the Consumer Product Safety Commission, transmitting, pursuant to law, the budget request of the Commission for fiscal year 1985; to the Committee on Commerce, Science, and Transportation.

EC-1768. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Efficient Investments in Water Resources: Issues and Options"; to the Committee on Environment and Public Works.

EC-1769. A communication from the Director of Civil Works, Office of the Chief of Engineers, Department of the Army, transmitting, pursuant to law, the annual report of the Chief of Engineers for fiscal year 1982 on civil works activities; to the Committee on Environment and Public Works.

EC-1770. A communication from the Inspector General, Veterans Administration, transmitting, pursuant to law, a report on a Veterans Administration matching program; to the Committee on Governmental Affairs.

EC-1771. A communication from the Director of the Selective Service System, transmitting, pursuant to law, a report on a matching program to locate absent parents with child support obligations; to the Committee on Government Affairs.

EC-1772. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report on the examination of the U.S. Capital Historical Society's financial statements for the years ended January 31, 1982 and 1981; to the Committee on Rules and Administration.

EC-1773. A communication from the Secretary of Energy, transmitting, pursuant to law, a report concerning the need for continuation or modification of the Price-Anderson Act; to the Committee on Energy and Natural Resources.

EC-1774. A communication from the Chairman of the National Advisory Committee on Oceans and Atmosphere, transmitting, pursuant to law, a report of the Commission entitled "Marine Minerals an Alternative Mineral Supply"; to the Committee on Energy and Natural Resources.

EC-1775. A communication from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to establish a 1-year limitation on the filing of claims for unpaid accounts formerly maintained in the Postal Savings System; to the Committee on Finance.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations, with amendments:

S. 1762. A bill entitled the "Comprehensive Crime Control Act of 1983."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Matthew V. Scocozza, of Tennessee, to be an Assistant Secretary of Transportation;

Barbara E. McConnell, of the District of Columbia, to be a member of the Civil Aeronautics Board for the remainder of the term expiring December 31, 1983; and

Barbara E. McConnell, of the District of Columbia, to be a member of the Civil Aeronautics Board for the term of 6 years expiring December 31, 1983.

(The above nominations were reported from the Committee on Commerce, Science, and Transportation with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PACKWOOD. Mr. President, I also report favorably a nomination list in the Coast Guard which previously appeared in the CONGRESSIONAL RECORD of September 12, 1983, and, to save the expense of reprinting the list on the Executive Calendar, ask unanimous consent that these nominations lie on the Secretary's desk for the information of Senators.

By Mr. TOWER, from the Committee on Armed Service:

Mr. TOWER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: in the Army there are 5 permanent appointments to the grade of brigadier general—list begins with Thomas M. Geer—Rear Adm. John B. Mooney, Jr., U.S. Navy, to be Chief of Naval Research, in the Army there are 37 appointments to the grade of major general—list begins with John L. Ballantyne, III—Lt. Gen. John S. Pustay, U.S. Air Force—age 52—to be placed on the retired list, Maj. Gen. Richard D. Lawrence, U.S. Army, to be lieutenant general and Lt. Gen. LaVern E. Weber, U.S. Army, to be lieutenant general, and in the Army there are 60 appointments to the grade of brigadier general—list begins with James R. Ralph, Jr.—I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, in addition, in the Air Force there are 409 permanent promotions to the grade of major—list begins with James E. Abbott—in the Air Force there are 410 appointments to the grade of major and below—list begins with Leonard B. Addison—in the Army there are 8 permanent promotions to the grade of major—list begins with Van T. Barfoot, Jr.—in the Army Reserve there are 121 promotions to the grade of colonel and below—list begins with Ralph L. Bishop—in the Navy there are 740 permanent promotions to the grade of lieutenant commander—list begins with Robert J. Adams—in the Naval Reserve there are 1,232 permanent promotions to the grade of commander—list begins with David D. Abelson—in the Naval Reserve there are 1,072 permanent promotions to the grade of captain—list begins with Donn V. Aaby—in the Naval Reserve there are 3,785 permanent promotions to the grade of commander—list begins with Garry W. Aaron—in the Marine Corps Reserve there are 234 permanent appointments to the grade of lieutenant colonel—list begins with John J. Abbattista—in the Navy there are 574 permanent promotions to the grade of captain—list begins with Reinaldo G. Alvarez—in the Navy there are 1,583 permanent promotions to the grade of commander—list begins with Raymond L. Adman—in the Air Force there are 36 permanent promotions to the grade of colonel and below—list begins with Felix M. Fabian, Jr.—in the Air Force Reserve there are 14 promotions from the Air National Guard to the grade of lieutenant colonel—list begins with Frederick H. Forster—in the Air Force Reserve there are 20 promotions from the Air National Guard to the grade of lieutenant colonel—list begins with Stanley I. Anderson—Robbins W. Campbell, U.S. Air Force, to be appointed to the grade of major or below, in the Army there are 2,992 permanent promotions to the grade of major—list begins with Crispin A. Abad—in the Navy and Naval Reserve there are 195 permanent appointments to the grade of commander and below—list begins with Carl D. Fago—in the Navy there are 240 permanent promotions to the grade of chief warrant officer—list begins with Charles D. Arnold—and in the Marine Corps there are 344 transfers from the Marine Corps Reserve to the grade of lieutenant colonel and below—list begins with Lillian Hagener—in the Air Force Reserve there are 758 promotions to the grade of lieutenant colonel—list begins with James L. Adams, Jr.—in the Air Force and Air Force Reserve there are 44 appointments/promotions to the grade of

colonel and below—list begins with Paul V. Humbert. Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk appeared in the RECORD of September 12, 1983, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SASSER (for himself and Mr. BAKER):

S. 1854. A bill for the relief of the survivors of John Smitherman; to the Committee on the Judiciary.

By Mr. HOLLINGS (for himself, Mr. FORD, and Mr. RIEGLE):

S. 1855. A bill to authorize the operation of U.S. land remote sensing satellite systems, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. BURDICK:

S. 1856. A bill entitled the "Criminal Reward Reimbursement Act"; to the Committee on the Judiciary.

By Mr. DURENBERGER (for himself, Mr. MOYNIHAN, Mr. BRADLEY, and Mr. MATSUNAGA):

S. 1857. A bill to amend the Internal Revenue Code of 1954 to remove certain impediments to the effective philanthropy of private foundations; to the Committee on Finance.

By Mr. MATHIAS (for himself and Mr. EAGLETON):

S. 1858. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act, and for other purposes; to the Commtittee on Governmental Affairs.

By Mr. DOMENICI:

S. 1859. A bill for the transfer of certain interests in lands in Dona Ana County, N. Mex., to New Mexico State University, Las Cruces, N. Mex.; to the Committee on Energy and Natural Resources.

By Mr. LAXALT (for himself, Mr. HECHT, Mr. CRANSTON, and Mr. WILSON):

S. 1860. A bill to clear title to certain lands along the California-Nevada boundary; to the Committee on Energy and Natural Resources.

By Mr. PRESSLER:

S. 1861. A bill to authorize the development of a new generation land remote sensing satellite, and to insure the role of the United States as the world leader in development and utilizing land remote sensing technology through the Landsat program; to the Committee on Commerce, Science, and Transportation.

By Mr. DECONCINI:

S. 1862. A bill to establish a Select Commission on Drug Interdiction and Enforcement; to the Committee on the Judiciary.

By Mr. GARN:

S. 1863. A bill for the relief of Aundun Endestad; to the Committee on the Judiciary.

By Mr. DOMENICI:

S. 1864. A bill to amend the Internal Revenue Code of 1954 to provide a declaratory judgment with regard to the extension of time for payment of estate tax; to the Committee on Finance.

By Mr. STEVENS (for Mr. JEPSEN) (for himself and Mr. HUDDLESTON):

S. 1865. A bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs; read twice and placed on the calendar.

By Mr. BAKER (for himself and Mr. PERCY):

S.J. Res. 166. Joint resolution providing statutory authorization under the war powers resolution for continued U.S. participation in the multinational peacekeeping force in Lebanon in order to obtain withdrawal of all foreign forces from Lebanon; to the Committee on Foreign Relations.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolution and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HOLLINGS:

S. Res. 224. Resolution to commend Virginia P. Bobo for her exemplary service to the U.S. Senate and the Nation; considered and agreed to.

By Mr. STEVENS (for Mr. BAKER):

S. Con. Res. 68. Concurrent resolution to correct the enrollment of S. 602; considered and agreed to.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SASSER (for himself and Mr. BAKER).

S. 1854. A bill for the relief of the survivors of John Smitherman; to the Committee on the Judiciary.

RELIEF OF THE SURVIVORS OF JOHN SMITHERMAN

● Mr. SASSER. Mr. President, along with the distinguished majority leader, Mr. BAKER, I am today introducing legislation for the relief of the survivors of John Smitherman of Mulberry, Tenn.

John Smitherman passed away this past Sunday without the service-connected compensation from the Veterans' Administration that was his just reward for the service he gave his country. Now, his widow, Rose Smitherman, is without support, and this bill seeks to correct this injustice.

The case of John Smitherman is a tragic saga that goes back to his service in the Navy in the South Pacific just after World War II. At that time he witnessed an atmospheric atomic test. Then, only hours later, his ship sailed into the very spot of the test site. After several hours of work around the site, John Smitherman took the most unfortunate swim of his life in water that had just been contaminated by atomic radiation. During the entire exercise, John Smitherman and his colleagues received no warnings from Navy officials about the hazards of radiation.

Today, if one is near low level radiation, one must wear extensive protective clothing: John Smitherman wore only shorts the day he witnessed an atomic bomb blast.

Despite the fact that John Smitherman lost two legs to this cancer, the Veterans' Administration continued to insist that his disease was not service-connected.

Despite all the evidence that the cancer which slowly consumed him and eventually caused his death is linked to the radiation exposure, the Veterans' Administration remained adamant in its refusal to grant service-connected compensation.

John Smitherman made seven appeals to the Veterans' Administration, each one unsuccessful, each one bogged down by a technicality. This case is a bureaucratic nightmare. This case is a classic example of Government insensitivity to its citizens.

John Smitherman served his country proudly and even while lying on his deathbed because of a disease acquired while in his country's service, insisted, without hesitation, that he would serve his country again.

I hope that my colleagues will act favorably and expeditiously on this legislation.

I ask unanimous consent that recent editorials from the Nashville Banner and Tennessean regarding John Smitherman be printed in the RECORD at this point.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

[From the Nashville Banner, Sept. 15, 1983]

JOHN SMITHERMAN'S FIGHT GOES ON

John Smitherman, a 55-year-old Lincoln County man, was serving his country in the Navy during the days after World War II when testing of this nation's new-found atomic power was being tested in remote Bikini Atoll in the Pacific. Mr. Smitherman was there when an atomic bomb was tested in 1946, and for the past seven years he vainly sought benefits from the government in the form of disability pay.

Mr. Smitherman suffered from lymphatic cancer that cost him his legs and caused one hand to swell abnormally. The cancer, he said, was a result of the atomic testing to which he was exposed. Mr. Smitherman continued his fight until the day of his death last Sunday, not only for himself, but in behalf of the thousands of members of the National Association of Atomic Veterans, an organization of which he was chairman. There have been nearly 3,000 claims by veterans and their families of atomic testing induced illness. Sixteen have been granted. Mr. Smitherman's was not one of them.

In his stead, members of Tennessee's congressional delegation are carrying on the fight. "He knew he could count on his friends to continue fighting for him, and we will," said Rep. Jim Cooper. "John Smitherman knew that his time was short but his thoughts were not of himself," Sen. Jim

Sasser told the Board of Veterans' Appeals in Washington. "Do the right thing . . . give the justice to John Smitherman after his death that was denied him in life" Rep. Albert Gore Jr. urged the panel. Rep. Don Sundquist said Mr. Smitherman was a "quiet hero of a cause the country has not yet faced."

But instead of reaching a decision, the board sent his case back to Nashville for Mrs. Smitherman to add claims for survivor's benefits to the case. It then presumably will hear it again.

Rep. Sundquist told the board members, "Let's hope he didn't die in vain," adding that Mr. Smitherman had repeatedly said he would again serve his country. By his determination, his courage and his sacrifice, he is doing just that. The outcome of the John Smitherman case will have much impact on the cases of all the others who seek benefits from the Veterans Administration. Mr. Smitherman sought only justice, and he serves at least that, even in death.

[From the Nashville Tennessean, Sept. 14, 1983]

MR. SMITHERMAN'S LEGACY

For the last six years of his life, Mr. John Smitherman waged a courageous battle against lymphatic cancer.

The disease had spread from his colon to his spleen and liver. Both of his legs were amputated. One hand was five times the size of the other.

His death on Sunday ended Mr. Smitherman's battle with cancer. But the struggle for which he will be remembered was not against a disease, but against the Veterans Administration.

Mr. Smitherman was a World War II veteran. As a boiler operator in the U.S. Navy, he witnessed the 1946 atomic bomb testing on the Bikini Atoll. He often recalled that he was clad only in shorts, and that the atomic debris showered his bare chest. He received no safety instructions.

Despite the testimony of numerous physicians, the VA was never convinced that Mr. Smitherman's medical condition was the result of his exposure. They rejected his claim for disability pay. His wife cannot claim his disability pension.

According to the National Association of Atomic Veterans, which Mr. Smitherman chaired, there have been 2,883 radiation-related claims by veterans and their families. Only 16 had been granted by November, 1982.

Mr. Smitherman knew for months that his physical condition was terminal, but he continued to fight his battle. He testified to congressional committees on the injustice to atomic veterans. He was scheduled to appeal his case in Washington this week for the seventh time.

Mr. Smitherman's legacy will continue with other atomic veterans, and with all people concerned about humane treatment for those who have served this nation.●

By Mr. HOLLINGS (for himself, Mr. FORD, and Mr. RIEGLE):

S. 1855. A bill to authorize the operation of U.S. land remote sensing satellite systems, and for other purposes; to the Committee on Commerce, Science, and Transportation.

LAND REMOTE SENSING SATELLITE AUTHORIZATION ACT OF 1983

● Mr. HOLLINGS. Mr. President, on March 8 of this year President Reagan made a decision to seek to commercialize existing U.S. weather and land remote sensing satellite systems. As the Members of this body surely recall, the response by the Congress over the proposed sale of the weather satellites was a resounding and unanimous no. Since that time Secretary Baldrige has made an effort to involve the Congress in the administration's decisionmaking. He is to be commended for his forthrightness.

However, there is a basic flaw in the administration's plan, the sale of weather satellites does not make sense. A number of studies have been released and hearings held which explored the question of transfer of weather and land remote sensing satellites. I am unaware of any new information that would suggest that there is an advantage to the citizens of this country to transfer the weather satellites to the private sector. Let this be a clear signal again that this Senator finds little reason for placing weather satellites in private hands. If there are efficiencies to be made in the present operation of weather satellites, let the Department of Commerce find them. But let us not confuse anyone that the Congress has changed its mind on this question.

On the other hand, commercialization of satellite land remote sensing is a different matter. There are reasons for increased private sector participation in this area just as the private sector did in satellite communications years ago. This is an area of space commercialization that will produce increasing economic and public benefits. Clearly, the French and others see these benefits.

The Landsat program was developed by NASA more that 10 years ago. Recently, it has been managed by NOAA. The program has produced a valuable technology. The benefits of that technology to the Federal Government, to the State and local governments, to the private sector and the international community already have been well established.

Currently we have in operation a Landsat D satellite. Difficulties have arisen with regard to the operation of that satellite, and it now appears we will have to launch as early as possible a follow-on Landsat D' satellite. At this time there are no plans by the Federal Government to purchase additional satellites to follow after D'. The concept which the administration is pursuing is to seek ways to have the private sector invest in and develop follow-on land remote sensing satellite systems.

The administration approach unfortunately rests on the belief that both weather and land remote sensing satellites should be transferred to the private sector. They are soliciting bids from private companies through a request for proposal—RFP—process to own and operate these satellites. As I indicated at the outset, I believe the inclusion of weather satellites is not in the national interest. Their inclusion in the RFP process only confuses prospective bidders. This confusion, the delays associated with the RFP process, and the need to seek legislation to authorize the sale of those satellites would only put the United States at a major disadvantage with regard to future international competition in land remote sensing.

As an alternative to this process, I propose that the U.S. Congress deal with the issue of land remote sensing satellites now and not wait until late next year.

The bill I am introducing today sets forth several simple ground rules by which we can resolve this remote sensing issue and move to protect U.S. public and private interests. First, this bill states that it is the policy of the United States to assure data continuity beyond the functioning of the Landsat D' system. Second, that it is the policy of the United States to maintain the ownership and operation of the current Landsat D and D' system within the Government, providing an option for private sector leasing or contracting. Third, this bill would guarantee that whatever U.S. systems are developed, they shall comply with international and national security considerations. Fourth, that to assure data continuity the Secretary of Commerce shall immediately proceed to seek ways for private sector development and investment in land remote sensing satellite systems. This process would include a determination of basic Federal requirements for land remote sensing data, followed by a review of alternative, cost effective satellite systems that could meet these basic requirements. Among possible incentives, the Secretary of Commerce would have the authority to provide loan guarantees for private sector risk taking in this area.

Finally, this bill provides an option that if the private sector will not be able to furnish basic Government requirements for data, the Government may decide to purchase their own systems.

There is one company already interested in providing relatively inexpensive yet sophisticated satellite land remote sensing systems. With the encouragement provided in this bill, others may follow. We need to provide a climate for innovation that encourages imagination and the entrepreneurial spirit so characteristic of this Nation. To attempt to do so through a scheme previsouly proposed that insures a guaranteed market and a monoploy is not in the best American tradition. We can do much better. That is the aim of this bill.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1855

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Land Remote Sensing Satellite Authorization Act of 1983".

FINDINGS, PURPOSES, AND POLICY

SEC. 2. (a) FINDINGS.—The Congress finds and declares that—

(1) remote sensing from satellites can assist the rational management of the Earth's natural resources and environment by providing data on the geological, biological, hydrological, agricultural and other natural features of the Earth's surface;

(2) the United States is the world leader in developing land remote sensing technology through the experimental Landsat program;

(3) remote sensing data from satellites has been valuable and useful and is expected to be in greater demand in the future if it is available on a continuous, timely, and reliable basis, since data continuity is essential to market development;

(4) the Federal Government should, for the near future, continue to be responsible for the existing United States land remote sensing satellite system (including Landsats D and D'), so that the market for data and data products from such a system will expand and become more mature;

(5) the private sector has the technical ability and financial resources to develop, own and operate future United States land remote sensing satellite systems and, therefore, authority for private sector involvement in land remote sensing should be provided;

(6) the rapid development of follow-on land remote sensing satellite systems by the private sector should be encouraged to preserve and enlarge the benefits already realized from the existing United States land remote sensing satellite system; and

(7) the ownership and maintenance of the United States meteorological satellites are the responsibilities of the Federal Government and no action should be taken to transfer, lease or sell them to the private sector.

(b) PURPOSES. It is declared to be the purposes of the Congress in this Act that—

(1) the Secretary of Commerce shall be responsible for the operation of the existing United States land remote sensing satellite system (including Landsats D and D), with authority to lease or contract such operation to the private sector;

(2) the Secretary of Commerce shall establish a process for assuring data continuity after the existing United States land remote sensing satellite system is no longer in operation; and

(3) any United States land remote sensing satellite system shall be operated in a manner consistent with the national security and international obligations of the United States.

(c) POLICY.—It is declared to be the policy of the Congress in this Act that—

(1) the United States should take steps to ensure, on a non-discriminatory basis, dissemination of data from any United States land remote sensing satellite system;

(2) all nations have the right to acquire data from space systems in outer space;

(3) space technology developed by programs of the United States Government should be transferred to the private sector whenever feasible and cost-effective; and

(4) any regulations required under this Act shall be designed to encourage private sector operation of, and competition among, land remote sensing satellite systems.

DEFINITIONS

SEC. 3. As used in this Act, unless the context otherwise requires, the term—

(1) "data" means a set of signals collected by sensors on a satellite that are useful in describing or viewing the Earth's resources, features or environment, but does not include conclusions, manipulations or calculations derived from such measurements and observations;

(2) "data-handling segment" means that portion of the United States land remote sensing satellite system that receives, processes, stores and manages data transmitted from a satellite, including the aggregation or processing of such data into usable information, except that such term does not include the space segment, as defined in paragraph (3) of this section;

(3) "space segment" means that portion of the United States land remote sensing satellite system associated with satellite operation and control, and includes the satellite, its sensors, and associated equipment and facilities for tracking, guidance, and command purposes, except that such term does not include the data-handling segment, as defined in paragraph (2) of this section;

(4) "land remote sensing satellite system" means a system of one or more satellites operating in outer space, the purpose of which is to obtain data on the geological, biological, hydrological, agricultural, and other natural features of the Earth's surface, and includes the space segment and data-handling segment, except that the term does not include any satellite which is intended for (A) national security uses; (B) commercial telecommunications; (C) weather observation and forecasting; or (D) research and development;

(5) "Landsat" means the existing United States land remote sensing satellite system operated by the Department of Commerce including the D and D satellites and related ground systems; and

(6) "Secretary" means the Secretary of Commerce.

AUTHORITY OF THE SECRETARY

SEC. 4. (a) IN GENERAL.—The Secretary shall be responsible, in accordance with the provisions of this Act, for—

(1) the management and general oversight of the existing United States land remote sensing satellite system (including Landsat D and D);

(2) the operation of existing space and data-handling segments, including the leasing or contracting of such operation to the private sector, if the Secretary determines such operation to be feasible and cost-effective;

(3) the supervision and oversight of any non-governmental entity or entities operating any land remote sensing satellite system;

(4) determining the basic requirements of the Federal Government for land remote sensing satellite data; and

(5) assuring data continuity beyond the existing United States land remote sensing satellite system.

(b) OVERSEEING THE EXISTING SYSTEM.—The Secretary shall acquire from the National Aeronautics and Space Administration all portions of the existing United States land remote sensing satellite system, except for those portions which are devoted solely to research and development. Data from any research and development portion of such system should be made available as soon as possible for the purposes of this Act.

(c) DATA CONTINUITY.—(1) The Secretary shall prepare a comprehensive overall plan, with periodic amendments as necessary, for the management of the existing United States land remote sensing satellite system, including—

(A) procuring or acquiring launch services;

(B) launching Landsat D as soon as possible after Landsat D is no longer in operation;

(C) operating and maintaining the existing space and data-handling segments, including methods for reducing costs; and

(D) leasing or contracting the existing space or data-handling segments, or both, to the private sector.

(2) The Secretary shall establish a competitive process that seeks to provide data continuity after Landsat D is no longer in operation. Such process shall be based primarily upon—

(A) the Secretary's determination of the potential availability of cost-effective commercial United States land remote sensing satellite systems; and

(B) those conditions which will stimulate and foster efforts by the private sector to provide data continuity.

In determining whether a United States land remote sensing satellite system is cost-effective under this paragraph, the Secretary shall consider various basic requirements of the Federal Government for land remote sensing satellite data as compared to the cost of providing such data.

(3) The Secretary shall encourage the private sector to develop United States land remote sensing satellite systems which will meet the basic requirements of the Federal Government for such systems after Landsat D is no longer in operation. To increase the viability of private ownership and operation of United States land remote sensing satellite systems, the Secretary shall promote the use, sale and distribution of Landsat data and data products. The Secretary may guarantee any lendor or lessor against loss of principal and interest or other contractual commitments on leases or loans issued to finance development of such systems. If the private sector can not be encouraged to develop such systems, the Secretary may undertake to purchase for the Federal Government a land remote sensing satellite system that will meet such basic requirements.

(4) When Landsat D and D are no longer in operation, the Secretary shall facilitate the transfer or lease to the private sector of assets and facilities of the space and data-handling segments. Any such transfer or lease shall be conducted on a competitive basis.

(d) COOPERATION WITH OTHER AGENCIES.—The Secretary shall coordinate the operation of the existing United States land remote sensing satellite system and the regulation of any commercial United States land remote sensing satellite system with each department or agency of the Federal Government interested in such system or its data.

(e) INTERNATIONAL NEGOTIATONS.—The Secretary, with the guidance of the Secretary of State, may hold discussions with international bodies or foreign governments in

order to carry out the policies, purposes, and provisions of this Act.

PROHIBITION OF REPRODUCTION FOR SALE OR DISTRIBUTION OF DATA AND BASIC INFORMATION PRODUCTS

SEC. 5. (a) PROHIBITED ACTS.—(1) It shall be unlawful for any person to reproduce for sale or distribution, or to sell or distribute, any data or basic information product produced by the existing United States land remote sensing satellite system, except in accordance with conditions specified by the Secretary. In setting forth such conditions, the Secretary shall consider the fair use of data by agencies of the Federal Government, and for teaching and research purposes.

(2) Notwithstanding any other provision of law, no data obtained from any commercial United States land remote sensing satellite system may be duplicated or released by any agent or department of the Federal Government or any other user, except upon prior receipt by the owner of such system of the price of such data, as if such data had been purchased directly from the owner.

(b) PENALTY.—(1) Any person who violates any provision of subsection (a) of this section, or any regulation issued under such subsection, shall be subject to a civil penalty of not to exceed $25,000 for each such violation.

(2) Any such penalty may be compromised by the Secretary. In determining the amount of the penalty, or the amount agreed in the compromise, the appropriateness of such penalty to the size of the business of the person charged and the gravity of the violation shall be considered. The amount of such penalty, when finally determined, or the amount agreed upon in the compromise, may be deducted from any sums owed by the United States to the person charged.

(c) JURISDICTION.—(1) The United States district court shall have jurisdiction, for cause shown, to restrain or enjoin violations of subsection (a) of this section upon petition by the appropriate United States attorney, or the Attorney General on behalf of the United States.

(2) Actions under paragraph (1) of this subsection may be brought in the district where any act or transaction constituting the violation occurred or in the district court where the defendant is found, is an inhabitant, or transacts business. Process in such cases may be served in any other district or where the defendant is an inhabitant or wherever the defendant may be found.

(3) In any action brought under this subsection, subpenas for witnesses who are required to attend a United States district court may run into any other district.

REGULATIONS

SEC. 6. The Secretary is authorized to establish such regulations as may be necessary to carry out the provisions of this Act.

ALLOCATION OF COMMUNICATIONS FREQUENCIES

SEC. 7. Within 120 days after the date of enactment of this Act, the Federal Communications Commission shall determine the frequencies for use by United States Landsat and commercial land remote sensing satellite systems. In making such determination, the Federal Communications Commission shall seek the comments of the Secretary. The Federal Communications Commission shall without prejudice permit the development and construction of any United States land remote sensing system (or component thereof) while any frequency determination is being made.

APPLICABILITY OF THE NATIONAL AERONAUTICS AND SPACE ACT OF 1958

SEC. 8. Nothing in this Act shall be construed to reduce or otherwise affect the authority of the National Aeronautics and Space Administration under the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.) to continue the research, development, design, testing, and evaluation of remote sensing components, subsystems, and systems for experimental purposes.●

By Mr. BURDICK:

S. 1856. A bill entitled the "Criminal Reward Reimbursement Act"; to the Committee on the Judiciary.

CRIMINAL REWARD REIMBURSEMENT ACT

Mr. BURDICK. Mr. President, today I am introducing a bill to provide that convicted criminals reimburse any payor of a reward which was offered for information that led to the criminal's apprehension, arrest or conviction. This bill amends the Victim and Witness Protection Act of 1982 (Public Law 97-291).

A reward is as much of a loss as an injury to the property of the victim. Since this loss is caused by the criminal in order to complete the case against him he should be held liable for it when he is found guilty. The resultant benefits are several.

First, while it is given that many criminals are indigent and cannot pay back the reward, many others are affluent, and the possibility of paying back rewards amounts to an increased penalty. This additional burden will operate as a significant deterrent to crime and would be especially useful in fighting crime in areas like white collar crime and high level drug operations.

Second, the possibility of being reimbursed for a reward will encourage more rewards—both from private and public sources—to be offered. The additional rewards will encourage more whistle blowers to report criminal activities. The effect will be the discovery and adjudication of more crimes. The result will be a lower crime rate and a lower rate of unsolved crimes.

Third, this bill will not cost the Government any money; but rather, it will produce revenue for crime prevention. Though this legislation applies to both private and public rewards, any public money used for rewards that is reimbursed can then be used for another reward. In other words, once money is paid for a reward, it is not necessarily lost from the informant fund forever. It would, in effect, be recycled to the extent that the criminal can repay and to the extent that the court orders reimbursement.

Mr. President, at this point I would like to discuss what may be raised as an objection to this bill. Opponents may argue that if this proposal were law, nothing would prevent anyone from offering outrageous rewards because they can be reimbursed. There are several safeguards to prevent such an application.

First of all, the risk that the reward money will be lost forever is not eliminated. The offender must be convicted before he can be forced to pay back the reward.

Second, whether to impose reward reimbursement is a discretionary power of the judge. The law to which this provision is being added reads:

The court, when sentencing a defendant convicted of an offense under this title * * * may order, in addition to or in lieu of any other penalty authorized by law, that the defendant make restitution to any victim of the offense. 18 U.S.C. 3579(a)(1).

The third safeguard against the use of rewards getting out-of-hand is that the prospect for the payor to be reimbursed for the reward is always limited by the assets of the criminal. Finally, this bill specifies that the reimbursement shall not exceed $25,000.

In conclusion, Mr. President, I offer this legislation because it will be a significant factor in fighting crime in this country. Furthermore, it will force convicted criminals to pay some of the costs for society to maintain the law and order that they themselves have violated. No motive could be more just.

I ask unanimous consent that the content of of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1856

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (D) of paragraph (2) of rule 32(c) of the Federal Rules of Criminal Procedure is amended by inserting before the period at the end thereof the following: "and any reward that was paid for information leading to the apprehension, arrest, or conviction of the defendant".

SEC. 2. Subsection (b) of section 3579 of title 18, United States Code, is amended—

(1) in clause (3) by striking out "and" after the semicolon;

(2) in clause (4) by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(3) by inserting at the end thereof the following:

"(5) in any case in which a reward was paid for information furnished to the prosecution leading to the apprehension, arrest, or conviction of the defendant, reimburse the payor of the reward in an amount up to $25,000.".

SEC. 3. As a supplement to the report required by section 7 of Victim and Witness Protection Act of 1982 (Public Law 97-291), within one year after the date of enactment of this Act the Attorney General shall report to Congress regarding any laws that are necessary to insure that no Federal felon derives any profit from the sale of the recollections, thoughts, and feelings of such felon with regards to the offense committed by the felon until the payor of a reward receives restitution.

By Mr. DURENBERGER (for himself, Mr. MOYNIHAN, Mr. BRADLEY, and Mr. MATSUNAGA):

S. 1857. A bill to amend the Internal Revenue Code of 1954 to remove certain impediments to the effective philanthropy of private foundations; to the Committee on Finance.

TAX TREATMENT OF CONTRIBUTIONS TO PRIVATE FOUNDATIONS

● Mr. DURENBERGER. Mr. President, America's 22,000 private foundations have provided an invaluable service to our Nation by supporting important charitable work in communities nationwide. So great has been their support that over $3 billion has been spent annually by private foundations for philanthropic causes. Foundation grants support new approaches to community health, emergency food and shelter for the homeless, housing for the poor, scholarships, medical research, and numerous other charitable activities. America's foundations have met significant human needs that the Government might be called upon to perform without the initiatives of the private sector.

Since 1969, foundations have been subject to a multitude of rigorous Federal regulations. Tight restrictions have been imposed upon foundations by the Internal Revenue Code with respect to dealings with closely related parties, annual charitable distributions, business holdings, foundation investments and grants, and public reporting. Since enactment of these regulations, foundations have been carefully audited by the IRS and have proven in compliance with our tax laws.

Although the private foundation rules have provided an effective overall regulatory framework for foundations' charitable activities, more than a decade of experience has demonstrated that certain aspects of the rules create significant impediments to effective foundation philanthropy.

In order to encourage foundation development, in 1981 we removed a significant unforeseen impediment to foundation progress—the "5 percent" rules. The time has now arisen for us to take an important step and remove additional impediments to foundation philanthropy.

Today, Senator MOYNIHAN and I are introducing legislation that would eliminate the discriminatory tax treatment of lifetime gifts to foundations. Since 1969, such gifts have received significantly less favorable tax treatment than giving to other charities. The result has been a drastic decline in the level of lifetime gifts to foundations. Our legislation would help reverse this trend by making these gifts to foundations deductible on the same basis as gifts to other charities.

Our legislation would also simplify parts of the 1969 legislation by making several technical changes. It would limit the definition of "family member" to the children and grandchildren of substantial contributors and other so-called "disqualified persons," rather than to all lineal descendants of such disqualified persons.

This legislation would allow foundations to rely on official Internal Revenue Service rulings recognizing the tax-qualified status of potential grantees, and it would apply strict and detailed recordkeeping and reporting requirements only where total grants by a private foundation to a particular grantee during a taxable year exceed $25,000. Finally, our bill would provide the Secretary of the Treasury with authority to abate first-level penalty rules in cases in which a violation of the private foundation rules is due to reasonable cause and is corrected within the statutory correction period.

Identical legislation was introduced in the House in May and 18 of the 25 members of the House Ways and Means Committee have already joined as cosponsors. This important legislation has also received broad support from the charitable community.

I believe this is an important step in supporting the vital role foundations serve in our country and it sets an important example to the rest of the private sector.

I am hopeful that this legislation will be favorably considered by the Senate in the very near future, and I ask unanimous consent that the entire text of the legislation be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1857

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DEDUCTION FOR CHARITABLE CONTRIBUTIONS TO PRIVATE FOUNDATIONS.

(a) PERCENTAGE LIMITATIONS.

(1) IN GENERAL.—Paragraph (1) of section 170(b) of the Internal Revenue Code of 1954 (relating to percentage limitations on deductions for charitable contributions) is amended—

(A) by striking the phrase "described in subparagraph (d)" as it appears in subparagraph (A)(vii) and inserting in lieu thereof the phrase "as defined in section 509(a)",

(B) by striking out subparagraph (B),

(C) by redesignating subparagraph (C) as subparagraph (B),

(D) by striking out subparagraph (D), and

(E) by redesignating subparagraph (E) as subparagraph (C).

(b) CONTRIBUTIONS OF CAPITAL GAIN PROPERTY.—The first sentence of section 170(e)(1) of such Code (relating to certain contributions of ordinary income and capital gain property) is amended by striking subparagraph (B) and inserting in lieu thereof the following:

"(B) in the case of a charitable contribution of tangible personal property, if the use by the donee is unrelated to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in subsection (c)), 40 percent (28/46 in the case of a corporation) of the amount of gain which would have been long-term capital gain if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution)."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1982.

SECTION 2. TECHNICAL AND ADMINISTRATIVE AMENDMENTS.

(a) DEFINITION OF FAMILY MEMBER.—Subsection (d) of section 4946 of the Internal Revenue Code of 1954 (defining members of family) is amended to read as follows:

"(d) MEMBERS OF FAMILY.—For purposes of subsection (a)(1), the family of an individual shall include only his spouse, ancestors, children, grandchildren, and the spouses of children and grandchildren."

(b) RELIANCE UPON DETERMINATIONS BY THE SECRETARY.—Section 4946 of the Internal Revenue Code of 1954 (relating to special rules for application of the private foundation rules) is amended by adding at the end thereof the following subsection:

"(e) RELIANCE UPON DETERMINATIONS BY THE SECRETARY.—A grant by a private foundation to an organization which has been determined by the Secretary to be an organization described in paragraphs (1), (2), or (3) of section 509(a) or in paragraph (3) of section 4942(j) shall be treated as a grant to such an organization provided that the grant or other expenditure is made prior to the earlier of the date of publication of notice by the Secretary that the organization is no longer described in paragraphs (1), (2), or (3) of section 509(a) or in paragraph (3) of section 4942(j) or the date on which the foundation acquires actual knowledge that the organization has been notified by the Secretary of such a change in the organization's status, and provided that the foundation was not responsible for (other than by making a grant or grants), or aware of such a change in the organization's status."

(c) EXEMPTION OF CERTAIN GRANTS FROM EXPENDITURE RESPONSIBILITY REQUIREMENT.—Paragraph (4) of section 4945(d) of the Internal Revenue Code of 1954 (defining taxable expenditure) is amended to read as follows:

"(4) as a grant to an organization unless—

"(A) the private foundation exercises expenditure responsibility with respect to such grant in accordance with subsection (h),

"(B) such grant is to an organization described in paragraph (1), (2), or (3) of section 509(a), or

"(C) the aggregate amount of grants made during the private foundation's taxable year by the foundation (and all other private foundations effectively controlled, directly or indirectly, by the same person or persons who control the foundation in question) to such organization does not exceed $25,000."

(d) ABATEMENT OF FIRST TIER TAXES IN CERTAIN CASES.—

"(1) IN GENERAL.—Subchapter C of chapter 42 of the Internal Revenue Code of 1954 (relating to abatement of second tier taxes) is amended by redesignating sections 4961 and 4962 as sections 4962 and 4963 respectively and by inserting as the first section in such subchapter the following new section:

"SEC. 4961. ABATEMENT OF FIRST TIER TAXES IN CERTAIN CASES.

"(A) GENERAL RULE.—If the Secretary determines that—

"(1) a taxable event was due to reasonable cause and not to intentional disregard to rules and regulations, and

"(2) such event was corrected within the correction period for such event,

then any first tier tax imposed with respect to such event (including interest) shall not be assessed, and if assessed, the assessment shall be abated, and if collected shall be credited or refunded as an overpayment."

(2) CONFORMING AMENDMENTS.—

(a) The title of subchapter C of chapter 42 is amended to read as follows:

"Subchapter C—Abatement of First and Second Tier Taxes in Certain Cases"

(B) The table of sections for subchapter C of chapter 42 is amended to read as follows:

"Sec. 4961. Abatement of first tier taxes in certain cases.

"Sec. 4962. Abatement of second tier taxes where there is correction.

"Sec. 4963. Definitions.

(e) EFFECTIVE DATES.—

(1) The amendment made by subsection (a) shall take effect on January 1, 1983.

(2) The amendments made by subsections (b) and (c) shall apply to grants made after December 31, 1982.

(3) The amendments made by subsection (d) shall be effective for taxable years beginning after December 31, 1982.●

● Mr. MOYNIHAN. Mr President, I rise today with my distinguished colleague from Minnesota, Mr. DURENBERGER, to introduce legislation that will remove certain impediments to private foundation philanthropy and will reduce certain administrative burdens now imposed on private foundations. This legislation is needed so that private foundations can continue to grow and to support charitable activities more effectively.

In 1969, Congress enacted comprehensive restrictions on private foundations to correct certain abusive practices and insure that they operate strictly in the public interest. For the most part, these 1969 rules have provided an effective overall regulatory framework. More than a decade of experience, however, has demonstrated that certain aspects of these restrictions have created significant impediments to effective foundation philanthropy.

Current law strongly discourages lifetime gifts to private foundations by according such gifts much less favorable tax treatment than gifts to other charities. Current law also imposes significant administrative burdens on foundations. These tax rules have contributed to a two-thirds drop in the birthrate of new foundations since 1969. This legislation would eliminate the discriminatory treatment of gifts to private foundations.

The bill would also reform certain aspects of the 1969 restrictions, thereby reducing the administrative burdens on private foundations and freeing them to support charitable activities more effectively. Under current regulations, the definition of "family member" includes all lineal descendants. The present bill would limit the definition of "family member" to the children and grandchildren of substantial contributors and other so-called disqualified persons, rather than to all lineal descendants of such disqualified persons. The bill would also allow private foundations to rely upon official Internal Revenue Service rulings recognizing the tax-qualified status of potential grantees. The bill would also limit the current detailed recordkeeping and reporting requirements to those instances in which the total grants of a foundation to a particular grantee during a given year exceeded $25,000. Finally, the bill would give the Secretary of the Treasury authority to abate first-level penalty taxes in cases in which a violation of the private foundation rules is due to reasonable cause and is corrected within the statutory correction period.

This important legislation has received broad support from the public charities as well as private foundations, and will contribute greatly to the health of philanthropy in our Nation. In recent years, America's 22,000 private foundations have paid out more than $3 billion annually to support important charitable work in communities nationwide. Foundation grants support new approaches to community health, emergency food and shelter for the homeless, housing for the poor, scholarships, medical research, and a range of other charitable activities. Were it not for these initiatives of the private sector, Government might well be called upon to meet many of these needs.

Mr. President, let me mention that experts in these matters predicted that Congress would have to revise some of what it did in 1969.

As Boris Bittker, in his book "Federal Income Taxation of Corporations and Shareholders," observes:

(T)he Tax Reform Act of 1969 affected a massive overhaul of the tax treatment of foundations and exempt organizations. These provisions constitute the most complex and restrictive feature of the 1969 legislation, and even a brief summary of their scope and effect is well beyond this work. Suffice it to say that the 1969 changes can be characterized as "modern mortmain" legislation—so much so that amelioration of its harsher aspects may be the order of the day when the passions of 1969 fade away.

In 1981 we took an important first step to insure the future vitality of foundation philanthropy, by removing a significant unforeseen impediment arising from the 1969 legislation, the so-called 5-percent rule. We must now remove additional impediments to the health of foundation philanthropy. This bill would do so.●

By Mr. MATHIAS (for himself and Mr. EAGLETON):

S. 1858. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act, and for other purposes; to the Committee on Governmental Affairs.

AMENDMENT TO DISTRICT OF COLUMBIA SELF-GOVERNMENT AND GOVERNMENTAL REORGANIZATION ACT REGARDING LEGISLATIVE VETO

● Mr. MATHIAS. Mr. President, on June 23, 1983, the Supreme Court handed down its sweeping decision in *Immigration and Naturalization Service* v. *Chadha,* 103 S. Ct. 2764 (1983), which calls into question the legitimacy of all legislative veto provisions enacted and used by the Congress over a number of decades.

One of the more than 200 statutes apparently affected by the Chadha decision is the District of Columbia Self-Government and Governmental Reorganization Act of 1973, also known as the Home Rule Act. When considered and enacted by the Congress in the early 1970's, a scheme was devised by which the citizens of the District of Columbia could govern themselves, while the Congress retained the right to exercise its constitutional authority to act "as legislature for the District." To this end, a process by which all District City Council enactments are sent to the Congress for review, was enacted. Under this process, during the congressional review period, the Home Rule Act allows for the passage of a concurrent—and in certain situations a simple—resolution to block a City Council enactment from becoming law. Needless to say, concurrent and simple resolutions involve no presentment to the President. And, assuming such action to block an enactment of the City Council is legislation, this process would appear to run afoul of the mandates set out in Chadha.

Mr. President, the District of Columbia is a functioning municipality. Like any other municipal government, the government of the District faces myriad problems and issues in its day-to-day operations. One of its most pressing problems, not surprisingly in this day and age, is keeping itself within its budgets and funding itself during low cash flow periods. To accomplish this, the city is working diligently to get itself into the municipal bond market with a reasonable bond rating. However, since the Chadha ruling, the city has been unable to obtain an unqualified go-ahead from its bond counsel.

Mr. President, this creates an urgent situation for the city that must be addressed expeditiously. As a result, I am joined by Senator EAGLETON today in introducing a technical correction to the House Rule Act which will bring that law into compliance with the mandates of Chadha. Our bill will continue to allow Congress to override City Council enactments, but will require the utilization of the mandated

bicameral consideration and presentment to the President.

The District of Columbia has functioned well under the Home Rule Act to date. Over 700 enactments of the City Council have come to the Congress for review, and only two of those have been overturned by the Congress. The Members of the Senate serving on the District of Columbia Subcommittee have worked diligently to review Council enactments sent to us for review and have worked equally hard to use our veto responsibility and authority sparingly. The system does work, and will continue to work. Building the Chadha mandates into the Home Rule Act will not change that.

Mr. President, a great deal of time and effort has gone into the bill we introduce today. We have worked closely with both the Mayor and the City Council and with the House District Committee. We, therefore, come to the Senate with a consensus approach to meet the urgent situation which faces the District of Columbia. I urge my colleagues to give this important measure favorable and expeditious consideration.●

● Mr. EAGLETON. Mr. President, the bill Senator MATHIAS and I introduce today is of utmost importance to the District of Columbia.

The District, which, since 1975, has operated as a self-governing municipality under the District of Columbia Self-Government and Governmental Reorganization Act—home rule—found this June that it was caught in the net thrown around the legislative process by the Supreme Court's decision in *Immigration and Nationalization Service* v. *Chadha*, 103 S. Ct. 2764 (1983).

While the publicity and legal discussions emanating from the Chadha decision have focused on the impact of the decision vis-a-vis such major pieces of legislation as the Budget Act, the War Powers Act, and the Arms Export Control Act, those of us who have long been associated with the District of Columbia knew that in light of Chadha, Congress would have to move quickly to amend the Home Rule Act and change the act's so-called legislative veto provisions.

Without such amendment the District, which as a functioning local government makes legal commitments and decisions on a daily basis, leaves itself open to challenge on the validity of its law. In addition, the city informed us last week that its bond counsel has advised the city that because of the Chadha cloud, the District will be unable to participate in the municipal bond market. Since the District will depend on the bond market for its operating revenues beginning October 1, it is now crucial that the legislative veto provisions of the Home Rule Act be brought into conformance with Chadha.

As you know, Mr. President, I was floor manager during Senate consideration of the Home Rule Act and was active in the joint Senate-House conference on the act. We wrote the legislative veto provisions—known in the act as a resolution of disapproval—into the act so that Congress could allow the District to manage its own government but still have Congress retain review over District laws, thus meeting the constitutional mandate of article 1, section 8, clause 17, which states:

The Congress shall have power * * * to exercise exclusive legislation in all cases whatsoever, over such District * * *."

As a practical matter, the resolution of disapproval procedure allows Congress 30 legislative days in which to review all acts passed by the Council and signed by the Mayor of the District of Columbia. If, within those 30 days, Congress does not pass a resolution of disapproval, the act automatically becomes city law.

To date, I feel this review process has worked rather well. Since 1975 and the inception of the city's home rule government, Congress has disapproved only two city acts. A total of 744 acts sent to Congress have become law.

With this track record, I would argue that Congress could cure the city's Chadha problem by simply eliminating the review process altogether. Given the constitutional requirement, however, and given the uncertainty about how Chadha will affect the legislative process overall, I am more comfortable at this point with simply cleaning up the Home Rule Act so that it meets Chadha's technical requirements: that is, turning the resolution of disapproval into a joint resolution, which requires passage by both Houses of Congress and transmittal to the President.

That small technical correction, which is made by the bill we introduce today, puts the city back to its pre-Chadha legal status, retains the pre-Chadha review procedure for Congress, and lets the city get on with its daily operations, including bond offerings.

This bill in no way sets a precedent for, or offers a solution for, other Chadha problems. It is a simple technical change to allow the District of Columbia to proceed with its business, and, since time is of the essence here, I urge my colleagues to adopt this bill with the utmost speed.●

By Mr. DOMENICI:

S. 1859. A bill for the transfer of certain interests in lands in Dona Ana County, N. Mex., to New Mexico State University, Las Cruces, N. Mex.; to the Committee on Energy and Natural Resources.

TRANSFER OF CERTAIN LAND TO NEW MEXICO STATE UNIVERSITY

● Mr. DOMENICI. Mr. President, today I introduce a bill that will transfer control of 5,711.39 acres from the Bureau of Land Management to New Mexico State University. This land is the remaining part of some 50,000-plus acres that was set aside from the university.

These 5,700-plus acres are interspersed or, as we say in New Mexico, intermingled within the 52,000 acres. This transfer will once and for all clearly spell out the boundaries of the NMSU college ranch, where important research continues each year.

This proposed legislation complies with the provisions set forth in the Federal Land Policy and Management Act of 1975 in that the lands are extremely difficult for the BLM to manage because they are found within lands managed by the university. Surely university research would fall under the category of the public good being served by a transfer.

I would hope that as this legislation progresses through the process and that the Interior Department will come out in strong support of it.

I would point out that the Federal Government will maintain ownership of mineral rights under the land and that the legislation contains the typical reverter clause which States that the land must be used for college research.

In closing, I would point out that New Mexico State University is a leader in both livestock and range research and that this college ranch plays an important part in programs in that area. The president of the university, Dr. Gerald Thomas, is a leading expert in these fields and is known worldwide for his work in these areas.

I would hope that the Congress acts quickly on this legislation so that the college ranch can move on to new horizons in the areas of livestock and range research.●

By Mr. PRESSLER:

S. 1861. A bill to authorize the development of a new generation land remote sensing satellite, and to insure the role of the United States as the world leader in developing and utilizing land remote sensing technology through the Landsat program; to the Committee on Commerce, Science, and Transportation.

LAND REMOTE SENSING SATELLITE AUTHORIZATION ACT

● Mr. PRESSLER. Mr. President, I am introducing legislation today which would authorize the development of another land remote sensing satellite (Landsat) as a follow-on to the current series in the Landsat program. Timely consideration of this bill has become especially important in light of recent developments in the land remote sensing field.

Our present Landsat satellite has developed serious problems which jeopardize the flow of valuable scientific,

economic, and military information to U.S. users. A follow-on satellite, already built, will be launched within a few months. Its life expectancy is approximately 3 years. If we are to insure continuity of these data, we need to begin building the next satellite very soon. We are already in danger of a data gap for valuable military, economic, and scientific information. The longer we delay consideration of this matter, the more serious the problem becomes.

This problem is further exacerbated by new competition from foreign countries which jeopardizes the U.S. market for these data. Since this technology was first developed over a decade ago, the United States has been the undisputed leader in the field. Recently, however, as pointed out in the attached article from the Wall Street Journal, other foreign countries have made great strides in this area and may soon be in a position to capture much of our market. By failing to address the Landsat issue in a timely matter, we are helping foreign countries beat us at our own game. If we continue our present course, they may well succeed.

Mr. President, we have made great strides in Landsat technologies in the past 10 years, but it is still in its infant stages. The remote sensing program holds even greater promise for generations to come. In addition to current applications, Landsat has the potential to provide us with the tools necessary for an efficient, economic global information and management network. They orbit hundreds of miles above the Earth, scanning continents at a time to tell us what resources we have, how they are changing, and what we can be doing to more efficiently and effectively manage them to the benefit of all mankind.

I am confident that this program will one day mature to a point where we can turn its operation over to private enterprise. Until we reach that point, however, we must insure program continuity and world leadership through researching and developing better technology and application.

Space holds great opportunities for us in better understanding and managing the complex and constantly evolving world in which we live. Today's decisions will affect our world for many generations to come. I urge my colleagues to join me in supporting this vitally important measure, and insure that those decisions will be in the best interest of all mankind.

I ask unanimous consent that the Wall Street Journal article, entitled "French Company To Offer Images of Earth as U.S. Monopoly in Field Unravels," be printed immediately following this statement.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FRENCH COMPANY TO OFFER SATELLITE IMAGES OF EARTH AS U.S. MONOPOLY IN FIELD UNRAVELS

(By Arlen J. Large)

The picture shows the city of Ann Arbor, complete with the University of Michigan football stadium, taken from an airplane 21,000 feet high. It's intended to simulate the way the same scene would look from a satellite orbiting 500 miles overhead.

"Familiarisez-vous avec les donness SPOT!" commands a bilingual brochure, or "Get acquainted with SPOT data!" The sales pitch and get-acquainted pictures are part of a bold foreign invasion of a very specialized U.S. market: companies that need satellite images of the Earth's cities, crop lands, mountains and oceans.

The invader is SPOT Image Corp., an American subsidiary of a multinational company based in Toulouse, France. The company plans to launch its first picture-taking satellite in January 1985, on the European Ariane rocket. Not waiting for that, SPOT is already selling pictures and computer tapes made from airplane flights over Ann Arbor and 60 other U.S. test sites in June and July. Potential customers can use the aerial data to teach their computers how to process SPOT pictures, so they're ready once the real satellite starts working.

With these aggressive marketing tactics, SPOT is encroaching on the very homeland of a global monopoly enjoyed by the U.S. government's pace-setting Landsat satellites. For more than a decade, Landsats have been sending down Earth images useful to oil explorers, mining prospectors, crop forecasters, timber managers and land-use planners all around the world. The pictures aren't as sharply revealing as those taken by U.S. and Soviet military spy satellites, but for civilians they've been the only goods on the shelf.

A SICK SATELLITE

Now the Landsat monopoly is unraveling. The current Landsat in orbit carries an experimental new camera that's the best yet, but its radio transmitter and power supply are prematurely sick. The satellite is expected to die this fall, and the government doesn't know what to do next.

Congress has yet to approve the $25 million cost of putting up a replacement next spring. The Reagan administration has said there will be no more government Landsats after that, but it's under strong pressure from data users to keep launching them. Either way, today's policy uncertainty promises big gaps in the future Landsat picture flow.

The likelihood of untapped markets is attracting new players. A new Earth-sensing satellite specializing in ocean scenes is being designed in Japan. Space Services Inc. of Houston, along with two other private firms announced Wednesday a plan for putting up three Earth-sensing satellites in 1986, no matter what the government does with the Landsat system.

And then there's SPOT. "The market still has to be developed," says Gilbert Weill (pronounced Vail), who as president of the U.S. subsidiary, hunts customers from his newly opened offices in downtown Washington. Central to his marketing campaign is a promise that despite Landsat's brilliant scientific performance in representing the Earth's features, SPOT will be a faster and more reliable purveyor of pictures to its customers.

"People must believe that the data can flow," says Mr. Weill. "That's a very big challenge, and our first priority."

SPOT's promise to keep its data flowing, once it starts, is backed by government money. Basically a creature of the French space agency, the parent SPOT Image Societe Anonyme in Toulouse is 34 percent owned by the government of France, 4 percent by the government of Belgium and 6 percent by the government of Sweden, along with private investors.

"There's no way in the world that SPOT Image will fold," says Frederick Henderson, president of the Geosat Committee, a collection of U.S. oil, mineral and engineering companies that use satellite pictures. "Those governments will keep it going."

Though details aren't set, SPOT would like to build a station in Canada to receive its raw satellite signals for picture distribution to North American customers. The main product will be computer tapes that a customer can use for further refinement of a landscape's image to meet the specialized requirements of, say, crop forecasting. A whole new cottage industry of image-processing companies has sprung up to do this work for hire.

SPOT plans to sell pictures that can show surface objects as small as 10 meters, compared with the 80-meter resolution offered by the main Landsat camera. SPOT also says its customers can place special orders for scenes in out-of-the-way places, and in three-dimensional images as well. Landsat can't do that, but it does offer images in a broader array of wave lengths than the SPOT product, including those responsive to limestones and clays especially prized by geologists. That's why the Geosat Committee's Mr. Henderson and other data users, while welcoming the arrival of SPOT, hope the U.S. government will keep putting up Landsats as fast as they wear out.

ONE VS. TWO SYSTEMS

SPOT's Mr. Weill says the widely heard charge that he is trying to take advantage of Landsat's technical and political troubles is unfair. "I don't think we've had an opportunistic attitude," he says. "We don't want to see the Landsat program in jeopardy. Data from two systems is going to flow better than from a single system."

The Reagan administration wants the U.S. government to get out of the commerical Earth-sensing satellite business once the current Landsat's replacement wears out in 1987 or so. The best U.S. defense against foreign competitors like SPOT, Commerce Secretary Malcolm Baldrige has told Congress, "is to get these satellites into the hands of a competent firm that can build on the technology and knows how to provide what the customers need."

But the administration's hope of transferring the Landsat system to one or more private operators is bumping into a common belief that nobody can make an unsubsidized profit on the young, weak market for Earth pictures. The hard-nosed attitude of national-security bureaucrats hasn't fostered much willingness of private companies to make big investments in picture-processing equipment; at a recent meeting of would-be investors, a State Department official said the government wants a veto over any private company's installment of receiving stations in countries deemed politically undesirable, and a Pentagon official said the government won't allow the pictures of private operators to approach the image reso-

lution of spy satellites. People at the meeting were "shocked," says a participant.

Reluctance of private companies to own picture satellites alone is why the administration is willing to transfer its weather satellites along with the Landsats, so a new owner could be assured of a fat market in selling weather data back to government forecasters. That's the deal Communications Satellite Corp. wants to bid on, but the idea has few backers in Congress.

By Mr. DOMENICI:

S. 1864. A bill to amend the Internal Revenue Code of 1954 to provide a declaratory judgment with regard to the extension of time for the payment of estate tax; to the Committee on Finance.

RIGHT OF APPEAL WITH RESPECT TO EXTENSION OF TIME TO PAY ESTATE TAXES

● Mr. DOMENICI. Mr. President, today I am introducing a bill which provides a remedy to the estates of decedents who held interests in closely held businesses and whose estates are being deprived of the benefits of section 6166 of the Internal Revenue Code by the Commissioner of the Internal Revenue without a right of appeal, before the estate taxes are assessed and paid. The bill I am introducing today provides a right of appeal to the executors of a decedent who held interests in closely held businesses which might qualify for the benefits of section 6166 under the Internal Revenue Code of 1954, but who otherwise are being deprived of such benefits by the Commissioner without the right of appeal.

Presently, executors can only appeal such decisions by the Commissioner after the business has been sold, or broken into parts and sold, to pay the estate taxes. At this point, appeals are useless, and the purpose of section 6166 is thwarted. Because no executor has the right of appeal from an IRS determination with respect to a closely held business under section 6166, Congress' intent in passing into law section 6166 is being thwarted in many situations. Because the statute itself is silent with respect to the definition of a "closely held business," in terms of the parameters of the individual's trade or business or degree of activity required of the business, the IRS has had the authority and power to determine what a closely held business is without any fear of judicial review of such decision.

The purpose of section 6166 was to protect businesses and heirs of decedents from having to liquidate businesses in order to pay estate taxes. By liquidating a business in order to pay estate taxes, the business was either destroyed or substantially impaired. The purpose of section 6166 was to prevent such general hardship either to the business or the heirs of the decedent. The Commissioner's attempt to limit businesses which qualify for the election under section 6166 to manufacturing, mercantile, and service enterprises is contrary to the intent of the statute itself. By providing for a declaratory judgment of the Commission's ruling on what qualifies as a closely held business, Congress will be providing estates of decedents a remedy to an adverse decision by the Commissioner.

Many people who operate businesses as sole proprietorships are going to be deprived of the benefits of section 6166. The Commissioner has determined that such businesses do not qualify as closely held businesses and, therefore, they receive less favorable treatment than a business operated as a partnership or a corporation. The statute itself expressly includes all three types of ownerships as an interest in a closely held business, and it makes no distinction with respect to the nature of the assets held in connection with the operation of the business. If the purpose of section 6166 is seen to protect the active conduct of a trade or business from premature disposition, there is no reason for treating different types of ownership differently. By providing executors of estates the right to appeal the Commissioner's decision with respect to controversies involving section 6166, Congress will be preventing the Commissioner from thwarting any purpose of its passage of section 6166. My bill, which I am introducing today on behalf of a constituent, will provide a remedy to the estates of decedents which could potentially qualify as closely held businesses, but which are being denied such a right. This bill will prevent the estates of decedents, with interests sufficient to qualify as a closely held business, from suffering irreparable injury, and it provides an adequate remedy at law to the estate of such a decedent.

This declaratory judgment procedure only applies where there is an actual controversy. No declaratory judgment will be available prior to a decedent's death or prior to a transaction involving disposition or withdrawal of an interest in a closely held business. Jurisdiction to issue a declaratory judgment is given to the U.S. Tax Court, the U.S. Court of Claims, and the district court for the United States. Any declaration by any of these three courts is to be considered a final judgment and reviewable as such. The remedy which this bill provides is available only if the petitioner, that is, the executor of a decedent's estate, has exhausted all available administrative remedies within the Internal Revenue Service. An executor must demonstrate that the Internal Revenue Service has acted adversely to the decedent's estate, and that he has appealed any adverse determination by a district office to the appellate division of the Internal Revenue Service, or has requested or obtained through the district director technical advice of the national office. To exhaust his administrative remedies, an executor must satisfy all procedural requirements of the Service. Mr. President, it is my hope that the bill I am introducing today will help alleviate any unjust and undue hardship to any estate, business, or heirs of a decedent resulting from an adverse determination by the Commissioner with respect to section 6166.

I am aware that Senator SYMMS has introduced a bill that deals with this particular issue as well as other items in the estate tax area. The particular problem addressed in my bill has come to my attention because New Mexicans and their tax counsel have found this provision to be burdensome and unfair.

The American Bar Association has worked on this topic and their suggestions are incorporated in this bill. I hope the Finance Committee will act soon on this piece of legislation.●

By Mr. STEVENS (for Mr. JEPSEN and Mr. HUDDLESTON):

S. 1865. A bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and to the 1985 crop wheat and feed grain programs; read twice and placed on the calendar.

EARLIER ANNOUNCEMENT OF AGRICULTURE PROGRAMS

Mr. JEPSEN. Mr. President, today I am introducing legislation which would require the Secretary of Agriculture to announce farm programs earler than is now specified by law.

This bill is similar to the measure I introduced on July 27. At that time, the companion measure, H.R. 3564, passed the House and unanimously passed the Senate on August 2.

Despite strong bipartisan support for the bill, the President vetoed the measure on August 12. The bill I am introducing today is essentially the same bill I introduced previously, but it contains flexibility for the Secretary of Agriculture to make changes when unforeseen circumstances arise. I anticipate administration support for this measure.

I must emphasize that the main thrust of this legislation I am introducing today is the same as the language in my original bill which will be of great help for farmers and agribusiness to plan for the 1984 feed grain crop.

The bill requires announcement of the 1984 farm program for feed grains by September 30, 1983, the 1985 feed grain program by September 30, 1984, and the 1985 program for wheat by July 1, 1984. The understanding exists that the Secretary may make adjustments in the program announcement within 30 days if there is a significant

change in the total supply of feed grains.

Mr. President, the historical complaint about farm programs is the late date of their announcement. The poor timing in the announcement of this year's payment-in-kind program, for example, added to this perception and created many problems for farmers and the agri-business community.

Current announcement deadlines are August 15 for wheat programs and November 15 for feed grain programs. Both dates are too late for adequate planning by either farmers or agribusiness suppliers.

Under normal conditions, farmers make planting decisions in the fall. When a program is not announced until mid-January, the farmers often suffer financial disaster. The same is true with agribusiness. The bad timing of the PIK program left agri-business burdened with costly inventories and huge financial losses.

The bill that I am introducing today is a signal to our Nation's farmers that they can make financial decisions based on the knowledge that USDA will make the 1984 program decisions by September 30 for feed grains. It will also signal to our agri-business community our interest to require USDA to make an early announcement that will help our farm suppliers make sound management decisions for 1984.

Mr. HUDDLESTON. Mr. President, this legislation will insure that the provisions of future wheat and feed grain programs are announced at the earliest possible date, while giving the Secretary of Agriculture the flexibility to respond to unforeseen circumstances.

H.R. 3564, a bill that passed Congress but was vetoed by the President on August 12, required earlier announcement dates for the 1984 and 1985 crop feed grain programs, and the 1985 crop wheat program.

The bill Senator JEPSEN and I are introducing today will retain the announcement dates proposed in the earlier vetoed bill, but give additional discretionary authority to the Secretary to make changes in the program announcements if a significant change in the total supply of affected crops occurs.

Under the bill, the Secretary will be required to announce key details of the 1984 feed grain program by September 30, 1983, instead of the November 15, 1983, deadline provided by existing law; and the 1985 feed grain program announcement will be required by September 30, 1984. The 1985 wheat announcement deadline will be set at July 1, 1984, instead of the August 15 deadline in existing law.

In addition, the Secretary of Agriculture would be given discretionary power to make changes in the program announcement within 30 days after each such announcement deadline if there is a significant change during that period in the total supply of the affected commodity.

The program announcement dates specified in the bill will give farmers and farm supply industries additional time to plan for the next year's production.

Mr. President, the provisions of the bill will benefit farmers, industries that produce farm supplies, and ultimately, the consumers of farm products.

ADDITIONAL COSPONSORS

S. 175

At the request of Mr. DECONCINI, the name of the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 175, a bill to amend title 17 of the United States Code to exempt the private noncommercial recording of copyrighted works on video recorders from copyright infringement.

S. 338

At the request of Mr. COHEN, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 338, a bill to revise the procedures for soliciting and evaluating bids and proposals for Government contracts and awarding such contracts, and for other purposes.

S. 815

At the request of Mr. HATFIELD, the name of the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 815, a bill to provide that it shall be unlawful to discriminate against any meetings of students in public secondary schools and to provide the district courts with jurisdiction.

S. 875

At the request of Mr. MATHIAS, the name of the Senator from California (Mr. WILSON) was added as a cosponsor of S. 875, a bill to amend title 18 of the United States Code to strengthen the laws against counterfeiting of trademarks, and for other purposes.

S. 891

At the request of Mr. BUMPERS, the name of the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 891, a bill to develop additional procedures for Federal land sales.

S. 905

At the request of Mr. EAGLETON, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Delaware (Mr. BIDEN), the Senator from Hawaii (Mr. INOUYE), and the Senator from Kentucky (Mr. FORD) were added as cosponsors of S. 905, a bill entitled the "National Archives and Records Administration Act of 1983."

S. 917

At the request of Mr. STAFFORD, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 917, a bill to amend the Comprehensive Environmental Response, Compensation and Liability Act of 1980, commonly referred to as the Superfund law, so as to provide compensation for the victims of environmental pollutants and poisons.

S. 1025

At the request of Mr. HATFIELD, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1025, a bill to establish in the Federal Government a global foresight capability with respect to natural resources, the environment, and population; to establish a national population policy; to establish an interagency Council on Global Resources, Environment, and Population, and for other purposes.

S. 1035

At the request of Mr. BENTSEN, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 1035, a bill to provide for the enforcement of a trade agreement between the United States and the Commission of the European Communities concerning imports of steel pipe and tube products.

S. 1159

At the request of Mr. HATFIELD, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1159, a bill to amend the Export Administration Act of 1979 to extend the provisions relating to the export of domestically produced crude oil.

S. 1301

At the request of Mr. HEINZ, the name of the Senator from New York (Mr. D'AMATO) was added as a cosponsor of S. 1301, a bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for expenses incurred in the care of elderly family members.

S. 1448

At the request of Mr. BYRD, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 1448, a bill to designate the square dance as the national folk dance of the United States.

S. 1513

At the request of Mr. HATFIELD, the name of the Senator from Alabama (Mr. DENTON) was added as a cosponsor of S. 1513, a bill to extend for five years the authorization of appropriations for the National Historical Publications and Records Commission.

S. 1563

At the request of Mr. STEVENS, the name of the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 1563, a bill to amend section 204 of the Federal Property and Administrative Services Act of 1949 to

authorize the deposit of cash proceeds from the disposal of excess or surplus property into the general fund of the Treasury for use to retire the national debt.

S. 1569

At the request of Mr. PRESSLER, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 1569, a bill to authorize the Secretary of the Interior and other major Federal land managers to provide for the conservation and scientific study of vertabrate paleontological resources on public and Indian lands.

S. 1614

At the request of Mr. HEINZ, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1614, a bill to amend title XIX of the Social Security Act to allow States to implement coordinated programs of acute and long-term care for those individuals who are eligible for both medicare and medicaid.

S. 1615

At the request of Mr. MATSUNAGA, the name of the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 1615, a bill to amend title XVIII of the Social Security Act to authorize payment for occupational therapy services under part B of the medicare program.

S. 1621

At the request of Mr. HUMPHREY, the name of the Senator from North Carolina (Mr. EAST) was added as a cosponsor of S. 1621, a bill to amend the Federal Aviation Act of 1958 to require commercial passenger carrying aircraft to be equipped with smoke detectors and automatic fire extinguisher in all aircraft lavatories and galley areas.

S. 1680

At the request of Mr. GOLDWATER, the name of the Senator from Nebraska (Mr. ZORINSKY) and the Senator from Colorado (Mr. ARMSTRONG) were added as cosponsors of S. 1680, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1708

At the request of Mr. GRASSLEY, the name of the Senator from Oklahoma (Mr. BOREN) was added as a cosponsor of S. 1708, a bill to amend part D of title IV of the Social Security Act to assure that all children in the United States who are in need of assistance in securing financial support from their parents will receive such assistance regardless of the economic status of their parents and that parents prevent their children from becoming a burden on taxpayers by fulfilling, to the best of their ability, their financial obligations on behalf of their children.

S. 1732

At the request of Mr. SPECTER, the name of the Senator from Virginia (Mr. TRIBLE) was added as a cosponsor of S. 1732, a bill to amend the Internal Revenue Code of 1954 to increase the energy investment tax credit for conversions to coal-fueled facilities, and for other purposes.

S. 1737

At the request of Mr. DOLE, the names of the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Washington (Mr. GORTON) were added as cosponsors of S. 1737, a bill to make permanent section 1619 of the Social Security Act, which provides SSI benefits for individuals who perform substantial gainful activity despite a severe medical impairment.

S. 1748

At the request of Mr. EAST, the name of the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of S. 1748, a bill to amend the National Labor Relations Act to apply explicitly the right-to-work laws of a State to Federal enclaves within the boundaries of that State.

S. 1760

At the request of Mr. BENTSEN, the name of the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 1760, a bill entitled the "Pension Correction Act of 1983".

S. 1766

At the request of Mr. BUMPERS, the names of the Senator from Nevada (Mr. LAXALT), and the Senator from South Carolina (Mr. THURMOND) were added as cosponsors of S. 1766, a bill to amend section 706 to title 5, United States Code, to strengthen the judicial review provisions of the Administrative Procedure Act by giving courts more authority to overturn unfair agency action.

S. 1772

At the request of Mr. MATSUNAGA, the names of the Senator from Montana (Mr. MELCHER), and the Senator from Michigan (Mr. LEVIN) were added as cosponsors of S. 1772, a bill to amend title XVIII of the Social Security Act to provide for direct medicare reimbursement for services performed by registered nurse anesthetists.

S. 1784

At the request of Mr. BYRD, the names of the Senator from Illinois (Mr. DIXON), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 1784, a bill to provide a consolidated program of extended unemployment compensation which shall replace the current extended compensation and Federal supplemental compensation programs.

S. 1843

At the request of Mr. SASSER, the name of the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 1843, a bill to extend by 3 months the cutoff date for social security disability determinations which will be subject to the provisions allowing continued payment of disability benefits during appeal.

SENATE JOINT RESOLUTION 132

At the request of Mr. RIEGLE, the names of the Senator from New Jersey (Mr. BRADLEY), the Senator from Indiana (Mr. LUGAR), and the Senator from Texas (Mr. BENTSEN) were added as cosponsors of Senate Joint Resolution 132, a joint resolution to designate the week beginning August 7, 1983, as "National Correctional Officers Week."

SENATE JOINT RESOLUTION 160

At the request of Mr. BYRD, the names of the Senator from California (Mr. CRANSTON), and the Senator from Arkansas (Mr. PRYOR) were added as cosponsors of Senate Joint Resolution 160, a joint resolution to designate the week of October 17, 1983, through October 24, 1983, as "National Adult Continuing Education Week."

SENATE CONCURRENT RESOLUTION 62

At the request of Mr. MATTINGLY, the names of the Senator from Maine (Mr. MITCHELL), the Senator from New York (Mr. D'AMATO), the Senator from North Carolina (Mr. EAST), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of Senate Concurrent Resolution 62, a concurrent resolution to direct the Commissioner of Social Security and the Secretary of Health and Human Services to develop a plan outlining the steps which might be taken to correct the social security benefit disparity known as the notch problem.

SENATE RESOLUTION 118

At the request of Mr. HOLLINGS, the name of the Senator from Maine (Mr. COHEN) was added as a cosponsor of Senate Resolution 118 a resolution to express the sense of the Senate in support of continued integrity of the National Oceanic and Atmospheric Administration.

SENATE RESOLUTION 139

At the request of Mr. ZORINSKY, the name of the Senator from North Carolina (Mr. EAST) was added as a cosponsor of Senate Resolution 139, a resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs.

SENATE RESOLUTION 180

At the request of Mr. METZENBAUM, the names of the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of Senate Resolution 180, a resolution expressing the sense of the Senate in support of affordable and decent health care for older Americans.

SENATE RESOLUTION 201

At the request of Mr. PRESSLER, the names of the Senator from Wyoming (Mr. SIMPSON), the Senator from Montana (Mr. BAUCUS), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of Senate Resolution 201, a resolution expressing the sense of the Senate concerning the use and/or provision of chemical warfare agents by the Soviet Union.

SENATE RESOLUTION 204

At the request of Mr. LEVIN, the name of the Senator from Illinois (Mr. PERCY) was added as a cosponsor of Senate Resolution 204, a resolution to express the sense of the Senate concerning Raoul Wallenberg.

AMENDMENTS SUBMITTED

STATE DEPARTMENT AUTHORIZATION, 1984 AND 1985

PROXMIRE AMENDMENT NOS. 2162 THROUGH 2164

(Ordered to lie on the table.)

Mr. PROXMIRE submitted three amendments intended to be proposed by him to the bill (S. 1342) to authorize appropriations for the fiscal years 1984 and 1985 for the Department of State, the United States Information Agency, and the Board for International Broadcasting, and for other purposes; as follows:

On page 38, between lines 9 and 10, insert the following:

(e) No individual may be eligible for appointment as an officer of the Endowment, and no individual may be eligible for employment by the Endowment, if such individual has engaged in any intelligence activity.

AMENDMENT No. 2163

On page 24, line 19, insert "Libya, Syria," after "Cuba,".

AMENDMENT No. 2164

At the bottom of page 48, add the following:

TITLE VII—GENERAL PROVISIONS

DEOBLIGATION OF FUNDS FOR SYRIA

SEC. 701. (a)(1) All funds appropriated in the fiscal year 1983 or in any prior fiscal year to carry out the provisions of the Foreign Assistance Act of 1961 which have been obligated for Syria shall be deobligated.

(2) All funds deobligated pursuant to paragraph (1) shall be deposited in the Treasury of the United States as miscellaneous receipts.

(b) None of the funds appropriated or otherwise made available by any provision of law for the fiscal year 1983 or any prior fiscal year may be available for Syria.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS ACT, 1984

BUMPERS (AND DIXON) AMENDMENT NO. 2165

Mr. BUMPERS (for himself and Mr. DIXON) proposed an amendment to the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes; as follows:

In lieu of the language proposed to be stricken, on page 42, lines 13 through 25 insert the following:

"SEC. 112. None of the funds in this Act shall be expended for the sale or lease of coal on public lands, except for emergency leasing as defined in 43 CFR 3425.1-4, lease modifications as defined in 43 CFR 3432, and lease exchanges as defined in 43 CFR 3435, until the Secretary has appointed a Commission to review the Department's coal leasing and valuation procedures to ensure receipt of fair market value and the development of coal leases in an environmentally compatible manner; the Commission has submitted its report to the Congress within six months after appointment; and ninety days have elapsed after the report is submitted to Congress."

BRADLEY (AND MELCHER) AMENDMENT NO. 2166

Mr. BRADLEY (for himself, Mr. MELCHER, and Mr. BOSCHWITZ) proposed an amendment to the bill H.R. 3363, supra; as follows:

Strike lines 16 through line 23 on page 54 and lines 1 through 9 on page 55 and substitute in lieu thereof:

"STRATEGIC PETROLEUM RESERVE AND EMERGENCY PREPAREDNESS

"For expenses necessary to carry out the provisions of sections 151 through 166 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), $528,770,000, to remain available until expended, and for necessary expenses in carrying out emergency preparedness activities, $5,230,000.

"SPR PETROLEUM ACCOUNT

"The aggregate amount that may be obligated under section 167 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), as amended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), for the acquisition and transportation of petroleum, and for other necessary expenses, is $1,316,000,000, in addition to authority provided in fiscal years 1982 and 1983, to remain available until expended."

DOMENICI (AND BINGAMAN) AMENDMENT NO. 2168

Mr. DOMENICI (for himself and Mr. BINGAMAN) proposed an amendment to the bill H.R. 3363, supra; as follows:

Strike line 23 on page 23 through line 8 on page 25 and insert in lieu thereof the following: "in field offices, $819,710,000 of which not to exceed $53,735,000 for higher education scholarships and assistance to public schools under the Act of April 16, 1934 (48 Stat. 596), as amended (25 U.S.C. 452 et seq.), shall remain available for obligation until September 30, 1985, and the funds made available to tribes and tribal organizations through contracts authorized by the Indian Self-Determination and Education Assistance Act of 1975 (88 Stat. 2203; 25 U.S.C. 450 et seq.) shall remain available until September 30, 1985; *Provided*, That this carryover authority does not extend to programs directly operated by the Bureau of Indian Affairs; and includes expenses necessary to carry out the provisions of section 19(a) of Public Law 93-531 (25 U.S.C. 640(d)-18(a)), $3,951,000, to remain available until expended: *Provided further*, That none of these funds shall be expended as matching funds for programs funded under section 103(a)(1)(B)(iii) of the Vocational Education Act of 1963, as amended (20 U.S.C. 2303(a)(1)(B)(iii): *Provided further*, That in addition, moneys received by grant to the Bureau of Indian Affairs from other Federal agencies to carry out various programs for elementary and secondary education, handicapped programs, bilingual education, and other specific programs shall be deposited into this account and remain available as otherwise provided by law: *Provided further*, That $450,000 shall be made available until expended for transfer by the Secretary of the Interior to the Attorney General to reimburse private litigants for legal fees incurred in the *State of New Mexico ex rel. Reynolds* v. *Aamodt* water adjudication suit: *Provided further*, That any cost of".

TSONGAS (AND OTHERS) AMENDMENT NO. 2167

Mr. TSONGAS (for himself, Mr. HEINZ, Mr. SARBANES, Mr. PELL, Mr. RIEGLE, Mr. GLENN, Mr. EAGLETON, Mr. DODD, Mr. PERCY, Mr. CRANSTON, Mr. MELCHER, Mr. DIXON, and Mr. MATSUNAGA) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 53, line 11, strike the number "$333,481,000" and insert "$360,681,000".

STATE DEPARTMENT AUTHORIZATION, 1984 AND 1985

DECONCINI AMENDMENT NO. 2169

(Ordered to lie on the table.)

Mr. DECONCINI submitted an amendment intended to be proposed by him to the bill S. 1342, supra; as follows:

On page 24, between lines 19 and 20, insert the following new section:

"DOMESTIC POLITICAL ACTIVITIES OF AMBASSADORS

"SEC. 122. (a) Section 7323 of title 5, United States Code, is amended by inserting '(other than an ambassador or minister)' after 'Senate'.

"(b) Paragraph (3) of section 7324 (d) of such title is amended by inserting '(other than an ambassador or minister)' after 'in its relations with foreign powers or'."

● Mr. DECONCINI. Mr. President, the amendment I submit today is a modification of an amendment I submitted on September 19, 1983—amendment No. 2160. My earlier amendment inadvertently covered a broader category

of personnel than it was intended to cover.●

DEPARTMENT OF THE INTERIOR APPROPRIATIONS ACT, 1984

NUNN (AND OTHERES) AMENDMENT NO. 2170

Mr. NUNN (for himself, Mr. HOLLINGS, Mr. JOHNSTON, and Mr. MATTINGLY) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 12, line 25, strike out all beginnings with "608,202,000" Viz: through "(16 U.S.C. 451)" on page 13 and insert in lieu thereof "608,302,000 without regard to the Act of August 24, 1912, as amended (16 U.S.C. 451) of which $100,000 shall be made available upon entering into a cooperative agreement with the Martin Luther King, Jr. Center for Nonviolent Social Change, Inc."

PERCY (AND DIXON) AMENDMENT NO. 2171

Mr. McCLURE (for Mr. PERCY and Mr. DIXON) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 13, line 18, before the period insert the following: *"Provided further,* That up to $100,000 shall be available for a study to examine the suitability of a site in East St. Louis, in the State of Illinois, for a museum of American culture and antrhopology, and to determine the variety and breadth of the collections that might be exhibited in such museum".

STEVENS AMENDMENT NO. 2172

Mr. STEVENS proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 51, line 25, delete "$248,714,000" and insert in lieu thereof "$255,714,000"; and

On page 53, line 3, after the word "process" insert the following: ": *Provided further,* That $7,000,000 of the amount provided above shall be used to support research and development of purged carbons technology".

GARN (AND McCLURE) AMENDMENT NO. 2173

Mr. GARN (and Mr. McCLURE) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 74, line 25, before the comma insert the following: ", and except to carry out the obligations and responsibilities of the Secretary of Interior under section 17(k)(1)(A) & (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226)"

TOWER (AND BENTSEN) AMENDMENT NO. 2174

Mr. McCLURE (for Mr. TOWER and Mr. BENTSEN) proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 11, line 8, strike out "$28,600,000" and insert in ieu thereof "$30,100,000".

On page 11, line 9, strike out the period and insert in lieu thereof ": *Provided,* That $1,500,000 shall be available for land acquisition in the Rio Grande Valley National Wildlife Refuge, Texas.".

WARNER AMENDMENT NO. 2175

Mr. McCLURE (for Mr. WARNER) proposed an amendment to the bill H.R. 3363, supra; as follows:

Amendment Number 2142 is amended by adding the following new section (b): "(b) No more than 25 additional permits shall be issued pursuant to this amendment."

McCLURE AMENDMENT NO. 2176

Mr. McCLURE proposed an amendment to the bill H.R. 3363, supra; follows:

On page 14, between lines 14 and 15, insert the following new appropriation account:

"VISITOR FACILITIES FUND

"For grants to the National Park Foundation for reconstruction, rehabilitation, replacement, improvement, relocation, or removal of visitor facilities within the National Park System, and related expenses, as authorized by Public Law 97-433, $5,800,000 to remain available for obligation until September 30, 1989, to be derived from the National Park System Visitor Facilities Fund."

McCLURE AMENDMENT NO. 2177

Mr. McCLURE proposed an amendment to the bill H.R. 3363, supra; as follows:

On page 77, line 19 after the word "areas" insert the following: ", any lands designated by Congress as wilderness study areas or any Bureau of Land Management wilderness study areas"

NOTICES OF HEARINGS

SUBCOMMITTEE ON CONSUMER AFFAIRS

Mrs. HAWKINS. Mr. President, the Subcommittee on Consumer Affairs of the Senate Banking, Housing, and Urban Affairs Committee will hold a hearing on September 28, 1983, at 9:30 a.m., in room SD-538 of the Dirksen Senate Office Building on S. 573, the Fair Deposit Availability Act.

The purpose of this hearing is to explore the extent, and seriousness, of problems depositors encounter when depository institutions delay the availability of deposited funds and delay accruing interest for deposits to interest-bearing accounts. The subcommittee is also interested in comments concerning check cashing fraud, including the collection of bad checks that have been honored before their return; the improvement of the check collection system; state actions taken to address the problems of check fraud and delayed availability of funds; and the the propriety of Federal legislation or regulation in these areas.

Any questions concerning the hearing should be directed to Linda Zemke at 224-1564 or Pat Abshire at 224-1547.

AUTHORITY FOR COMMITTEES TO MEET

PERMANENT SUBCOMMITTEE ON INVESTIGATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, September 20, to hold a hearing on Hotel Employees and Restaurant Employees International Union.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, September 20, at 2 p.m., to hold a markup of the committee arms control resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, September 21, at 2:15 p.m., to meet in executive session with Field Marshal Abu Ghazala, Deputy Prime Minister and Minister of Defense and War Production of the Arab Republic of Egypt to discuss security issues of mutual interest.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, September 21, at 10 a.m., to consider S. 121, the Trade Reorganization Act of 1983.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PREPAREDNESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Preparedness of the Committee on Armed Services be authorized to meet during the session of the Senate on Thursday, September 22, to hold a hearing on emerging trends in the Army's ammunition program.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

BIRTHDAY OF DILLON RIPLEY

● Mr. GOLDWATER. Mr. President, today marks the 70th birthday of Dillon Ripley, the Secretary of the Smithsonian Institution. I am happy to extend to him my best wishes and congratulations on this significant milestone, together with my appreciation for the leadership he has provided for nearly 20 years to the venerable Institution that is one of America's most popular public attractions, a place where people come to be informed, inspired, educated, amused, and entertained. It is also one of the

world's great centers of education and research, with activities not only in Washington, but in other parts of this country and abroad as well. It is an Institution of scholars, artists, communicators, and educators where evidence of the growth, development, and evolution of widely diverse societies is studied, conserved, preserved, and exhibited. Where, indeed, human knowledge is increased and shared.

This magnificent combination of people, buildings, knowledge, art, and artifacts from around the world is America's national museum, belonging to every citizen. It is a constant source of national pride for all Americans, and I am personally privileged to serve as a member of its Board of Regents.

The Smithsonian's original mandate—for the increase and diffusion of knowledge among all mankind—continues to be its guiding principle, the philosophical cornerstone of all of the Institution's programs and activities—both those easily seen and admired by the public, and those concerned with scholarly research, preservation, and conservation that are less widely known.

The eighth Secretary in the 137 years of the Smithsonian's existence, Dr. Ripley, more than any of his predecessors, has enlarged the reach and the scope of the Institution through the establishment of new research programs, new means of communication such as the associates programs and Smithsonian magazine, and new museums such as the National Air and Space Museum.

The world's most visited anything, the National Air and Space Museum is, in the words of a young man who returned to the United States recently after a number of years serving our Nation abroad, the most "American" of our museums. When queried about why this was so, he pointed out that the technology it displays reflects the culture of adventurous and curious people who have sought and exceeded the apparent limits of geography as well as of intellect.

Mr. President, I want to express again to Dr. Ripley my best wishes for a happy birthday.●

TECHNOLOGY TRANSFER TO CHINA AND THE KAL AFFAIR

● Mr. GARN. Mr. President, I am concerned that the administration may be moving too rapidly in the direction of decontrolling trade in sensitive goods and high technology with the People's Republic of China. Many questions remain to be answered before any trade relaxation should take place, not the least of which is the quid pro quo. Will relaxation of trade result in a more friendly relationship with the PRC? Will they renounce the use of force in any efforts toward reunification with Taiwan? Will there be any progress toward human rights? Will the PRC Government agree to the provisions of the Nuclear Nonproliferation Treaty, or will our high tech exports enhance the ability of the Chinese to employ nuclear weapons, or otherwise threaten the security of our friends in the region? What reliable guarantees do we have that the Chinese will not retransfer American high technology to the Soviets in exchange for concessions or to play the United States and the Soviet Union off against one another?

Mr. President, it may interest my colleagues to know that the Soviet heat seeking missile that downed the Korean Air Lines plane was probably a copy of our own sidewinder missile based in large part on U.S. technology. How do we know that with regard to the Chinese we will not repeat our experience with the Soviet Union and come to experience the use of our own technology against us? The PRC does not seem to have air defense procedures that are much of an improvement on the Soviet system, and they glaringly abstained in the United Nations on the resolution condemning the Soviet action.

Mr. President, these questions are today unanswered, and as they remain so I think that it is premature to take any drastic steps to facilitate the export of sensitive goods and technology to the People's Republic of China, lest we come to rue this action 10 years later as we have with regard to the Soviet Union.●

HUSTLER—BACK TO THE GUTTER

● Mr. MURKOWSKI. Mr. President, I have asked for a few minutes to clear the air due to a certain publication sent to me as well as many of you.

Larry Flynt, publisher of Hustler magazine, a well-known, hard core pornographic magazine, has sent me a complimentary subscription.

While I do not mean to give him any more publicity than he already receives, I do not want him or any of my family, friends or constituents to think that I accept his publication. I believe that any type of literature one enjoys should impart some form of literate information. Unfortunately, the information one would receive from this publication is that which belongs where it was conceived—the gutter.

Mr. President, thank you for allowing me the time and I now turn the floor back to more pressing Senate Business.●

HISTORIC, LONG DISTANCE FLIGHT BY B-29 TRI

● Mr. SASSER. Mr. President, 38 years ago this week, just after Japan surrendered in World War II, three B-29 crews made the first nonstop flight from Japan to Chicago, where they refueled, and then to Washington, D.C. The crews were selected by Gen. Curtis LeMay, and the general's plane was piloted by my good friend from Shelbyville, Tenn., J. Ivan Potts. It was truly an historic trip—a nonstop 6,509 miles.

Ivan Pots was a World War II pilot with the 40th Bomb Group, one of the most decorated units in the war in the Far East. The 40th Group in 1944 made the first strikes on the Japanese homeland except for the Doolittle Raids of 1942. The 40th Group flew 70 missions against Japan out of India, China and Tinian for which they received three Presidential citations and eight campaign battle stars. Ivan himself flew eight transport missions from India to China across the Hump in the Himalayas, and compiled 525 combat hours, including 35 combat missions against Japan. He has been awarded two Distinguished Flying Crosses, four Air Medals, two Presidential Unit citations, the Army Commendation Medal and many others. He is today a colonel in the Tennessee Air National Guard.

The September issue of Air Force magazine includes an article Ivan has written to recount the exploits of the nonstop flight 38 years ago, and I am sure there will be many fond recollections among those who gather this week in Dayton, Ohio, the veterans of the 40th Bomb Group. Our Nation sends its congratulations and its gratitude to Ivan and to others of the 40th Group for their splendid record in a time of great peril for the United States.

Mr. President, in tribute to these brave men, and without objection, I should like to insert in the RECORD at this time Ivan Potts' account of the historic nonstop flight from Japan of the three B-29's of the 40th Bomb Group. I wish them many more happy reunions.

The article follows:

AFAer Tells Story of Historic, Long-Distance Flight by B-29 Trio

This September marks the thirty-eighth anniversary of a significant long-distance flight by three B-29 crews of Twentieth Air Force. That was the nonstop flight from Hokkaido in northern Japan to Chicago, where the aircraft landed on September 19, 1945.

Highlights of the mission are told by J. Ivan Potts, Jr., an AFA member from Shelbyville, Tenn., then a lieutenant and pilot of the number two airplane. The mission was led by Lt. Gen. Barney Giles, Deputy Commander of the US Army Strategic Air Forces in the Pacific. He flew aboard the number one aircraft. Number three aircraft carried Brig. Gen. Emmett O'Donnell, then Commander of the 73d Bomb Wing, and its crew. Ivan Potts and the crew of number two were led by Maj. Gen. Curtis E. LeMay, then Chief of Staff of the US Army Strategic Air Forces in the Pacific.

Potts says, "After an evaluation of every airplane in the group, our B-29-75—number 44-70015 of the 44th Bomb Squadron—was

finally selected because of its record for low fuel consumption and overall reliability.

"On Guam, all three planes were modified for the nonstop attempt. Five 600-gallon tanks were installed in the bomb bays. Everything was stripped that was not absolutely necessary for the flight, including guns and turrets. The blisters atop and on the sides were replaced by square flush windows. The 40th Group markings were removed, leaving a solid silver bird waxed and polished to an almost new finish. The only marking remaining was our Air Force star. Then a new tail insignia was installed, the emblem of the Twentieth Air Force."

After being prepared for the flight, which was intended to go nonstop from Hokkaido to Washington, the three aircraft were ferried from Guam to Hokkaido and readied for takeoff on September 18.

Potts continues. "We were awakened long before dawn to make final preparations for takeoff. Far in the north, Super Dumbos and Dumbos, B-29s and B-17s equipped for air/sea rescue, were standing alert. They would take off instantly on word that any of our three US-bound planes were in trouble.

"General LeMay decided Lt. Col. William C. Kingsbury would get the plane airborne. We had 10,000 gallons of gasoline on board. Gross weight was 144,000 pounds, the heaviest overload ever attempted in a B-29 until then.

"Colonel Kingsbury ran the throttles forward. There was no room for error or malfunction. We were so heavily loaded that if one of our four engines failed or partially lost power we would have crashed. We used up all 8,200 feet of the runway before finally lifting off. Our climb was gentle and slow, partly to conserve fuel, and also because of the excessive weight."

After several hours en route, crews of the three aircraft realized that they were bucking headwinds instead of getting a free push from the high-velocity winds of the newly discovered jet stream. Even after crossing the Bering Sea and escaping the effects of a Pacific typhoon, they continued to encounter headwinds.

Potts continues, "Over Northway, Alaska, reported navigator Bill Townes, 'It occurred to me that we were not on schedule and had been bucking much stronger headwinds since we left Fairbanks. When I reported that fact to General LeMay, he looked at me as if he thought it was my fault, so I retreated behind the bulkhead to check my figures.'

"By 9:00 a.m. Eastern War Time on September 19, we were 370 miles southeast of White Horse in the Yukon and sunlight was visible in the east. Sleep had been virtually impossible. We were now seventeen hours into the flight.

"We had been buffeted by unpredicted headwinds ever since we passed over Nome. As we crossed the Canadian border, General LeMay reported later that we began to hit the 'stinkingest stuff' of the whole trip.

"After conferring over the radio, General Giles decided to have all three aircraft land in Chicago."

The number two B-29, commanded by General LeMay, was using less fuel than the others.

Potts says, "Capt. Theodore Finder, the flight engineer, and Bill Townes, the navigator, estimated we had enough gasoline to make Washington, but with only fifteen minutes reserve. If Washington had bad weather or for any reason we had to make two passes at the field, we would have to bail out. General LeMay then decided to return to Chicago and stay with the other planes. Our plane was the last to give up the nonstop attempt to Washington."

After refueling in Chicago, the aircraft pressed on to Washington, reaching National Airport in late evening, September 19.

Potts concludes, "This was the way one national correspondent reported our arrival: 'The silvery sky giants, manned by their blue-ribbon crews, which had streaked across Alaska and Canada on the homeward leg of their ambitious mission, roared over National Airport in formation at 9:30 p.m. Eastern War Time.'

"General Giles landed at 9:52 p.m., General LeMay at 9:54 p.m., and, finally, General O'Donnell at 9:56.

"The reception in Washington was fantastic. When we landed thousands of people stood behind the fences at the ATC terminal. General LeMay wouldn't deplane until he had implanted a fresh cigar in his mouth. As we alighted, the eighty-piece Air Force Band struck up our beloved 'Air Force March.'

"A press conference was held the following morning. Virtually all the questions by the reporters at the press conference were put to General LeMay. He used the time to emphasize the significance of the flight in reverse. 'Now that we have proved we can do it, we must remember that any future enemy will also be able to do it.'

"He reported that we had averaged 236 mph and commented on the strong headwinds, the fact that they were encountered 3,000 miles from Chicago, and that the trip had covered 6,509 miles.

"General LeMay stated, 'When we took off from Hokkaido we had a little headwind and expected it. However, all our information indicated that once we passed Fairbands it would drop. We didn't need a tailwind. All we needed was nice normal wind to arrive on schedule. The buffeting headwind averaged seventy mph.'

"He went on to add, 'This trip proved a lot. The B-29 Superfort went right from the drawing board into battle without any real test as to what it could or could not do. We found out that the B-29 can and will perform beautifully on long-range trips, belligerent or otherwise.'" ●

TRAVEL AGENTS SHOULD GET PAID FOR WHAT THEY DO

● Mr. WARNER. Mr. President, this morning's Wall Street Journal carries an op/ed by Mark S. Nadel, a regulatory reform attorney doing research at Columbia University. Mr. Nadel's article is entitled "Travel Agents Should Get Paid for What They Do."

I bring this article to the attention of my colleagues to point up the incredible amount of misinformation which is floating about concerning the operation of the travel marketplace, and what is and is not available to consumers.

Mr. President, I ask that Mr. Nadel's op/ed appear at this point in the RECORD.

The article follows:

[From the Wall Street Journal, Sept. 20, 1983]

TRAVEL AGENTS SHOULD GET PAID FOR WHAT THEY DO

(By Mark S. Nadel)

American Airlines' recent effort to reduce the commissions paid to travel agents has been grounded. The rest of the industry seems determined to stay in a holding pattern, continuing to pay about 10% of ticket prices to travel agencies. Yet American's canceled departure from the traditional standard doesn't repair an apparent structural defect in the current system revealed in the initial action.

The fees earned by the 22,000 U.S. travel agencies are imposed without regard to the amount of service provided to travelers by the agent. For example, an agent may receive only a nominal commission for spending several hours on the phone, booking and repeatedly rescheduling a vacation for a family determined to stay at a resort that doesn't offer any agent fee, yet receive $672 for 10 minutes of work for a client who desires two round-trip tickets on a self-selected flight on the Concorde. This system of cross subsidies is both unfair and inefficient and is being eroded by widespread secret rebating. If Randy Malin of US Air is correct in observing that such rebating is inevitable, then why not simply allow agents to openly set their own commissions? Clearly they are the best judges of their own costs.

The crux of the problem is that travel-agency fees now are hidden in ticket prices and hotel charges. The Civil Aeronautics Board has chosen to allow airlines to treat travel agents as airline employees, and the airlines include a standard fee in the ticket price for the varying levels of service that agents provide. Travelers aren't told what commissions they are paying, and travel agents are understandably reluctant to be the first in their area to make them explicit.

Consumers willingly pay lawyers and accountants for expert advice, and travelers presumably would pay an agent for being ticketed on the best available flight, even when there was no need to rely on an agent's experienced judgment concerning where and when to go, what to see and where to stay, Agents might charge clients for their time by the hour, as do most lawyers, or, more likely, follow the example of stockbrokers, setting different percentage-rate fees for varying levels of service. There is no reason to believe that travelers who normally tip waiters and taxi drivers at a 15%-20% rate would object to a reasonable agency commission.

Customers who desired normal or special treatment could be charged the full value of such service, while others who preferred only minimal services could be charged a lower rate. Just as discount stockbrokers (and some of the airlines) find it profitable to offer lower rates for "no frills" service, so could discount travel agents. Discount agents (which would presumably include airline-employee agents) might charge only a 5% commission or a flat fee for administrative handling costs and might also offer credit services on their own or in conjunction with a creditcard company.

In the future, these discount services often might be handled by automated agents, accessible in airline lobbies and other public areas, by telephone or by home computer. In fact, long-distance telephone companies like AT&T or MCI could act as national discount agents if they were able to provide services over a tollfree 800 number

at a lower cost than even the airlines. Travelers might even choose to use these discount agents after paying separately for research services.

It should be noted that this changeover would lead to a secondary market in tickets: That is, agencies could, individually or through affiliations among themselves, acquire blocks of tickets, which they then would be responsible for reselling to the public. These agents could set their own policies on discounts, refunds and no-show penalties, taking advantage of their more personalized contact with passengers and thus freeing airlines of some administrative hassles on the ground. This secondary market might resemble the one operated by Ticketron for entertainment events.

Airlines certainly are free to set their net transportation fares at whatever levels they choose. They may allocate their fixed costs among different classes of passengers by whatever methods they desire. But agents themselves should be permitted to act as independent entrepreneurs, employed by travelers.

The agents should be permitted to purchase "net priced" tickets and charge their own chosen commissions, free of any artificial psychological barrier. Travelers shouldn't be forced to pay for services that they don't need, and agents should no longer be hesitant to charge for the full value of the services that they do provide.

International agreements currently preclude the usefulness of this practice for international fares, but an unbundling requirement can be introduced for the domestic industry. The emergence of discount brokers has appeared to work well in the securities industry, and it is likely that they would also improve the travel industry. As long as travel agencies provide customers with reasonably priced services, the only effect would be to replace some inefficient agencies with more efficient ones and provide better and more accurately priced service to the public.

If the Civil Aeronautics Board is unwilling to reexamine this issue, then the Federal Trade Commission or Justice Department should intervene. They should recognize that the bundling of transportation costs and agent services facilitates industrywide price fixing of commission rates. The time has arrived for independent and competitive travel agencies.

Mr. WARNER. Mr. President, in today's travel marketplace there exist no barriers to carry out any of the proposed alternatives suggested by Mr. Nadel. In fact, many of those alternatives already exist, but admittedly are available in limited areas of the country. That, however, is more a function of emerging technology and limited market demand that it is of any regulatory obstacles which may exist.

The main contention in Mr. Nadel's article—that the standard commission received by travel agents for the sale of airline tickets should be done away with, and in its place should come a fee based on the amount of services performed—fails to recognize that this practice does indeed occur. Again it is not widespread, but, I am told by travel industry representatives, one of the biggest reasons for this situation is that over the years the traveling public has come to expect travel agent services free of charge, recognizing that they are compensated by commissions paid them by the airlines on the tickets they sell.

Indeed, as a case in point, a member of my own staff recently went to a travel agent to arrange hotel accommodations for his vacation. When the travel agent asked if he was booking his airline accommodations as well, and was told no, the travel agent advised him that he would be charged for making the hotel reservations. My staff member said thank you very much, and booked his own hotel reservation.

Mr. President, I raise these points because there will be some who will read Mr. Nadel's article and say to themselves, if the recent decision of the Civil Aeronautics Board (CAB) in the competitive marketing investigation (CMI) were allowed to stand, all of these ideas which Mark Nadel proposes could evolve in the marketplace.

Let me say for the record, that is not the case. The fact of the matter is that if the CAB's 3-to-2 split decision in the CMI to strip the Air Traffic Conference (ATC) of its antitrust immunity is all to be implemented, not only will the traveling public not have the option of using a travel agent who charges for his services or is paid by the accommodations he represents on commission, the traveling public also will not have the availability of full service travel agents. Rather, they will be forced to choose from a confusing variety of limited service travel sales representatives. Further, many of the conveniences and privileges which travelers enjoy as a result of ATC programs will end.

That is why, Mr. President, 37 Senators and over 145 Representatives have joined Congressman GLENN ANDERSON and me in support of the Air Travelers Security Act (S. 764 and H.R. 2053) in an effort to reverse that unfortunate CAB decision.

Our bill is a very simple, straightforward piece of legislation which recognizes the universality of the present airline/travel agent marketing system and all the benefits it offers to consumers. The bill seeks to maintain the antitrust immunity afforded the ATC under the Airline Deregulation Act of 1978, while at the same time eliminating any regulatory barriers which have prevented any marketing alternatives which may evolve outside the ATC.

Hearings have begun in the House of Representatives on the Air Travelers Security Act, and Senator KASSEBAUM will hold hearings in the Aviation Subcommittee of the Senate Commerce Committee on October 4.

This is a very important consumer rights, proderegulation, procompetition bill. It is widely endorsed throughout the travel and tourism industry, and it has received the endorsement of the National Conference of Black Mayors at their national meeting last week in Atlanta.

Mr. President, this bill deserves the support of the entire Senate, and it is my hope that we can bring the Air Travelers Security Act to the floor of the Senate and pass it before adjournment this year.●

THE RESIGNATION OF HERBERT M. KLINE, SENIOR BUDGET OFFICER

● Mr. GOLDWATER. Mr. President, I rise today to recognize the contribution of Mr. Herbert M. Kline, professional staff member and senior budget officer of the Senate Select Committee on Intelligence, who will be leaving our staff after 3 years of outstanding and dedicated service to the Senate. Herb Kline has served our committee untiringly and with the highest professionalism since the fall of 1980, when he was hired as a professional staff member and budget officer. I promoted him to the position of senior budget officer in the summer of 1982, and he has served in that position ever since.

Before coming to our committee, Herb had a distinguished career in the U.S. military. Following his graduation from Wilkes College in 1961, where he earned degrees in mathematics and engineering, Herb was commissioned in the Navy. He served on the U.S.S. *Independence*, and at the Defense Nuclear Agency at Sandia, N. Mex. Thereafter, he joined the U.S. Air Force and served with the Air Proving Ground at Eglin Air Force Base in Florida.

After earning a masters degree at Texas A&M, he served in Vietnam as an operations analyst with the 7th Air Force, and spent 3 years with the Defense Intelligence Agency in the same capacity. Herb went on to become a cost analyst in the Office of the Director of Budget, at Air Force Headquarters in the Pentagon. He also served for several years on the intelligence community staff here in Washington, D.C. Before joining our committee, Herb was awarded the National Intelligence Certificate of Distinction in recognition of his contributions to U.S. intelligence.

Mr. President, it should be clear from this résumé that the Senate Select Committee on Intelligence was very lucky to get a man of Herb's qualifications to serve as our senior budget officer. It is rare to find somebody with as much hands-on experience with the intelligence budgeting process, and it is equally rare to find somebody who has served on active duty in both the Navy and the Air Force. Herb did a very good job for us in this important nonpolitical position, and I am sad to see him go.

Herb Kline has performed his role as senior budget officer to the Senate Select Committee on Intelligence with great distinction, with great professional capability and with extraordinary knowledge of the important programs which we oversee and authorize. On behalf of all the members of the committee, past and present, I would like to thank Herb for his dedication, loyalty and service to the Select Committee on Intelligence, to the Senate and to the Congress of the United States. We are grateful to him for his contributions and we wish him the very best for the future.●

TESTIMONY OF RITA SALBERG, CHAIRMAN OF PUBLIC AFFAIRS FOR B'NAI B'RITH WOMEN

● Mr. MOYNIHAN. Mr. President, at a hearing on prayer in school conducted by the Senate Committee on the Judiciary in June, Ms. Rita Salberg, of B'nai B'rith Women, made a most eloquent statement. School prayer is a highly complex issue on which the opinions of many intelligent men and women may differ. Ms. Salberg's testimony was a clear and thoughtful enunciation of her organization's position on this matter. It expressed, quite well, the feelings of B'nai B'rith Women's 120,000 members, as well as the feelings of the many others who share their perspective.

I would like to share with my colleagues Ms. Salberg's words and ask that her statement be included in the RECORD.

The material follows:

STATEMENT OF RITA SALBERG AT A HEARING ON PRAYER IN THE SCHOOLS

Good afternoon, Senator. My name is Rita Salberg. I am the chairman of public affairs for B'nai B'rith Women and a member of the executive board of the Anti-Defamation League of B'nai B'rith.

I am here this morning on behalf of the 120,000 members of B'nai B'rith Women to tell you of our profound distress over the proposed bill to amend the Constitution to allow prayer in the schools. We believe it to be bad government policy, bad religious practice, and bad educational programming.

It is our firm belief that the protections of democracy can only be maintained by a clear and strict separation of church and state, a separation we believe is violated by the proposed prayer bill. As a Jewish organization, we are particularly mindful of the strong historical tendency of government and religions to intermix—and with disastrous consequences for minorities.

The genius of the bill of rights is that it serves to limit the rights of the majority in particular instances, thereby granting protections to minorities. As our country becomes ever more ethnically and religiously diverse, such protections assume an even greater importance.

It seems to me that the proposed legislation is particularly vulnerable to criticism from a religious standpoint. If a prayer could be devised that is acceptable to all—and I'm thinking now of the recent influx into our country of people from Southeast Asia, many of whom have a heritage apart from the Judeo-Christian one—that prayer would necessarily be so homogeneous as to be meaningless. We who share religious belief however different the form, know that true prayer cannot be stopped by any court, just as true praying cannot be mandated by Federal or State law.

In fact, there is a strong argument to be made that mechanical recitation or prayer in a public school—especially a prayer composed by Government officials with a need to make that prayer have a wide acceptability—such a prayer degrades the religious experience that is true prayer. If the aim of a prayer in the schools is to inculcate in children ethical and moral standards, that can be done, and should be done, outside the context of prayer. To my mind, there is surely a place for prayer in children's lives, and that place is in the home, in the church, synagogue, mosque, in many places, but not our public schools.

I was a teacher in the New York City schools for 15 years. The purpose of the public school system was, it always seemed to me, best stated by the late Justice Douglas. He described a public school as a place "to train American citizens in an atmosphere free of parochial, divisive, or separatist influences of any sort—an atmosphere in which children may assimilate a heritage common to all American groups and religions."

I would be the last to say our schools are free of divisiveness or that they are havens from strife and conflict. They surely are not. Children from an early age are aware of racial and religious differences and conflicts—at least that has been my experience—but the role of the public school system is not to exacerbate those differences. Rather, schools are the places to emphasize our commonality, our oneness. In our richly pluralistic country, that oneness is not to be found in a religious belief or in a prayer.

Good educational policy also calls for us to look at our differences but to look at them in a constructive way. From the experience of Jewish people I have spoken with over the years, our differences are not addressed positively through praying in school. In fact, quite the contrary. I know people who suffered in varying degrees, from what was once the common practice of praying in schools. Most stinging was the experience of one friend, the only Jewish child in her class, who had the misfortune to have as a teacher a woman who called on her regularly to read from the New Testament the passage on the "Perfidious Jew." (The adjective was removed from the New Testament during Vatican II.) For her, and for others I know, prayer in the schools was far from a positive experience. It was not even a benign experience. It was hurtful and destructive, although the intent of the practice was quite the opposite. To those who argue, what harm can prayer in the schools do to children? I say it can do harm.

As members of one of the largest religious minority groups in the country, B'nai B'rith Women urges you not to proceed with legislation that will put prayer back into our schools.●

TAX CREDIT FOR CARE OF ELDERLY FAMILY MEMBERS

● Mr. D'AMATO. Mr. President, I support S. 1301, a bill to amend the Internal Revenue Code of 1954 to allow a tax credit for expenses incurred in the care of elderly family members.

Put simply, this legislation is necessary for both humanitarian and fiscal reasons. Institutionalized care for the elderly is a burden on family members and a drain on Government sponsored assistance programs. It is estimated, however, that up to 40 percent of our 1.3 million nursing home residents could live at home. In all too many instances, families are forced to institutionalize their elderly relatives because of financial reasons. This bill would provide tax credits for a portion of expenses incurred in support of services that the chronically ill elderly and their families require. Such services will include home health aide services, adult day care, respite care, nursing care, and medical or health-related supplies and equipment.

This assistance will not only provide much needed emotional and financial relief for the family, it will also save money for the Government. One of the highest expenses in medicare is institutionalized care. Nationwide, such care costs close to $20,000 annually per patient. I believe the savings medicare costs will far exceed the revenue loss from these tax credits.

S. 1301 is designed to target the greatest relief to those families most in need. The credit available will be determined on a sliding scale based on annual income. Families who have incomes under $10,000 can claim a tax credit for 30 percent of allowable expenses up to a maximum credit of $1,050. Families with adjusted gross incomes in excess of $50,000 will be ineligible for the credit, as will the elderly whose income exceeds $15,000. Only billable services can qualify for the credit.

This responsible legislation will especially assist those families whose elderly relation has a disease that is not covered by medicare or medicaid. S. 1301, for example, would help the family of an Alzheimer's disease sufferer, who may be physically healthy, but mentally debilitated to the point of requiring constant care. It is this disease and many like it that makes S. 1301 so important to the fastest growing group in our country, the elderly.●

WORLD POPULATION GROWTH

● Mr. HATFIELD. Mr. President, on July 15, 1983, an article appeared in the USA Today written by Carole L. Baker, executive director of zero population growth, addressing the perils of ignoring world population growth. I was impressed by this article and ask that it be included in the RECORD.

The article follows:

WE MUST ACT NOW, BEFORE IT'S TOO LATE

(By Carole L. Baker)

WASHINGTON.—World population growth—like an illness with no warning system—is

the most dangerous of conditions because its consequences aren't noticed until it's too late.

It is the obese man ignoring his physician and health, getting bigger and bigger. So-called "friends" say he looks fine . . . until the massive coronary.

Population growth is not a single dramatic event, but a constant process—one whose current scale promotes soil erosion and deforestation, overgrazing, poverty, malnutrition, illiteracy, political instability and military conflict.

Examples are everywhere.

There are still those who claim, citing a gradual lowering of world birth rates, that the patient looks fine, despite staggering growth. This is a dangerous mistake to make; slightly lower birth rates can't compare to the ever-expanding world population base we now have.

The compounding aspect of exponential growth is enormous. It took all of history up to 1830 to reach the first billion people. The second billion took only 100 years. Now the world adds another billion every 12 years.

All estimates project 6 billion people by the year 2000 . . . in just 17 years.

This is one-third more people added to our planet, mostly in the developing nations. Tragically, these nations, least able to meet their basic needs, also have the highest population growth rates. No government can expect to improve living standards when a nation's population growth outpaces its economic output.

Increasingly, this is the dilemma of the developing world.

Industrial nations are also straining their ability to support their people, because of high per capita use of energy and raw materials.

The United States continues to grow by more than 2 million per year. With only five percent of the world's population, this country consumes 11 times the world's average of energy, six times the steel, and four times the grain.

The United States must face these issues here at home. We are the fastest-growing industrial nation in the world, but the United States still has no population policy, no demographic goals or capacity to identify or plan for future trends.

Legislation now before Congress—The Global Resource, Environment and Population Act of 1983—would begin to answer these needs. By not taking action on population, governments ignore their responsibility. We must stabilize population growth.

In the words of Worldwatch president Les Brown, "We are not inheriting the earth from our fathers—we are borrowing it from our children."●

DEATH OF HUMBERTO CARDINAL MEDEIROS

● Mr. TSONGAS. Mr. President, my home State of Massachusetts and the capital city of Boston suffered a grievous loss this past week due to the death of Humberto Cardinal Medeiros, the Roman Catholic Archbishop of Boston.

Humberto Medeiros came from humble beginnings in the Azores, where he was born. An immigrant, he came with his family to settle in Fall River, Mass. Father Medeiros served for many years as a priest in Fall River, becoming chancellor of the diocese and pastor of St. Michael's Parish.

Larger responsibilities in the church were in store for him, however, and he was named Bishop of Brownsville, Tex., in 1966. In 1970, he became Archbishop of Boston and was named a cardinal by Pope Paul VI in 1973.

His years in Boston were marked by many achievements. His was a voice for reason and justice. His administration of one of the largest archdioceses in the United States brought it long-term financial stability in an era of great financial difficulty for many institutions.

Most of all, his leadership embodied gentleness and compassion. His leadership reflected an abiding faith in God, to whom he committed his life.

His interests and the breadth of his intellect ranged far beyond religious matters. I visited him at his home some months ago, and he talked knowledgeably about art and a number of other nontheological matters.

Humberto Cardinal Medeiros' passing is a great loss not only to the Catholic Church but to the entire community.

His loss will be felt especially deeply in Boston and in his home town of Fall River, where he will be buried Friday. The Portuguese-American community of Massachusetts and the rest of the country will feel the loss intensely.

His time as Cardinal-Archbishop of Boston was all too short. The message of his life: gentle, unwavering faith in God will endure through the ages.

Mr. President, I ask to have yesterday's most moving editorial from the Boston Globe about Cardinal Medeiros printed in the RECORD.

The editorial follows:

HUMBERTO CARDINAL MEDEIROS

When the third red hat elevated to the rafters of Holy Cross Cathedral is as nobly dust-covered as its companions, understanding and appreciating the age of Humberto Cardinal Medeiros will become easier for his bereaved archdiocese.

He will be missed as a good and gentle man, a figure of unquestioned holiness in an age suspicious of piety. His energy and compassion reached out to all, but especially to the least of his flock.

The cardinal, whose heart gave out Saturday at 67, succeeded two widely-known prelates, William Cardinal O'Connell and Richard Cardinal Cushing. Both are the stuff of storytelling legend in the history of the Archdiocese of Boston. Both were commanding, articulate figures who presided over a vast expansion of Catholic schools, parishes, hospitals and other institutions that have meant so much to Boston.

Cardinal Medeiros brought different skills to his task. His job as shepherd came at a stormy time for this flock. When he became Archbishop of Boston in 1970, the Vietnam war was raging, sending social currents that threatened long-cherished beliefs and behavior swirling through America.

In Boston, the cardinal faced hostility to the church's teaching on social justice and racial peace. He persevered. Boston's Covenant attracted many who wished to make witness to justice. Through simple moral example, the cardinal led the way.

He was a man of singular serenity and a pilgrim of peace, which accounts for the widespread grief over his passing.

"Many accompanied him to the river side," wrote John Bunyan of a similar figure in "Pilgrim's Progress." "As he went, he said, 'Death, where is thy sting?' And as he went down deeper, he said 'Grave, where is thy victory?' So he passed over, and all the trumpets sounded for him on the other side."●

THE PROPOSED MARTIN LUTHER KING HOLIDAY

● Mr. EAST. Mr. President, before my colleagues rush to consideration of legislation to designate the birthday of Dr. Martin Luther King, Jr., a national holiday, I hope they will consider the strong arguments against such a holiday. I ask that a column by Patrick Buchanan which appeared in the Washington Times on September 16, 1983, and a column by James J. Kilpatrick from Human Events of September 17 be printed in the RECORD.

The articles follow:

[From the Washington Times, Sept. 16, 1983]

WHY REAGAN SHOULD VETO A MARTIN LUTHER KING HOLIDAY

(By Patrick Buchanan)

Headed for the president's desk this fall is a bill, the disposition of which will likely presage the character of the campaign Ronald Reagan will conduct for re-election. Whether it will be middle-of-the-road Republican, or conservative Crusader.

The issue: A national holiday for Martin Luther King.

In the House, conservative opposition to the King holiday has folded up like a house of cards, with right-wingers rushing forward in a near hilarious display of kowtowing and trucking, paying extravagant homage to a man none of them, to my knowledge, has ever invoked in private. Looking down the list of members, Senate Judiciary, is a lost cause. The King holiday is not going to be stopped on the Hill; it is coming to the president's desk.

Ronald Reagan should veto it. Not because of the quarter billion a 10th national holiday would cost the Treasury, or the lost productivity we cannot afford. That would be a copout.

The president should veto it—for the right reason. That Dr. Martin Luther King Jr. does not deserve a national holiday. Not remotely. And because this campaign to place Martin Luther King on a pedestal in the national pantheon occupied only by one other American, George Washington, is an ill-motivated, ideological scheme to force a recalcitrant minority—perhaps a majority—of Americans to pay public tribute to a secular leader whose political legacy is anything but unambiguous.

That King is a historic figure, the equivalent to the civil rights movement of what Sam Gompers was to the labor movement, is not in question. Nor is the man's eloquence or bravery.

But by the day he died on that Memphis hotel balcony, King had become as polariz-

ing, as divisive, as negative a force as there was in national politics.

His constant preaching of civil disobedience bred a general disrespect for law among millions that persists to this day. He had progressed from being the nation's foremost advocate of civil rights into an apologist, an acolyte, of the welfare state as the hope of black America. He was at the time of his death an implacable critic of the national defense, a man who derided America's effort to halt communism in Southeast Asia as somehow racist, a sometime admirer of Ho Chi Minh, a self-proclaimed "citizen of the world" who denounced his own country—this country that is supposed to honor him alongside George Washington—as the "greatest purveyor of violence in the world today."

If civil rights activists and their liberal camp followers wish to honor King, as they have—with state holidays, local holidays, by appending his name to libraries, museums, bridges, highways, parks—they have every right to do so. And they have done so. But why should we conservatives be compelled to honor—above Abraham Lincoln, who has no national holiday—a political antagonist who trashed the agenda of modern conservatism as racist and reactionary?

If the party of Kennedy and Johnson that wiretapped King to document his communist connections and collect filth on his personal life wishes to make amends for its sins, let the Democrats find some other way than to force the rest of us—who had nothing to do with their nasty work—to pay homage to a politician they have hypocritically beatified—only after he was gone.

There is no national groundswell of support for this holiday. Some dozen states have so honored King; three dozen have declined, including many that tabled, and then rejected, the idea. In a federal union such as ours, the states' decision to honor or not to honor secular heroes should be decisive. In this pluralistic society, we ought not force minorities to worship at the altar of an alien congregation.

We do not demand that black Americans in the South pay tribute to the memory of Jefferson Davis or Robert E. Lee. Indeed, the proponents of the King holiday are among those who tell us what a moral outrage it would be to have mandatory prayer in the public schools—when even one child might be embarrassed by having to acknowledge a God in whom he or she disbelieves. This King enterprise is the very antithesis of tolerance.

To elevate an American to a position of honor and esteem alongside the Founding Father, Gen. Washington, is one upon which all Americans should be agreed. We are not agreed on this proposition. It is being rammed through Congress by politicians who are intimidating their opponents with the threat of being branded as racist if they refuse, with the warning that they and their party will face permanent loss of the political support of that tenth of the nation to whom the King holiday is said to be a nonnegotiable demand.

There is an answer presidents should always give to such non-negotiable demands. The answer is no.

[From Human Events, Sept. 17, 1983]

WHY A NATIONAL HOLIDAY FOR MARTIN LUTHER KING?

(By James J. Kilpatrick)

Now that emotions have subsided in the wake of the recent "March on Washington," it may be possible to address a few observations to this business of a federal holiday honoring Martin Luther King, Jr., without getting everybody stirred up.

The idea is wholly unwise. As a matter of principle, as a matter of perspective, and for several practical reasons, the idea ought to be abandoned in favor of some other means of honoring the civil rights leader.

I knew King very slightly; we once debated on national network television, and though we were poles apart on legislative issues, I admired his skill as an orator and his courage as a man.

When he went out to disturb the peace, he put on his go-to-jail clothes; unlike today's gutless wonders on college campuses, who want to violate the draft registration law and still collect subsidized student loans, Martin Luther King never sought impunity. He accepted whatever punishment came his way, and there is no denying his profound influence on the adoption of the Civil Rights Act of 1964 and the Voting Rights Act of 1965. He became the foremost symbol of the revolutionary racial changes that began in 1954 with the Supreme Court's decision in the school segregation cases.

But the question at hand is a legislative question: Should the Congress enact a law making King's birthday, January 15, a legal holiday for the District of Columbia and for federal workers everywhere? Let me argue the negative side of that proposition.

First, the practical matters: Legal holidays are supposed to serve a dual purpose. They honor particular individuals or events, and they provide working people with a day of rest from their everyday burdens. We have nine federal holidays; New Year's, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans Day, Thanksgiving and Christmas.

Holidays cost money. There is no way accurately to fix the cost to the government and to industry for the lost production that unavoidably results from a paid legal holiday, but the cost runs into the hundreds of millions of dollars. Must we add one more such consequence to the nine federal holidays already observed?

If King's birthday in January were to be made a national holiday, we would wind up with six holidays in a period of two and a half months—Election Day, Veterans Day, Thanksgiving, Christmas, New Year's and then King's Day. The argument in favor of easing the burden on the labor force ceases to hold water.

These practical objections provide the least of the objections. Note that of the nine federal holidays, only two honor specific individuals: George Washington and Christopher Columbus. We have no federal holiday for such towering figures as Jefferson, Madison and Lincoln. A decent sense of historical perspective should tell us that Martin Luther King, influential as he was in the field of civil rights, was no John Adams, no John Marshall, no Benjamin Franklin.

It is a sound principle in these matters to take the long view. Congress ought never to name a federal building for a living politician. The FBI building on Pennsylvania Avenue never should have been named for J. Edgar Hoover. A long period of years should elapse before individuals are formally ranked in the pantheon of national greatness. It takes time to assess character and to appraise achievements, and this truism applies in the matter of Martin Luther King.

The FBI's files on King were deposited in 1977 with the National Archives, under seal for 50 years. The year 2027 is no farther in the future than the year 1939 is in our past, and that seems not so very long ago. The files will document King's intimate association with Communist figures. The files will remind us of King's vitriolic attacks on his own country in the 1960's, when he publicly found the United States worse than Nazi Germany.

To say that the pending holiday bill is a legislative question is to stop short of the whole truth. The bill is a hot political question.

It is preposterous to contend that if one opposes the bill, one is therefore anti-black, but political life is filled with preposterous propositions. It will take courage of a high order to vote against the measure. Soon enough we will discover who has it, and who doesn't.●

SENATE CONCURRENT RESOLUTION 62

● Mr. D'AMATO. Mr. Speaker, I am pleased today to add my name as a cosponsor of Senate Concurrent Resolution 62, which addresses the social security benefit disparity known as the notch problem. This resolution calls on the Commissioner of Social Security and the Secretary of Health and Human Services to immediately develop a plan and report to Congress on the steps Congress might take to deal with the notch problem.

In 1977, Congress passed a series of cost-cutting reforms to save the then nearly bankrupt social security system. Because the old system of determining social security benefits was flawed and overcompensated for inflation, Congress established a new formula which affects all those born after 1916. This formula provides for lower benefits. To ease the transition from the old to the new, special provisions were enacted for people about to retire, that is, those born in 1917–21. These benefits would be determined by a special formula if, and only if, the formula would provide higher benefits than under the new system.

However, the high inflation rates of the late seventies made the difference in benefit levels for individuals whose benefits were computed under the old rules somewhat higher than anticipated when the benefit formula changes were enacted. As a result, people whose benefits are computed under the old rules have a greater than intended advantage over those who have to use the transitional or new computation rules.

The Social Security Amendments of 1983 showed this Nation's solemn commitment to maintaining a financially stable and secure social security system. Despite the fact that this legislation did not attempt to deal with the unintended consequences of the change in benefit formulas, I believe that Congress still has a responsibility to remedy some of the unintended consequences of its actions. I look forward to the cooperation of the Secretary of Health and Human Services

and the Commissioner of Social Security in finding an equitable solution to this problem. I urge my colleagues to support this resolution.●

THE MX—A GIANT STEP TOWARD NUCLEAR WAR

● Mr. HART. Mr. President, the administration and others are playing upon Americans' justified anger by using the Soviet Union's barbaric attack upon the unarmed Korean airliner to justify building the MX missile.

In the wake of this senseless tragedy, we seek a response that will adequately express both our outrage at the atrocity and our determination that it never happen again. In our anger, however, we must still think clearly, and not respond in ways that will weaken, rather than strengthen, our national security while failing to impress the Soviets. Yet this is precisely what the administration would have us do by linking the shooting down of flight 007 with support for its proposal to build 100 MX missiles and base them in old Minuteman silos.

Mr. President, I abhor this brutal attack not only for the wanton destruction of innocent lives but also for the Soviet's utter disregard for human life to "preserve the Russian motherland." It painfully reminds us of another godless state that slaughtered 6 million Jews in pursuit of its deranged political beliefs. In the Soviet Union, as in Hitler's Germany, the state counts for everything while the individual counts for nothing.

The Soviet attack comes as no surprise. It merely continues the trend of atrocities—the Stalin purges of the 1930's and 1950's, the crushing of Hungary in 1956, Czechoslovakia in 1965, then Poland, and Afghanistan. The list goes on and on.

Yet, this latest atrocity bears no relation to the debate over whether to deploy the MX missile. Those who oppose the administration's proposal do not harbor any illusions about the Soviet Union's good faith in its international dealings or its respect for human life. We oppose it for reasons based solely upon our own national interests. And the arguments against building the MX and basing it in existing Minuteman silos remain as persuasive today as they were before the Soviets shot down flight 007.

The administration's proposal will not make our land-based missile force more survivable. It will divert tens of billions of dollars from genuine human needs, as well as from efforts to strengthen our conventional forces. It will not give us a "bargaining chip" for concluding a nuclear arms control agreement. But, in conjunction with Soviet deployments, it will move both nations dangerously close to nuclear war.

By any measure, the MX missile will seriously weaken our national security.

First, after rejecting over 30 other options, the administration plans to base it in the worst possible location—existing, vulnerable Minuteman silos. President Reagan took office resolving to close the so-called window of vulnerability caused by the growing ability of Soviet missile to destroy our land-based nuclear forces in a first-strike. Now, he plans to put our most expensive and lethal strategic weapon in the most attractive target we could offer the Soviets. And the Soviets do not even have to retarget their missile or spend a single ruble to knock it out.

Defense experts agree the Soviets currently can "kill" between 75 and 95 percent of our Minuteman silos. Therefore, as the chairman of the Senate Armed Services Committee has said, MX missiles in Minuteman silos would be "sitting ducks," only fatter and larger than the Minuteman missile. They would offer the United States about as much military security as a disconnected burglar alarm in a house with the front door open.

It makes no sense for President Reagan now to claim building the MX will demonstrate to the Soviets our toughness in response to the shooting down of the Korean airliner. If MX-in-Minuteman was vulnerable before, it is still vulnerable now. Why should the United States make itself look foolish by spending $30 billion on a weapon system the Soviets know they can defeat, and then say, "That'll show' em." That is not national will, that is national ignorance. And it is not likely to impress the Soviets.

Second, the MX represents an enormous diversion of defense resources from building a smaller new mobile missile, improving our conventional forces, and addressing human needs. Defense spending has contributed to the President's unprecedented budget deficits that threaten to choke off economic recovery and to bring closer the day of reckoning for every segment of our society, including national defense.

Each MX will mean fewer resources for truly survivable alternatives to today's vulnerable land-based missiles. Each MX will mean fewer ships, tanks, fighters, and other conventional forces to buffer against nuclear war.

And the costs will not be limited to the $30 billion or more just to build and deploy the MX missile. They will ultimately include additional billions to try to protect it from Soviet attack—either with an antiballistic-missile system or some "Star Wars"-type satellite defense—when the administration finally discovers its vulnerability has rendered the MX useless.

Third, although its proponents maintain the MX gives the President a "bargaining chip" in arms control negotiations, he has repeatedly said he will not bargain it away for arms control.

Moreover, this administration's record gives no confidence it will keep the arms control part of the MX "bargain." It has refused to seek ratification of the SALT II Treaty. It has delayed for many months any negotiations at all on nuclear arms, going to the table only when prodded by public pressure. It flirted with insanity by talking of nuclear warning shots and winnable nuclear war. It has abandoned the goal of a comprehensive nuclear test ban. And it has launched an arms race in space, diminishing our national prestige by enabling the Soviets to exhibit reasonableness in calling for its halt.

In fact, so many Members of Congress doubt the administration's commitment to arms control that the President seems to negotiate as much with them over his arms control policies as with the Soviets. Some Members have threatened to withdraw their support for the MX if arms control negotiations do not soon show some real progress. Others have made their support contingent on the President's endorsing a so-called build-down proposal—eliminating two existing warheads for every new one.

Thus, while the President sees the MX as a bargaining chip with the Soviets, Congress uses it as a bargaining chip with the President—to get his active commitment to control and reduce the number of nuclear weapons. It is a Faustain bargain of the worst kind. And it stands logic on its head: It makes no sense to support a buildup of our nuclear arsenal—by 100 MX missiles armed with 1,000 warheads—just to encourage the President to secure an arms control agreement that would likely force us to remove them.

Finally, and most seriously, the MX is a giant step toward nuclear war. Because its unprecedented power and vulnerability invite the Soviets to strike first, the MX, from a military standpoint, is useful only if we launch it in a first-strike against them or the moment we think their missiles are on the way. Given the frightening number of "War Games"-style false alarms that have lit up our defense computers in the past, shifting to a launch on warning doctrine dangerously increases the chance of accidental nuclear war.

This future will not bring peace. It will bring a test of nerves between both superpowers, their fingers poised on hair triggers ready to use their weapons rather than lose them.

The President reportedly chose the name of his MX missile—Peacemaker. Apparently, George Orwell's "1984" arrived in Washington a year early.

We do not need a missile called a Peacemaker. We need a President who is one. And we need an administration that will listen to the American people when they call for clear strategic thinking and reject a missile that makes no sense.●

MENDING OUR FENCES

● Mr. ABDNOR. Mr. President, the Reverend Harold DeGroot, pastor of the Christian Reformed Church in Sioux Falls, S. Dak., recently wrote a column for the Sioux Falls Argus Leader in which he discussed the real nature of the Soviet threat.

In his article Pastor DeGroot looks at Soviet communism from a historical perspective. He reminds us that the Leninist goal of world domination has not changed and that we must keep our fences mended, militarily.

The brutal shooting down of an unarmed Korean airliner with 269 men, women, and children aboard—including about 60 Americans—should be reminder enough of the mentality of our Soviet adversaries.

Yet, as Pastor DeGroot points out, we tend to forget with the passage of time. Some even propose to freeze us into permanent strategic inferiority.

I ask that the article be printed in the RECORD.

The material follows:

[From the Sioux Falls (S. Dak.) Argus Leader, Sept. 10, 1983]

WE NEED STRONG FENCE WITH SOVIETS

(By Harold DeGroot)

Having been raised on a farm I learned a very important lesson for all of life: "Good fences make good neighbors." We had a neighbor who neglected his fences. His livestock spent about as much time on our farmyard as on his own. Needless to say, this brought tension.

This is also true in the international arena: "Good fences make good neighbors." The only wise course for the United States to follow is to build good fences. We must meet the Soviet Union on every level—technologically, militarily. If we neglect our fences it will, no doubt, bring about unilateral American disarmament. The only responsible position is to negotiate from a position of strength.

We forget that we are still at war with communism. The Communists are still out to take our freedoms and to enslave us and our children. Communism is waging its war to enslave us according to plans carefully spelled out over 60 years ago by Lenin. Lenin's plan states: "First, we will take Eastern Europe, then the masses of Asia, then we will encircle the United States, which will be the last bastian of capitalism. We will not have to attack. It will fall into our hands like an overripe fruit."

Following Lenin's plan the Communists are directing a two-pronged attack against the United States. Their program is designed, first, to destroy our ability to resist (disarmament) and, second, to destroy our will to resist. If the Communists could trick us into destroying our arms, our ability to resist would be destroyed. Now they are also working to destroy our will to resist. Since Vietnam and further expansionism by the Soviets, we are a nation with a diminished will.

In the light of all this history some of us are still asking for a nuclear freeze—weaken our fences!—Even though we all know we cannot trust the Communists. And churches are getting involved, often taking the leadership in this suicide! At best, church involvement in military and political issues only muddies the waters.

Communism is an idea born in hell. It must be replaced by an idea born in heaven. That is where the churches come in! Tell the whole truth about communism. Preach the word, which has much to say about the communist enslavement and wanton killing of millions in Cambodia, Laos, Vietnam, Afghanistan, Poland and a host of other iron-and bamboo-curtain countries. They have crushed the spirit and robbed the freedoms of those enslaved! A monstrous crime. We must tell them that being free in Christ we are free indeed. Only then.●

GENERAL ASSISTANCE TO LOCAL EDUCATION AGENCIES

● Mr. BENTSEN. Mr. President, I am pleased to join as a cosponsor of S. 1630, a bill to provide general assistance to local education agencies for making educational services available to alien children. S. 1630 authorizes $68 million over the next 3 years to assist districts that provide educational services in areas with disproportionately large numbers of refugees and illegal alien students.

Classrooms across the Nation, confronted by the biggest influx of immigrant students since the turn of the century, are struggling to absorb hundreds of thousands of youngsters each year. This assistance is essential to local districts that cannot fully underwrite the cost of providing such services. The presence of large numbers of limited English speaking students has generated new demands for equipment, materials and supplies, classroom space, and bilingual staff.

These increasing demands constitute a growing burden of State and local tax resources. The Texas Education Agency estimates that an average of $2,600 was spent on each Texas schoolchild during the 1982-83 school year. While alien students costs are higher because of the special needs cited earlier, using the baseline figure of $2,600 for the estimated 29,170 undocumented aliens in Texas schools indicates that communities are being asked to assume more than $75 million per year in additional obligations.

These costs place an enormous strain on existing educational resources. For example, the Ysleta school district superintendent recently testified to the State Education Subcommittee that his district has been unable to employ sufficient bilingual and English as a second language teachers. According to the superintendent of Dade County, Fla., nearly $12 million has been expended over the last 3 years to purchase portable classrooms for refugee students. While some might argue that Federal funding available through the chapter 1 program for educationally disadvantaged children should be sufficient to defray such costs, assistance under this program is allocated on the basis of the 1980 population census which undercounts the number of undocumented aliens, thereby underfunding States responsible for educating large numbers of alien children.

Devaluation of the Mexican peso in 1982, which reduced the peso to one-sixth of its previous buying power, has severely curtailed the flow of commerce from Mexico into the United States communities along the border are affected disproportionately by plummeting retail sales, a rising number of bankruptcies, declining tax bases, and high unemployment. In Joint Economic Committee hearings over which I presided on August 1, witnesses reported unemployment rates of 12 percent in El Paso, 16 percent in Brownsville, 27 percent in Laredo, and an unprecedented 47 percent in Starr County. Sales tax receipts in Laredo and similarly hard-hit cities fell 44 percent last year. Improvement in the economy of the region is projected to be several years away, meanwhile school board members and superintendents dependent on local tax revenues are experiencing difficulties in collecting sufficient funds to meet either operating costs or long-term bond obligations.

A host of related problems has emerged, caused in part by the ravaged local economy and Congress inability to enact a coherent immigration policy which would regulate the influx of aliens from outside our Nation's borders. The problems center around provision of basic services, such as health care and emergency food and shelter. As unemployment increases, the number of persons not covered by unemployment insurance and health care similarly increases. The cost of caring for indigents, many of whom are illegal aliens, is expensive—$2 million per year in Cameron County alone, according to testimony provided by local officials at the JEC hearing. The circumstances exacerbate the difficulty which local jurisdictions experience in attempting to respond to demands for education services.

I have long supported Federal legislation to respond to the special needs of areas disproportionately impacted by large numbers of aliens. On two separate occasions, I introduced and guided through the Senate bills to provide assistance for construction of classrooms in schools affected by economic dislocations and overcrowding due to legal alien immigration along the United States-Mexican border. I have supported the Simpson-Mazzoli immigration legislation as a means to

control the flood of aliens into this country. But neither initiative has been enacted, and the citizens of communities all along the border need assistance now in response to present, severe conditions. This bill is the first necessary step toward redressing those needs in the area of education. I urge my colleagues to join me in support of S. 1630.●

MEETING THE SOVIET CHALLENGE

● Mr. HART. Mr. President, on September 1 after hearing that the Soviets had shot down an unarmed Korean Air Lines passenger plane, I termed the act cowardly, unprovoked and barbaric behavior. The passage of time has not, nor should it, diminish the despicable character of this Soviet action.

To date, the Soviets have continued to deny their victims and the world at large their minimum due: an apology; a commitment never to repeat such an act; and appropriate compensation for the families of the victims.

Indeed, Soviet actions have been the epitome of arrogance and brutality:

In Madrid, Soviet Foreign Minister Gromyko at a forum committed to the extention and preservation of human rights effectively said that any violation of Soviet territory justifies murder.

In a subsequent press conference, Soviet Defense Minister Ogarkov crudely lied about the lights on the KAL aircraft and its resemblance to other aircraft.

The Soviets clearly gave the world the impression that not only do they have no regrets but that they would do it again and equally without qualm.

Yet this should not surprise us. Soviet policies whether they be the invasion and continued supression of Afghanistan or the harassment and incarceration of domestic dissidents have demonstrated the harsh reality of the Soviet System. The destruction of the KAL jetliner is but another sorry page in this record.

Our response to Soviet terror has been properly measured and coordinated internationally. We have sought devices to bring pressure on the Soviets without circumscribing our own interests as suspension of arms control negotiations or economic boycotts would have done. In this vein, the Soviets have been brought to the docket at the U.N. Security Council and harshly criticized. We are still orchestrating an appropriate NATO response. Along the same line, we should support and commend the proposal of the International Federation of Airline Pilots to suspend air service to the Soviet Union for 60 days. Likewise, we should continue to press the Soviets for access to the crash site, compensation for our citizens and a commitment to honor the sanctity of civilian aircraft.

Obviously, there are lessons to be drawn from this disaster and special interests will rush to wrap their programs in the mantle of tragedy. I suggest, however, that the lessons are not simply that we need more defense or that we must negotiate to prevent war. Indeed the clearest lesson is a reaffirmation of the truism that we live in a dangerous world and that the powers of any nation or group to redress a wrong are limited. As always we will need our best minds, our calmest reactions and our strongest resolves to deal with the challenges posed by the Soviet system in every forum—military, diplomatic, economic—where our interests conflict or coincide.●

ALTERNATIVE FINANCING FOR CLINCH RIVER—CBO SPEAKS OUT

● Mr. HUMPHREY. Mr. President, as I pointed out in an earlier CONGRESSIONAL RECORD entry, the proposed alternative financing plan for the Clinch River breeder reactor project is in no way a cost-sharing arrangement. In fact, my staff has estimated that it would add from between $150 million to $300 million to the cost of the project through increased financing costs and the granting of tax benefits.

Yesterday, my own estimates were verified by the Congressional Budget Office (CBO). In testimony before the Subcommittee on Energy, Conservation, and Power of the House Committee on Energy and Commerce, the newly appointed Director, Rudolph Penner, outlined two major findings of a CBO study on the budgetary effects of the proposed plan.

The first finding was that the plan would add $2.6 billion to the Federal deficit from 1990 to 2020 and that even when discounted, the cost of the plan to the U.S. Treasury would be almost $250 million more than if the Congress chose to fully fund the project.

The second finding was that the after-tax rate of return earned by the equity investors under the plan would be nearly 37 percent.

Mr. Penner in his testimony indicated that this financing plan was even worse than the approach Congress has already found unacceptable. These findings are significant and make it clear that the proposed financing plan is seriously flawed and in need of careful review and extensive modification.

Certainly, any attempt to attach legislation for this plan on the continuing appropriations resolution, should be resisted. A plan this controversial that requires authorization of $1.5 billion in obligations on a single vote, and that ironically increases the project's cost ought not to be considered at the last minute on an appropiations bill. Indeed, submitting such legislation separately would make far greater sense particularly now that DOE has made draft legislation available (see the CONGRESSIONAL RECORD at S12453, September 1983).

Mr. President, I believe it is important that the Senate understand just how flawed the proposed alternative financing plan is and how much it is in need of markup and modification as separate legislation. I ask that the entire text of the CBO study, "Comparative Analysis of Alternative Financing Plans for the Clinch River Breeder Reactor Project" and Mr. Penner's written testimony be printed in the RECORD.

The material follows:

STATEMENT OF RUDOLPH G. PENNER, DIRECTOR, CONGRESSIONAL BUDGET OFFICE

Mr. Chairman, I am pleased to appear before you today to discuss the proposed financing plan for the Clinch River Breeder Reactor. The staff of the Congressional Budget Office (CBO) has analyzed the financial implications of this plan for the federal government. Our analysis deals only with alternative financing options, and does not address the value of the project itself or the decision about whether it should be completed.

Our analysis focuses on two basic options: on the one hand, the private financing plan developed by the Breeder Reactor Corporation (BRC) Task Force and endorsed by the Administration; and, on the other hand, an alternative that I will call the "government-financed" plan. The latter assumes:

No additional private sector contributions, other than the $175 million already committed by public utilities;

Federal funding of an additional $2.3 billion in construction costs;

Continued government operation of the reactor through the year 2020, and sales of power at market rate throughout the period; and

Completion of the project at the same cost and at the same time as assumed for the BRC private financing plan.

Under these assumptions, the BRC plan would reduce federal budget deficits between 1984 and 1990 by close to $700 million, but would add $2.6 billion to the deficit over the following 30 years, as compared with the government-financed alternative. Thus, the budgetary effect of the BRC plan is to reduce deficits in the early years at a cost of larger deficits in later years.

Because the value to the government of receiving a dollar in the future is less than the value of receiving the same dollar now, an evaluation of this trade-off requires a discounting of future outlays and revenues to put all cash flows on an equivalent basis, regardless of the year in which they occur. When discounted, at the after-tax cost of federal borrowing, the cost of the private plan is almost $250 million more than if the Congress chose to fully fund the project. This indicates that the short-term savings from the BRC plan do not offset the higher costs to the government over the life of the reactor.

The higher cost of the private plan reflects the fact that the government would be borrowing funds from the private sector and paying a guaranteed rate of return higher than normal government borrowing costs. Under the BRC plan, our base-case as-

sumptions imply that the after-tax rate of return earned by the equity investors would be about 37 percent, while the after-tax rate of return for bondholders would be 7.5 percent. The difference between these rates and the government's assumed after-tax discount rate of about 6.75 percent accounts for the higher long-term cost to the government of the BRC plan.

Our analysis reflects an assumption that, under the government-financed plan, power produced by the reactor could be sold at market rates throughout the period. This would demand a change in the current contractual agreements, which require the Tennessee Valley Authority (TVA) to buy the power produced by the reactor for the first five years at "avoided energy costs." This restriction could, at the discretion of the Congress, be maintained or removed regardless of which financing plan is selected. Therefore, in comparing the two basic alternatives, the same power sales were assumed for both.

Our analysis also assumes that the Tennessee Valley Authority would not exercise its option to purchase the reactor after five years of operation. In view of its projections of excess capacity, the TVA has indicated that it would probably not acquire the plant.

Our analysis is based on an assessment of the tax benefits that private investors would receive under the BRC plan from the investment tax credit and from depreciation and interest deductions. We have also estimated taxes the investors would pay on their income from the project. The results have been tested under varying assumptions about the tax treatment of the private investors, the amount of income from the sale of electricity, and the discount rate used in the analysis. The cost of the BRC plan is lower than that of the government-financed plan under only one of the scenarios analyzed. That scenario assumes that, with government financing, power would be sold at a below-market price to the Tennessee Valley Authority for the first five years of the reactor's operation, as specified in current agreements. On the other hand, it assumes that power sales under the private plan would be at a market price. It is not apparent, however, why the restriction on power sales should necessarily be maintained in one case, but not in the other. Therefore, the choice of financing mechanism should not be affected by this assumption.

In sum, the CBO analysis indicates that, if the government is to proceed with the Clinch River Breeder Reactor Project, direct appropriation of the necessary additional construction funds would be more economical to the government in the long term than the BRC's private financing plan.

Mr. Chairman, this concludes my statement this morning. More detail on this analysis appears in the Staff Working Paper that we have provided to this Subcommittee. I will be happy to answer any questions you or members of the Subcommittee may have.

Comparative Analysis of Alternative Financing Plans for the Clinch River Breeder Reactor Project

As mandated by the Congress, the Department of Energy has transmitted a new plan for financing the Clinch River Breeder Reactor Project (CRBRP) involving greater participation from the private sector. At the request of the Subcommittee on Energy Conservation and Power of the House Committee on Energy and Commerce, the Congressional Budget Office (CBO) has prepared an analysis of the proposed financing plan, assessing its long-term impact on the federal budget compared to the alternative of full federal funding of the remaining costs. This paper describes the background of the new financing plan and the CBO analysis of its budget impact.

BACKGROUND

The CRBRP was authorized in 1970 and initial appropriations were provided in 1972. The cost of the project was estimated in 1972 to be $699 million, based on manufacturers' conceptual designs. In 1973, utilities committed themselves to pay $257 million plus interest to the CRBRP. The Department of Energy now estimates that interest will raise the utility commitment to more than $340 million. After detailed cost estimates and reference designs were completed in 1974, the estimated costs of the project rose to over $1.7 billion, assuming operation in 1982. Funding restrictions, delays, licensing requirements, and cost reestimates have since raised the estimated costs to over $4 billion, of which nearly $1.7 billion has been spent. In the Further Continuing Appropriations Act for Fiscal Year 1983, the Congress directed the Department of Energy to report on options to secure additional private sector participation in the CRBRP that would reduce the federal budget requirements. An initial report was submitted in March, and a second more detailed plan was submitted in early August. No funds were included in the Energy and Water Appropriations Act of 1984 for the CRBRP pending action on private financing. Work continues, however, on site preparation activity.

Responsibility for the CRBRP is governed by contractual agreements involving the Department of Energy, the Commonwealth Edison Company, the Tennessee Valley Authority (TVA), and the Project Management Corporation (PMC). The latter represents the interests of contributing utilities in the management of the project. The Breeder Reactor Corporation (BRC) was established to represent the electric power industry in providing assistance and support to the project.

Under present working agreements, if the project is to be completed by 1990 as currently planned, the government will be responsible for providing an estimated additional $2.3 billion to complete construction. As part of their original commitment, utilities (through the BRC) are obligated to provide an additional $175 million.[1] The TVA is required to purchase power generated by the CRBRP for the first five years of the project's operation, and has the option to purchase the plant at the end of that period. No specific agreements have been reached regarding the operation of the project after the five-year period.

THE BRC PLAN

In response to the Congressional directive, the Department of Energy explored options to secure additional private sector financing for the CRBRP. The Breeder Reactor Corporation prepared a proposal that would increase private participation in the funding of the CRBRP. It includes $1.5 billion in additional government financing and $825 million in additional private funds, the latter consisting of $675 million in short-term lending and $150 million in equity participation (see Table 1 below). This plan was endorsed by the Administration and transmitted to the Congress by the Department of Energy on August 1, 1983.

TABLE 1.—PROPOSED SOURCES OF CRBRP FUNDS, 1984–1990

[In millions of dollars]

	Current arrangements	Proposed BRC plan	Difference
Government appropriations	2,325	1,500	−825
Utility contributions	175	175	
Equity participation		150	150
Private lending		675	675
Total	2,500	2,500	

Under the proposed plan, the federal government would be required to cover the full costs of the equity investment, as well as principal and interest payments on the debt, through various tax benefits, project revenues, and, if necessary, federal payments. Thus, the proposal embodies virtually no risks to the new private sector participants. The short-term private investment of $675 million would be retired in 1990 by the issuance (by the equity investors) of an estimated $1.04 billion in 30-year bonds, which would cover the $675 million in short-term construction loans plus interest accrued at 10 percent. The plan would require a government commitment to cover the principal and interest payments on the bonds, either from the reactor's power sales or, if those are not adequate, from other government funds. The sale of $150 million in equity shares in the project would be attracted through a guarantee of tax benefits and a share of revenue not needed to pay interest on the debt. Because of the uncertainties associated with the newness of the technology, licensing requirements, and the volume and price of future electricity sales, the BRC proposes that the government guarantee that both the equity and the debt holders will be repaid their investments, as well as a minimum rate of return. The actual rates of return would be open to negotiation and would reflect market conditions at the time. All cost overruns would be paid for in full by the federal government.

THE ALTERNATIVE: GOVERNMENT FINANCING

For the purpose of this analysis, the BRC plan is compared to an alternative that assumes:

Federal funding of an additional $2.3 billion in construction costs;

Utility contributions, already committed, of $175 million;

Continued government operation of the reactor through the year 2020, with sales of power at market rates throughout the period;

Completion of the project at the same cost and at the same time as under the BRC plan.

As with the proposed BRC plan, this alternative (which we will generally refer to as the "government-financed" plan) would require a change in the current contractual agreements, because of the present requirement that the TVA must buy the power produced by the CRBRP for the first five years at avoided energy cost.[2] This restriction

[1] This is in addition to the utility contributions to date, which, with accrued interest, total $166 million.

[2] Avoided energy cost is the incremental cost to an electrical utility of electric energy or capacity or both.

could, at the discretion of the Congress, be maintained or removed regardless of which financing plan is selected. Therefore, in analyzing the two basic alternatives, power sales at market rates were assumed for both.

The analysis also assumes that TVA would not exercise its option to purchase the reactor after five years of operation. In view of TVA's recent reductions in its own plans for construction of power-generation facilities, all indications are that TVA would probably not acquire the plant.

ESTIMATED BUDGET IMPACT OF THE BRC PLAN

CBO has analyzed the budgetary impact of the proposed BRC plan on both outlays and tax revenues, assuming that the project is completed within current cost estimates and on schedule, and that the financing terms would be those assumed by the developers of the plan.

Compared to the government-financed plan described above, the BRC plan would:

Reduce federal outlays for project construction;

Reduce federal tax revenues in the early years (through 1995), and increase them in subsequent years; and

Reduce or eliminate federal receipts from the sale of power.

Each of these effects is discussed separately below.

Construction Outlays

Under the BRC plan, the government would spend $1.5 billion and private parties $1.0 billion to complete the CRBRP. This would reduce federal outlays by $825 million between 1984 and 1990—with $150 million provided by equity investors and $675 million covered by short-term construction loans.

Tax Revenues

The equity participants, in return for their investment, would be entitled to potentially large tax credits and deductions. The proposal does not assume any new tax benefits; it only requests that the federal government guarantee to make appropriate repayments to the equity investors if the current tax incentives are not made available as planned. On this basis, the equity investors would be entitled to the 10 percent investment tax credit on the $825 million of private investment, depreciation on 95 percent of the investment using the accelerated cost recovery system (ACRS), and deductions of construction interest costs.[3] Offsetting these tax losses would be the revenue generated by taxes on the bond interest and on power revenues received by the equity investors.

The Investment Tax Credit.—The equity holders would be entitled to take the 10 percent investment tax credit (ITC) on the full amount of the private investment ($825 million), as progress payments were made on the CRBRP. Over the 1984–1990 period, the cost of these credits to the U.S. Treasury would be $82.5 million.

Accelerated Depreciation.—The equity participants would be allowed to take depreciation under the accelerated cost recovery system. Because the proposal requests that the project be exempted from the rules regarding public utilities, it is assumed that that property would be depreciated over five years. (If the property was classified as public utility property, it would be depreciated over ten years.) The investors would be allowed depreciation deductions based on only 95 percent of the cost of the project. They could not depreciate 100 percent of their investment because of the 50 percent basis adjustment for the ITC required by the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA).

For the purposes of this analysis, it is assumed that the equity investors would be corporations subject to a marginal tax rate of 46 percent. The private investors would not be allowed to start taking depreciation until 1991, when the plant was placed into service. The revenue loss to the government from these deductions would be an estimated $361 million, occurring over the 1991–1995 period. (If the property was classified as public utility property, the revenue loss would be the same but would be spread out from 1991 through 2000.)

Construction Interest.—It is assumed that the investors would be allowed to deduct interest expended during the construction period (1984–1990), estimated to total $365 million. Although the interest would be deductible by the equity holders, it would constitute taxable income to the lenders. The net cost of this provision to the government would be the differential in tax rates between the equity investors and the lenders. In this analysis, it is assumed that the equity investors would be in the 46 percent tax bracket and the lenders in the 25 percent tax bracket.[4] This difference in tax rates would result in a net cost to the government of $77 million over the 1984–1990 period. If the borrowers and lenders were assumed to be in the same tax bracket, this provision would not result in a net cost to the Treasury.

Although it is assumed that the equity holders would be allowed to expense interest during the construction phase of the project, they might be required by the Internal Revenue Service (IRS) to "capitalize" the interest payments.[5] TEFRA requires firms to capitalize interest payments related to nonresidential real property. Although ten-year public utility of five-year recovery property is not considered in the class of nonresidential real property for depreciation, part of the CRBRP could be considered real property for purposes of the interest capitalization provision. The effect of capitalizing the interest payments is discussed later in this analysis.

Bond Interest and Power Sales.—Offsetting the cost of the tax benefits allowed the private parties are the additional tax revenues associated with the project. The proposal estimates that the CRBRP would generate sufficient power sales to pay both the interest (at 10 percent) and the principal on the $1.04 billion of long-term debt. On an annual basis, the revenue required to pay off the bonds would be $110 million. For purposes of this analysis, it is assumed that the investors receive $110 million per year composed of net income, after operating expenses, from power sales or government appropriations.[6] (If net sales income is less than $110 million, the government is assumed to cover the shortfall.) In the event that net income exceeds $110 million, it is assumed that the difference is turned over to the Treasury. (Although the plan is unclear as to how the revenues over $110 million would be shared, the assumption used here is conservative in that any residual revenue allocated to the private parties increases the net cost to the government of the BRC option.) Under these assumptions, the $110 million in annual net income is therefore not affected by the actual prices and costs of power over the life of the CRBRP.

It is assumed that the full $110 million per year received by the equity investors is used to pay off the long-term bonds. Because only the interest portion of the bond repayments constitutes a deduction for tax purposes, the equity investors would owe tax on the difference between the $110 million in revenue and the bond interest expense. Because the interest payments are also taxable income to the recipients, the full $110 million would be subject to taxation—partly to the equity investors and partly to the bondholders. The total additional tax revenue is estimated to be $29 million in 1991, increasing gradually to $49 million in 2020.[7]

Federal Receipts From the Sale of Power

While under the BRC plan revenues from power sales would accrue to the equity holders, such revenues would be paid to the Treasury under the government-financed plan. These receipts, net of operating costs, would be $110 million per year over the project's 30-year life, under the assumptions of this analysis.[8]

---

[3] In general, the deductions and credits from CRBRP would exceed the anticipated income from the project during the construction phase and its first few years of operation. Because of this, the BRC plan has been designed as a partnership so that the investment tax credit (ITC) and the deductions for depreciation and construction interest could be used to reduce the investors' outside taxable incomes. The partnership arrangement outlined by the BRC would allow the full tax deductions to be passed through to the equity investors. Because of the "at-risk" rules in the tax code, it is expected that virtually all of the equity participants would be corporations. The at-risk rules limit an individual's tax loss in any given investment to the amount the investor stands to lose in the venture. These rules do not apply to corporate investors.

[4] The tax rate on the equity holders is higher than the assumed rate on the bondholders because the equity participants will primarily be corporations (which have a marginal rate of 46 percent). The bond interest recipients are assumed to be individual taxpayers. The average marginal tax rate for individuals receiving interest income is approximately 25 percent (see U.S. Department of the Treasury, Internal Revenue Service, Statistics of Income—1979, Individual Income Tax Returns, 1982).

[5] Capitalized interest payments would not be deductible when expended but would be added to the basis of the property and recovered through depreciation. That is, the value of the property would increase by the amount of construction interest and would therefore increase the annual depreciation deduction proportionately. In addition, the capitalized interest payments would be eligible for the 10 percent ITC during the year in which they were incurred.

[6] This is the assumption in the BRC proposal of 350 megawatts of capacity, utilized at 65 percent, and sold for 11 cents per kilowatt hour. Operating expenses are assumed to be 5.5 cents per kilowatt hour, yielding net sales income of 5.5 cents per kilowatt hour.

[7] The tax revenue grows from $29 million to $49 million because the bondholders are in a lower tax bracket (25 percent) than are the equity holders (46 percent). Because the bonds are assumed to be fully amortized over 30 years (structured like a mortgage), the percentage of the $110 million paid in interest declines over the life of the loan. Therefore, the share of the $110 million subject to the lower 25 percent tax rates falls, and the share subject to the 46 percent rate rises, over the 1991–2020 period.

[8] More generally, power sales are assumed to be equal in both the BRC and the government-financed cases. Under the BRC plan, if net income from sales is less than $110 million, the government must appropriate the difference to pay off the bondholders; in the government-financed case, it forgoes the same amount of power revenue. In other words, the incremental cost to the govern-

The cash flows to the federal government for the two basic alternatives are summarized in Table 2.

In the short run (1984-1990), the private financing plan would save the federal government $825 million in construction outlays. These savings would be partially offset by tax losses of $159 million ($82 million in ITC and $77 million net interest during construction). As a result, the net saving to the government in the short run would be an estimated $666 million.

Between 1990 and 2021, however, the government would relinquish $3.3 billion in potential power sales. In addition, the private parties would be entitled to ACRS deductions worth $361 million. Offsetting these costs would be tax revenues (from the bond and equity holders) in the amount of $1.05 billion. Thus, the private plan would add $2.6 billion more to the federal deficit than the government-financed case over the 1990-2021 period.[9]

TABLE 2.—COMPARISON OF THE BRC PLAN AND THE GOVERNMENT-FINANCED PLAN

[In billions of dollars]

	BRC plan		Government-financed plan	
	1984-90	1991-2020	1984-90	1991-2020
Construction outlays	1.5		2.3	
Tax losses:				
ITC	0.1			
ACRS		0.4		
Interest deductions (net)	0.1			
Less: Tax revenue		−1.1		
Less: Power sales income				−3.3
Total increase or decrease (−) in the deficit	1.7	−0.7	2.3	−3.3

Note.—The amounts in this table represent current cash flows, not discounted present values.

PRESENT VALUE ANALYSIS

Because the value to the government of receiving a dollar ten years from now is different (and less) than the value of receiving the same dollar today, it is useful to discount future outlays and revenues so that the alternatives can be more accurately compared. Discounting all future dollar amounts puts all cash flows on a commensurate basis, regardless of the year in which they occur. The total of all discounted future cash flows is the discounted present value of a project, and it reflects the current value of all dollar amounts. The discount factor used in this analysis is 6.75 percent, which represents the estimated after-tax cost of federal borrowing consistent with the bond rate assumed by the BRC plan.[10]

Under the assumptions used in this analysis, the BRC plan would cost the government almost $250 million more than if the Congress chose to fully fund the project. (More precisely, the discounted value of the private plan is $248 million less than that of the government-financed version.) This indicates that the short-term savings from the BRC plan would not offset the higher costs to the government over the life of the plant.

The higher cost of the private plan reflects the fact that, under the BRC plan, the government is essentially borrowing funds from the private sector and paying a guaranteed rate of return higher than normal government borrowing costs.[11] Under the private plan, the after-tax rate of return earned by the equity investors is about 37 percent; the rate of return for the bondholders is 7.5 percent. The difference between these rates and the government's after-tax discount rate (6.75 percent) accounts for the higher long-term cost to the government of the BRC plan.

SENSITIVITY ANALYSIS

The results of the above analysis do not change greatly even when the major assumptions are modified. Under varying assumptions, the private plan generally costs the government more than government financing, although the differences may be less than the $248 million (in present value terms) of the basic case described above.

Six alternative cases were analyzed to study the effect that modified assumptions would have on the present value of the BRC plan, as compared to the government-financed plan. They are as follows:

(1) Ten-Year Public Utility Property.—Instead of depreciating the CRBRP over five years, it is assumed that the property is defined as ten-year public utility property. If all other assumptions are held constant, this change reduces the present value of the depreciation deductions and thereby reduces the cost to the government of the BRC plan by an estimated $24 million. The cost of the private plan, on a present value basis, would still exceed that of the government-financed version by $224 million.

(2) Construction Interest Capitalized.—In the base case, it was assumed that construction interest was expensed. Alternatively, it can be assumed that the construction interest must be capitalized and recovered through depreciation.[12] (It is likely that the actual tax treatment of the construction interest would fall somewhere between full capitalization and expensing.) Since the capitalization of interest payments would delay the realization of some of the tax benefits to the investors, this assumption would reduce the cost to the government of the BRC plan by an estimated $12 million on a present value basis. The cost of the private plan would still exceed that of the government-financed alternative by about $236 million.

(3) Equal Public and Private Borrowing Rates.—The basic analysis assumed that the government's discount rate was 6.75 percent—based on a 9 percent borrowing rate and a 25 percent marginal tax rate. It can be argued, however, that the 1 percent interest difference (between 10 percent and 9 percent) should not be counted as an advantage of the government-financed case because it does not reflect the "true" cost of capital. Because the government is removing funds from the private sector that have an assumed marginal cost of 10 percent, the government's discount rate should reflect the alternative private cost of capital. If the discount rate is raised from 6.75 percent to 7.5 percent, the relative cost of the private plan is reduced, but remains $168 million above the government-financed alternative.[13] (This difference reflects the return above 7.5 percent provided to the equity investors.)

(4) Combined Assumptions.—If the assumptions in the three foregoing cases are combined—that is, the property is depreciated over ten years, all interest is capitalized, and the discount rate is 7.5 percent instead of 6.75 percent—the cost to the government of proceeding with the private financing plan would be reduced, but would still be about $117 million above the cost of government financing.

(5) Power Sales to TVA.—Under current contractual agreements, CRBRP power must be sold to the TVA for the first five years. If this requirement is maintained, power revenues would be substantially lower than if power was sold to private utilities. This case compares the government-financed option, assuming power sales to TVA, with the BRC plan, assuming sales to other utilities. It is assumed that the power is sold to TVA at cost—that is, the net cash inflow over the first five years is zero. After five years, net income from power sales is assumed to revert to the $110 million per year level. For this analysis the reduction in power sales is applied only to the government-financed case; in the private plan, net income is assumed to remain $110 million for all years. By sharply reducing federal receipts under the government-financed plan, this assumption would significantly increase the attractiveness of the private plan, to the extent that its long-term cost to the government would be $59 million less than the cost of the government-financed plan. However, just as the Congress, under the BRC plan, could terminate the obligation to sell CRBRP power to TVA, it could presumably take the same action under government financing.

(6) Reduced Power Sales.—This case combines the five-year TVA assumption from case (5) above with an assumption of reduced power sales under the private plan in the first five years. In this case, it is assumed that private power sales are only 75 percent of $110 million (or $82.5 million) in the first five years. This could occur if the plant operated at a low capacity or prices were lower than anticipated. In this case, the government would have to appropriate $27.5 million per year in order to cover the repayments of the private bonds. Compared to case (5), the assumption of reduced private power sales increases the cost of the BRC plan because of this appropriation. If all other base case assumptions are held constant, the difference in discounted present value between the two financing alternatives is only $17 million.

The results from these sensitivity cases are summarized in Table 3. Both the government's discounted present value and the equity holders' rate of return are presented for each case. The differential cost to the government of the two financing alternatives is also shown. In all but one case, the cost of the BRC plan exceeds that of the

ment of net sales income less than $110 million is identical in both cases. Because the government is assumed to retain 100 percent of the revenues in exesss of $110 million, the marginal revenue from an increase in sales is the same for both cases. Because of this symmetry, the difference in net costs of the two plans does not vary if net power income differs from the assumed $110 million.

[9] These estimates do not include changes in interest on the public debt that would result from the two alternatives. Such interest costs are reflected in the present value analysis discussed in the following section.

[10] The pretax interest rate is assumed to be 9 percent. Bondholders are in a marginal tax bracket of 25 percent, which results in an assumed after-tax interest rate of 6.75 percent.

[11] This is essentially the same conclusion reached by the General Accounting Office in its "Analysis of Studies on Alternative Financing for the Clinch River Breeder Reactor" (GAO/RCED-83-151), May 12, 1983.

[12] Capitalized interest payments are also allowed the investment tax credit when they are incurred.

[13] If the general level of interest rates varies from those assumed in the BRC plan, both the returns required by the investors and the appropriate discount rate would change. Such variations would not significantly affect the results of the analysis.

government-financed option. Only case (5) has the opposite result, and that requires an assumption that power would be sold to TVA for the first five years, at below-market rates, only under the government-financed plan. Thus, if the Congress chooses to sell electrical power at below the private market price, the public plan may be the more costly alternative. On the other hand, if the Congress decides to sell the CRBRP power at private market prices, the public plan will be the less costly alternative. In sum, as long as the CRBRP power is sold at the same price under either the private or the public plan, the private plan will be the more costly alternative. The relative discounted cost of the private plan as against the public plan ranges from $117 million to $248 million under the alternative cases shown here.

It should be noted that the assumption that all residual revenues from the project accrue to the federal government minimizes the cost of the private plan. If a share of the annual net income (over the $110 million needed to pay off the bonds) was dedicated to the equity holders, the comparative cost of the private plan would be greater than shown in each of the cases. Therefore, depending on the revenue sharing agreement, the net cost to the government of the private plan could be higher than indicated here.

Finally, if annual net income from power sales fell below $110 million, the costs of both the plans would rise by the same amount, because the government would bear the cost in either event. Thus, the relative costs of the two alternatives do not change if power income is less than $110 million a year.[14]

TABLE 3.—SENSITIVITY ANALYSIS OF THE COST OF THE CRBRP

[In millions of dollars]

Case [1]	Discounted present value			Equity holders' after-tax rate of return
	Government financed plan	BRC plan	Difference [2]	
(1) 10-yr depreciation	−1,105	−1,329	224	33.5
(2) Capitalized Construction interest	−1,105	−1,341	236	27.2
(3) 7.5-percent government discount rate	−1,184	−1,352	168	36.8
(4) Joint assumptions 1, 2, and 3	−1,184	−1,302	117	22.5
(5) 5-yr sales to TVA	−1,413	−1,353	−59	36.8
(6) Reduced power sales and 5-yr sales to TVA	−1,413	−1,430	17	36.8
Initial base case	−1,105	−1,353	248	36.8

[1] For further explanation of the cases see text.
[2] The difference represents the comparative discounted cost of the private plan versus government financing. A positive difference indicated the private plan costs more than the public plan, and vice versa.●

ORDERS FOR WEDNESDAY

Mr. STEVENS. Mr. President, let me try to see if we have a unanimous-consent agreement.

ORDER FOR RECESS UNTIL TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent, that when the Senate completes its business today, it stand in recess until tomorrow at noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that following the recognition of the two leaders, under the standing order, the following Senators be recognized for not to exceed 15 minutes each with special orders, Senators BAUCUS and EAGLETON.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE BUSINESS TOMORROW

Mr. STEVENS. Mr. President, I further ask unanimous consent that following the special orders that there be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m. during which Senators may speak therein for not to exceed 2 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION OF H.R. 3363 AND TIME LIMITATION AGREEMENT

Mr. STEVENS. Mr. President, I then ask unanimous consent that at 1 p.m. the Senate resume consideration of a pending business with the Domenici amendment being the pending business under a time limitation of 1½ hours to be equally divided between the Senator from New Mexico (Mr. DOMENICI) and the Senator from Montana (Mr. MELCHER) or their designees.

Further, I ask unanimous consent that following the debate on the Domenici amendment there be a colloquy between the Senator from Oregon (Mr. HATFIELD) and the Senator from Ohio (Mr. METZENBAUM).

Mr. President, I ask unanimous consent that no further amendments be in order with the exception of an amendment to be offered by the Senator from Oklahoma (Mr. NICKLES) on the subject of National Park Service funding and three amendments to be offered by the Senator from Ohio (Mr. METZENBAUM) with respect to timber sales, and that including the pending amendment of the Senator from New Mexico (Mr. DOMENICI) that there be no further amendments in order to this bill other than those I just recited.

Mr. BYRD. Mr. President, reserving the right to object, did the Senator include a provision that has to do with the Metzenbaum colloquy?

Mr. STEVENS. Is it the Senator's understanding that he wishes to have a colloquy with Senator HATFIELD first and following that colloquy determine which, if any, or all three amendments he mentioned will be offered?

Mr. METZENBAUM. Mr. President, I appreciate the consideration of both the acting majority leader and minority leader protecting my interests, but what I actually am intending is to call up one of my amendments, debate that amendment, and then it is my understanding that the Senator from Oregon will respond in such a manner that it may be possible for me to take down that amendment.

Absent that, I would go forward with that amendment and possibly with two others as well.

I am inclined to believe that that procedure would be permissible under the terms that were stated by the acting majority leader, but I wish to make it clear that the colloquy is really more a part of the debate in connection with the amendment that I will call up.

Mr. STEVENS. Mr. President, it would be my suggestion that I delete the reference to the colloquy between the Senator from Oregon and the Senator from Ohio and merely leave in the agreement that the Senator from Ohio has the right to offer up to three amendments dealing with the subject mentioned of timber sales and that there is no time limitation on the Senator from Ohio. There is no time limitation on the Senator from Oklahoma, nor is there a time limitation on the bill itself under this request. But no further amendments would be in order other than those that have been specifically mentioned to be offered by the Senator mentioned.

Mr. BYRD. Mr. President, reserving the right to object, I have no objection.

Mr. STEVENS. I thank my friend.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I am pleased with that result. That is I think the best we could achieve this evening.

It would be the intention of the leadership to state with the consent of the managers of the bill that there be no further consideration of this bill this evening and that there will be no further rollcall votes tonight.

Mr. President, I do state again it is the intention of the leadership to call up the revenue-sharing bill tomorrow following the disposition of the pending bill, the Interior appropriations bill.

As this Senator interprets that time agreement, it looks long, but as a matter of actual development and prediction it would be my feeling that there will be a vote at approximately 2:30 p.m. on the Domenici amendment and following that, there will be this consideration of the Metzenbaum amendment and then the Nickles amendment following that. I do not think it will take too much time.

We would intend to be on the revenue-sharing bill early tomorrow afternoon.

Mr. President, may I ask if there is any further business to come before the Senate?

[14] Again, this assumes that the actual power sales would be the same in both alternatives, even though the amount would be less than $110 million a year.

RECESS UNTIL TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move that the Senate stand in recess until the hour of 12 noon tomorrow.

The motion was agreed to, and the Senate at 7:48 p.m., recessed until Wednesday, September 21, 1983, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate September 20, 1983:

DEPARTMENT OF STATE

Terence A. Todman, of the Virgin Islands, a career member of the Senior Foreign Service, class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Denmark.

THE JUDICIARY

Thomas J. Curran, of Wisconsin, to be U.S. district judge for the eastern district of Wisconsin vice Myron L. Gorden, retired.

DEPARTMENT OF TRANSPORTATION

Diane K. Steed, of the District of Columbia, to be Administrator of the National Highway Traffic Safety Administration, vice Raymond A. Peck, Jr., resigned.

ENVIRONMENTAL PROTECTION AGENCY

A. James Barnes, of the District of Columbia, to be an Assistant Administrator of the Environmental Protection Agency (new position—Public Law 98–80 of August 23, 1983).

Josephine S. Cooper, of Virginia, to be an Assistant Administrator of the Environmental Protection Agency (new position—Public Law 98–80 of August 23, 1983).

John C. Martin, of Virginia, to be Inspector General, Environmental Protection Agency, vice Matthew Norman Novick, resigned.

DEPARTMENT ON EDUCATION

Louis Roman DiSabato, of Texas, to be a member of the National Museum Services Board for a term expiring December 6, 1987, vice Lloyd Hezekiah, term expired.

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall the officers be appointed in the grade higher than that indicated.

LINE OF THE AIR FORCE

To be captain

Philip N. Brown, xxx-xx-xxxx
Roger A. Hildebrandt, xxx-xx-xxxx
Sal A. Leone, xxx-xx-xxxx

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force under the provisions of section 531, title 10, United States Code, with grade and date of rank to be determined by the Secretary of the Air Force provided that in no case shall the officer be appointed in a grade higher than that indicated.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 20, 1983:

Department of Justice

James B. Roche III, of Massachusetts, to be U.S. Marshal for the district of Massachusetts for the term of 4 years.

Thomas C. Rapone, of Pennsylvania, to be U.S. Marshal for the eastern district of Pennsylvania for the term of 4 years.

The Judiciary

Kenneth W. Starr, of Virginia, to be U.S. circuit judge for the District of Columbia circuit.

John F. Keenan, of New York, to be U.S. district judge for the southern district of New York.

John P. Vukasin, Jr., of California, to be U.S. district judge for the northern district of California.

Foreign Service

Foreign Service nominations beginning James E. Sarn, and ending John F. Cannon, which nominations were received by the Senate and appeared in the Congressional Record on July 25, 1983.

EXTENSIONS OF REMARKS

ARMS RACE RESOLUTION

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. EDGAR. Mr. Speaker, this past week I received—as did all my congressional colleages—a most powerful and compelling resolution on the many dimensions of the arms race. It comes from the general assembly of the Presbyterian Church U.S.A. The assembly is the highest governing body of the church which has a membership of over 3 million. It is a representative judicatory composed of an equal number of ministers and lay officers—known as elders—elected by the 195 presbyteries of the denomination.

What I found compelling in the resolution was not only the support for a nuclear freeze but the thoughful and responsible manner by which the assembly dealt with the many aspects and dimensions of the worldwide arms race. It calls for renewed efforts toward a Comprehensive Test Ban Treaty. It urges the Government not to deploy new missile systems in Europe. It addresses other dimensions of the arms race: The growing international arms trade and the increased levels of violence that are the result of that trade; the distorted national priorities that are reflected in the energies of our scientists devoted to military research and development; and the growing emphasis on military use of space. It not only spotlights these areas of concerns but suggests several innovative solutions to reverse these dangerous trends.

I urge all Members to give careful consideration to the following resolution.

THE ARMS RACE: CONTINUING DYNAMICS

Approved by the 195th General Assembly (1983), Presbyterian Church (U.S.A.), June 1983

STATEMENT OF CONCERN

We are Christ's people. We live by faith in the God who is the source of life, the Lord of all nations and peoples, the judge of history and the giver of grace experienced by us as Shalom—peace. In responding to God's grace, the church seeks to bear witness to Christ, the Prince of Peace, by nourishing the moral life of the nation for the sake of peace. The times call for a faithful and obedient people. We are called to be faithful stewards of God in the created order. We are called to be reconcilers in a world divided by historic, political, ideological, racial, and cultural barriers. We are called to work for justice in a world where the patterns of violence and human depravity are often more visible than signs of hope. We are called to see beyond our own limited horizons, to view the world through the eyes of Christ.

When, as Christ's people, we see the burden of the arms race on the creation, on nations, and on all peoples, we are compelled to renew our commitment to achieving disarmament in ways that will guarantee the peace, security, and integrity of all peoples.

Numerous aspects of the arms race, with far-reaching implications for our own society and the whole world, challenge us in this witness. There are factors that disturb the stability of societies, that alter the physical environments in which we live, that deplete limited economic and natural resources, that heighten the risks and broaden the parameters of potential conflict.

The church in its witness must help to nurture change in public attitudes, raise public consciousness about the issues, and examine the values that shape the decision-making forces in our society. To this end the United Presbyterian Church addresses several of these matters as it renews its commitment to witness for peace.

THE DYNAMICS

A. Nuclear Armaments

The primary global threat comes from the escalating and accelerating nuclear arms race and has been addressed by the church on numerous occasions. Despite the attention given the nuclear arms race at the United Nations Special Session on Disarmament (1982), the professed commitment of the United States administration to reach meaningful arms agreements involving substantial reductions in nuclear strategic and theatre weapons, and the ongoing multilateral and bilateral negotiations in Geneva, the evidence is clear that the nuclear arms race will be with us for at least another decade. Clear actions that would give some sign of hope are avoided. The administration opposes an immediate bilateral nuclear freeze and refuses to press for the ratification of Salt II. It has discontinued negotiations on a comprehensive test ban treaty and is pursuing plans that will mean abandoning the Antiballistic Missile Treaty. At the same time that Congress has moved toward the endorsement of a nuclear freeze, it has also approved the financing and development of major weapons systems: the MX Missile, the B-1 Bomber, the Cruise missile, and the Trident submarine. At the same time the Soviet Union has announced plans of their own for matching United States advances.

B. The Arms Trade

While the whole world teeters on the brink of nuclear disaster, various parts of the world have been undergoing their own catastrophes. Local, regional, and civil wars have claimed 25,000,000 lives since World War II. These wars are often fought with weapons supplied by the industrial powers—from both the East and the West. In countless situations the militarization of developing countries is accompanied by extreme repression of the peoples in those countries by their own governments.

Recent studies reveal that during the period from 1978 to 1982 conventional arms transfer agreements between developing countries and the arms suppliers have totaled $120 billion. The non-Communist world has accounted for $76 billion of this total, the Communist world $44 billion. The Soviet Union has sold $33 billion and the United States, $30 billion. While sales and agreements vary from year to year, the trend has been ever upward. Each superpower has its preferred clients, depending on its ideological and strategic interest.

For the merchants the arms trade has the deceptively easy appearance of being "good business" because the focus is on the immediate realization of high profits, not on the long-range impact of the arms race on society. Costs (research, development, tooling, etc.) are distributed over a greater quantity when weapons are produced for export and not just for domestic use, thereby reducing the costs per item. This consitutes an advantage particularly beneficial to the initiator of new weapons.

For the selling country, arms sales can be a source of hard currency or a way of redressing balance of payment deficits. Sales also tend to fix seller-buyer relations because they inevitably involve further training, service, and parts agreements.

Buyers often presume they are enhancing the security of their countries because they are conditioned to think of security in military terms. They also tend to assume that modern armaments facilitate the economic modernization of their societies. More freqently, insecurity and economic dislocation occur because expenditures on arms imports can only weaken the domestic economy.

C. Military Research and Development

The relationship between the arms race and technological imperatives has long been debated. Technocrats often argue simply from the logic of development: If new technology makes a new weapon possible, that weapon is then seen as necessary and should be produced. Others argue that weapons technology development always proceeds from the political decision-makers. These arguments do not obscure the obvious.

1. Military research and development are estimated to consume one fourth of the entire world expenditure for research and development for all purposes—in excess of $35 billion in 1980. They further occupy the talents and energies of over 3 million of the world's scientists and engineers. In the United States this represents 40 percent of our scientific resources.

2. Military research and development increase the sophistication of weapons systems. In addition to the refinement of nuclear systems with enhanced accuracy and faster delivery times, the superpowers are working on weapons utilizing high energy sources, e.g., lasers and particle beams. Chemical and biological weapons, mostly developed in secret, represent unknown destructive potentials. Antipersonnel weapons, e.g., cluster and combustion bombs, seem only to become more diabolical as our inventiveness progresses.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

11-059 O-87-22 (Pt. 18)

3. Military research and development moneys reflect diversion of resources from purposes that could be more constructive and beneficial for the whole human family. The consequences are numerous and profound: In the Third World such a diversion can severely inhibit economic development. For the United States, caught in economic stagnation with slow economic growth, the economic diversion restricts development in the consumer and production sectors of our society.

Militarily, the technological race stimulates the general arms race because it fosters a continuing cycle of competitive development, duplication, and counterdevelopment among the different national contestants. As a consequence, the pattern further depersonalizes the decision-making process, as technology forces us into an ever-increasing reliance on the computer and on other automated responses. We are moving toward a "launch on warning" stage in the nuclear arms race. This dehumanizes people by treating them as expendable or as if they were machines. Both weapons of mass destruction and antipersonnel weapons (e.g., plastic fragmentation bombs resulting in splinters that cannot be detected in the human body), reflect a disregard for human life and an alienation from responsibility for the victims.

D. The Space Race

After several decades of primarily peaceful exploration of space where the military uses of space developments have been essentially passive in nature, i.e, related to intelligence gathering, monitoring, and communications, the United States Government has announced a new space policy emphasizing military operations. Its plans call for increased spending on military operations in space. For example, the military space budget in 1982 ($6.2 billion) surpassed that of NASA for the first time. The Air Force has also created a new space command, and space shuttle operations may increasingly become military in purpose. Finally, the temptation to place military attack and defense systems in orbit will be great whether these involve antisatellite weapons, nuclear orbital-bombing systems, or laser and particle-beam weapons.

We are on the verge of a new, dangerous, and destabilizing space war race and are therefore faced with a new challenge: Can we stop the race before it begins? We know that ending it, after it has begun, will be next to impossible. The 1967 Outer Space Treaty, ratified by both the United States and the Soviet Union, is known to be inadequate to stop a "space wars" scenario because it does not cover new and emerging technologies. Talks with the Soviet Union on this issue have been suspended since 1979 and as yet no current forum exists for controlling or preventing this next expansion of the arms race.

CONCLUSION

All of these developments in the arms race foster the militarization of American society, weakening the very democratic fabric of our society. Evidences of this should be clear: The requirements of military secrecy in all areas limit the right of the people to know and, thus, to form educated opinions. This denies them the ability to participate adequately in the democratic process either directly or through their representatives. This is also reaffirmed by the courts, which essentially say that the people have no standing to gain access to military information, to challenge the political decisions of the administration, or even to enjoin the government to adhere to the law on the grounds that the court cannot make political determinations or rule on the foreign policy powers of the President.

Further, the decision-making exigencies of strategic nuclear war often foreclose even congressional participation as constitutionally required in matters related to war.

The military-industrial orientation of our economy, with its heavy social costs, weakens the social structures designed to provide for the general welfare. The military "necessities" take priority over civilian need—particularly when congresspersons are so susceptible to pressures from the military-industrial complex.

Militarism is difficult to sustain in a normally open and democratic society. Therefore, it appears that a climate of fear and distrust is systematically cultivated in order to justify the economic burden. A democratic society cannot long survive without full participation by its constituents, reasonable patterns of accountability, and essential levels of trust.

RESOLUTION

Whereas the Confession of 1967 reminds us that "God's redeeming work in Jesus Christ embraces the whole of man's life: social and cultural, economic and political, scientific and technological, individual and corporate"; and makes clear that "God's reconciliation in Jesus Christ is the ground of the peace, justice, and freedom among nations which all powers of government are called to serve and defend"; and that "reconciliation among nations becomes peculiarly urgent as countries develop nuclear, chemical, and biological weapons, diverting their manpower and resources from constructive uses and risking the annihilation of mankind" (The Constitution of The United Presbyterian Church in the United States of America, Part I, Confession of 1967, Part II, Section A, 4, b; Part III (9.45 and 9.53); and

Whereas Peacemaking: The Believers' Calling reminds us that the church bears witness to Christ when it nourishes the moral life of the nation for the sake of peace in the world; and

Whereas the arms race continues unabated, with its many facets shaping our futures: a continuous buildup in nuclear weaponry and delivery systems at the expense of domestic programs; a burgeoning international arms trade involving the most sophisticated of weapons, with increasing and crippling costs to developing countries; an evermore consuming preoccupation of the scientific and engineering community with specifically military research and development at the expense of humanitarian goals; a conscious shifting of the arms race into space, which was previously reserved for peaceful development; and

Whereas the consequences of these developments appear to be an ever-increasing threat to the democratic values and structures of our society, as well as an ever-growing threat to the peace of the world;

Therefore, the 195th General Assembly (1983) of the United Presbyterian Church in the United States of America, believing that a just peace requires the rejection of militarism as the basis for security and as the organizing force for social order and the rejection of war as an instrument for obtaining national goals, renews its call for an end to the arms race in all of its dimensions.

In so doing, the 195th General Assembly (1983):

1. Renews its efforts to seek an end to the nuclear arms race by:

a. Reaffirming its endorsement of a bilateral verifiable freeze on the testing, production, and deployment of nuclear weapons, missiles, and new aircraft designed primarily to deliver such weapons;

b. Commending those synods, presbyteries, and congregations that have endorsed the Bilateral Nuclear Weapons Freeze and encouraging other governing bodies and congregations to consider prayerfully endorsing and taking additional supporting actions;

c. Calling upon the administration to resume negotiations on a Comprehensive Test Ban Treaty, to take the place of the existing Limited Test Ban Treaty;

d. Calling upon our government in the absence of a Bilateral freeze to initiate a suspension of nuclear testing for a specific time period, thereby offering a challenge to the Soviets to a reciprocal suspension, while negotiations on a Comprehensive Test Ban Treaty are under way;

e. Calling upon the government of the United States not to deploy the first strike Pershing and Cruise missiles in Europe. Any such deployment would escalate the arms race, would be destabilizing, would continue to heighten international tensions, and would be inconsistent with our endorsement of an immediate halt to the arms race;

f. Calling on Congress to place a moratorium on new nuclear weapons development pending the outcome of the START talks in Geneva.

2. Urges the government to work toward the reduction of the international trade and transfer of arms by

a. Placing a strict limit to the global exportation of arms from both public and private sources, pledging not to introduce new arms technologies into regions previously without them.

b. Resuming negotiations on conventional arms transfer agreements with the Soviet Union and initiating them with other supplier countries.

c. Prohibiting "coproduction" and "licensing" agreements with Third World countries for the manufacture of arms.

d. Coupling restrictions on arms transfers to Third World countries with economic development incentives to those countries restricting the arms flow.

3. Urges the government to work toward the reallocation of resources and personnel engaged in military research and development, both public and private:

a. By reordering its own budgetary priorities, shifting from military research and development to research and development related to energy, environmental, health, and agricultural concerns.

b. By planning for conversion on a national level from military production to consumer and capital growth needs, and assisting local communities and industry in similar planning.

4. Recommends that each presbytery peacemaking network undertake out of a concern for persons and their jobs an examination of the conversion issue as it relates to the specific community, involving civic, corporate, labor, and religious leaders.

5. Calls upon the administration to sign and the Congress to ratify the United Nations Convention on Inhumane Weapons and Its Protocols.

6. Calls upon the government to reverse the trend toward the militarization of space by

a. Resuming the negotiations on the antisatellite treaty and expanding negotiations with the Soviet Union and other countries to prohibit any introduction into space of military hardware other than passive technology.

b. Prohibiting the use of the space shuttle for military operations other than passive in nature.

7. Calls upon Presbyterians to study the multiple issues related to the arms race and to remain active in their public witness for the sake of peace in our world.

8. Directs the Co-Stated Clerks to convey these concerns to the President of the United States, the Secretary of State, and the members of Congress.

9. Further, the 195th General Assembly (1983) requests the theological institutions of the Presbyterian Church (U.S.A.) and the Presbyterian College Union (or its successor) to report to the 196th General Assembly (1984) of the Presbyterian Church (U.S.A.) their consideration of the United Presbyterian Church's military-related investments guidelines.●

ORDINATION OF BISHOP PATAKI IN SCRANTON, PA.

HON. FRANK HARRISON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. HARRISON. Mr. Speaker, on Tuesday, August 23, the people of the diocese of Passaic, N.J., and, indeed, all of the people of God rejoiced in the Episcopal ordination of the Most Reverend Andrew Pataki. Bishop Pataki was born in Palmerton, Pa., on August 10, 1927, the son of the late Ignatius Pataki, Sr., and Sophie Dejak. Following graduation from Central Catholic High School in Allentown, Pa., he enrolled in St. Vincent's College at Latrobe. In 1944, he began studies for the priesthood and entered St. Procopius College-Seminary, Lisle, Ill., from which institution he was graduated in 1948. He completed theological studies at the Byzantine Catholic Seminary of SS. Cyril and Methodius, Pittsburgh, and was ordained to the priesthood in the Seminary Chapel by the Most Reverend Daniel Evancho, Exarch of Pittsburgh, on February 24, 1952.

Following extensive pastoral work, the then Father Pataki was assigned to pursue graduate studies in canon law at the Pontifical Institute for Oriental Studies in Rome. He subsequently received both a bachelor and a licentiate degree in canon law from the Gregorian University in Rome.

He was appointed by His Holiness Pope Paul VI as a consultor on the Pontificial Commission for the Revision of the Eastern Code of Canon Law, a project which consumed 5 years, from 1973 to 1978. During that time, on December 21, 1974, he was elevated to the rank of prelate of honor by His Holiness Pope Paul VI.

It is thus after a distinguished career, as a pastor and canon lawyer, that then Monsignor Pataki was designated by His Holiness Pope John Paul II, as a bishop of the titular see of Telmisso and named auxiliary to the Most Reverend Michael J. Dudick of the Byzantine Catholic Diocese of Passaic on June 14, 1983.

On August 23, the papal mandate was fulfilled with the Episcopal ordination of Bishop Andrew Pataki, J.C.L., in St. Peter's Cathedral, Scranton, Pa.

It is a privilege and an honor for me, Mr. Speaker, to take these few minutes to bring this happy and momentous occasion to the attention of my friends and colleagues in the House and to wish Bishop Andrew Pataki many, many years of joyous and dedicated service to God and man.●

FOUR AREA LEADERS HONORED BY CHRISTIANS AND JEWS

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. FLIPPO. Mr. Speaker, I want to make special note today of four outstanding leaders from my district who were recently honored by the National Conference of Christians and Jews for their outstanding contributions to brotherhood.

Receiving the organization's national "Brotherhood Award" were Maynard Layman, assistant to the publisher of the Decatur Daily; William H. Mitchell, president of the First National Bank of Florence; Leroy A. Simms, editor and publisher of the Huntsville Times; and Frank S. Wyle of Los Angeles, chairman of the board of Wyle Laboratories.

One could fill 100 CONGRESSIONAL RECORDS with the accomplishments and honors received by this distinguished group. If a hall of fame for civic service is ever established for my direct, these four distinguished Americans will certainly be charter members.

However, knowing these men as I do, there is no doubt in my mind that for every public honor and recognition they receive, there are countless thousands of good deeds they do daily for their fellow men which go unreported. That is the way they would want it, because that is the kind of men they are. They seem to have the attitude that if anyone finds out about their good deeds, they do not count.

As long as I can remember, these men have been at the forefront of my district, promoting brotherhood, understanding, justice, and equality. Unfortunately, I was not blessed with knowing Mr. Wyle as well as the others.

A wise man once said, "The more one gives to others, the more he has for his own." All of these gentlemen are associated with thriving businesses.

I shall not attempt to repeat all of the accomplishments of these men. No mere mortal could do that. Rather, I insert an article from the Huntsville Times by Karen Middleton that sums up some of the highlights of their illustrious lives:

The article follows:

[From the Huntsville Times, Sept. 14, 1983]

FOUR AREA LEADERS HONORED BY NATIONAL ORGANIZATION

(By Karen Middleton)

Four area and national leaders were honored here Tuesday evening by the National Conference of Christians and Jews for their "outstanding contributions to brotherhood."

Receiving the organization's "Brotherhood Award" at its annual North Alabama awards dinner were Maynard Layman, assistant to the publisher of the Decatur Daily; William H. Mitchell, president of the First National Bank of Florence; Leroy A. Simms, editor and publisher of the Huntsville Times, and Frank S. Wyle of Los Angeles, chairman of the board of Wyle Laboratories.

Layman served as a cotton adviser to the secretaries of agriculture in both the Kennedy and Johnson administrations and he was instrumental in cash markets for farm produce, thereby helping to relieve poverty in Alabama. In accepting his award Layman said, "Few have known the strong help of hands that I have known. . . . My heart is filled and happy and grateful."

Mitchell is past president of the Alabama Bankers Association, was chairman of the industrial expansion committee in Florence and has been active in the United Way. Well known for his family's advocacy of interfaith unity in the Florence community, Mitchell said, "I accept this award with humility and gratitude to both our family and friends from whom we happily inherited the tradition of brotherhood so beautifully espoused by this organization."

Simms, whose career in journalism began in the 1920s, joined *The Huntsville Times* as editor in 1961. In the award presentation, he was cited by *Decatur Daily* Publisher Barrett Shelton for having guided the paper to journalistic excellence; for serving as a member of a three-man committee that worked quietly in the 1960s in Huntsville to preserve racial harmony and assure opportunities for employment, education and housing for all citizens; for his work with United Way, and for serving as a prime supporter and fund-raiser for the University of Alabama in Huntsville. Simms said in accepting his award, "This is the greatest night of my life."

Wyle, who was introduced by Patrick W. Richardson, founded Wyle Laboratories in 1949. Richardson said the contributions of the Huntsville operations of Wyle's company to the community and UAH were a significant factor in the city's development as a technical and scientific center. Wyle, who said he was "deeply honored to accept this award," was also cited for his lifelong record of ethical and equitable business practices and for helping to establish a major museum of folk arts and crafts in Los Angeles.

W. F. Sanders Jr. presided at the awards dinner.●

CAMP SPRINGS COMMUNITY GARDEN PROJECT

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mrs. HOLT. Mr. Speaker, as we approach the harvest season, I would like to give credit to the Camp Springs United Presbyterian Church, its members and volunteers, who for the past 5 years have sponsored a program, under the chairmanship of Mr. Calvin Ditrick, which is worth of emulation—the Camp Springs Community Garden Project.

Under the project, people with home gardens donate excess produce to the church. Some of these vegetables and fruits are sold at a produce stand by volunteers. A part of the proceeds of the sales is given to needy families to assist them in starting and maintaining their own gardens. The remainder of the money is distributed to three charitable agencies at the local level. The produce which is reserved from sale is distributed to families identified by clergymen in the community. I want to recognize Mr. Ditrick and his volunteers for this practical approach to helping their fellow man with what could have become wasted surplus food.●

LOCAL 428 CELEBRATES 50TH ANNIVERSARY

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. EDWARDS of California. Mr. Speaker, together with Congressman NORM MINETA, I am pleased to bring to the attention of my colleagues the 50th anniversary of local 428 of the United Food & Commercial Workers Union. This fine labor organization's history is entwined with the history and development of Santa Clara County.

Local 428 was originally established as the Retail Clerks Union in 1910, but was wiped out in the 1920's. In the 1930's a group of sales workers again began to organize and the Retail Store Employees Union, Local 428 was rechartered on October 27, 1933. The union's early activities centered around the struggle to secure the 8-hour day for retail salespersons. Once this goal was achieved, local 428's leadership turned to the problems of working conditions and wages. In the 1950's the union helped to pioneer the first employer paid health and pension plans in the industry. As a result of the merger of the Butcher & Retail Clerks International Unions, local 428 was renamed the United Food & Commerical Workers and has grown to be the largest union in Santa Clara County, representing nearly 8,500 workers.

Local 428's history is one of service to our community. They identify a need, organize, and mobilize their membership to deal with the community problem. For instance, housing for our senior citizens has for many years been a very real problem in Santa Clara Valley. Local 428 sponsored and developed Casa del Pueblo, a 165-unit housing complex for low-income senior citizens. The United Food & Commercial Workers Union was one of the first labor organizations in the United States to be involved in this type of worthy project.

Congressman MINETA and I salute local 428 for its devotion to community service and involvement. A list of the truly outstanding leaders of the local over the years is a sample of the illustrious history of the labor movement in Santa Clara County—Jim McLaughlin, Dave Reiser, and George Soares. Local 428 is to be congratulated on their 50 years of growth and their contributions to all of our citizens.●

U-PICK-IT VEGETABLE FARM

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. RICHARDSON. Mr. Speaker, it is during these times of high unemployment that all of us must use some ingenuity in creating new job opportunities. I believe the Sandia Pueblo Indians in my congressional district have done just that with the formation of their U-pick-it vegetable farm.

This new employment opportunity is starting out small but has the potential to strengthen the local economy by creating new jobs in the area; while offering neighbors the chance to buy fresh, low-cost vegetables.

Mr. Speaker, I hope my colleagues will take the time to read the following editorial and article about this project that recently appeared in the Albuquerque Journal, a daily newspaper in my district:

SANDIA PUEBLO PLANS TO ENTER PRODUCE BUSINESS

(By Talli Nauman)

Sandia Pueblo officials will open construction bids this afternoon for a new retail vegetable market that will compete with other Albuquerque farm-produce outlets.

The store, Sandia U-Pick-It, is scheduled to open next month, according to Fred Baca, grants coordinator for the project. The market will offer chili, corn, squash, watermelon, tomatoes and a variety of other vegetables—all grown on 20 acres the pueblo began cultivating this year.

Customers will have the option of picking their own vegetables, if they want, to get them at reduced prices.

The store will be about a mile south of Bernalillo on the west side of U.S. 85 in the midst of the pueblo cropland.

Eventually Sandia hopes to enter the wholesale vegetable market and supply Albuquerque stores with fresh produce. Next year, the pueblo plans to expand its farming operation to 50 acres. "There's a lot of potential to go bigger," Baca said.

Eris Wenk, operator of Wenk Farm, an 80-acre South Valley vegetable market, is not disturbed at the prospect of new competition.

"There's a lot of room for competition in the vegetable business. There's not that many people who are willing to put in the seven days a week it takes to do it," he said. "I'm happy to see they want to do that kind of stuff."

To date, the Wenk Farm and a Corrales vegetable farm run by Gus Wagner have been the only major retail outlets for fresh garden produce, and neither one offers a you-pick option.

"There's a big demand for fresh vegetables," Wenk said, "but there's a limit to what one farmer can do. I think it'd be real good for the whole community to have more people do that."

Baca declined to release the dollar value of the investment which the pueblo and the federal Housing and Urban Development Administration have made in the pueblo project, conceived a year ago. It now employs eight people.

The farm is a row-crop operation, drawing irrigation waters from a well and the Middle Rio Grande Conservancy District irrigation system. Farm workers are using tractors, a cultivator and a transplanter to till their fields, Baca said.

The pueblo had hoped to open its store this month, but a late frost in May delayed the expected harvest.

The Housing and Urban Development Administration must approve the lowest bid on the construction before the pueblo can sign a contract with the bidder, but Baca said he is hopeful that the contract will be signed by the end of the week.

INDIAN FARM ENTERPRISE

The men of Francisco Vasquez de Coronado's expendition into New Mexico in 1540 spent a winter at a pueblo not far from the present lands of Sandia Pueblo, and undoubtedly borrowed, begged, bought or stole more than a few ears of corn and squash gourds from the friendly local inhabitants.

Pueblo Indians were farmers when the first Europeans arrived, and farming has continued at Sandia Pueblo to the present.

Now, in 1983, the farmers of Sandia Pueblo are making a move to get into the business of providing foodstuffs to non-Indians in a big way, with the building of a farmers' market outlet on pueblo lands just south of Bernalillo.

It appears to be a logical business endeavor for a small pueblo which for years has sought out economic activities that could bring employment to its people within the bounds of the tribal lands.

If the tribe's ambitious marketing plans are successful, Sandia Pueblo farming could become a major employer on the reservation.

And garden-fresh produce from just north of Albuquerque would indeed be fresher than that trucked from Arizona, California, or Mexico.

Other fresh vegetable farmers in the Middle Rio Grande Valley say they welcome

the pueblo's entry into the field, saying there's demand enough for all.

We hope and expect they're right. And the benefits extend beyond the dinner table.

Any economic activity that turns dollars around in the immediate area instead of sending them out of state helps build the strength of the local economy.

Sandia Pueblo's vegetable market could help do just that.●

MAKE LEBANON STAY INDEFINITE

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. LEWIS of Florida. Mr. Speaker, it is important that we make it crystal clear to all nations of the United States' resolve in Lebanon since it appears inevitable that the decision will be made for us to maintain a presence there.

I would prefer the establishment of a multinational peacekeeping force under the auspices of the United States. That, of course, is not practical considering there is little doubt the Soviet Union would veto such a proposal on behalf of its client nations such as Syria.

History tells us that tranquility in Lebanon is nonexistent. The strife and turmoil are fueled daily by countless Moslem and Christian splinter sects and the presence of three armies, two police forces, and a multitude of militias and political parties.

Since that commitment cannot be successful if tied to a capricious timetable, I oppose any established time limit.

No nation in the world should be aware of when we intend to withdraw. That only dilutes the effectiveness of our presence. Furthermore, we should not bind ourselves to time constraints if the purpose of our mission in Lebanon is to keep the peace or to be a forthright symbol of legitimacy for the Lebanese Government.

And while our marines remain in Lebanon, they should have the absolute freedom to defend themselves. Their presence there is not to fight, but if their positions are fired upon, then our marines should use any means to protect and defend their positions and their lives.●

HACIA AL FUTURO (TOWARDS THE FUTURE)

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. LANTOS. Mr. Speaker, the celebration of National Hispanic Heritage Week gives us an opportunity to reflect on the contribution of Hispanics to the United States. We in California are particularly proud of the historic Hispanic presence and conscious of the current role of Hispanics in the present and future development of our State.

As a nation whose strength lies in its ethnic diversity, Hispanic culture has been a vital influence on all aspects of American life. Hispanos, however, are just beginning to assume their rightful role in our political life.

I am proud to represent a sizable yet diverse Hispanic community. The latest report of the Census Bureau indicates that almost 14 percent of the population of my congressional district are of Hispanic origin. This is a group whose leadership is rising to meet the tremendous challenges posed to the growing Hispanic community striving for advances in every phase of its life.

The vast potential of Hispanics is fast becoming reality as Hispanics assume critical roles in many business, educational, and professional fields, as well as in the political arena.

I welcome this development, as well as the growing influence of Hispanics in the political process.

My district has seen the recent addition of another able Hispanic in local politics—Mr. Ruben Abrica was recently elected a member of the city council of the newly-incorporated city of East Palo Alto. Mr. Abrica typifies the long-awaited trend toward the involvement of committed Hispanics who are taking their places as leaders in the American political system.

The impact of increased involvement of Hispanics in our political process cannot be overstated. With a nationwide population estimated at 16 million, of whom 64 percent are under the age of 29, the Hispanics clearly will come to play an increasingly important role in our country's future. I am pleased that we can take this occasion to recognize and honor this vital group.●

GOLAN HEIGHTS AND WEST BANK CRITICAL TO SECURITY

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. RUDD. Mr. Speaker, from a defensive standpoint, the Golan Heights and the West Bank are essential to the security of Israel. Both make up the high grounds that surround the nation and which are so critical to the military strategy of any country. Without them, Israel becomes an easy target for any of its enemies.

Last week, one of my constituents called my attention to an article on the importance of the Golan Heights and the West Bank to Israel that appeared in the Arizona Republic. The article, which was written by the newspaper's publisher, Darrow Tully, was right on target and the author is to be commended.

I urge my colleagues to read the article.

WEST BANK, GOLAN HEIGHTS INDISPENSABLE TO ISRAELI SECURITY

(By Darrow Tully, Publisher, The Arizona Republic)

JERUSALEM.—The most widely accepted military axiom continues to be, "Take the high ground and hold it."

That is precisely what Israel did by occupying the Golan Heights and part of the West Bank.

The Golan Heights and the West Bank share an important common denominator—they're both indispensable to Israel's security.

The Golan was part of the proposed Jewish state under the original 1948 United Nations partition plan. The area constitutes a plateau about 45 miles long rising from 600 feet high in the south to 9,000 feet in the north where it borders Syria, Lebanon and Jordan.

When Israel was established in 1948, the Syrians invaded and occupied the Golan. After the treaty of 1949, Syria agreed to a demilitarized Golan but then refused to enter into peace negotiations with Israel and repeatedly shelled and terrorized Jewish villages beneath the heights.

The area contiguous to the border was one of unceasing military activity culminating in an attempt to divert the waters of the Banias and Hazbani Rivers, principal tributaries of the Jordan River, which flows into the Sea of Galilee and is Israel's main water supply.

On June 5, 1967, Israel launched a preemptive military action against Syria, Jordan and Egypt.

It's difficult for people not familiar with the geography to understand the necessity of a pre-emptive strike. Distances are not comparable to anything in the United States.

Consider for example, Phoenix threatening Tempe as Egypt did Israel on May 17, 1967.

Syria already had proclaimed that "the time has come to enter into the battle of liberation."

Distances are measured in thousands of yards or in terms of eight to 10 miles. Reaction time to a surprise attack is nil.

In an incredible military action, Israeli forces scaled highly fortified positions in inaccessible terrain to secure the Golan.

I stayed in a kibbutz just under the former Syrian gun emplacements, and it is inconceivable that Israel could have taken any other action than it did when it annexed the Golan area in 1981.

No conscientious government could put citizens under those emplacements again. No nation could ask sons and daughters to shed blood twice for that hard-won ground.

The West Bank is a different matter. Whatever absurd political expediencies that led to the original division of Palestine were and still are unworkable.

Only the Israelis actively supported the creation of a Palestinian state by virtue of support of the United Nations partition resolution.

Here again, we have the specter of hostile forces occupying high ground all around Jerusalem.

Israel captured the West Bank from Jordan during the Six-Day War.

The West Bank was seized by Trans-Jordan during the 1948 war of independence. The Israelis claim with some legal justification that Israel liberated the West Bank and has every right to encourage settlers to emigrate there.

Secretary of State George Shultz has acknowledged that "Israeli settlers had a legal right to live in the occupied West Bank of the Jordan River."

Regardless of whether Shultz is right about the legal status of the settlements, they're there to stay.

Don't think of a settlement as a group of cabins or some backward outpost. Many are small cities complete with all the amenities that make life not only bearable, but pleasant.

You can see most of Jerusalem from a couple of these settlements, and only a fool would turn that ground over to a hostile neighbor.

The real problem facing Israel is under what jurisdiction can Palestinians and Israelis live in peace.

I will explore several alternative in subsequent columns and also share interviews with differing Israeli and Palestinian points of view.●

REPRESENTATIVE BYRON BUILDS ON INTERESTS AND EXPERIENCE

HON. G. V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. MONTGOMERY. Mr. Speaker, during the recent work period, three members of the House Armed Services Special Subcommittee on Arms Control, headed by Maryland's Representative BEVERLY B. BYRON, conducted a 10-day swing through Europe and the Mediterranean area to study various aspects of East-West arms negotiations. In observing her responsibility as chairperson of that special subcommittee, Representative BYRON stated:

Arms control cannot be isolated from an effective U.S. deterrent. Deterrence is not just bluff; it is a perceived capability, coupled with an understood commitment to use our retaliatory forces against key elements of Soviet power.

In this regard, her attention to detail has not only gained the respect of her constituents, but also the military.

Mr. Speaker, the Armed Forces Journal includes a regular column titled "Darts & Laurels." In the September 1983 issue of the above publication, in that column, Representative BYRON is given laurels which are well deserved. At this point, I include the column and call this to the attention of my colleagues.

[From the Armed Forces Journal International, September 1983]

DARTS & LAURELS

To Rep. Beverly B. Byron (D-MD), three-term Member of the House Armed Services Committee—for going out of her way to get "hands-on" experience with the military equipment which her Committee authorizes each year.

Byron, for example, has flown over 12 major military aircraft since 1979—including the F-15, F-16, B-52, B-1, A-10, F-111A, AH-64, and the UH-60A.

Byron is also the first woman nonpilot to have flown both the F-18 and the Navy's new Hawk trainer. In recent months, she has taken time (her weekends) to fly the A-6 and the F-14. To do that, Byron had to be checked out in water survival training because both flights were catapult shots off the aircraft carrier USS *Kennedy.*

To Reps. Beverly B. Byron (D-MD) and Nicholas Mavroules (D-MA)—for spending their July 4th holiday visiting with the US 24th Marine Amphibious Unit stationed in Lebanon. And, Marines who were there tell us, both asked intelligent, relevant, and important questions throughout their visit.●

BILINGUAL EDUCATION NEED NOT BE THREATENED BY NEW APPROACHES

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. BIAGGI. Mr. Speaker, I wish to bring to the attention of my colleagues a recent editorial from the New York Times which eloquently states the current debate surrounding our bilingual education programs.

As a member of the House Education and Labor Committee and a supporter of bilingual education, I believe that today's bilingual education programs are often hampered by restrictive methods of teaching children English. As the Times points out, proficiency is not always the goal of these programs. In fact, in 1977, I authored an amendment to the reauthorization of the program which required that teachers be proficient in English. Amazingly, it was revealed at that time that not all teachers could read and write proficiently in the very same language that they were supposed to be teaching their students.

I fear that we have not come very far since that time. We continue to hear the same complaints about bilingual education. We continue to face the same opposition from groups which feel that by allowing greater flexibility in the program—we are somehow turning our backs on children that need English-language instruction.

Nothing could be further from the truth. I remain a supporter of the program and hope that the administration's bill as well as all others in this area will receive close consideration by Congress during the reauthorization of the Bilingual Education Act in 1984.

The article follows:

[From the New York Times, Sept. 13, 1983]

SI QUIERE PROMOVER ENGLISH

The trouble with much "bilingual" education is that it isn't bilingual. Too often it's a program to teach children math, social studies and science in their native language without any genuine effort to help them function in English as soon as possible.

That moving children into English instruction is desirable should be beyond debate. Whatever the transitional value of teaching them in a native language, English is the essential skill for anyone expecting opportunity in the United States. "Bilingual" programs are worthy of Federal subsidy only so long as achievement in English is their true aim.

That is the principle that would be reaffirmed by a bill the Reagan Administration has submitted to Congress. It would let local school systems decide how best to achieve the goal. But it would stop requiring that youngsters be taught in their native tongue.

Such native-language training may or may not be helpful to pupils also busily learning English. The available research is inconclusive. But the proposed law would stop denying Federal aid to districts that choose to immerse them in mostly English studies.

Flexibility in approach was the clear intent of Congress 15 years ago when it passed the Bilingual Education Act to support any "new and imaginative" program for non-English speaking students. Only gradually was the statute bent to require teaching in native languages. The Health, Education and Welfare Department's Office of Civil Rights insisted in 1970 on "special assistance" for non-English speakers. The Supreme Court upheld its guidelines and directed schools to create special programs in foreign languages. In 1975, the civil rights office directed that districts had to develop "bilingual" programs; an all-English program no longer qualified for support.

The bilingual programs have probably been useful in many situations. They are thought to have helped many immigrant children adapt to a new culture at their own pace. They ended the often cruel practice, particularly in the Southwest, of letting Mexican-American students move uncomprehendingly through school, falling far behind because they were learning neither English nor the subject matter in Spanish.

But all too often, bilingual programs pay only lip service to the goal of making students proficient in English. Some teachers in the programs are themselves inadequate in English. Students are often kept in non-English classes longer than necessary. The foreign-language teachers and bilingual managers have developed a vested interest in preserving their enrollments. They often exaggerate the difficulty or damage of rushing youngsters along in English.

A study for the Twentieth Century Fund this year went so far as to urge the Federal Government to stop supporting bilingual education. It argued for "immersion" in English language study and special help in other subjects when needed. Most educators seem to consider that the soundest approach to educating children for life in America.

The virtue of the Administration's bill is that it does not even try to resolve this educational argument. Far from eliminating bilingual programs, as its critics charge, the bill would make proficiency in English a primary requirement for bilingual teachers, refine the requirements for evaluating bilingual programs, and let school districts

decide whether their non-English speakers are best served by "immersion" courses or transitional training in native languages.

For those who honestly hope to promote learning in English, that seems the wisest course.●

LIMITED HEALTH CARE RESOURCES: ETHICAL IMPLICATIONS OF OUR CHOICES

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. MARKEY. Mr. Speaker, one of the most troubling issues our society faces today, and one we will continue to face, is how to allocate our scarce medical resources. Today, we spend over 10 percent of our gross national product on medical and health expenses. It would not be hard, doctors and hospital administrators tell us, to spend 20 percent, 40 percent, or some other astronomical level. The question has to be answered, however, on how much can we afford.

Whether we realize it or not, that question—how much resources do we dedicate to health and medical care—is being answered every day. The answer may come on an ad hoc basis, may be implicit, but it is nonetheless forceful. If we want to be fair to all citizens, if we want to have some control over our expenditures, for health and medical resources, then we must begin to answer the question in a positive manner.

Recently, Daniel Callahan addressed the conference, "Limited Health Care Resources: Ethical Implications of Our Choices," sponsored by the Health Planning Council for Greater Boston on May 17, 1983. Dr. Callahan is director and cofounder of the Hastings Center Institute of Society, Ethics, and the Life Sciences, Hastings-on-the-Hudson, NY. As Dr. Callahan states: "There does not now exist, nor is there ever likely to exist, a simple moral formula that will tell us how to ration resources * * * however * * * we can morally frame the allocation problems in a way that will maximize the possibility of doing the morally best thing."

I submit the first half of the address for your consideration:

LIMITED HEALTH CARE RESOURCES: ETHICAL IMPLICATIONS OF OUR CHOICES

(By Daniel Callahan, Ph. D.)

The topic of my talk is one of the most difficult of all, I think, in contemporary medicine, and perhaps in contemporary domestic policy. In talking about the allocation of health resources, we are dealing with a historically unique human situation. One can hardly expect to find ready solutions to a problem of that magnitude, or one so new. In fact, it is going to take some decades to work things through. I would like to be able to provide you with some simple solutions, but I cannot do that. What I would like to do, however, is to give you my own sense of how the subject matter might be understood. First, I want to give you some sense of my interpretation of the historical background of the present set of problems. Second, I want to suggest some general moral guidelines that I think might be helpful in trying to understand the problems. Then, finally, I would like to say something about how one might apply those guidelines to a sample of pressing contemporary policy decisions.

Beginning approximately with the Second World War, mankind made an enormous discovery. If enough research money were spent, and if enough resources were devoted to medical care delivery, the health of human beings could be radically improved. Indeed, human illness, which previous generations had accepted as a matter of fate, was now seen to be under potential human control. I choose the Second World War as dividing line because it marked that point in history when the governments of developed countries, particularly the United States, realized that large economic investment in biomedical research could reap major benefits. Thus in the years shortly after the war the National Institutes of Health in this country was developed as a major research agency, with hundreds of millions of dollars invested each year in support of basic research and of its clinical applications. Once it was realized that such an investment could provide enormous social benefits—that money could make the difference between life and death—it was only a short step to the development of the Medicare and Medicaid programs during the sixties, and to the emergence of a debate over a right to health care and the desirability of national health insurance.

The early decades of that development were marked by hope and optimism. Given enough investment of time, money, and energy, no utopian fantasy seemed too outlandish. The average human lifespan could be significantly extended, the number and quality of children could be controlled, the ill could be made well, pain and suffering could be radically reduced, and what had hitherto seemed out of human control—the body and its limitations—brought within the framework of human choice and manipulation. No sooner had biomedical research conquered one frontier, than another beckoned for attention. The future seemed unlimited in its possibilities.

In the moral realm, those were decades of considerable optimism as well. While our society had always been one dedicated to human rights (even if it did not always live up to that commitment), the decades between the forties and the eighties opened up new vistas for the concept of rights. If a necessary condition for the exercise of all rights is that of life itself (closely followed by that of minimally decent health), then it was only a short step to proposing a whole new range of what came to be called welfare rights, and to include among them a right to health care. Moreover, given the scientific and medical progress, it seemed perfectly feasible to propose such a right. In earlier times, when medicine lacked any decisive power to save lives, when nature seemed beyond human control, it would have made little sense to talk of a right to health care; similarly, before it was clearly understood that many environmental risks are manmade, it would have made equally poor sense to talk of a right to a healthy environment. In sum, not only could health be improved and risks reduced, but human beings could now claim a right to those goods. A technological and a moral revolution were thus joined.

Unhappily, as we know, the past few years have seen a sharp change in mood. While there still remains considerable zeal and justification for the improvement of health and reduction of risk, a number of important realities have emerged to force a much more complex, and troubled, understanding of our present situation and our future possibilities. Three general factors have emerged to change the perspective and to move the discussion to a different plane. The first factor is economic, the second technological, and the third moral.

The economic factor encompasses a number of elements. Even prior to our present economic troubles there were some nagging worries about the possible financial cost that an all-out effort to guarantee a right to health care might entail. In medicine, it has been reluctantly recognized that the list of human evils that might be brought under medical superintendence is almost unlimited, ranging from the ills of the body through the threats to psychological health posed by life in a complex society. The desire for medical benefits seemed unlimited, not only in terms of dealing with present, obvious ills, but potentially by extending the net of medicine to capture the full range of social ills, as well. It was not impossible to imagine spending the entire gross national product on the improvement of health and unhappiness.

In the sixties and the early part of the seventies, that was an underground worry only, with only a few stray voices being raised to wonder where we were heading. The major political efforts went toward extending the scope of biomedical research and the delivery of medical care. Even so, as the seventies moved along, it became painfully obvious that the national health bill was increasing at a rapid rate, far outstripping that of inflation in general. Moreover, an insight of horrendous proportions was becoming inescapable—that the day of cheap technological fixes for human illness was, with the conquest of infectious diseases, over. Instead, it was becoming obvious that the future promised to deliver rapidly escalating costs with increasingly marginal returns from expenditures. The reason for that is fairly simple. With the conquest of the great killers of the young and otherwise able—influenza, diphtheria, dysentery, yellow fever, smallpox, for example—the remaining diseases, primarily affecting the elderly, came to the fore. Cancer, heart disease, and stroke—chronic disease in general—have proved to be tough foes, and not one of them is likely to be amenable to inexpensive solutions. One may grant that the $1.8 billion expended each year on 20,000 dialysis patients extends their lives, and grant also that open heart surgery and heart transplants, vastly improved neonatal intensive care units, artificial limbs and joints, all bring notable health benefits. But the bill for those benefits is beginning to look astronomical.

I believe that those problems would have become manifest even if the prosperity of the fifties and sixties had continued unabated. At some point or other, but perhaps later than has turned out to be the case, it would have dawned on everyone that the maximization of health is a highly expensive goal. That the economic times have turned sour, and that those realities have been forced upon us in a dramatic way, only underscores what was an implicity inherent problem in the first place. The problem is

simply that, given the enormous cost of achieving everything that it might be possible to achieve, some scaling down of aspirations, some wiser ways of trying to determine the limits of reasonable expectations, are required. To say this is not to claim that we are already spending too much on health care, or to deny that many basic needs are still being unmet. It is only to say that some limits must be established.

Still another disturbing insight began to emerge as well. The technological developments necessary to improve health and reduce risk carry with them unintended consequences. Medical progress has produced two supreme, and vastly disturbing, ironies. The first is that the rapid reduction of mortality as a consequence of better biological understanding and health care delivery has created a population problem; the moral and effective means of controlling birth have not kept up with means of controlling death. Thus the population of the world, if not necessarily that of developed countries, has developed at a geometrical rate, rapidly increasing the number of those who can be subject to ill health as well as polluting the environment on the way. The second great irony is that, as we have extended the average human lifespan, we have also created an entirely new problem—that of the care of the elderly, who can and will live on for many years beyond the traditional retirement age of 65. The elderly now constitute about 11 percent of the population, some 26 million, and within twenty years it is estimated that there will be 52 million elderly. And for the most part of course the elderly are no longer economically productive. Through their well-deserved relief from work and toil, they are in many cases taking more from the economy at this age than they can put back in.

But that is not the end of it. In response to population pressures and the rising economic costs of raising a family, families have become smaller. Thus an increasingly smaller proportion of young people will be forced to pay for an increasingly larger proportion of elderly people. The social security system is already under considerable pressure, and that at a time when a ratio of workers to beneficiaries is 5.4 to 1. According to the most recent Census Bureau projections, that ratio will be 4.7 to 1 in the year 2000, 3 to 1 in 2025, and 2.6 to 1 in 2050. Needless to say, the burden upon the young to support the elderly will be heavy.

No one would propose that we simply let the elderly die, or that we go back to high infant mortality rates. But it must be recognized that we are beginning to experience a supreme unintended consequence of medical progress, one exceedingly troublesome to anyone who desires to improve the human condition.●

PAYSON LAND CONVEYANCE

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. RUDD. Mr. Speaker, Mr. Speaker, I rise today to introduce a bill which would authorize the conveyance of 1.1 acres of national forest land to the town of Payson, AZ, a community within my district.

The town of Payson is tightly surrounded by the Tonto National Forest, and its history is, therefore, closely tied to the activities of the Forest Service. This bill would authorize the transfer of Payson's first ranger station and residence, built in 1908, and a small amount of land surrounding the facilities, to the town of Payson. The purpose of this conveyance is to allow the town to lease the site to the Northern Gila County Historical Society so that its members can proceed with plans to restore the old buildings and use the property as a museum for the preservation and display of historical materials, including Indian artifacts, old ranger equipment, and pioneer farming equipment used in the area.

A new ranger station and residence have been built to the east of town, and the old facility has not been used by the Forest Service for some time.

Once completed, this museum would be a tremendous asset to the public, serving the citizens of Payson as well as the many tourists who visit this area each year.

This is an important opportunity for the community to work with the Forest Service to achieve a common goal of promoting the rich history of this region, and I urge appropriate consideration of this bill so that efforts to reach this goal may move forward.

H.R. 3940

A bill to authorize a land conveyance from the Department of Agriculture to Payson, Arizona

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Agriculture is authorized to transfer, without consideration, to the town of Payson, Arizona, the following described parcel:

A parcel of land entirely within the south half of the southeast quarter of the southeast quarter of the southeast quarter, of section 5, township 10 north, range 10 east, Gila and Salt River base and meridian, Payson, Gila County, Ariz., more particularly described as follows: commencing at the common corner of sections 4, 5, 8, and 9, township 10 north, range 10 east, Gila and Salt River base and meridian; thence north 89 degrees 56 minutes west, along the south line of section 5, a distance of 164.47 feet to the true point of beginning; thence continuing north 89 degrees 56 minutes west, along the south line of section 5, a distance of 337.13 feet; thence north 13 degrees 33 minutes 08 seconds east, a distance of 223.16 feet, to a point on the south right-of-way line of West Main Street; thence south 74 degrees 10 minutes 23 seconds east, along the south right-of-way line of West Main Street, a distance of 145.02 feet; thence south 43 degrees 09 minutes east, along the south right-of-way line of West Main Street, a distance of 243.72 feet; thence north 89 degrees 56 minutes west, along the south right-of-way line of West Main Street, a distance of 21.36 feet, to the true point of beginning.

The above described parcel of land contains 1.10 acres, more or less.

SEC. 2. (a) The property described in the first section shall be used for the preservation and display of articles of historical significance. If the property is not used for historical purposes, title to such property shall revert to the United States.

(b) Subject to the use restrictions provided in subsection (a), the town of Payson, Arizona, may provide for the administration of the property by the Northern Gila County Historical Society.●

WINTER NAVIGATION: THE MICHIGAN STUDY

HON. DAVID E. BONIOR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. BONIOR of Michigan. Mr. Speaker, On August 3, the Committee on Public Works and Transportation ordered reported H.R. 3678, to provide for the conservation and development of water and related resources. In section 1123, the committee authorized the Corps of Engineers to implement a full year extension of the navigation season on the upper Great Lakes and a 10-month extension on the St. Lawrence Seaway.

Traditionally, the navigation season on the upper Great Lakes has ended on December 15 plus or minus 2 weeks. The corps' proposal extends the navigation season through the construction of bubblers, icebooms, underwater dams, harbor and channel dredging and widening, and the use of a fleet of new icebreakers. The corps presently estimates the project's initial investment cost to the United States at over $600 million.

The corps' 1979 draft "Survey Study for Great Lakes and St. Lawrence Seaway Navigation Season Extension" prompted extensive criticism. A series of major studies raised substantial questions about the corps analysis of the project's economic benefits, its real costs, and its potential environmental impact.

The New York State Department of Transportation commissioned a study from the Pennsylvania Transportation Institute at Pennsylvania State University. The Great Lakes Basin Commission published a study entitled, "Economic Review of Navigation Season Extension." LBA Counsulting Partners, Ltd., did a study for the St. Lawrence Seaway Authority.

In 1981, the corps own Board of Engineers and its Chief of Engineers declined to recommend the project to Congress for authorization. The project has not received special study since the corps 1981 decision.

The economy of the Great Lakes region, including its key steel and auto industries, has changed substantially since the late 1970's. The House should not have to decide on a major public works project—one which was not even recommended for authorization by the corps itself—on the basis

of studies that may be seriously dated. Yet there may be no alternative.

The Great Lakes Basin Commission study was done at the request of the Governor of Michigan. It reviewed the corps cost-benefit analysis. Just as the New York State study would later conclude—see, CONGRESSIONAL RECORD, September 15, 1983, E4308-09—the Great Lakes Basin Commission found that benefits were significantly overstated and costs may also be seriously understated.

Winter navigation's justification rests, in large part, on projected capacity limitations in the Great Lakes navigation season. Those limitations stem from projected backlogs at the system's key bottlenecks, principally the locks.

By spreading the demand over a longer period of time, winter navigation allows increased shipping despite the capacity limitations. Yet winter navigation is only one solution to the projected constraints. In an important analysis, the Commission also addressed alternatives that address the bottlenecks directly.

The Commission notes proposals that were both less expensive and had substantially better cost-benefit ratios. One was the construction of a new lock at Sault Ste. Marie. Over the short term, the Commission also noted the Canadian proposal to increase the capacity of the Welland Canal through operational changes and the possibility of 24-hour operations on key locks.

Because a new lock independently generates many of the benefits of winter navigation extension, the Commission carefully notes that a new lock substantially reduces the cost-benefit ratio for winter navigation—duplicating perhaps 90 to 95 percent of the benefits. The alternatives are mutually exclusive.

The Commission's conclusion is important because the committee has also moved in section 1149 of H.R. 3678 to accelerate study of a new lock to parallel the existing Poe lock at Sault Ste. Marie. I have included a substantial extract from the Commission's review of alternatives to winter navigation. I urge my colleagues to give it, and the full study, their closest attention.

ECONOMIC REVIEW OF NAVIGATION SEASON EXTENSION

(A review of the U.S. Army Corps of Engineers' "Survey Study for Great Lakes-St. Lawrence Seaway Navigation Season Extension" conducted by the staff of the Great Lakes Basin Commission, Lee Botts, Chairman, at the request of Governor William G. Milliken, State of Michigan, prepared by R. Bruce Den Uyl, Charles A. Job, Dean R. Whitehill, Martha W. Deline, under the direction of Dr. Paul E. Nickel.)

ALTERNATIVES TO WINTER NAVIGATION

Introduction

One of the first principles of benefit-cost analysis is that all of the relevant alternatives to the proposed project be considered. The reason is simply that if the same objective can be accomplished in an alternative way which results in greater net benefits than the proposed plan, the nation will be better off. Therefore, even though one alternative may have a benefit-cost ratio greater than one, there may be another alternative with greater discounted net benefits.

The Survey Study considered only alternative lengths of season extension on both the upper four Great Lakes and the St. Lawrence Seaway, not other alternatives to the program. Thus, the Survey Study, in analyzing only internal alternatives, assumes a commitment to season extension and considers only how to achieve maximum benefits by this approach. A more comprehensive approach is to consider alternatives to season extension itself.

It is apparent that most of the benefits of season extension come from the attenuation of capacity constraints at the locks throughout the Great Lakes-St. Lawrence Seaway system. Assuming an increase in Great Lakes shipping, without the increase in capacity that season extension is expected to achieve, some commodities will have to be diverted to alternative modes of transport, principally rail. Rail transport is generally more expensive than water transport, especially for bulk commodities such as iron ore. Therefore, the expansion of capacity associated with season extension will preclude diversion of commodities to these more expensive modes, with substantial savings to the nation.

There are other alternatives to season extension that could expand capacity of the locks. The most obvious alternative is to build larger locks. The Corps of Engineers has conducted preliminary studies of lock expansion, but such expansion was not considered as an alternative to season extension.

Although some potential alternatives to winter navigation are described here, it was not possible in the time available to identify the most feasible alternatives, if any. Rather, these possible alternatives are discussed here to suggest that they ought to be considered.

It should be reiterated that these alternatives relate only to the lock capacity problem. Season extension achieves other benefits not related to the capacity constraints, such as stockpiling benefits and winter rate savings. If these benefits are great enough, winter navigation might be justified on this basis alone.

Sabin-Davis lock alternative

Nature of the alternative: The Corps of Engineers has prepared a draft feasibility study of replacement of the Sabin or Davis locks at the Soo Locks. The purpose of this replacement is to provide an additional lock which can accommodate vessels at least 1,000 feet long and with a draft of 25.5 feet. Such a lock would essentially duplicate the Poe lock which can now accommodate vessels of this size. Since this expansion would significantly expand capacity at the Soo Locks, it can be considered an alternative to capacity expansion through season extension.

Analysis: The replacement of the Sabin and/or Davis lock is not a complete alternative to season extension, because it would not provide stockpiling and winter rate savings. However, it would relieve projected capacity constraints at the locks, and it may accomplish this more efficiently than season extension. Season extension only delays capacity constraints at the Soo for approximately 15 years, whereas lock replacement would provide sufficient capacity for a much longer period.

Furthermore, lock replacement is a relatively inexpensive alternative to winter navigation. In the somewhat dated study of lock replacement, the average annual cost of replacing the Sabin lock with another lock that would accommodate ships 1,100 feet in length is estimated to be $7.1 million. The average annual cost of year-round navigation on only the upper four Great Lakes is $76 million. Even if the cost of lock replacement has doubled, there is still a wide disparity. The benefit-cost ratio for the lock replacement at the Sabin location is projected to be 12.9.

Effect on winter navigation benefits: Since replacement of the Sabin-Davis locks is an alternative to capacity expansion through season extension, it is of interest to consider how the benefits of winter navigation would change if the local replacement alternative was undertaken. This rough analysis should only be taken as illustrative because adequate data was not available, for a full analysis.

Since lock replacement would prevent capacity constraints at the Soo locks, thus precluding diversion of traffic to alternative modes, winter navigation benefits attributed in the Survey Study to decreased diversion of tonnage would be excluded. Since lock replacement at the Soo would only affect capacity on the upper four Great Lakes, tonnage projections for Proposal 3 (year-round shipping on the upper four Great Lakes) were compared with normal season projections to determine the amount of diverted tonnage that season extension prevents. Some of the diverted tonnage that the Survey Study counts as a benefit might be attributed to winter navigation even with lock replacement, so to be conservative only diverted tons related to coal and iron ore were counted. Since the Study does not indicate the savings per ton for diverted traffic for each commodity, dollar savings could not be calculated. Instead, percentages were calculated that indicate what proportion of the total diverted tons listed in the Survey Study would not be diverted with lock replacement at the Soo. The results are given in the accompanying table. The projections of commodity shipments were taken directly from Table 2 (p. E-20-21) in Appendix E of the Survey Study.

TABLE 4.—PERCENTAGE OF TONS DIVERTED DUE TO CAPACITY CONSTRAINTS THAT WOULD NOT BE DIVERTED WITH LOCK REPLACEMENT AT THE SOO

[In tons]

	1900	2000	2010	2020	2030	2040
(1) Normal season:						
Projected shipments:						
Coal	34,163	34,628	33,953	32,844	32,213	31,634
Iron ore	94,838	97,972	96,304	95,891	95,358	94,704
(2) Proposal 3:						
Projected shipments:						
Coal	34,487	39,349	43,513	42,453	41,947	41,493
Iron ore	96,376	111,081	123,396	122,942	122,382	121,694
Tons not diverted:						
Coal	324	4,721	9,560	9,609	9,734	9,859
Iron ore	1,538	13,109	27,092	27,051	27,024	26,990
(3) Total tons not diverted under Proposal 3	1,862	17,830	36,652	36,660	36,758	36,849
(4) Total tons not diverted under Proposal 7	5,487	22,324	41,434	41,744	42,140	42,562
(3)/(4) (percent)	33.9	79.9	88.5	87.8	87.2	86.6

Source: The projections of commodity shipments were taken directly from Table 2 (p. E-20-21) in Appendix E of the Survey Study.

The table indicates that most of the diverted tonnage is related to capacity constraints at the Soo Locks. Season extension does not significantly affect capacity at the Welland as most of the commodities moving through the Welland are shipped during the normal season.[1]

With lock replacement, overall benefits attributed to season extension would decline. A very conservative estimate is that average annual transportation rate savings would be reduced by 75 percent. For the proposed plan (year-round navigation on the upper four Great Lakes, and an 11-month season on the St. Lawrence Seaway), assuming that all other benefits remain unchanged, the new benefit-cost calculation would be as follows:

Average annual benefits

	Thousands
Transportation rate savings	$65,201
Winter rate savings	17,694
Stockpiling savings	59,417
Total	142,312
Average annual costs	101,816
Benefit-cost ratio	1.40

This calculation is for the incremental average annual benefits, which excludes benefits counted in the Corps' March 1976 Interim Report (for an extension to January 31). If total average annual benefits are used, the benefit-cost ratio increases to 1.54.

The issue paper on stockpiling benefits states that it may not be valid to count all of the stockpiling savings because of capacity constraints would move by rail which is able to ship during the winter. If the lock replacement alternative were undertaken, stockpiling benefits would be retained, since there would be no diverted traffic which could be moved during the winter months.

Conclusion

In concluding this discussion, it should be pointed out that even with the lock replacement alternative, winter navigation could still be an economically feasible program. In fact, if winter navigation is considered desirable after all relevant alternatives are studied, it might be cost efficient to implement the winter navigation program before lock replacement in order to delay the need for lock replacement. However, if lock replacement would be needed shortly anyway, most of the transportation rate savings could not be attributed to winter navigation, thus reducing benefits of the season extension program. What this analysis has shown is that there may be alternatives for resolving the capacity constraint that are more economically desirable than winter navigation, and that the major economic benefit of winter navigation stems from stockpiling and winter rate savings.

Postscript

It should be noted that after the draft report of this economic review was prepared, it was determined that none of the stockpiling benefits could be attributed to season extension. However, a portion of these stockpiling benefits would be transferred to transportation rate savings.[2] This change will be incorporated in the Survey Study final report. The change means that between 90% and 95% of the benefits of winter navigation are related to capacity constraints at the Soo Locks.

However, nothing in this discussion of alternatives is altered by these changes. It would still be valid to count stockpiling benefits when discussing alternatives. The reason that they are excluded from consideration when discussing NED benefits and costs is because stockpiling is unnecessary when capacity constraints force the diversion of tonnage to alternative modes. However, if a new lock were constructed at the Soo, this diversion would no longer be necessary, and therefore, the only means to eliminate stockpiling during the winter months would be to ship these commodities during the winter. Hence, stockpiling benefits would be a valid consideration in any study of alternatives.●

TRIBUTE TO WILLIAM GALLO AND MICHAEL CIPRIANI

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. BIAGGI. Mr. Speaker, I have been invited to attend ceremonies for the induction of two prominent individuals into the Yonkers Sports Hall of Fame. The city of Yonkers is especially proud of their contributions in enriching and enhancing the world of sports. I refer to William (Bill) Gallo, the eminent sports columnist-cartoonist for the New York Daily News, and Michael Cipriani, the Nation's outstanding photographer for harness racing. At this time I would like to pay tribute to these two men and share the highlights of their careers with my colleagues:

WILLIAM V. GALLO

William (Bill) Gallo was born in Manhattan on December 28, 1922, the son of Frank and Henrietta Gallo. His father was a newspaperman who died at the young age of 36 when William was 11 years old.

As a youngster Gallo dreamt of following in his father's footsteps. "As long as I can remember, printer's ink was a part of me," he says. He studied art in high school and after graduating he landed a job on the New York Daily News in 1941. He remained there for 7 months until he answered Uncle Sam's call, joined the U.S. Marine Corps, and went off to war.

He served with distinction as a member of the 4th Marine Division for 4 years, seeing action in Roi-Namur (Kwajelin Islands), Saipan, Tinian, and Iwo Jima. Upon war's end he returned to the New York Daily News as a picture clerk in the caption/art department.

It was in 1960, when he was transferred to the sports department, that he began his illustrious career as a sports cartoonist and as a sports columnist. It was here, also, that he was to develop such well-known characters as "Basement Bertha," "Yuchie," and "Penthouse Polly"—familiar personalities to hundreds of thousands of readers.

Bill Gallo's talents and creativity as a cartoonist have earned him many honors, awards, and citations. He is the five-time recipient of the coveted "Reuben," awarded by the National Cartoonist Society for excellence in the sports category. He has won the Page 1 Journalism Award from the New York Newspaper Guild 16 times. Among his other prestigious honors are the Power of Printing Award, the Segar Award, and the Achievement Award for Alumni from the School of Visual Arts. He has also won fame as

an authority in boxing and his colleagues have honored him with the James J. Walker Award. He is also the recipient of the Champion Award from the Downtown Athletic Club.

Bill Gallo and his wife Dolores have two sons, Gregory, who is the sports editor of the New York Post, and Bill, Jr., who is the steeplechase racing secretary at the Belmont Racetrack.

Gallo, who is currently marking his 23d year as a cartoonist-columnist for the New York Daily News, moved his family to the city of Yonkers some 25 years ago. His more than 5,000 cartoons and his innumerable sports columns have brought much honor and prestige not only to him and his family, but also to his profession and to the city of Yonkers as well.

MICHAEL CIPRIANI

Michael Cipriani was born in Boomer, W. Va., on September 1, 1914, and raised transient style in Cincinnati, Chicago, Columbus, Ohio, and Harlan County, Ky. In the 1930's the Cipriani family moved to the city of Yonkers and it was there that Michael's love affair with photography began.

Cipriana began his career servicing New York City daily papers with news and feature photos, winning an award in 1955 for his coverage of an auto mishap. In that same year he signed on with the Yonkers Raceway. Since that time he has photographed thousands of races, including every Cane Pace and Yonker's Trot since these two prestigious events were inaugurated the year he joined the track.

"Harness racing has been so good to me," says Cipriani, who related the simple ethic by which he lives—"My father once told me, whatever you do, you've got to be the best. I've always lived to apply that to my photography."

Along with traveling throughout the world to photograph horse races, Cipriani has also covered a variety of other subjects. These include a dozen Miss America pageants, Presidents, movie stars, boxers, musicians, and other famous athletes and celebrities. And, of course, he has always been on hand for any sports event of importance taking place in the city of Yonkers.

Cipriani has earned many awards and honors throughout his distinguished career. Some of these include: The New York Daily News Photo Award, Yonker's Raceway Patrol Force Award, member of the Yonker's Columbus Day Committee, March of Dimes, Yonkers Captains, Heart Fund, Enrico Fermi Educational Foundation, Yonkers Safari, and the Yonkers City Council.

Mike Cohen, publicist, sports information chief for the NBC television network, and well-known public relations counsel, refers to Cipriani as "a great artist. You can tell his work without a signature. Nobody can equal the quality of Mike's pictures in racing. He's inventive, ahead of his time. He's lengths ahead of anyone else."

Michael and his wife Mary are the proud parents of one son, Ralph, a former member of the FBI, currently an attorney with a statewide reputation.●

TESTIMONY OF MARGARET E. MAHONEY, THE COMMONWEALTH FUND

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. GREEN. Mr. Speaker, the Subcommittee on Oversight of the Committee on Ways and Means was fortunate in late June of this year to hear testimony by Miss Margaret E. Mahoney, president of the Commonwealth Fund located in New York City. Miss Mahoney's testimony, concerning the rules governing private foundations, should provide the public with a fine analysis of the issue which is presently before the subcommittee.

At this time, Mr. Speaker, I would like to insert the text of Miss Mahoney's testimony into the CONGRESSIONAL RECORD and I commend it to the attention of my colleagues:

TESTIMONY OF MARGARET E. MAHONEY, THE COMMONWEALTH FUND

My name is Margaret E. Mahoney. I am President of The Commonwealth Fund, a private foundation which was chartered in the State of New York in 1918. The Fund is located at One East 75th Street, New York City. At present it has assets of approximately $185 million and an annual budget of just under $12 million.

In this testimony, I will focus on the work of The Commonwealth Fund because I know it best, but I believe that its work is broadly representative of the work being carried out by many other foundations around the country. I shall conclude with a statement of support for the proposed legislation, H.R. 3043, designed to improve the regulation of private foundations.

I—THE COMMONWEALTH FUND

The Commonwealth Fund was originally established "to enhance the common good," and in all its activities the Fund retains a deep concern for people and the institutions that serve them.

The Fund's Board of Directors has defined the foundation's core mission to be encouraging more effective health care for all Americans. The Fund supports activities to achieve this goal across the country, but also places particular emphasis on programs and institutions in its own community, New York City.

The Fund's secondary mission is to promote good relations between the United States and the United Kingdom, Australia, and New Zealand through the Harkness Fellowship Program, which allows talented young people from these countries to pursue postgraduate studies in, and become acquainted with, the United States.

A History of Defining and Attacking Problems

Again and again in the last 65 years, the Fund has used the flexibility available to foundations to identify health care problems not receiving adequate attention and to support institutions and individuals with the interest and ability to devise solutions. For example, in the 1920's the Fund grappled with the then poorly recognized problem of juvenile delinquency, and this led to early and very influential support of services and training in child guidance. Model Fund programs in the 20's, 30's and 40's to provide health care to rural areas and to regionalize care were also far ahead of their times. The Fund has also supported the work of many distinguished medical researchers, including three Nobel Prize winners. As other sources of funding have developed for an important undertaking, the Fund has moved on to new activities where foundation support could make a difference.

Today's Challenges and Opportunities

At present, worries about our country's economy and the generally accepted belief that governmental expenditures cannot grow as in the past have created understandable pessimism about the outlook for further improvements in health care. This is a time when many may be too discouraged to search for creative responses to problems. But it is also a time when foundations can be particularly useful if they can show how, working with available resources, individuals and institutions can still pursue, evaluate, and adapt ways of making health care more effective.

The Fund's Present Program

Our present program takes this path. It is designed in part to help health care institutions adapt their missions, programs, and operations so they can continue to fulfill public responsibilities without risking financial disaster.

First, we pay special attention to the quality of health care and of life in general in New York City.

Secondly, and in the tradition of the Fund, we are applying our limited resources to certain carefully selected problems with social and medical implications that need attention: for example, problems of elderly people; of low-income families, especially those headed by women; of members of minorities who wish to work in the health professions; and of lifestyles that affect an individual's health, specifically alcoholism.

Thirdly, we are especially concerned with the nation's more than 100 academic health centers—those multi-institutional federations comprising a medical school, one or more teaching hospitals, and other related institutions. These essential centers educate physicians and other health professionals, advance medical knowledge through their research programs, provide highly specialized care unavailable elsewhere, and frequently fill the general medical care needs of people in their communities, which are often inner cities.

To be more specific about what we are doing in each of these three areas, I offer you the following thumbnail sketches of representative projects the Funding is now supporting.

New York City

Training volunteers to help elderly people continue to live at home: Volunteers are coordinating existing services for about 1,500 frail elderly people so they can avoid going into nursing homes; if this model proves ef-

fective it could be used in many other communities. $173,206, Laurence G. McFarland, Academy for Gerontological Education and Development, Bronx.

Improving the health and development of children through early preventive care: Harlem Hospital is providing community care for some 400 young pregnant women that includes both medical and educational services, and continuing care for their babies through the first year of life. $269,921, Margaret Heagarty, M.D., Harlem Hospital.

Long range planning for North General Hospital: The only voluntary hospital in the Harlem area, and the area's largest private employer, is developing a financial aid program plan crucial to its survival. $100,000, Eugene L. McCabe, North General Hospital, Harlem.

A prepaid medical system for the Bronx: Montefiore Medical Center is developing a medical care system for three financially stressed community health centers that, through prepayment for services, will allow the centers to make better use of resources and to continue serving some 12,000 Medicaid recipients and other poor people not covered by Medicaid. $232,634, Mo Katz, Montefiore Medical Center, Bronx.

Career explorations: For a second summer, a program for 200 minority high school students is providing paid summer employment, job training, and counseling under the mentorship of Black professional and business men and women; those completing the program are automatically accepted to Hunter College upon graduation. $150,000 annual budget, Donna E. Shalala, Hunter College and the Coalition of 100 Black Women, Bronx, Brooklyn, Manhattan, and Queens.

Counseling for alcoholics and their families: A city service is guiding alcoholics and their families on the best treatment. $10,000, Edmona L. Mansell, Freedom Institute, Inc., Manhattan.

Developing a children's zoo for Brooklyn: A new educational zoo for children is being designed to replace the present facilities in Prospect Park; when completed, the new zoo will serve an estimated 2 million visitors a year. $250,000, William Conway, New York Zoological Society, Brooklyn.

Health-Related Problems the Elderly

Research into the major cause of senile dementia: Researchers at Albert Einstein College of Medicine, New York City, The Johns Hopkins University, Baltimore, and Yale University, New Haven, are searching for the causes of Alzheimer's disease, a form of senile dementia that affects an estimated 1.25 million Americans and fills nursing homes with its victims. $250,000 to each of the institutions.

Directory of continuing care retirement communities: contracts to assure life-long residence for elderly people in a caring community began to appear in this country some fifteen years ago, largely encouraged by church groups; now close to 300 such communities exist, and interest in developing more is growing. This directory, to be updated annually, will inform those interested in living in such a community. $24,830, Erik Gjullin, American Association of Homes for the Aging, Washington, D.C.

Meeting the needs of the functionally dependent elderly: What are the options? This study is developing national strategies to deal with the problems of elderly Americans who are both physically frail and needy. $300,017, Karen Davis, Ph.D., The Johns Hopkins University, School of Hygiene and Public Health, Baltimore, Maryland.

Developing a social health maintenance organization for older Americans: This experimental program will meet the medical and other daily needs of about 4,000 elderly people, providing nursing home care if necessary, in exchange for an annual fee paid jointly by Medicare and the individual member. $175,000, William C. McMoran, Senior Care Action Network, Long Beach, California.

Toward the better diagnosis and treatment of urinary incontinence: A debilitating medical and social problem for millions of older Americans, incontinence is thought to be a major reason many older people enter nursing homes. This work will develop better diagnostic and treatment methods. $450,000, John W. Rowe, M.D., Harvard University, Cambridge, Massachusetts.

Medical Care for Low-Income Families

Examining the effects of medicaid and medicare financing and delivery innovations: This study is evaluating innovations in the states of Arizona, California, and New York to determine the effects of Medicaid and Medicare financing on aged, disabled, and poor people, and on the institutions that serve these groups. $325,000, Stuart H. Altman, Ph.D., Brandeis University Health Policy Consortium, Waltham, Massachusetts, three states listed above, and nationwide.

A prepaid medical care system for community health centers in Tennessee: An association of primary care centers is developing an experimental prepaid system of comprehensive health services for about 5,000 children and parents eligible for Medicaid served by 22 centers. $234,000, Jay Harrington, Tennessee Association of Primary Health Care Centers, Nashville, Tennessee and statewide.

Helping selected States make decisions about changing their medicaid programs: A team at Harvard University is working with public officials and hospital directors in California, Georgia, Massachusetts, Michigan, New York, and Texas to help them in controlling Medicaid expenditures and monitoring the consequences of these actions. $309,272. Penny H. Feldman, Ph.D., and Marc J. Roberts, Ph.D., Harvard University, Cambridge, Massachusetts and six states listed above.

Helping States restrain medical expenditures for nursing home care without harming quality or access: This study is examining how different Medicaid reimbursement methods affect nursing home care in California, Connecticut, Georgia, Illinois, Maryland, Massachusetts, New York, and West Virginia; results will be reported to policy planners. $345,637, John F. Holahan, Ph.D., The Urban Institute, Washington, D.C. and eight states listed above.

Children and Teenagers

Determining factors affecting economic independence and family stability for teenage mothers: Researchers at The University of Pennsylvania are interviewing 300 low-income women who were teenage mothers about fifteen years ago to determine which women have achieved economic independence for themselves and their children, what factors explain their success, and how this information might be used to help other teenage mothers. $375,000, Frank F. Furstenberg, Jr., Ph.D., University of Pennsylvania, Philadelphia, Pennsylvania.

Development of a community-based center for troubled adolescents: This center is providing education, job training, medical care and counseling for youngsters between the ages of 13 and 20 who might otherwise be placed in psychiatric hospitals far from home. $150,000, Marion Wright Edelman, Children's Defense Fund, Washington, D.C.

Project self-renewal: A group of Black professional women, with other professional and community groups, is designing a program in several cities to help Black teenage mothers and fathers obtain economic independence; the program will provide each young person with a role model/mentor and services such as school guidance, family planning and other health care, pediatric and day care, and job counseling, training, and placement. $550,000, Jewell J. McCabe, Coalition of 100 Black Women, New York City and several sites to be determined.

Minorities in the Health Professions

The general medical care needs of low-income blacks—are younger black physicians a major source of care?: This study is examining whether young Black physicians are continuing to provide, as their elders have, the majority of health care to low-income Black communities and, if not, what steps are necessary to ensure a steady supply of new physicians for these communities. $195,525, August G. Swanson, M.D. and Stephen N. Keith, M.D., Association of American Medical Colleges, Washington, D.C. and nationwide.

Developing careers in academic medicine and research: National Medical Fellowships, Inc. is administering a program aimed at guiding 100 academically gifted minority medical students toward careers in academic medicine and biomedical research, thus partly correcting the shortage of minority doctors in these professions. $260,000, Leon Johnson, Jr., National Medical Fellowships, Inc., New York and nationwide.

Alcoholism

Hospital outpatient treatment of alcoholism: The Bronx Municipal Hospital is testing a self-help approach to treating alcoholism in a large outpatient department of a major hospital; if successful, this less expensive and less disruptive approach could be used in similar facilities elsewhere, which nationwide now treat over 600,000 alcoholics a year. $202,904, Marc Galanter, M.D., Albert Einstein College of Medicine, Bronx, New York.

Comparison of treatment approaches used in industrial alcoholism programs: Researchers are determining which of three common approaches used by industry to treat alcoholism in workers—simple confrontation, outpatient treatment, or hospitalization—is more effective, with the cost factor included; the study is being carried out in cooperation with selected General Electric Company plants in Massachusetts. $405,000, Diana Chapman Walsh, Boston University Center for Industry and Health Care, Boston, Massachusetts and statewide.

Strengthening the skills of general physicians in the treatment of alcoholic patients: Harvard doctors are developing and testing programs to prepare general practitioners to better diagnose alcoholism in patients, particularly at the early stage, and to coordinate its treatment. $446,354, Thomas L. Delbanco, M.D., Harvard Medical Center, Boston, Massachusetts.

Can a law reduce traffic accidents in Maine caused by drunk driving? This study is determining what effect a new and very strict drunk driving law in Maine will have in reducing traffic deaths and injuries. $268,439, Ralph W. Hingson, Sc.D., Boston

University School of Public Health, Boston, Massachusetts and Maine.

Use of Medical Technology

Studies at Dartmouth Medical School, the Rand Corporation and the University of Rochester are seeking ways to guide doctors in the use of expensive procedures, encouraging proper use without compromising the quality of care. The Rochester study is paying special attention to severe problems of older people, specifically to the treatment of pneumonia and vascular disease. $330,000, John E. Wennberg, M.D., and Daniel F. Hanley, M.D., Dartmouth Medical School, Hanover, New Hampshire; $625,000, Robert H. Brook, M.D., The Rand Corporation, Santa Monica, California; $250,000, Paul F. Griner, M.D., University of Rochester Medical Center, Rochester, New York.

Academic Health Centers

Alternative strategies for urban health care and medical education at Downstate Medical Center: Downstate Medical Center, the only academic health center in Brooklyn and a major provider of health care services in that borough, is working out alternative strategies for redeveloping the center so it can better serve the community. $150,000, Donald J. Scherl, M.D., The State University of New York, Brooklyn, New York.

Better information for academic health center planning in New York City: Work to guide academic health centers in New York City in developing plans to make New York City an important world medical center. $379,398, Eli Ginzberg, Ph. D., Columbia University, Conservation of Human Resources, New York City.

Strengthening the management capabilities of Meharry Medical College/faculty development at Meharry Medical College: Meharry's concerted effort to improve its management strengths and its academic program is supported by one Fund grant to fill important management positions and develop better financial and management information systems, and a second to provide a fully endowed faculty chair. $300,000, Richard G. Lester, M.D.; $1,000,000 over five years, David Satcher, M.D., Ph.D., Meharry Medical College, Nashville, Tennessee.

Developing a comprehensive system of publicly supported health care services for mothers and children in Iowa: The University of Iowa is developing a statewide plan to assure health care for pregnant women, new mothers, and children with rare diseases. The university is the major provider of care to women and children in the state, managing most government funds for these services, and is thus in a central position to carry out such a plan. $70,000, Samuel Levy, Ph. D. and John W. Colloton, the University of Iowa Hospitals and Clinics, Iowa City, Iowa.

Collaborative effort to develop a better medical care system for patients covered by medicaid: Eight teaching hospitals in Boston are forming, with neighborhood health centers, a private, nonprofit corporation to contract with the Commonwealth of Massachusetts to provide all Medicaid-financed services to 75,000 women and children for a predetermined, annual, all-inclusive fee, thus containing costs without denying or reducing coverage. $300,000, Jerome H. Grossman, M.D., New England Medical Center, Boston, Massachusetts.

I hope this brief account of current work supported by the Commonwealth Fund gives adequate evidence of the breadth and variety of people, institutions, and activities that foundations like the Fund support. These grants illustrate the deep commitment of the Commonwealth Fund, and other foundations, to invest our funds so as to bring about marked improvements in the way institutions and organizations function and in the lives of the people affected by them.

The Commonwealth Fund and other foundations have accomplished what they have over time largely because of the flexibility they have been accorded in meeting the changing needs of a dynamic society. The importance of this flexibility is reflected in my following remarks on the proposed legislation H.R. 3043, a bill revising the regulation of private foundations.

II—PROPOSED LEGISLATION TO CHANGE REGULATION OF PRIVATE FOUNDATIONS

I believe that H.R. 3043, which has been introduced by Congressman Barber Conable, addresses a number of problems that have hampered private foundations since the 1969 tax reform legislation and therefore deserves support. In brief, the proposed legislation would:

Encourage the establishment of new foundations and the giving during the donor's lifetime of gifts to existing foundations by making lifetime gifts to foundations deductible on the same basis as gifts to other charities. Income tax deduction rules for gifts to private foundations are now less favorable than rules governing gifts to other charities. The reasons for making these rules more restrictive have been removed by subsequent legislation, while the rules continue to contribute to a decline in the formation of new foundations and in lifetime giving to existing private foundations.

Clarify and simplify certain regulations that, as now formulated, place an onerous administrative burden on foundations and limit their flexibility to respond to need. Under the new legislation foundations would be more able to make effective small grants on short notice—for example, to newly organized community progarms.

Mr. Chairman, as I indicated earlier in this testimony, foundations are working today in a complex environment. It is not a climate of expansion, but one of general refinement; and it is not a time in which funding will grow rapidly, but a time to seek more effective ways to use existing resources. However, it is a time when foundations can play a particularly important role in stimulating the exchange of ideas and in searching our fresh approaches that may encourage others in this uncertain climate. The Commonwealth Fund's efforts today reflect the desire to help in the discovery of what works best while further testing yet better ways to do things.

The Fund has issued an annual report each year since its first year of operation, which was 1918-19. We also issue brochures about our various activities, and make available to anyone interested all reports to the Board of Directors on program proposals. It is also a policy of the Fund to seek co-funding for projects where possible.

I submit the evidence above with the strong belief that foundations are a principal part of the private sector of this country. This country is unique in its commitment to private philanthropy for the public good. It is a heritage that should be treasured by us all. But honoring such a heritage does not preclude keeping a watchful eye over the performance of foundations, and the hearings seem an appropriate step to me to review present activities of, as well as unneeded restrictions on, foundations.●

CHILD SUPPORT: A FORMULA WITH NO FUNDS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. FLORIO. Mr. Speaker, the administration's economic policies continue to impose hardships on millions of Americans, especially women.

Today, American women are confronted with a barrage of economic adversity, including unemployment, pay discrimination, and occupational segregation from high wage jobs. Not only on the job, but in pension rights, property settlements, and other areas are women being deprived of any economic security. Current projections suggest by the year 2000, almost all the U.S. poor will be female—primarily single mothers and elderly widows.

Considering these projections, I urge my colleagues to examine the administration's proposal to cut child support programs by 20 percent. While the President has proposed to expand efforts of collection on delinquent payments from fathers who have left their families, no additional funding has been proposed to implement the processes.

A recent census report found that 8.4 million women nationwide had custody of their children, yet less than half receive child support. In addition, to those entitled to payments, only 47 percent receive the full amount of $40 while 28 percent of the mothers receive no child support at all.

When fathers do not pay, their families usually end up on welfare, supported by the taxpayer.

The sources for collecting child support payments from fathers are there. They can come from his wages or income tax returns. Expanding the child support collection enforcement program is fine, but without money the program just will not work.

Mr. Speaker, I submit the following article for my colleagues' review.

[From the (Cherry Hill, NJ.) Courier Post]

PRESIDENT'S CHILD-SUPPORT GESTURE TO WOMEN MAY BE AN EMPTY ONE

(By Jane Bryant Quinn)

In what was trumpeted as a major victory for women, the Reagan administraton agreed to reconsider its budget cuts in a small but vital program: collecting unpaid child support from fathers who have ducked out on their families.

Some victory.

Formerly, the federal government paid 75 percent of the cost of collaring deadbeats dads, while the states paid 25 percent. This year the federal share dropped to 70 percent, and would have dropped to an average of 55 percent next year. Instead—in a friendly salute to women—the administration kindly offered to hold the drop to 60 percent, down 10 percent from the present guarantee.

The President also proposed expanding the collection efforts—which is what makes headlines. But he doesn't propose to spend more money to make stepped-up collections possible.

A recent census report found that 8.4 million women nationwide had custody of their children in 1981, yet fewer than half of them had been awarded child support. Of those entitled to payments, only 47 percent received the full amount—an average of $40 a week. Another 25 percent got partial payments; 28 percent got nothing at all. The disinclination of many men to help support their children is one of the reasons that more women are falling into poverty.

For bleeding hearts, the growing feminization of poverty is of deep social and humanitarian concern. But it's also important to people who only bleed in the pocketbook. When dads don't pay, their families often end up on public welfare, supported by the taxpayers at large.

The states all have programs to try to collect child-support payments from delinquent fathers if the mother is on welfare. Some also help women who are not on welfare.

Automatic child-support collection is increasingly used if the father is within reach. Child support may be withheld from his wages, his income-tax returns and in some cases from his unemployment benefits.

When a family is on welfare, any child-support money collected from the father is used to reimburse the state and federal treasuries. The money collected for a non-welfare mother goes directly to her, for the benefit of the children. In recent years, Washington has been discouraging child-support collections for non-welfare mothers, because government didn't get anything back for its efforts. The idea has been to use the program for the benefit of the federal treasury, not for the benefit of women and children.

Among several bills now before the House Ways and Means Committee, the major one is the administration's new proposal brought forth in good part through the efforts of Republican women politicians.

The administration now proposes to pay bonuses to the states for improving collections for both welfare and non-welfare mothers—the bonuses making up for the cut in guaranteed funding. It may also seize the federal tax refunds of delinquent fathers of non-welfare families—a change in attitude welcomed by state directors of child-support enforcement.

But Dan Copeland, head of the State Directors Association, worries about the cut in guaranteed funding. State legislators may be willing to replace lost federal money, but many child-support programs depend on county budgets for support. "When the county commissioners see a cut in the federal guarantee, they respond by reducing their own efforts," he says.

Extending the child-support enforcement program to cover more non-welfare mothers is fine, but it's a hollow gesture if Reagan doesn't provide any money to do the job.●

THE "NEW FEDERALISM"

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. OTTINGER. Mr. Speaker, in recent months we have seen a number of articles and studies on the impact of Reaganomics and the so-called New Federalism. I think it is vitally important that we in Congress be fully aware of the results of these Reagan policies on the people of this country. I would like to recommend to my colleagues, a paper written by my son, Larry, a recent graduate of the University of California at Berkeley.

After carefully evaluating the Reagan proposals, this paper concludes that under New Federalism, many State and local governments would reduce or end support for domestic programs, especially those for low income and disadvanataged persons. Viewed in terms of the administration's broader economic program and ideology, the New Federalism seems to be part of a move to shift national priorities and resources from social programs to military programs, for the poor to the rich, and from the public sector generally to the private sector.

The introduction and a description of the New Federalism ideology follows:

THE "NEW FEDERALISM"

(By Lawrence S. Ottinger)

In his State of the Union Address of January 26, 1982, President Ronald Reagan introduced a proposal for a "New Federalism" that would eliminate the federal government's involvement in a panoply of domestic programs. Specifically, the administration's proposal aims at abolishing the federal grant-in-aid system in which the national government presently provides funding with varying degrees of guidelines for state and locally implemented programs in health, education, welfare, transportation, and other areas. This system for providing federal aid to states and localities grew tremendously during the 1960's as part of the Johnson administration's Great Society initiatives.

The Reagan administration's proposal continues a recent conservative trend to undo the federal grant-in-aid system. This trend began with the Nixon administration's original "New Federalism" which passed into law block grant and revenue sharing programs designed to significantly lessen federal guidelines attached to federal funds. The Reagan administration's "New Federalism" would go much further by eliminating federal funding and federal guidelines for many domestic programs.

The Reagan administration claims that these domestic programs and the needs they address would not be harmed by doing away with federal involvement. Rather, they claim, complete state responsibility for these programs would make them more efficient and effective, while also enhancing decentralized decision-making and local autonomy. At the same time, being freed from involvement in these domestic affairs, the federal government would be able to concentrate its energy and resources on its primary responsibility to national defense and foreign policy.

This paper will evaluate the Reagan administration's proposal in terms of its likely impact on the programs it would completely return to the states. It will also examine the basis for and implications of the proposal's ideological foundations.

It is the contention of this paper that under the "New Federalism" proposal, many state and local governments would reduce or end support for domestic programs, especially those for low income and disadvantaged persons. Without federal funds and political directives, many states and localities would be unable or unwilling to maintain these programs and the needs they address. The "New Federalism" would exacerbate current regional, interstate, and intrastate disparities in provision of these basic public services.

Under the guise of decentralization and local autonomy, the Reagan administration's proposal would reverse the historical development of a national commitment to human welfare and public infrastructure needs. Viewed in terms of the administration's broader economic program and ideology, the "New Federalism" seems to be part of a move to shift national priorities and resources from social programs to military programs, from the poor to the rich, and from the public sector generally to the private sector.

"NEW FEDERALISM" PROPOSAL

The major aspects of the "New Federalism" proposal are outlined in a White House fact sheet released the night of the President's speech.[1]

The proposal is separated into two main components. The first involves an "equal swap" [2] between the states and the federal government of the major public assistance programs for the poor and disadvantaged. The federal government would assume total financial responsibility for Medicaid, while the states would assume complete responsibility for Aid for Families with Dependent Children and Food Stamps, which together are often referred to simply as "welfare."

Currently, the federal government has a large role in providing public assistance to the poor. It totally finances Food Stamps and through the grant-in-aid system it matches state contributions to AFDC and Medicaid.

The second component in broad outline involves the following: Over an eight year transition period, the federal government would eliminate its involvement in forty state and local domestic programs totaling $30.2 billion. During this same period, the federal government would phase out its collection of certain excise taxes worth $28 billion allowing the states to then raise revenues through this base.

The states would not have to maintain support for any of the programs after the eight years. They could use revenues from the excise taxes they collect for any purpose. The administration's figures indicate that taken together the states would have enough revenues to support these programs if they chose to do so.

The programs being "turned back" under this second component fall generally under two categories: public assistance programs for poor and disadvantaged persons and public infrastructure programs. The former include Social, Health, and Nutrition Services and Low Income Home Energy Assistance. Along with AFDC and Food Stamps, then, the states would have most of the responsibility for programs aimed at providing a minimum standard of the basic human needs. The latter includes Community Development and Facilities, Local Transportation, and Education and Training programs. These public infrastructure programs provide for the basic facilities and services upon which communities, states and the country

depend. The states would also take responsibility for Occupational Safety Assistance from the federal government.

The excise tax base that would be given to the states to compensate for these increased programmatic responsibilities include taxes on the following: gasoline, tobacco, alcohol, telephone service, and oil. Of the $28 billion the federal government collected from these excise taxes, the oil windfall profit tax provided the largest revenue by far at $16.7 billion.

Taken as a whole package, the administration's figures indicate that the states would take on $50 billion in new programmatic responsibilities that they could make up, if they desire, through excise taxes, Medicaid savings, and increased efficiency.

THE IDEOLOGY

Conservative ideology since the Nixon administration has been very consistent in its attacks on the federal grant-in-aid system, blaming the federal government for taking on too much power and responsibility for program areas that would be handled more effectively and efficiently if left completely to state and local governments. This ideology claims that decentralization of federal responsibilities along the lines of the "New Federalism" proposal would enhance citizen participation in politics, state and local autonomy, and government accountability.

Federal v. State Responsibilities: The Clean Separation

The Reagan administration justifies the "New Federalism's" complete elimination of federal involvement in education, welfare, and the other domestic areas through ideological appeals to classical federalism and eighteenth century America.

The classical definition of federalism states that "the general and regional governments are each, within a sphere, coordinate and independent." [3] By "largely abolishing" the federal grant-in-aid system with its sharing of responsibility between the levels of government, the "New Federalism" would effect a clean separation of programmatic duties. As a result, each level of government would have "independent program responsibilities, independent finances, and full and mutual sovereignty." [4]

In broad terms, the administration seeks a clean separation of program responsibilities along the following lines: The federal government takes care of national defense and foreign policy, while state and local governments take care of most domestic affairs. In his speech, President Reagan hearkened back to the "constitutional balance envisioned by the Founding Fathers" [5] between the federal government and the states. At the time, national defense was indeed the major concern of the newly formed federal government, and each state acted as an autonomous whole in domestic political, economic, and social concerns.

Human welfare and public infrastructure programs would fall under domestic affairs that should be handled completely by the states. In attacking the federal "intrusion" into these domestic concerns, the President quoted a Democratic Governor as saying, "The national Government should be worrying about arms control not potholes." [6]

Needs Addressed More Efficiently and Effectively by States.

Without federal interference, the states would provide for human welfare and public infrastructure needs more efficiently and effectively. Because state and local governments are closer to the problem, they also are closer to the solution. In reference to returning AFDC and Food Stamps completely to the states, the President said:

This will make welfare less costly and more responsive to genuine need because it will be designed and administered closer to the grass roots and the people it serves.[7]

Federal guidelines attached to federal funding only serve to "bind the hands of state and local officials." [8] The federal government fails in providing initiatives because it is too far removed from the particular circumstances. Former President Nixon explains why state and local officials would address these needs better without federal involvement.

Decisions about the development of a local community should reflect local preferences and meet local needs. No group of remote Federal officials—however talented and sincere—can effectively tailor each local program to the wide variety of local conditions which exists in this highly diversified land.[9]

Promotes Democratic Decentralization

After a third of a century of power flowing from the people and the States to Washington it is time for a New Federalism in which power, funds, and responsibility will flow from Washington to the States and to the people.[10]

Former President Nixon thus introduced the original "New Federalism" in front of a national TV audience in 1969. Conservative ideology since then has consistently claimed that the federal role in domestic programs has harmed possibilities for decentralized decision-making and state and local autonomy. Though the federal grant-in-aid system and the Great Society programs of the 1960's are their immediate targets, the roots of their attacks go back to the New Deal programs of the 1930's and the development of the welfare state.

By decentralizing program responsibilities and access to the excise taxes, the "New Federalism" would give the states complete autonomy in handling the turned back domestic concerns. By accomplishing a complete separation of programmatic duties, state and local officials would be completely accountable for any failure to meet these needs. Citizens could not be given the runaround that results from sharing responsibilities between the different levels of government. Thus, President Reagan introduced his "New Federalism" as a proposal that would make government "again the servant of the people." [11]

NOTES

[1] The proposal has been modified since then. It most likely will not reach Congress for a vote by 1984. The original proposal has been chosen as it most clearly indicates the administration's programmatic vision.

SINGLE EMPLOYER PENSION PLAN AMENDMENTS ACT OF 1983

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. ERLENBORN. Mr. Speaker, today I am joining with our colleague, Mr. CLAY, chairman of the Subcommittee on Labor-Management Relations, in introducing legislation which is needed to help assure the solvency and long-term self-financing nature of the single employer pension plan termination insurance program under title IV of ERISA.

The provisions of the proposed legislation, as described in detail in my colleague's statement, can be seen to represent a modification of the bill which Senator DON NICKLES and I introduced in the 97th Congress. While the new bill contains a number of changes in order to accommodate suggestions made by the various interested parties in hearings over the past several years, the bill by no means can be said to be perfect, nor can it be. As I stated during the debate leading to the enactment of ERISA, the termination insurance program under title IV could only lead to ever escalating costs and, in an effort to contain perceived abuses, ever more restrictive and burdensome regulation of the businesses and plans providing the pension benefits. In line with the inevitable and my earlier warnings, the proposed legislation contains a number of provisions to control costs and continue the self-financing nature of the single employer termination insurance program. While I support the basic thrust of the legislation, the bill contains some provisions which are over-reaching, such as certain restrictions placed on an employer's ability to terminate a single employer plan in a collective-bargaining situation, and will have to be modified if the consensus which is necessary to enact this legislation into law is to be achieved.

Comments and suggestions for change are sought from all affected parties, and in the interest of moving toward an early markup of the legislation, hearings by the Subcommittee on Labor-Management Relations have been tentatively scheduled to be held on September 28, 1983.

While requiring additional refinement, the proposed legislation does contain the kernel of recommendations made by the Pension Benefit Guaranty Corporation which have been generally supported by an outside panel of experts and several generations of PBGC advisory committees.

First, in order to amortize the single employer program deficit currently estimated at $384 million, and to help

keep it from growing to unsupportable levels in the future, the single employer termination insurance premium is increased from $2.60 to $6 per capita.

Second, in order to discourage employers having low net-worth from terminating their underfunded plans and transferring their debts to the other employers supporting the system, the conditions under which a plan is allowed to terminate are tightened up to require that the employer and its control group demonstrate a significant "distress" situation such that without relief the continued viability of the employer and its control group would be threatened. Employers would still be allowed to freeze the accrued benefits under their plans under a standard termination, but the bill would require them to continue to fund their plans until all nonforfeitable benefits have been satisfied.

Third, the law is changed to make contributing sponsors and members of their controlled group liable for up to 5 years—or up to 10 years in select situations involving very large transactions—in the event that the plans for which they were formerly obligated terminate. These provisions are intended to address the situation under present law which allows a controlled group of corporations to spin off a subsidiary and its related pensions liabilities thus removing the controlled group from the reach of the PBGC, in the event the subsidiary terminates its plan. In other cases, the liability to the PBGC can be increased dramatically when a company sells its assets and transfers its pension liabilities to a buyer which is financially weaker than the seller. The proposed legislation contains a number of exceptions to the contingent liability provisions which provide safe harbors in connection with transactions which do not present undue risk to the single employer termination insurance program or its premium payers.

Fourth, in order to protect the PBGC against antiselection the bill contains a provision which gives a plan a lien in the amount of any funding waiver obtained by the plan sponsor prior to plan termination.

Additionally, in order to discourage the termination of underfunded pension plans by ongoing employers, the amount for which an ongoing employer is liable to the PBGC is increased above the present law 30 percent of net worth cap to include a 10-year 10 percent of pretax profits provision. An additional penalty equal to 5 percent of pretax profits for up to 10 years would be payable to a termination trust providing for payment of nonforfeitable benefits above the current level of PBGC guarantees. By discouraging the termination of underfunded pension plans the bill would reduce the administrative costs of the title IV program. Administrative costs would also be reduced under the proposed legislation by streamlining the procedure for closing out fully funded plans. Since the passage of ERISA, almost 98 percent of all terminated plans have been found to be sufficient. PBGC costs in connection with the termination of such plans would be reduced by allowing plan administrators and enrolled actuaries to certify to the PBGC as to their sufficiency.

These changes represent a major restructuring in the single employer termination insurance program under title IV. Their early enactment is necessary in order to protect the financial stability of the program and to avoid the curtailment of benefit guarantees in the future which will become necessary if the changes are not made. With this in mind I encourage all affected parties to limit their demands and provide our committee with suggestions for change which will make the program more workable and viable over the long term.●

TRIBUTE TO HON. JAMES H. QUILLEN

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. DUNCAN. Mr. Speaker, the friends and alumni of Washington College Academy will gather this Friday to pay tribute to our colleague, Congressman JAMES H. (JIMMY) QUILLEN. The occasion will mark the establishment of the Quillen Scholarship Fund at the Academy, the oldest institution of learning west of the Alleghenies. This tribute is an indication of the love felt for JIMMY QUILLEN by the people of the First District of Tennessee. Having worked with him throughout my congressional service, and appeared with him in east Tennessee, I have seen the affection and admiration given to Congressman QUILLEN.

As the following biography shows, it is his hard work and drive which have earned JIMMY this respect. I am certainly proud to be his neighbor and colleague. He has worked as hard in the Congress as he did as a boy in Kingsport, struggling to finish high school. These efforts have been paid off with the love of the First District. I believe the following biography will give an insight of the character and determination of this man.

CONGRESSMAN QUILLEN: HIS STORY

Congressman James H. Quillen is a man who had to struggle for his education. It was a struggle he hasn't forgotten, even though his life's successes long ago eclipsed darker days.

Finishing high school at all was no small challenge for Quillen during the depression-marked days of the mid-1930's. Quillen was born in Southwest Virginia, and the family moved to nearby Kingsport, Tennessee, when he was a child. The young Quillen picked up odd jobs in town, and he worked for free at the local newspaper. It was the latter that he hoped to make his career.

While working his way through Dobyns-Bennett High School, Quillen made $3 a week by cooking and serving breakfast in a restaurant before classes each day. The job meant he had to rise at 3:30 a.m. and walk three miles to work. On Saturdays, he worked in a grocery store till midnight.

In school, he wrote plays and poetry and earned straight A's.

In 1934, he received his diploma and took the first job he was offered—carrying a paste pail in the bindery of Kingsport Press for 25 cents an hour.

He had been offered an appointment to the United States Military Academy at West Point, but felt he couldn't afford to take the opportunity. So, he stayed with the paste pail, 10 hours a day, six days a week.

Then one day his boss asked him to go to a Rotary Club meeting with him and participate in a debate with the latest debate champion from Dobyns-Bennett High School. Quillen won that debate—and a boost in his self-confidence. Feeling that maybe he could do better than the paste pail, he went back to the newspaper and asked for a paying job—this time selling advertising.

He wrote some news stories on the side, and eventually rose to the lofty salary of $21 a week. Finally, at the age of 20, Jimmy Quillen's long-felt ambition took flight. With $42 in his pocket (two weeks' pay), he started his own newspaper.

He wrote his own copy, sold his own advertising, hand-delivered all the bills, collected the payments, kept the books—and made a profit. In the next three years, he sold the Kingsport newspaper, and started another in neighboring Johnson City. He volunteered for the Navy after Pearl Harbor, and finally made it to college—Dartmouth, for a brief indoctrination. He continued publication of his newspaper until he received orders to go overseas, served as an officer on a carrier in the Pacific, and started to learn first-hand about the difficulties of operating a business from halfway around the world.

After his discharge in 1946, he came home. Instinct for identifying the public's desires told him there would be a great demand for new houses. In the post-war era, GI's had come back to the states with the GI Bill in hand, and it looked like supply wouldn't be able to keep up with demand. He bought a couple of lots down the street from the family home, dug the footings himself, and soon sold his first two houses.

Two led to four, four to eight, and eventually the idea of insuring the homes as well as building them. From 1948 to 1954, the businesses seemed to take on a life of their own—so much so that by election time in 1954, Jimmy Quillen was in need of a new challenge.

Friends had been urging him for weeks to run for a seat in the Tennessee legislature. He finally consented to run, but lost the election—at least he thought he did. He had gone to bed election night after hearing a radio report saying he had missed the seat by 67 votes. It wasn't until the next morning that he saw the truth on a newspaper headline: "Quillen Wins By 67 Votes."

Jimmy Quillen has been winning ever since—four terms in the State Legislature, and eleven in the U.S. Congress.

The early struggle to finish high school was worth it—just as Jimmy Quillen always knew it would be.●

RESOLUTION—CALLING FOR RESTORATION OF DEMOCRACY IN CHILE

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. WEISS. Mr. Speaker, last Thursday, September 15, I introduced legislation with seven Members of the House as original cosponsors calling upon the U.S. Government to continue to deny military assistance and to deny all future nonhumanitarian economic assistance to Chile until that country returns to democracy.

Joining us in introducing the same resolution in the U.S. Senate were Senators EDWARD KENNEDY, ALAN CRANSTON, and CHRISTOPHER DODD.

The recent upsurge of political protests and the swift and brutal response of the Pinochet regime should prove to the world and to the Reagan administration that little has changed in the past 10 years in Chile. Human rights are still being violated, political imprisonments continue, and torture is still a common practice as a means of intimidating the Chilean people into silence.

But the massive public demonstrations of the past 2 months show that the spirit of freedom and democracy still cries out among the Chilean people.

It is the spirit of the 25,000 Chileans killed, and 100,000 imprisoned, detained, and tortured by Chilean security forces in the first few weeks following the September 1973 coup.

It is the spirit of Victor Jara, the gifted Chilean folksinger and songwriter. Imprisoned in Santiago's National Stadium along with thousands of other Chileans just after the 1973 coup, Jara was brutally beaten by Chilean security forces who used rifle butts to crush his fingers and break his hands. Jara, although his hands had been destroyed, led the crowds of prisoners in singing the national anthem, whereupon he and countless others in the stadium were gunned down.

It is this sprit that defies the administration's conciliatory approach toward Chile.

It is this spirit which shows the world that it is Pinochet's Chile which should serve as the textbook case of a repressive society.

I urge my colleagues to join me and the original cosponsors of this resolution, Mr. BONIOR, Mr. EDWARDS of California, Mr. HARKIN, Mr. MARKEY, Mr. MILLER of California, Mr. MOAKLEY, Mr. BARNES, and Mrs. SCHNEIDER, to affirm this spirit of freedom of the Chilean people by calling upon Chile to return to democracy.

A copy of the resolution follows:

RESOLUTION CALLING FOR THE RESTORATION OF DEMOCRACY IN CHILE

Whereas September 11, 1983, marked the tenth anniversary of the establishment of military rule in Chile;

Whereas on September 11, 1973, a military coup led by General Augusto Pinochet overthrew the constitutionally elected government of Salvador Allende and brought about the collapse of democratic institutions in Chile;

Whereas in the months following the September 1973 coup, up to 25,000 Chileans were killed by the regime of the President Pinochet;

Whereas in the four days of demonstrations from September 8 to 11, 1983, fifteen Chileans have been reported as killed and over 550 arrested, and between June and September 1983 at least 40 persons were killed by the Chilean Air Forces Forces during public demonstrations of opposition to the regime of Augusto Pinochet;

Whereas during the same four month period, thousands more have been arrested in massive round-ups in working class neighborhoods in Chile;

Whereas the Pinochet regime, in response to the nationwide protests of June 14, 1983, targeted Chile's labor movement in particular, as shown by the dismissal of 31 union leaders and 799 copper workers from CODELCO, the imprisonment of 15 labor leaders by late June, and the arrest of 5 directors of the Coordinadora Nacional Sindical in the first week of July;

Whereas the Government of Augusto Pinochet has been linked by United States investigators to acts of terrorism and assassination in Argentina, Italy, and the United States, and was found "legally culpable" by a United States Federal District Court judge for the September 21, 1976, murders of former Chilean Ambassador Orlando Letelier and Ronni Karpen Moffitt;

Whereas only a fraction of the over 11,000 Chileans exiled by the Pinochet regime since the 1973 coup have been allowed to return to their country;

Whereas the present Chilean constitution grants executive authority to General Augusto Pinochet until 1989 and allows for delays in popular elections until 1998;

Whereas Amnesty International has noted that in recent years there has been a marked deterioration in the human rights situation in Chile, demonstrated by a consistent pattern of arbitrary detention, political imprisonment and killings, and systematic torture; and

Whereas Amnesty International, the International Commission of Jurists, the United Nations Human Rights Commission Ad Hoc Working Group of Chile, the United Nations General Assembly, and the Organization of American States Commission on Human Rights have stated that the regime of Augusto Pinochet has violated basic human rights and political freedoms in Chile since the military coup of 1973 in that country; Now, therefore, be it

Resolved, That until Chile returns to its long tradition of democratic procedures and institutions—

(1) the United States should continue to deny any and all military assistance directly or indirectly to the government of Augusto Pinochet;

(2) the United States should also deny all economic assistance to the government of Chile, including Export-Import Bank and Commodity Credit Corporation guarantees and loans; and

(3) as mandated under section 701(f) of the International Financial Institutions Act of 1977, the United States should oppose all loans and grants to the government of Chile by international financial institutions such as the Inter-American Development Bank, the International Bank for Reconstruction and Development, and the International Development Association, unless such assistance is directed specifically to programs which serve the basic human needs of the people.●

INTRODUCTION OF MULTINATIONAL FORCE IN LEBANON RESOLUTION

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1982

● Mr. ZABLOCKI. Mr. Speaker, the recent increasingly dangerous situation in Lebanon has raised serious questions in this Nation and among many Members of Congress as to the precise role of the U.S. Marines in the multinational force, and how that role fits into overall U.S. policy in Lebanon and the Middle East. The death of four U.S. Marines and the wounding of 27 others and the resulting clear applicability of section 4(a)(1) of the war powers resolution to the Lebanese situation demand action by the Congress.

From the outset of the U.S. force deployment in August 1982 it has been my consistent position that those troops have been introduced into hostilities or into a situation where imminent involvement in hostilities is clearly indicated by the circumstances, thus triggering section 4(a)(1) of the war powers resolution. As Members know, once the President files a report to Congress under section 4(a)(1)—and only section 4(a)(1)—U.S. troops must be removed within 60–90 days unless Congress authorizes their continued presence.

It has been my hope, expressed in both letters to the President and public statements, that, in the collective, cooperative spirit envisioned by the war powers resolution, the President would have filed a section 4(a)(1) report to afford Congress an opportunity to exercise its judgment on this crucial matter.

Fortunately, the war powers resolution was crafted to enable Congress, as well as the President, to determine when a section 4(a)(1) report should be submitted. Acting on that basis, I am today introducing a joint resolution stating that the section 4(a)(1) reporting requirement became operative on August 29, 1983, and authorizing

the continued presence of U.S. Marines in Lebanon, as required by section 5(b) of the war powers resolution.

My decision to introduce this joint resolution is not based in any way on partisan considerations. Rather, I have done so with the conviction that the future course of action in Lebanon must be one decided by the President and the Congress. The war powers resolution was designed to be and is the best legislative vehicle for making that collective decision in a responsible manner.

I have decided to provide for continued authorization of U.S. Marines in Lebanon because I believe that it is necessary and desirable. With appropriate safeguards for their protection, and a firm understanding of their role in a clearly defined U.S. policy toward Lebanon, this authorization will greatly advance U.S. foreign policy objectives in the Middle East. For that very reason I am confident that a majority of the Members of Congress will support this joint resolution.

The resolution I am introducing is not an authorization for open-ended U.S. military involvement in Lebanon. Nor does it hamstring the President's ability to carry out an effective foreign policy. It has a balance of flexibility and control which includes the following:

A congressional finding that U.S. Armed Forces have been introduced into hostilities requiring congressional authorization and a congressional determination that section 4(a)(1) of the war powers resolution became operative on August 29, 1983;

A limitation on the functions of U.S. Armed Forces in accordance with the September 25, 1982 international agreement between the United States and Lebanon, except that this shall not preclude such protective measures as may be necessary to insure the safety of the multinational force in Lebanon. That agreement limits the Marine contingent to the Beirut area, places a ceiling of 1,200 on that force and allows for self-defense;

A semiannual reporting requirement on the status, scope, and duration of hostilities involving U.S. forces, the activities and present composition of the multinational force, the results of efforts to reduce and eventually eliminate the force, how continued U.S. participation in the force is advancing U.S. foreign policy interests in the Middle East, and what progress has occurred toward national political reconciliation among all Lebanese groups;

A declaration by the Congress that other countries should continue to participate in the multinational force, that the United States should promote continuing discussions to bring about the withdrawal of all foreign troops from Lebanon, and that the United States should discuss with the Security Council of the United Nations, on an annual basis, the replacement of the multinational force by a UN peacekeeping force;

A stipulation that U.S. participation in the multinational force will cease at the end of an 18-month period (unless the Congress extends such authorization) and that such authorization shall terminate sooner if all foreign forces are withdrawn from Lebanon (unless the President determines and certifies to the Congress that continued U.S. Armed Forces participation is required after such foreign forces withdraw up to the end of the 18-month period in order to establish Lebanese Government control of the Beirut area), or when the United Nations or the Government of Lebanon is able to assume the responsibilities of the force or upon the implementation of other effective security arrangements in the area;

Provides that nothing in the resolution precludes either the President or the Congress from directing the withdrawal of U.S. forces in Lebanon and that the resolution does not modify, limit, or supercede any provision of the war powers resolution or the requirement in the Lebanon Emergency Assistance Act of 1983 for congressional authorization of any substantial expansion in the number or role of U.S. Armed Forces in Lebanon.

Mr. Speaker, I am well aware there is great concern over the extension of the U.S. military presence for a period of up to 18 months. That concern must be weighed against the likely alternative of not providing such an extension.

The alternative is withdrawal. And the likely consequences of withdrawal are so detrimental as to make that alternative totally unacceptable.

First, U.S. withdrawal from the multinational force will most certainly lead to French and Italian withdrawal and the collapse of the force. Second, the collapse of the force will lead to complete anarchy, the likely disintegration of the Lebanese central government and, for all practical purposes, the end of Lebanon as a country for the foreseeable future. Third, with the political disappearance of Lebanon, the prospects for the achievement of a comprehensive peace in the Middle East, the primary U.S. foreign policy objective in the region, will have been effectively foreclosed.

In addition to these vital considerations, there are three other sound and valid reasons why the 18-month period was chosen. These reasons are:

1. Eighteen months is likely to be long enough to prevent Syria from questioning United States resolve to maintain troops in Lebanon and wait out the Marine presence and instead force it to negotiate in earnest for a comprehensive settlement in Lebanon.

2. This length of time will carry the authorization for troop involvement past the 1984 elections, thus insulating the U.S. participation from partisan wrangling and election-year politics.

3. The next administration will have an opportunity to review the situation without time pressure. Continuity will also be demonstrated since the U.S. Marine presence will remain over the course of two different administrations.

I am pleased to say that this joint resolution was crafted with the active and direct participation of the House leadership. I urge my colleagues to support this joint resolution as one that is in keeping with U.S. foreign policy interests and constitutionally mandated congressional prerogatives.●

STRENGTHENED EXPORT CONTROLS IN THE WAKE OF KAL 007

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, on September 16, 1983, the Republican study committee, of which I am chairman, held hearings on the Soviet destruction of Korean Air Lines flight No. 007. My colleagues and I were fortunate to have as witnesses at the hearing, the following persons:

Hon. Fred Ikle, Undersecretary of Defense for Public Policy;

Hon. Lawrence Brady, Assistant Secretary of Commerce for Trade Administration;

Dr. Ray Cline, of the Georgetown Center for Strategic and International Studies;

Mr. John Fisher, president, American Security Council;

Dr. Miles Costick president, Institute on Strategic Trade;

Mr. Burton Pines, vice president, the Heritage Foundation;

Mr. Paul D. Kamenar, the Washington Legal Foundation;

Capt. Thomas Ashwood, vice president, Air Line Pilots Association; and

Dr. Kyo Ryoon Jhin, representing the League of Korean Americans, who was accompanied by Mr. Hong An, executive director of the League of Korean Americans.

The witnesses proved to be an excellent selection. They were extremely knowledgeable and articulate. They provided an enlightening and sometimes moving explanation of what happened over Sakhalin Island 2 weeks before, why it happened, what the Soviet crime means to the United States and what the United States should do about it.

My colleagues and I, who were present at the hearings, want to share with Members some of the information we were fortunate to receive. I am entering into the RECORD the written

statement of Assistant Secretary Lawrence J. Brady:

I am pleased and honored to have the opportunity to appear at today's special hearing on what an appropriate U.S. response should be to the shooting down of KAL flight 007.

I am honored because I owe a personal debt of gratitude to Congressman Larry McDonald. Back in 1979, when I was forced to resign my post at the Commerce Department, Congressman McDonald was the first member of the House Armed Services Committee to step forward to ask for a full accounting of my charges that NATO security was being needlessly jeopardized by improvident technology transfers to the communist world.

Thanks to his crucial support, the Subcommittee on Investigations began a series of hearings which revealed for the first time in many years the true military costs of trading with potential adversaries. The hearings established a record which convinced Congress that same year to pass legislation strengthening considerably the export control system.

Congressman McDonald proved to be an effective and forceful advocate of strengthened controls, and he impressed me as a true patriot, a man who always put loyalty to country ahead of personal ambition or gain. Thanks in great part to his efforts, the new Administration was able to make major gains in placing our trade relations with the Warsaw Pact nations on a more sensible footing.

Congressman McDonald was a stern critic of the notion we should seek to enmesh ourselves in a "web of economic interdependence" with sworn adversaries. He believed our generosity in transferring tens of billions of dollars of credits and advanced technology would be repaid mainly with the coin of aggression—not with hard currency.

He believed the Soviets would take our most advanced equipment and manufacturing techniques, purchased ostensibly for civilian purposes, and apply them whenever feasible to modernizing Warsaw Pact weapons systems so as to tilt the balance of power against the West.

He believed the Soviets would utilize their relationships with the international business community primarily to lull the Free World into a false sense of security so that we would continue to expand our trade even while Soviet and Soviet-proxy troops threaten our vital interests in Central America, the Middle East, Southeast and Southwest Asia, and across the breadth of Africa.

He knew it was wrong to assume that an economically more powerful U.S.S.R. would come automatically to accept our values, our belief in the free enterprise system, and our commitment to individual liberties.

The shooting down of an unarmed civilian airliner shows just how little the Soviets have absorbed our standards, while they profit from our trade. The recent tragedy forces us to search for an appropriate response.

President Reagan was quick to speak out forcefully in strong condemnation of this terrible deed. He appealed immediately to the allies to join us in a measured range of sanctions in the area of civil aviation which have commanded broad international support.

He also pledged the U.S. would redouble its efforts to control the flow of strategic and military sensitive technologies to the U.S.S.R.

I can think of no finer tribute to Congressman McDonald than to intensify efforts to stem the hemorrhaging of our strategic technology which boosts the Warsaw Pact's warmaking capabilities. To this end the President is determined to achieve concrete results in our ongoing discussions with the allies concerning the security dimensions of East-West trade policy.

A top priority is assigned to our COCOM list review. Not only will many advanced technologies be added to the control list, we are also requesting a substantial upgrading of the COCOM secretariat. We are prepared to do whatever it takes to insure that COCOM has the resources to get the job done.

We seek our allies' support for new controls on oil and gas technology equipment vitally needed by the Soviets for their crash energy development program, as well as for some military purposes. We presented the U.S. control proposal to the allies in June and will be holding a bilateral round of discussions with them in October, preparatory to a special meeting of COCOM this January in Paris.

We have achieved substantial results in eliminating preferential credit terms of the U.S.S.R. The allies agreed to move the U.S.S.R. into a "developed country" category, insuring that official credits can be offered only at rates offered to other industrialized nations. The United States, of course, has furnished no official credits to the U.S.S.R. since the Jackson-Vanik amendment was adopted in 1974. This move means the Soviets, formerly charged rates at 7-8 percent, have since July of last year been forced to pay 12.5 percent.

In addition, through discussions in the International Energy Agency, the allies have agreed to avoid energy dependence on potentially unstable sources of supply and to accelerate the development of Western energy alternatives to Soviet natural gas. Our intent is to preclude expansion of the Siberia-West Europe natural gas pipeline network to more than a single export strand. If we are able to develop cost-competitive alternative sources of supply, the Soviets will be deprived of their only major opportunity to improve a bleak hard currency earnings picture. Soviet hard currency earnings could be diminished by as much as twenty-five percent beginning in the early 1990's as a result of our policy.

In short, the Soviets are paying a price for internal repression and external aggression, a price that will go far higher if they cannot learn to live at peace in the civilized community of nations. Through their outrageous acts—the invasion of Afghanistan, the destruction of human rights at home, the imposition of martial law in Poland, and the commission of this latest outrage against humanity—the U.S.S.R. has forced the West to react with a series of defense and economic measures which demonstrate our unwillingness to accept this conduct.

To complement our East-West trade work program with the allies, the Administration has submitted to Congress legislation extending the Export Administration Act which provides the President adequate authority to impose effective national security and foreign policy controls.

The President must retain this authority if our contributions to the Warsaw Pact's military buildup are to be limited, or if he is to have the ability to apply new economic sanctions against the Soviets or their surrogates.

There are voices in Congress who would strip away the President's power here, just as they would tie his hands in responding militarily to any foreign challenge. These voices of isolationism would have the President and the country stand virtually powerless before the forces of aggression, incapable of using military or non-military instruments of diplomacy. They actually seem to believe that the world will be a safer place only when the democratic nations forswear any forceful or meaningful measures of reaction. We clearly cannot allow such voices to prevail.

For this reason, the Administration needs your support in the weeks ahead as Congress begins work on the Export Administration Act, in order to convince the American people and our allies that we are determined to shoulder the responsibilities before us.

From 1969 to 1979 our policies in administering the EAA were liberalized dramatically to facilitate the expansion of East-West trade. As a result, during the so-called era of detente, the Warsaw Pact's military infrastructure received a direct injection of our advanced computers, machine tools, and manufacturing systems.

In 1979, following the revelations about military production at the giant Kama River truck plant, Congress took some initial steps to place a national security emphasis back in the program.

Unfortunately, this year the progress so painfully achieved could be undone. There are proposals before Congress which, if enacted into law, could have serious adverse national security and foreign policy consequences.

These new proposals could weaken the controls system to the point where the worst licensing abuses of the past would be replicated on a far larger scale. Unlike the 1970's, however, when the alliance had a more favorable conventional and nuclear military posture with respect to the Warsaw Pact and thus could better tolerate the West-East leakage of strategic technology, today there are real questions whether Free World defense budgets can absorb the costs of compensating for capabilities we have bestowed on our adversaries. In other words, technology flows to the Warsaw Pact may shift the military balance against us at the margins in ways which cannot be offset by increased defense expenditures on our part. This certainly is certainly not a happy scenario for defense planners.

Let me now take just a moment to discuss the most troublesome provisions in the bill reported from the House Foreign Affairs Committee.

ELIMINATION OF COCOM LICENSING

The House Committee bill significantly weakens our enforcement program and our discussions with the allies on coordination of policy by eliminating certain licensing requirements for exports to COCOM countries, which consist of the NATO countries minus Iceland plus Japan. It states that a validated license can only be required for exports to certain end-users rather than the country as a whole. This eliminates the "paper trail" needed for effective enforcement and is administratively infeasible. Commerce would be required to identify and publish a list of foreign proscribed end-users. Having to establish the legitimacy of all potential end-users in advance and against the whole spectrum of controlled items would divert resources, be of limited effectiveness and generate controversy over the "blacklisting" of companies. Furthermore, virtually all other COCOM countries

have licensing requirements for transfers among themselves. At the very time the United States is seeking to harmonize the licensing procedures within COCOM, we should not be asked to take a unilateral step away from harmonization because of this provision.

MANDATORY ELIMINATION OF UNILATERAL CONTROLS

The bill also requires that militarily sensitive technology and equipment which has been approved for export to a country group for a one-year period must be decontrolled completely, unless Commerce is able to prove that a particular end-user should not receive such exports.

This provision raises many of the same problems with respect to national security and administrative effectiveness as the elimination of COCOM licensing. It would require compiling a list of proscribed end-users within that country group. More importantly, there would be no way administratively to assure that a product decontrolled for one country group would not be diverted to another country group for which controls on that product continue to apply. We would also lose the ability in particular transactions to monitor end-users and end-uses in decontrolled country groups, increasing the chances that Soviet "front" companies would be able to illegally obtain military technology. The effectiveness of the licensing system would therefore be severely undercut.

FOREIGN AVAILABILITY PROVISIONS WEAKEN MULTILATERAL CONTROLS

The use of the foreign availability rationale in the Committee bill to decontrol strategic technologies and equipment would also have a very adverse impact on our licensing program. The bill states that negotiations must be conducted to eliminate the availability from foreign sources of items controlled for national security purposes; if the availability is not eliminated within six months the item must be decontrolled.

We agree that fair enforcement of controls requires multilateral cooperation, and we are committed to making every effort to eliminate foreign availability. Requiring negotiations to do this is entirely appropriate. But mandating that national security controls on such items be lifted if foreign availability is not eliminated within six months could have serious ramifications. We might, as a consequence, be required to unilaterally decontrol items on the COCOM control list which are available from other foreign sources even if our negotiations to control the items have not been completed. This would damage our position in COCOM. In addition, although we appreciate the concern that U.S. businesses should not be precluded from selling their products overseas if foreign competitors are not similarly restricted, our discretion to maintain U.S. controls on sensitive items under certain circumstances should not be eliminated.

EXTRATERRITORIAL AUTHORITY MUST BE RETAINED

Finally, the bill removes the President's authority to impose foreign policy export controls extraterritorially without prior approval of Congress. This provision undermines the President's ability to conduct U.S. foreign policy. For example, it severely limits the effectiveness of antiterrorist foreign policy controls which require extraterritorial application of U.S. laws to be effective. Additionally, the provision could be read to eliminate re-export controls as well. Controls on re-exports are necessary to ensure that our export controls are not circumvented by shipments through third countries. Re-export controls must be maintained if our controls are to achieve their intended purpose.

In conclusion, I again want to emphasize the important contributions Congress can make in working with the Administration to advance our broad strategic trade goals. I also would like to commend the Republican Steering Committee for holding this hearing, and I wish you every success in your endeavors.●

HE KEPT US OUT OF PEACE

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. JACOBS. Mr. Speaker, here is a letter I received from Mr. Judson F. Haggerty of Indianapolis, Ind. It seems fortunate that he and Mark Twain were able to get together at this critical time when the administration seems so prone to compel history to repeat itself. Our country should go to war when we have to, not just when we have a chance to.

HAGGERTY & HAGGERTY,
ATTORNEYS AT LAW,
Indianapolis, Ind., August 1, 1983.

Congressman ANDREW JACOBS, Jr.,
House Office Building,
Washington, D.C.

DEAR ANDY: I have come up with Reagan's campaign slogan for '84—"He Kept Us Out of Peace." This latest foolishness in Central America reminds us of Mark Twain's warning:

"The loud little handful—as usual—will shout for the war. The pulpit will—warily and cautiously—object—at first; the great, big, dull bulk of the nation will rub its sleepy eyes and try to make out why there should be a war, and will say, earnestly and indignantly, "It is unjust and dishonorable, and there is no necessity for it." Then the handful will shout louder. A few fair men on the other side will argue and reason against the war with speech and pen, and at first will have a hearing and be applauded; but it will not last long; those others will out shout them, and presently the anti-war audiences will thin out and lose popularity. Before long you will see this curious thing: the speakers stoned from the platform, and free speech strangled by hordes of furious men who in their secret hearts are still at one with those stoned speakers—as earlier—but do not dare to say so. And now the whole nation—pulpit and all—will take up the war-cry, and shout itself hoarse, and mob any honest man who ventures to open his mouth; and presently such mouths will cease to open. Next the statesmen will invent cheap lies, putting the blame upon the nation that is attacked, and every man will be glad of those conscience-soothing falsities, and will diligently study them, and refuse to examine any refutations of them; and thus he will by and by convince himself that the war is just, and will thank God for the better sleep he enjoys after this process of grotesque self-deception."

Yours very truly,

JUDSON F. HAGGERTY.●

BOAT REFUGEES' HORRORS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. SOLARZ. Mr. Speaker, I would like to bring to the attention of my colleagues the following article by Roger Winter which recently appeared in the New York Times regarding piracy in the Gulf of Thailand.

Brutal atrocities, including murder, rape, kidnaping, and robbery, continue to be inflicted upon innocent refugees fleeing from Indochina in search of freedom by boat. In the first 3 months of 1983, 53 percent of the boats arriving in Thailand were attacked—on an average of 2½ times each.

Some progress has been achieved in curbing these criminal attacks, but the level of brutality remains intolerable. I agree with Mr. Winter's conclusion that "the world community can do much better." I commend Mr. Winter and the United States Committee for Refugees, which he directs, for the leadership and humanitarian concern which led them to recently send a delegation to Southeast Asia to study what could be done to protect these innocent refugees.

BOAT REFUGEES' HORRORS

(By Roger P. Winter)

WASHINGTON.—The flow of Vietnamese boat refugees has fallen sharply since 1979, yet there remains a steady leakage across the Gulf of Thailand and the South China Sea of those who have experienced or fear repression by Vietnamese authorities. Today's refugees face the same dangers as their predecessors; rough seas and unseaworthy boats; Vietnamese Navy patrols; and, in some cases, an inhospitable welcome on the receiving shores. But these dangers pale next to the horror of pirate attacks. The pirates are not of the swashbuckling variety, but rather common thugs and murderers on the high seas.

More than two-thirds of all Vietnamese refugee boats that land in Thailand and Malaysia are attacked by pirates, most more than once. "Attack" in a term that covers a multitude of atrocities. Theft of whatever valuables the refugees have brought with them is universal. Frequently the attackers also steal the boat's motor or otherwise disable the craft, causing enormous suffering and loss of life. However, violence is the most vicious of all.

On May 6, for example, a boat carrying 31 Vietnamese refugees was attacked twice by Thai pirates. Twelve of the refugees were knifed or clubbed to death and thrown overboard. Three young women were abducted; the possibility that they survived is minimal. Twelve more people drowned when the refugee boat sank while being towed by the pirates. Only four men survived. In this incident it is not known whether rapes occurred. The normal pattern, however, is for young women to be repeatedly raped, sometimes dozens of times. If abducted, they and any young children with them are usually thrown overboard; a few are sold into prostitution.

Of the scores of boat refugees I interviewed recently as part of a United States Committee for Refugees team in Thailand and Malaysia, only one traveled on a boat that was not attacked during the journey. In every case, the pirates were Thai. In most cases the pirates were armed, but in almost no cases were the refugees armed. Sometimes, the pirates appeared to be common fishermen opportunistically attacking a vulnerable target.

Many boat people do not live to tell their stories. Those who do are carefully debriefed by United Nations authorities. What emerges is a picture of mayhem on the high seas involving unarmed refugees that is, I believe, unequaled anywhere in the world.

No one disputes the evidence—not the Thai Government, the United Nations or the United States Government. But no one stops the attacks.

The Thai Government operates a small, marginally effective antipiracy program in the Gulf of Thailand. The $3.6 million used in this effort last year was provided by a dozen nations, the United States being the largest donor.

The Thai Navy uses decoy boats, spotter planes and fast patrol boats to cover an area of 18,000 square miles. With only one unit of each type on daily patrol and many attacks occurring outside the project area, the deterrent effect, while perceptible, is minimal. A team of experts in marine patrol and interdiction recently analyzed the Thai effort and made recommendations to the United Nations High Commissioner for Refugees. At the prompting of Representative Stephen Solarz, Democrat of New York, Congress has appropriated $5 million to contribute to this and related efforts, rightly recognizing that these refugees are "our" people—individuals who have suffered for their identification with the United States and South Vietnam during the Vietnam War.

Of the hundreds of refugees we interviewed, almost all indicated that they knew from Voice of America broadcasts or other sources that pirate attacks should be expected. They also knew it was possible, if they landed in Thailand, that they would be interned for a period of years without hope of resettlement by Thai authorities seeking to eliminate the flow of boat refugees. We asked everyone, if, having emerged from the trauma of attack and impending internment, they would again attempt to flee Vietnam. In every case but one they answered with a clear yes. The one exception was a woman who had watched her 15-year-old daughter raped and abducted, probably never to be seen again. To her, the cost of freedom had been too high.

For refugees, the cost of freedom is always high. But all of us must agree that pirate attacks exact an inhuman price. Regardless of politics, the entire world has a vested interest in stamping out ruthless violence. It is intolerable for the civilized world to allow or to ignore such violence against refugees or any other peaceable people.

The world community can do much better.●

ALIEN: YURIY ANDROPOV

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. FIELDS. Mr. Speaker, when Yuriy Andropov ascended to the general secretaryship of the Communist Party of the Soviet Union last year, and subsequently became President of the U.S.S.R., the Western media was quickly engulfing the free world with false portraits of Mr. Andropov. If one were gullible enough to believe the reports and feature articles, one would have accepted Yuriy Andropov as a kind, tolerant, gentle, likeable connoisseur of Western literature and jazz music.

Fortunately a number of articles and books have recently been coming into print which present a more realistic look at Mr. Andropov and teach something about Soviet society and the power processes at work inside the party leadership. Two such books are "Andropov: New Challenge to the West" (by Beichman and Bernstam) and "The Russian Version of the Second World War" (edited by Graham Lyons), both of which are reviewed in fall, 1983 issue of the Heritage Foundation's Policy Review.

Mr. Speaker, the reviews follow:

ALIEN

(By Stephen Haseler)

Andropov: New Challenge to the West, by Arnold Beichman and Mikhail S. Bernstam (New York: Stein and Day Publishers).

The Russian Version of the Second World War, edited by Graham Lyons (New York: Facts on File Publications).

It was inevitable that much of the Western media, together with the remnants of the Western foreign policy establishments, would attempt to portray a new boss in the Eastern bloc both as a force for stability and as a Communist with a human face. Yuri Vladimirovich Andropov, who ascended to the general secretaryship of the Communist Party of the Soviet Union (CPSU) on November 15, 1982, and subsequently became president of the U.S.S.R., was simply the beneficiary of a Western need. Whoever had won the tussle to succeed Brezhnev would have been accorded the same lenient treatment.

Pleasant characteristics—a certain liberality, a measure of tolerance, a lack of fanaticism, and the like—would have been attributed to party leaders like Viktor Grishin, Vladimir Dolgikh, Mikhail Gorbachev, or Mr. Andropov's most serious rival for the post, Konstantin Chernenko. Even Mr. Andropov's predecessors at the head of the Soviet security apparatus—the odious Genrikh Yagoda and the repugnant Lavrenti Beria—had they been born later and succeeded to the top (rather than being executed), would have lived to see the gentler side of their natures paraded before Western eyes.

A world both hungering for stability and fearing war quite naturally wants to believe the best of the man placed in authority over the globe's most powerful military machine. And the trivial and often gullible media give people what they want. Also, there is present in the aftermath of any Kremlin succession, when public attention is focused directly though fleetingly upon the rulers of the Soviet regime, a generalized tendency to contain the popular anti-Communist sentiment in the West that might take hold if the record of the new leader were properly scrutinized.

BEHIND THE MASK

Consequently, the KGB disinformation network hardly had to work overtime on Yuri Andropov's image. An impression of a man of Western tastes who like American jazz—and for a separate generation the tango as well—emerged quite smoothly. The man of intellect and wide sympathies was easy to sell and package.

There was, quite naturally, something of a minor reaction to all of this among highbrow conservative circles within the West, but the initial image flickers on, and some seven months after the event a correspondent for the New York Times can refer to Mr. Andropov, without a shred of evidence or the use of named sources, as "said by his associates to be more cosmopolitan than his predecessors."

In this environment it is refreshing to be able to turn to the first serious account of Mr. Andropov's background to appear in book form. Andropov: New Challenge to the West is a political biography of the new Soviet chief. Mr. Beichman and Mr. Bernstam have produced a scholarly yet timely account of the rise and rise of the office clerk from Stavropol; and in so doing they provide the reader with intriguing glances not only into Mr. Andropov's background and character but also into the nature of the Soviet elite, its system of recruitment, its patterns of rewards and punishments, and the sheer ruthlessness, brutality, and luck needed to survive and prosper within it.

Mr. Andropov worked his way through the Komsomol (the Russian Communist youth organization) and at the age of 23 was working directly under the section of the NKVD (a predecessor of the KGB) that oversaw the Volga construction project and directed the slave labor that built it. During this period the future Soviet chief with liberal tastes evidently worked closely with two of the worst Stalinoid apparatchiks, Yacob Rappoport and Sergei Zhuk, both referred to in some detail in the second volume of Solzhenitsyn's Gulag Archipelago. Mr. Beichman and Mr. Bernstam argue that having worked closely with these two was "like having worked for Heinrich Himmler and Adolph Eichmann, in the later Nazi period." And Mr. Andropov was promoted. Later, at age 26, we see him leading, according to the biography, "a team sent to terrorize the population of the newly established Karelo-Finnish Republic."

Mr. Beichman and Mr. Bernstam develop a portrait of the young Mr. Andropov that is, to say the least, unsavory. Their Mr. Andropov is at home in the Stalinesque world of slave labor and terror, a guileful operator in the lower reaches of the Communist system, a Komsomol opportunist carefully developing contacts with patrons in the party in Moscow and in the NKVD. The biographers tell us little about the personal life of the aspiring Mr. Andropov—indeed there is hardly anything known about it—but an investigation into this area would be fruitful, for the new Soviet chief, the man of Western tastes and liberal outlook, hardly derived such human sensibility from his official life.

ONE OF THE GANG

One particularly intriguing aspect of Mr. Andropov's rise from local and regional "politics" to the center of events is revealed in this readable biography. Mr. Andropov was evidently a junior member of what Mr. Beichman and Mr. Bernstam discern and describe as a brotherhood within the Communist party, a "loosely organized hierarchical group within the party, one with its own rules, its own traditions and aspirations, a Marxist-Leninist brotherhood of power and strategy." This group included such figures as Mikhail Suslov, Brezhnev, Nikolai Patolichev (Mr. Andropov's patron), Frol Kozlov, and Boris Ponomarev. After the Second World War this brotherhood began to take up key positions in the party apparatus, and in 1952 they began preparing, with Stalin, a new wave of terror and another party purge. But the brotherhood evidently received a serious setback after Stalin's death. The coalition of Georgi Malenkov, Beria, and Khrushchev, and then the emergence of Khrushchev, virtually exiled Mr. Andropov from the outer ring of power, and he was on his way to the Budapest embassy.

The biographers suggest, however, that the brotherhood succeeded in making a comeback as Khrushchev's power waned, and that the key figure was the austere Suslov, who was able to place his client Mr. Andropov into a seat in the party secretariat following the Cuban missile crisis. By 1967, with Brezhnev and Suslov and Mr. Ponomarev increasing their reach and power, the brotherhood was able to secure for Mr. Andropov both a candidate membership in the Politburo and the control of the KGB.

The authors argue that the gang around Suslov, a coterie in which Mr. Andropov was playing an ever-increasing role, was never at home with the destalinization process attempted in the fifties, and that the Khrushchev period was, in the words of a key sentence in the book, "in the nature of a long transition between Stalin and the Brezhnev-Suslov coalition." The brotherhood also disliked the party line, still in force years after Khrushchev's ouster, that no reference should be made in public to the NKVD, Stalin's instrument for mass terror. Yuri Andropov, obviously hiding his liberal tastes, became so frustrated with this state of affairs that he made an extraordinary speech as early as 1967 that, in effect, resurrected the reputation of the NKVD.

MILLENARIAN PSYCHOPATHS

Here was the newly installed KGB chief showing his real colors and speaking for a gang that saw clearly that Communist party power rested securely upon "state security organs"—the NKVD, the NKGB, the MGB, and their present version, the KGB—from day one of the takeover in 1917.

Mr. Beichman and Mr. Bernstam have not only set out to put before their readers a detailed biographical sketch of Yuri Andropov; obviously, they are also attempting a much larger task: to weaken or destroy the Western intelligentsia's fatal attraction to the notion that Soviet leaders are the same kind of species of political being as our own politicians and that they are understandable in Western terms. Robert Conquest, in an introduction to the political biography, argues, "There are those in the West who would simply have us ignore the historical and psychological background of men like Andropov. They would pay no attention to the fact that he and those like him are the products of a history quite alien to our own and are the exemplars of a political psychology of a type hardly seen in the West outside small sects of millenarian psychopaths."

For those who remain, after reading this powerful book, unconvinced about Mr. Conquest's thesis that "them" and "us" are utterly different and distinct, I can recommend an intriguing little book entitled "The Russian Version of the Second World War," edited by Graham Lyons. In his book, published in 1976, Mr. Lyons has compiled an account of the Second World War as seen through the eyes of Soviet authors of Russian schoolbooks. Naturally, things being what they are, these schoolbooks amount to the official history of the war according to the Soviet party. They are deeply instructive.

Any Soviet, or indeed Russian, interpretation of the events of the Second World War is bound to be distinct from those prevalent in the West. Among normal states this is certainly the case: The American view presented in the schools no doubt differs significantly from that of the British, and the British from that of the French. As a young Englishman, I was brought up to believe that we British virtually won the war singlehandedly, that the Americans came in late, at the last moment as usual, that the French let us down in 1940, and so forth.

These impressions were culled from schoolbooks, from home life, and from movies. However, these simplistic and distorted notions did not last long as I, together no doubt with my generation in other democratic countries, gained access to other points of view, read more scholarly interpretations, and traveled. There was certainly no official view of the Second World War imposed upon me, and there was also a good deal of plain old anti-British sentiment in many of the schoolbooks. Just as American schoolchildren today are instructed in the wickedness of the American war in Vietnam, so were British schoolchildren told about the evils of the British Empire.

These points need to be borne in mind when one reads *The Russian Version.* It is not actually the Russian version; it is rather the Soviet Communist party version, a point strangely omitted by the editor. Furthermore, it is the only version available to any Soviet citizen.

THE FRATERNAL SOVIET FAMILY

But the main interest in this small book lies in some of the breathtaking assertions made by Yuri Andropov's KGB as it helped prepare and approve this history. Let us take the official account of the Nazi-Soviet pact, which is called, interestingly, the Soviet-German Non-Aggression Pact. It is argued that the Soviets were right to sign because the pact "enabled the Soviet Union to avoid war on two fronts and to gain time to strengthen the country's defenses." Evidently, "the Soviet government realized that Hitler had not given up his plans for war against the Soviet Union, and his proposal was a routine manoeuvre of the Facist leadership."

Following the pact, "The Nazis could not be allowed to reach the Soviet border . . . This is why in pursuance of its liberation mission the Soviet Army marched into the Western Ukraine and West Byelorussia, where it was enthusiastically welcomed by the population." Then, "Throughout October 1939, democratic elections were held in the newly liberated areas to people's assemblies. Acting on the will of the people, these assemblies proclaimed Soviet power and requested the Supreme Soviet to admit Western Ukraine and Western Byelorussia in the fraternal family of Soviet nations. The Supreme Soviet complied."

The Soviet invasion of Finland, described as "armed conflict with Finland," is treated in the following way: "The Soviet state was faced with the acute problem of further strengthening its security, in particular on the frontier with Finland . . . At the end of November 1939, artillery fire directed in provocation against our territory from the Finnish side forced the Soviet government to take retaliatory measures. Thus Finnish reactionary forces, incited by Fascist Germany and the other imperialist powers, unleashed war against the Soviet Union."

The incorporation of the Baltic states into the Soviet system is dealt with in the following way: "The German invasion of Poland also added to the danger of a Nazi attack upon the Soviet Unon from the Baltic shore . . . There was the danger that they [the Baltic states] would become German vassal states . . . In view of this the Soviet government approached the Baltic governments with the offer of mutual assistance treaties. The Soviet proposals were met favorably by the peoples of these countries, and their Governments gave their consent . . . The treaties fortified the defenses of the Soviet Union and the Baltic republics."

One is tempted, even in the medium of a review, simply to reproduce quote after quote from "The Russian Version," and without comment. Soviet "historians" can rightly argue that it was the Soviet Union that bore the brunt of the fighting and the horrow, and there is now a preponderance of Western opinion that would agree with them. But the sheer Orwellian doublespeak and the "big lie" technique that infuse this Russian version on so many other fronts take the whole issue beyond rational argument.

The madness of it all is that the Soviet historians who wrote this version may even believe in it. Can Robert Conquest be gainsayed when he argues that men like Yuri Andropov are "products of a history quite alien to our own"?

SINGLE-EMPLOYER PENSION PLAN AMENDMENTS ACT OF 1983

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. CLAY. Mr. Speaker, today my distinguished colleague from Illinois, Mr. ERLENBORN, and I are introducing the Single-Employer Pension Plan Amendments Act of 1983, which amends the Employee Retirement Income Security Act of 1974 (ERISA) and makes conforming changes in the Internal Revenue Code of 1954. The bill is urgently needed to put the Pension Benefit Guarantee Corporation (PBGC), the agency which insures that workers get their private pensions when their companies are in financial difficulty, back on a sound financial footing.

The bill would strengthen the PBGC program in two significant ways: by raising the insurance premium for single-employer plans from the current $2.60 per year per plan participant to $6 and by restructuring the single-employer insurance program to limit access to PBGC assistance only to those cases in which workers' pensions are jeopardized because their employers are in genuine financial difficulty. No changes to the multiemployer insurance system are made by this bill.

Over a year ago, the administration asked Congress to approve the single-employer premium increase but the business community strongly objected to the increase unless the system was reformed. At the request of Congressman ERLENBORN, the former chairman of the Subcommittee on Labor-Management Relations, Phillip Burton, agreed to defer action on the premium increase request until the necessary reforms were developed and could be enacted at the same time.

Few dispute the need for reform. The problem is deciding what type of reform is necessary and how to balance the conflicting interests of providing strong Federal controls to assure the least possible risk to the PBGC insurance system while at the same time permitting private sector business decisionmaking processes to proceed undisturbed. For at least 3 years, representatives of big and small business, organized labor, and the administration have been struggling to reconcile these competing interests and produce a reform package that all could support. Although they are very close to achieving consensus, a handful of outstanding issues remain.

Because Congressman ERLENBORN and I are committed to assuring both the premium increase and reform measures are enacted this year, we recently instructed the subcommittee staff to prepare a bill addressing to the greatest extent possible the concerns of all parties and identifying for us the issues which remain unresolved.

We are most concerned that 3 years have passed and no one has been willing or able to make the hard choices which are necessary to forge consensus. As elected policymakers, the Members of Congress have a responsibility to undertake that task when the private parties are unable to agree. And that is what we have done in this bill.

While I believe this is a good bill, I have no illusions that it meets all the objectives of all the parties who have been working hard on this issue for so many years. If each of us could write with a clean slate, none of us would pen this precise bill. But the longer we delay making these essential changes, the greater the financial pressures on the insurance system.

We invite the administration and the single-employer pension community as a whole to work with us to refine this bill. We have identified particular areas of concern in the summary which follows. We intend to work quickly. Enough time has gone by and the problems are well-known. The Subcommittee on Labor-Management Relations will hold a hearing on this bill on September 28, 1983, in room 2261 of the Rayburn House Office Building at 10 a.m. Shortly thereafter the subcommittee will mark up the bill. We urge all affected parties to share their comments and suggestions with us as soon as possible so that, working together, we may enact this urgently needed legislation this year.

SUMMARY OF THE SINGLE-EMPLOYER PENSION PLAN AMENDMENTS ACT OF 1983

GENERAL POLICY OBJECTIVES

The overall policy objectives of the bill are to encourage the maintenance and growth of single-employer defined benefit plans while at the same time increasing the likelihood that workers receive their promised pension benefits, to assure that unfunded pension liabilities are transferred onto the termination insurance system only in cases of severe business hardship, and to put the termination insurance system back on a fiscally sound basis by raising the single-employer plan premium and tightening the rules governing both access to the insurance system and liability upon plan termination.

DEFINITIONS

For purposes of clarity and consistency, key terms used throughout the bill and ERISA itself are defined in section 102 of the bill. Among those terms are contributing sponsor, employer, and controlled group.

PREMIUMS

Effective for plan years beginning after December 31, 1982, the single-employer pension plan termination insurance premium will be $6.00 per participant per year. A special payment rule is provided for plans which may have made their payments to PBGC for this year at the time the bill is enacted. In addition, the process by which Congress may adopt any future premium increases is changed from a concurrent to a joint resolution procedure. Finally, the Congressional Research Service (CRS) is directed to study the premiums established for single-employer plans under Title IV of ERISA and report to Congress any legislative or operational recommendations for change not later than two years after date of enactment of the bill. CRS will be assisted in its study by an Advisory Council consisting of individuals expert in these matters representing single-employer plan sponsors, employee organizations and the general public (Section 103).

TERMINATIONS BY PLAN ADMINISTRATORS

Sections 104 through 106 of the bill provide the framework for single-employer plan terminations initiated by the plan administrator. Plans may terminate only under a "standard termination" (new section 4041(b) set out in section 105) or under a "distress termination" (new section 4041(c) set out in section 106).

The general rules which apply to both a standard and distress termination are in new section 4041(a)(Section 104) and require prior notice and other preconditions to termination in the case of certain collectively bargained plans in which coverage of participants is specifically bargained and embodied in collective bargaining agreements or plan documents.

A. Standard termination

This type of termination is available to all contributing sponsors regardless of financial condition and does not require PBGC approval. Certain procedural requirements must be met, however, and certain obligations to employees may not be abrogated. Under a standard termination, future benefit accruals cease but additional service beyond the termination date must be counted for vesting and eligibility purposes. This is generally a codification of the current practice permitted by the Internal Revenue Service (the so-called "shallow freeze"). Cessation of benefit accruals outside of a standard termination will no longer be permitted.

Subsequent to a standard termination, contributing sponsors and members or their controlled groups will be required to fund the plan under the normal funding rules until the plan is fully funded. Full accrued benefits would continue to be paid after a standard termination. Faster funding would be required if the plan did not have enough money to pay benefits when due.

A plan could only close out its affairs when it had sufficient assets to discharge all vested liabilities. This is consistent with the overall policy goal of the bill to increase the likelihood that participants receive their full promised and earned benefits.

Procedurally, plan administrators must notify PBGC, participants, and employee representatives that the termination will take place on a proposed date. The notice of PBGC must contain certain actuarial information. The plan must be amended to reflect the cessation of accruals and any other additional obligations which arise as a result of standard termination. Until the plan administrator makes a final distribution of all assets, the plan administrator must provide the PBGC with a copy of certain actuarial information included on the Schedule B of the Form 5500 annually.

B. Distress termination

Consistent with the overall policy goal of the bill to limit access to the termination insurance system to plans of companies in genuine financial difficulty, PBGC would only be required to pay guaranteed benefits for plans who met one of four threshold tests:

(1) All plans maintained by the contributing sponsor and each substantial member of its controlled group must have received funding waivers from the Internal Revenue Service for three of five plan years preceding the year of plan termination, including the most recently completed plan year.

(2) The contributing sponsor and each substantial member of its controlled group has filed a petition (which has not been dismissed or converted) seeking liquidation under federal or state bankruptcy law.

(3) The contributing sponsor provides substantial evidence to the PBGC that unless a distress termination is granted, the sponsor and each substantial member of its controlled group will be unable to pay their debts when due and unable to continue in business.

(4) With respect to all plans of the contributing sponsor and each substantial member of its controlled group, the ratios of (A) required pension contributions to total annualized wages of covered participants, and (B) required pension contributions to

gross income, have doubled over a stated period of time.

For purposes of these tests, a substantial member of a controlled group is a person whose assets comprise 5% or more of the total assets of the controlled group.

Once one of these tests is met, the procedure followed by the PBGC to effectuate the termination is intended to be generally the same as current law. Determinations of sufficiency and net worth must be made before any distress termination is complete. We do not intend to put PBGC in any worse position than it is under current law nor do we intend to set up a structure for distress termination which invites additional litigation. We, therefore, solicit the comments of the PBGC and others as to the appropriateness of these distress tests to identify financially stressed companies for whom pension relief is essential. In addition, we invite comments on the necessity for providing greater protection for PBGC (and the premium-payers) against unnecessarily lengthy disputes over net worth.

TERMINATIONS BY THE CORPORATION

The PBGC's authority to terminate a plan involuntarily under section 4042 of ERISA is generally unchanged.

LIABILITY FOLLOWING PLAN TERMINATION

Once a plan has been terminated in a distress termination or by the PBGC under its own authority, persons may be liable to the PBGC and, in certain instances, to participants and beneficiaries. That liability is described in section 4062 (section 110 of the bill). Those who are liable (each contributing sponsor and all members of their controlled groups) are identified in subsection (a). The amount of liability to PBGC and participants is set forth in subsections (b) and (c) respectively. Subsection (d) contains a special rule limiting liability for certain persons who are liable under section 4062 not as contributing sponsors but rather only as members of controlled groups of those sponsors.

A. Liability to PBGC

The contributing sponsors and all members of their controlled groups are liable for the full underfunding of the plan with respect to guaranteed benefits. In addition, unpaid contributions (including any contributions for which funding waivers have been granted and any contributions which would have been due but for the filing of a bankruptcy petition) must be added to the amount of unfunded guaranteed benefits.

If the sum of all the amounts described above exceeds the sum of 30 percent of the net worth of each liable person, then the amount of liability is limited to the following:

(1) The 30 percent amount described above, and

(2) An amount equal to 10 percent of the pretax-profits of each contributing sponsor and all members of their controlled groups for a period of 10 fiscal years following the fiscal year in which the plan terminates. If there are not profits in any fiscal year, no profit payment to the PBGC is required.

B. Liability to participants and beneficiaries

Contributing sponsors and all members of their controlled groups who are liable under section 4062 are required to contribute to a special termination trust described in new section 4042A (Section 108 of the bill). The contribution is limited to 5 percent of pretax profits calculated and payable in the same fashion as the 10 percent of profits which is due to the PBGC. Payments to participants, and beneficiaries from the termination trust are designed to pay whenever possible the difference between vested and guaranteed benefits.

Although payments into the termination trust are limited in duration to a period of time ending on the earlier of the 10th fiscal year after the year in which the plan terminated or the year in which the trust has assets sufficient to pay all benefits not otherwise payable by the PBGC or the plan, payments from the trust to participants and beneficiaries will continue as long as there is money in the trust. If in any given year, however, there is not enough money to make the annual lump sum payments to all participants and beneficiaries, they may get no payment at all or only a pro rata payment. If money is subsequently contributed to the trust, generally no makeup payments are required.

CONTINGENT LIABILITY

A new part (Part 2) is added to Title IV to close the loophole under present law (1) which allows a controlled group of corporations to spin-off a subsidiary and its related pension liabilities thus removing the controlled group from the reach of the PBGC in the event the subsidiary terminates its pension plans and (2) in which the liability to the PBGC can be increased dramatically when a company sells its assets and transfers its pension liabilities to a buyer which is financially weaker than the seller. Section 112 of the bill contains all the new sections added to ERISA related to contingent liability.

Section 4071 defines the event, called a benefit obligation change, which triggers a 5 (or in certain cases a 10 year period) in which a formerly obligated contributing sponsor or controlled group member is contingently liable. In the event of a benefit obligation change, a formerly obligated person is jointly and severally liable on a contingent basis for 5 years from the occurrence of the event. The 5 year period is extended to 10 years if within the first 5 years one of the following events occur in connection with the new contributing sponsor (e.g., the buyer): a bankruptcy proceeding is initiated against such person, such person makes an assignment for the benefit of his creditors, a custodian, receiver, or trustee is appointed with respect to such person, or such person begins to undergo liquidation. An additional condition necessary to trigger the extension of the 5 year period to 10 years is that the total unfunded nonforfeitable benefits in connection with the change must exceed $5 million and the ratio or employer pension plan contributions to total net operating income must equal or exceed ⅓.

Under regulations of the PBGC, the contingent liability provisions may be applied to composite single-employer plans under which two or more employers who are not in the same controlled group) contributes to the covered plan.

Section 4072 describes the conditions under which a person undergoes a "benefit obligation change" with respect to benefits under a single employer plan, thus triggering contingent employer liability.

Under the first set of conditions, contingent liablity is triggered in any case in which the liability for some or all of the benefits under a single employer plan is transferred to one or more other single employer plans. Any person who, at the time of the transfer, is a contributing sponsor of the transferor plan, or a member of such sponsor's control group undergoes a benefit obligation change with respect to the benefits for which the liability is transferred. An exception to the general rule occurs in the case in which a person who is a contributing sponsor of the transferor plan is also a contributing sponsor of the transferee plan. In this case, such contributing sponsor and each member of such sponsor's control group does not undergo a benefit obligation change (and thus contingent liability is not triggered).

Under the second set of conditions, in any case in which a person ceases to be a contributing sponsor with respect to a single employer plan, each member of such sponsor's control group undergoes a benefit obligation change. An exception to the general rule provides that such a person does not undergo a benefit obligation change if immediately after the change such person is a contributing sponsor of the plan or a member of the controlled group of a contributing sponsor of the plan.

Under the third set of conditions, in any case in which a person ceases to be a member of a controlled group (1) such person undergoes a benefit obligation change with respect to benefits under any single employer plan of which any member of such person's controlled group is a contributing sponsor and (2) each such controlled group member undergoes a benefit obligation change with respect to benefits under any single employer plan of which such person is a contributing sponsor as of both immediately before and immediately after the change. An exception to the general rule provides that any such person does not undergo a benefit obligation change if the amount of the assets of such person at the time of the change is less than 5% of the total amount of assets of the controlled group and there is not more than one such change within 5 years of the plan termination.

Section 4073 sets forth the amount and payment of contingent liability. Subject to reductions under Section 4075, the liability of any contingently liable person under part 2 in connection with a single employer plan termination is equal to the amount of unfunded guaranteed benefits, less the amount of any liability collected by the PBGC from primarily liable persons. Under regulations a person may amortize the amount of contingent liablity over a period up to 15 years.

To the extent that the amount of contingent liability exceeds 30% of the person's net worth, the excess amount is payable in the same manner and to the same extent as is the case for persons who are primarily liable (e.g., subject to the 10% of pre-tax profit and 10 year limitation).

In addition to the 10% of pre-tax profit payments, a person is also liable to the extent of 5% of pre-tax profits to the termination trust established jointly by primarily liable and secondarily liable persons.

Under Section 4074, if the PBGC receives liability payments in full satisfaction of amounts of unfunded guaranteed benefits and unpaid contributions, then contingently liable persons who have made liability payments succeed to the claims which the corporation would otherwise have against primarily and other secondarily liable persons to the extent of any amounts not collected by the PBGC. The recourse of contingently liable persons against primary and other secondarily liable persons is subject to any relevant agreement which may have been made among such persons.

Under Section 4075 the amount of contingent liability for which a person may be

liable may be reduced if the person demonstrates to the PBGC that the amount of unfunded guaranteed benefits immediately before the benefit obligation change is less than the amount previously described under Section 4073. In addition if a subsidiary is liable by reason of membership in a controlled group based on a percentage of common interest of less than 80 percent but more than 50 percent, the amount of such person's liability is limited to the previously determined amount multiplied by the percentage of common interest. Finally the amount for which any contingently liable person may be liable is reduced by the amount of such person's liability which may arise under Section 4063 or Section 4064 in connection with a composite single employer plan.

Section 4076 sets forth exemptions and safe harbors in connection with contingent employer liability. A person is not liable under the contingent liability provisions if the person is also primarily liable under Section 4062.

A person is not contingently liable if, after the plan termination, he demonstrates that one of the following requirements have been met. Under the first safe harbor the otherwise contingently liable person must demonstrate that the total amount of unfunded nonforfeitable benefits under all single employer plans for which such person is a contributing sponsor is less than $500,000. Under the second safe harbor the otherwise contingently liable person must demonstrate that a particular ratio equals or exceeds one-third. The ratio is the total net operating income of all persons who are (as of immediately after the benefit obligation change) contributing sponsors of the plan and all members of such sponsor's control group, divided by the total amount of unfunded nonforfeitable benefits under all single employer plans of which such persons' are contributing sponsors. Under the third safe harbor, the otherwise contingently liable person must demonstrate to the satisfaction of the PBGC that the financial position of the new control group in connection with the benefit obligation change is at least as favorable as the financial position of the old control group prior to the change.

The fourth safe harbor is available if (1) the benefit obligation change occurs as part of an arm's-length sale of all assets of the employer (2) the sale occurs because of the death or retirement of any beneficial owner of any contributing sponsor or controlled group member, (3) the total number of employees of all such contributing sponsors and controlled group members does not exceed 250 at the end of the 2 plans years preceeding the dealth or retirement, and (4) the unfunded nonforfeitable benefits under all plans covering the employees of such contributing sponsors and controlled group members does not exceed $750,000.

Under the fifth safe harbor, the contingent liability provisions do not apply in any case in which the terminated plan has no unfunded nonforfeitable benefits for any 2 consecutive plan years beginning on or after the date of the benefit obligation change and ending on or before the termination date. In addition, in the event of the transfer of liability for benefits between plans, if the amount of assets transferred exceeds such liability, then the contingent liability provisions are made inapplicable.

Under Section 4077, the PBGC may waive some or all of the contingent employer liability if it determines upon application that the interest of the PBGC are adequately protected without such liability.

Under Section 4078, the PBGC and any person liable under Title IV shall in a timely fashion and after a written request (and to the extent not otherwise prohibited by law) provide any other contingently liable person such information they may have in their possession which is required under the Section 4076 safe harbors to show that the conditions under that section are met.

Under Section 4079, to the maximum extent possible, the PBGC shall take such actions as may be necessary and appropriate to assure that all civil actions against persons who are primarily and secondarily liable are brought under the jurisdiction of a single Federal Court.

LIENS IN FAVOR OF THE PLAN

As we understand current practice, when a waiver of the minimum funding requirements is granted, the Internal Revenue Service often requires that if a plan terminates before the waived amounts are fully repaid, those amounts become a debt due and owing to the plan at the time of termination. Both the bill introduced in the Senate (S. 1227) and section 112 of this bill provide for a lien for the waived amounts arising in favor of the plan at the time of the waiver. Both bills (to varying degree) rely on the plan administrator to decide whether, when, and on what collateral to perfect. This raises both theoretical and practical fiduciary responsibility questions which we are currently trying to resolve. Rather than hold up introduction of the bill any longer, we are soliciting suggestions from the PBGC, the Department of Labor and others as to the best way to provide protection for the plan and PBGC while not needlessly encumbering all property of the contributing sponsor.

ENFORCEMENT

Section 113 of the bill contains the enforcement provisions. In addition to expanding PBGC's authority to enforce the conditions of a standard termination, the bill adds a new section 4096 to ERISA in which is consolidated all rights of contributing sponsors of participants and others to enforce certain Title IV provisions against terminated single-employer plans or the PBGC.

EFFECTIVE DATE

The provisions of the bill are generally effective on the date of enactment.

CONFORMING INTERNAL REVENUE CODE AMENDMENTS

These are contained in Title II of the bill and include provisions providing for deductibility of contingent liability payments for controlled group members and for payments required under a standard termination.●

THERE IS MORE THAN ONE WAY TO SAVE THE WHALES

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. YOUNG of Alaska. Mr. Speaker, on numerous occasions I have taken the floor of this House to express my concern about environmental extremism. I want to bring to my colleagues' attention the latest in a long series of attempts by preservation groups to save something and thereby prevent sound conservation and management practices.

Sea World, Inc., a well-known institution dedicated to research and education through public display, has applied for a permit to remove from the wild up to 10 killer whales over the course of 5 years. The killer whales will be transported live to Sea World facilities and will become part of Sea World's captive marine mammal breeding program, a program that has successfully preserved a number of species. Due to the wording of the Marine Mammal Protection Act, the permit includes a request to take up to 100 whales; however, "take" in this context means simply to disturb, not to harm or kill. During the course of the operation, Sea World will allow scientists to conduct a number of needed research activities on the whales so that our knowledge of this animal can be increased.

One would think that a program designed to increase knowledge about a relatively unknown species and to breed that species so that it will survive in perpetuity, all at no cost to the taxpayer, would be supported by conservationists everywhere. Unfortunately, such is not the case. Greenpeace, an organization dedicated to saving whales, has filed objections, as have other groups and individuals. For those of you who have forgotten, Greenpeace is the organization that sent members into the Soviet Union and then used that episode to raise funds with large advertisements in the Washington Post. Greenpeace objects to the proposal because the killer whales removed from the wild will be put on public display. They ignore all of the scientific knowledge that will be obtained from this proposal, as well as the information that every visitor who goes to Sea World will receive. I wonder if those who oppose Sea World's proposal believe that knowledge should only be available to the select few that belong to environmental organizations.

George Will, the distinguished writer, recently authored a column on the Sea World proposal. I think it should be read by every Member of this House and I ask that it be printed in the RECORD.

[From Newsweek, Aug. 29, 1983]

THE ORCAS OF SEA WORLD

(By George F. Will)

Whales deserve no enemies and better friends. Some misanthropes love whales only because they (the misanthropes, not the whales) are repelled by humans. Furthermore, because protecting whales is a cause adopted by some persons who despise everything in Western civilization except bran muffins, right-wingers sport bumper stickers that say "Nuke the whales." (Hardliners prefer "Nuke the gay Iranian whales.")

Today a dispute about a few orcas (killer whales) is jeopardizing a worthy institution.

Sea World in San Diego blends entertainment, education and research. It is comparable in quality to San Diego's famous zoo. It cooperates with many universities and research institutions, such as the Scripps Institution of Oceanography. The most famous feature of Sea World is a show by orcas performing with trainers. Last year 6.6 million persons visited Sea World and two sister facilities near Cleveland and Orlando.

Anyone who sees the orcas perform is unlikely thereafter to be indifferent about harm done to whales. More than 75 million have seen them perform at the facilities. So Sea World is not only expanding knowledge about whales in the wild, it is mass-producing opposition to commercial whaling. Yet Sea World now is the object of immoderate opposition because of its request for permission to acquire a few more orcas.

Captivity: Orcas live in groups, called pods, of six or more. For the orcas' contentment in captivity, and for attempts at breeding, the three Sea Worlds, which have a total of eight, need 18. Some critics say breeding in captivity is impossible. Dr. Lanny Cornell, Sea World's zoological director, notes that the same was said about elephants and lowland gorillas, which are now frequently bred. (Twenty-seven bottlenose dolphins have been bred in San Diego. Sea World has the only U.S. display of Antarctic penguins, and three of the species are breeding.)

In 1972, in response to the clubbing of baby seals and the catching of dolphins in tuna nets, Congress passed a law that prevents the taking of marine mammals other than for research or display. No one knows how many orcas there are. There certainly are so many that they are not an endangered species. Sea World wants to collect 10 in five years.

Headlines shout that Sea World wants to "capture" 100. But 90 would be released within four hours, after scientific studies. They would be photographed (for identification by color patterns). A few would receive radio packs for tracking by satellite. One tooth would be taken (using a local anesthetic) from perhaps 20 whales to determine aging. Stomach and blood samples would be taken, and liver biopsies may be performed on animals with certain symptoms, to learn about their feeding habits and what parasites and pollutants threaten them. Some electroencephalograms would be made to measure hearing, as is done with human infants.

At hearings in Seattle last week some scientists endorsed and others criticized Sea World's research proposals. But the dispute is less about science than about cultural values. Representatives of Greenpeace, an anti-whaling organization, say Sea World is only interested in profits, a word they speak as though it soils their lips. The charge is an unfounded smear. It is especially obnoxious because Sea World's profits are funding numerous research projects, and an entire research institute, at a moment when public research funds are shrinking.

Environmentalists and others have had the salutary effect of encouraging zoo improvements, such as getting lions out of cages and elephants unchained. But the complaints of some environmentalists about the wickedness of separating creatures from their natural "ecosystems" suggest that the attack on Sea World is the thin end of a large wedge—an attack on the display of animals in man-made environments.

Bashing Sea World has become a cottage industry in Washington state. In 1976 Ralph Munro, who is now Washington's secretary of state and whose family has lived on Puget Sound for four generations, was sailing when he observed a Sea World attempt to collect orcas, using boats, planes and small noisemakers that critics enjoy calling "bombs." (Sea World no longer uses them.) He found it "gruesome" and now says things like: "The people" are tired of "these southern California amusement parks taking our wildlife down there to die." (He says life expectancy in captivity is two to four years. Sea World says it is 10 years and rising.) Munro dismisses Sea World's research as "baloney" and asks: "Why should our children who have the opportunity for generations after generations to see these animals in the wild have to go to southern California and pay $10" to see them?

Easy, Ralph. Sea World's research satisfies many scholarly journals. Sea World does not want "your" whales; it wants whales from Alaskan waters. And taking 10 will not blight the lives of Munros unto the seventh generation.

Progress: Whales, with their enchanting grace and playfulness, their individual personalities, intricate social behavior and complex brains, are so magnificent that commercial whaling, which is unavoidably cruel and utterly unnecessary, lacerates the feelings of sensitive persons. Only a person whose spirit is dead to the poetry of the planet can fail to see that life is richer because these graceful creatures are swimming—and singing—on the sea's surface, and in the sunless depths. Mankind's slow, meandering progress toward a nobler sensibility can be gauged, in part, by finer standards of stewardship over earth; such standards dictate respectful dominion over animals.

We are the responsible portion of creation and we are improved by observng creatures like whales, which make vivid the mysteriousness of the natural. It is best to see animals in their natural habitats. But zoos, aquariums and other responsible facilities, such as Sea World, are the only place where most people can acquire the sense of wonder that comes from exposure to magnificent creatures.

If Sea World is denied a permit for 10 orcas, I hope 230 million Americans go to Puget Sound, unfold lawn chairs on Munro's lawn, ask for iced tea and watercress sandwiches and watch the whales. It will be good for their souls, and will serve him right.●

REPUBLICAN STUDY COMMITTEE HEARINGS ON KAL 007

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. PHILIP M. CRANE. Mr. Speaker, on September 16, the Republican Study Committee, of which I am chairman, held a hearing on the destruction by the Soviet Union of Korean Air Lines flight No. 007 near Sakhalin Island.

One of the people who was invited to testify but was unable to do so was Dr. Zdzislaw M. Rurarz, former Ambassador of Poland to Japan who defected to freedom after the imposition of martial law in his country. Dr. Rurarz, submitted a written statement for the RSC hearing. I am asking that the statement be printed in the CONGRESSIONAL RECORD for the benefit of the Members.

The statement was hastily drafted at our request and has not been edited.

STATEMENT BY DR. ZDZISLAW M. RURARZ, FORMER AMBASSADOR OF POLAND TO JAPAN ON THE DOWNING OF THE KAL'S JETLINER BY THE SOVIETS; DELIVERED BEFORE THE CONGRESSIONAL COMMISSION ON SEPTEMBER 16, 1983

Mr. President, it is with the deepest sorrow that I have learned about the downing of the KAL's jetliner on September 1, 1983, by the Soviet SU-15, only seconds from international waters.

But as much as I was shocked by this new Soviet barbarism and as much as I joined in the grief by all those who lost their loved ones among the 269 innocent victims, I was not at all astonished by the act itself. Neither I was astonished by the silence, lies and all other abominable efforts by the Soviets to whiten themselves and blame everybody else instead.

We Poles have an exceptionally long list of grievances against the Soviets. Not once we were told that somehow it was perhaps our own behavior that invited the Soviet anger against us. Not once we were told that it was our representatives who were not capable to speak to the Soviets. And as the consequence of this the Teheran and Yalta agreements were served to us, leaving us and other nations of Central and Eastern Europe at the mercy of the Soviets.

It is only now that the Free World is learning in a shocking way what we have learned more than four decades ago.

Mr. President, I am very honored that you decided to invite me to speak before the forum chaired by you on the murder by the USSR of another tens of innocent people. Your initiative on learning what may be the motive behind that murder and all the ensuing Soviet behavior afterwards is something you should be congratulated for. It is still not too late to draw the conclusions from the Soviet behavior. It was this behavior which was behind my decision to seek the political asylum in the United States after the martial law was declared in Poland. It was not that I did not know earlier whom the Soviets are, but up to the last moment I wanted to believe that perhaps they may come to reasons and change. After invading Afghanistan and after pushing Jaruzelski to declare the war on the Polish nation, I could only lose the rest of my hope that the Soviets are corrigible. The downing of the Korean jetliner is only another proof of the same Soviet behavior. And promising to behave in the same way in the future too, means beyond any doubt that the Soviets have in deep contempt the human life, truth and dignity.

Mr. President, as I have already mentioned, we Poles have a particular reason to be concerned about the Soviet behavior.

I believe it can be of interest to you, Mr. President, and other Honorable Congressmen, to learn something about the Poles' experience in their relations with the Soviets. Our experience can be very instructive to the others, because the Soviets do not change by one iota.

Let me quote some historical facts.

On August 23, 1939, when the new world war was hanging over the mankind, and over Poland in particular, Hitler, still hesi-

tating as to launching it, received the encouragement from Stalin in the form of Ribbentrop-Molotov pact. At that time the world was unaware of the secret protocol on Poland's partitioning attached to it.

Next day, namely on August 24, 1939, the Soviet Ambassador to Poland, Nikolay I. Sharonov, told the Polish Minister for Foreign Affairs, Joseph Beck, that the Soviet-German non-aggression agreement in no way changed the nature of the Soviet-Polish non-aggression agreement.

Three days later, the head of the Red Army, Marshal Kliment Voroshilov, gave an interview to the Soviet journal Izvestia saying the following:

"The question of assistance in the form of raw materials and military supplies is a commercial one and there is no need to conclude a mutual assistance pact, still less a military convention, in order to supply Poland with these things.

This statement was to encourage the Poles to resist the German pressure and to go to war. Naturally, that statement was also to suggest nothing like stabbing the Poles on the back by the Soviets.

Moreover, on September 1, 1939, when Poland was already under the attack by Hitler's Germany, that same Soviet Ambassador N. I. Sharonov called again on Minister J. Beck and asked why Poland was not negotiating with Moscow for supplies as mentioned in the Voroshilov's interview?

And the Polish Government sent a special courier to Moscow to approach Molotov, the same who signed the sinister pact with Ribbentrop against Poland and in fact against world peace, to find out about the issue.

Molotov not only explained, on September 6, that no such supplies could be counted on as mentioned by Voroshilov, but even the supplies from the West could not pass to Poland over the Soviet territory.

But this is not the end of Soviet duplicity. In order to confuse the Poles even more, Molotov stated by the end of the conversation, that the above Soviet position can change.

Still on September 11, the Soviet Ambassador Sharonov was assuring the Polish Government that the Soviet Government had the said matter of supplies under consideration.

Six days later, without any declaration of war on Poland, the Soviet troops invaded Poland. The Soviet tanks waved the white flags and the troops were saying to the shocked Poles that the Red Army was coming to help them. And Poland, crumbling under the overwhelming superiority of German forces, decided not to declare the war on still another mighty neighbor. Believing that this would spare the lives of many of her citizens.

How wrong the Poles were! Soon the Soviets would execute many Poles on the spot and many arrests, among them some 15,000 officers, of whom only some 4,500 were found dead in Katyń and with the rest murdered in unknown places.

That is how the Second World War started and what the experience we Poles have.

In the course of that war we lost some 6 million people, about 1 million in the Soviet hands although Poland was never, even a single day, at war against the USSR.

The fate of some 2 million ethnic Poles deported to the USSR, with almost half never returning, was one of the most gruesome martyrdoms in the history of the humankind.

Mr. President, I am not going to mention more examples on the many atrocities committed by the Soviets on the Polish nation. The litany is too long and known too many in this country.

But what I wanted to emphasize in this connection it is the fact that the Soviets would never admit any, I repeat any, of the above facts. Not only they do not feel guilty for anything, although in fact they helped to unleash together with Hitler the last war in which also many of the Americans fell, but they demand instead that the Poles be grateful for being occupied by the Soviets.

Therefore, Mr. President, I am not astonished what the Soviets did and what they say. This is something we have learned by experience.

Yet there is something more than that.

Poland, Lithuania, Latvia, Estonia, Rumania and Finland were relatively small countries on which they could have taken without a risk of even being condemned. Thus that after all those aggressions the USSR was expelled from the League of Nations, but very soon the "Uncle Joe" became the most precious ally of the Democracies and in Teheran and Yalta they went as far as to abandon not only the above countries, with the possible exception of Finland, although after agreeing to some limitations of her freedom, but to add few more.

By conquering Central and Eastern Europe, with the Red Army on the Elbe river, the USSR started a new round of conquests, dragging even the United States in two major and costly wars, one not won and not lost and one lost terribly.

It was overlooked that by abandoning Central and Eastern Europe to the USSR it was in fact the making of it a superpower.

With Western Europe practically indefensible, with Japan extremely vulnerable, with the Middle East, Central American, Africa, Southeast Asia and the Pacific in turmoil, and with the Soviets having an edge in first strike nuclear weapons, the world has entered the era which is as dangerous as never before.

And, Mr. President, you may see by the Soviet behavior how much you may count on the Soviet willingness to diminish the dangers this era is carrying along with it.

The old Soviet crimes, never punished and even truly condemned, are now supplemented with the new ones. And more is to come, you may be sure, Mr. President. I as a Pole who lived for more than 42 years under the two totalitarian systems, can assure you that there is no such crimes the Soviet totalitarianism would not commit.

Moreover, you better forget that a crime would be ever admitted and much less regretted. It will be you who will be guilty for everything and it will be you who will finally get used to crime as a matter of life reality if you do not draw the proper conclusions from the lesson over the Sakhalin island.

Mr. President, I know only too well Marxism-Leninism and its main fortress the USSR. There is nothing strange about the Soviet behavior. The Soviets claim that Lenin said the future belongs to Communism. That is supposedly in total accordance with the so-called scientific socialism. And Lenin was a main "scientist" here. And what was he saying? Let me give you an example, quoted from the Lenin's "works" as edited in Moscow—telegram to L. D. Trotsky of September 10, 1918:

"In my opinion, one must not spare the city and put things off any longer, for ruthless annihilation is essential once Kazan is said to be in an iron ring" (Lenin, p. 147, Vol. 44, Moscow, 1977.)

Mr. President, Kazan was the Russian city, inhabited by Russian children, women and the elderly. And it was to be "ruthlessly annihilated" because such was the interest of the Bolshevik Revolution opening the door to the world dominated by Communism.

And you think, Mr. President, that anybody in the Kremlin would hesitate to send the Korean, American, Japanese, Canadian, Chinese, Australian and other civilian passengers to certain death carried by the heat-seeking missile against a defenseless passenger jet if the act is to serve Communism?

Do you believe, Mr. President, that Gromyko's statement about the "sacred borders" of the USSR is a slip of tongue or that Marshal Ogarkov's warning that in the future the same murderous acts will be repeated, are only limited to the inviolability of Soviet air space?

No, not at all. The Soviets want to scare the whole humankind and to bring it to submission. By killing, not repenting and threatening even more killing, the Soviets effectively defy the human civilization.

Mr. President, the Great American nation was defied by the Soviets as never before. The Soviets deliberately test the firmness of your nation. They know only too well how short are memories of those who actually never saw the totalitarian systems function. They count very much on the fact that the good-natured Americans will soon forget the shock and will return to seeing the world through the prism of a wishful thinking. I know how the Soviets know you and how in fact they neglect you. Believe me, Mr. President, I do not want to tease you on this sad occasion. But I am only warning you—beware of the Soviets.

Mr. President, I do not suggest you any particular action. I am not the citizen of this country and I am not entitled to recommend you anything.

I have the full confidence in American free and democratic institutions and I know that there are the limits to American patience and tolerance.

But if the Polish or my own experience may help you in making up your mind, then I can tell you with all the responsibility that contrary to the past you must not allow the latest Soviet murder sink into oblivion.

You bear a great responsibility before the humankind and not only before the Great American Nation.

Once were compromised the ideals for which we the Poles went to war, because we could not surrender before the humiliating ultimatums.

Nobody more than I wanted to live somehow with the Soviets hoping that one day they would mature. And when I lost that hope a death sentence was the only response to me.

Mrs. Kathryn McDonald was right when she said that you are at war with the USSR. Not at a shooting war yet, but at the war over the ideals. If you surrender your ideals no shooting war will be necessary.

But if you don't, then be prepared for more trials like you had in the last days. I hope the Americans will stay by their ideals.

Thank you, Mr. President.●

CENTRAL INDIANA COUNCIL ON AGING CELEBRATES 10 YEARS OF SERVICE TO OLDER AMERICANS

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. JACOBS. Mr. Speaker, Central Indiana Council on Aging is completing 10 stunningly beneficial years of service to the citizens of our community. Its services benefit not only senior citizens but in a very real sense all citizens. All good citizens feel gratitude to the council:

SENIOR LUNCHEON PROGRAM TO MARK 10TH YEAR

The Central Indiana Council on Aging's Nutrition Program will mark its 10-year anniversary Friday, October 7 at nutrition sites throughout central Indiana.

The purpose of this program, which is funded through the Older Americans Act of 1965 title IIIC money, is to provide older persons, 60 years and over, with a low-cost, nutritionally balanced meal five times a week. These meals, which are served at lunchtime throughout Marion and the seven surrounding counties, are provided to the elderly with the intent to promote better health through improved nutrition.

The Central Indiana Council on Aging is 1 of 16 area agencies on aging in Indiana. Each AAA operates their own nutrition program in their particular area. Central Indiana is known as area 8 and is operated by CICOA.

Area 8's nutrition program began in 1973 and evolved from a pilot project which was conducted by the Major's Task Force on Aging through the Greater Indianapolis Progress Committee. At that time, the program was operating about 12 sites in Indianapolis and serving around 500 meals daily. Ten years later, 45 nutrition sites have been established in Marion and the seven surrounding counties, serving daily more than 1,600 older persons at the congregate sites and providing meals for nearly 500 homebound seniors. In total, approximately 350,000 meals are served yearly.

Besides meals, nutrition sites also serve a vital purpose in providing active socialization among the elderly. Activities such as trips, card games, dances, lectures, arts and crafts aid seniors in expanding their capabilities and allows them an opportunity to dine with and socialize with persons who have similar interests and remembrances.

For the future, CICOA's nutrition program hopes to further expand the program into areas that aren't served, if federal funding continues at a good level. The program director hopes that as the elderly population increases in the coming years, funding for the nutrition program will continue to grow at the same rate.●

THE EXPORT ADMINISTRATION ACT AMENDMENTS OF 1983, H.R. 3231

HON. ED ZSCHAU

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. ZSCHAU. Mr. Speaker, the House will soon consider H.R. 3231, the Export Administration Act Amendments of 1983. As a member of the Committee on Foreign Affairs and a cosponsor of the bill, I have sometimes found the terminology associated with discussions about export control to be difficult to understand. With this in mind, I am submitting for the RECORD a glossary of terms that I hope will be of use to my colleagues during the debate on H.R. 3231.

The glossary follows:

EXPORT ADMINSTRATION ACT, GLOSSARY

Some of the terminology used in discussions of U.S. export policy and the Export Administration Act may be confusing to those without a long history of involvement with the issue. This glossary is intended as a quick, though necessarily incomplete, guide for use in understanding some of the terms related to export policy.

ACEP

Advisory Committee on Export Policy. An Administration interagency group at the assistant secretary level. Chaired by the Commerce Department and including the Defense, State, Treasury, Transportation, and Energy Departments, the Central Intelligence Agency, the National Security Council, and the Arms Control and Disarmament Agency. The Committee began meeting in 1982 to develop recommendations on the Administration policy on renewal of the Export Administration Act.

ARRAYS OF KNOW HOW (DESIGN OR MANUFACTURING)

Systematic arrangements, groups, or categories of know how. (See Militarily Critical Technologies.)

CCL

See Commodity Control List

CHINA DIFFERENTIAL

In 1981 the Reagan Administration announced a policy (the "China Differential") calling for licensing of exports to the People's Republic of China up to roughly twice the capacity and sophistication of goods that could be licensed for export to the Soviet Union. There are some exceptions such as nuclear technology.

COCOM

The Coordinating Committee for Multilateral Security Export Controls. Member countries voluntarily restrict exports to potential adversaries in order to preserve mutual security. There is no treaty or formal international obligation undergirding COCOM. Members are Belgium, Canada, Denmark, France, Greece, Italy, Japan, Luxembourg, the Netherlands, Norway, Portugal, Turkey, the United Kingdom, the United States, and West Germany (Japan and all NATO countries except Iceland and Spain).

COCOM LIST

A list of items whose export is controlled by governments participating in COCOM. The COCOM list contains 100-150 categories of items. Some of the individual items on the list require unanimous approval by all COCOM members before they can be exported to Communist countries; others simply require notification of member countries after the export has taken place.

COMECON

Council for Mutual Economic Assistance. Members are Albania, Bulgaria, Cuba, Czechoslovakia, German Democratic Republic, Hungary, Mongolia, Poland, Romania, Union of Soviet Socialist Republics, and Vietnam. Albania has not participated since 1961, but has not withdrawn. See Communist Countries entry also.

COMMODITY CONTROL LIST

For each of the commodities subject to licensing jurisdiction of the Commerce Department, the Commodity Control List shows the licensing requirements for each destination (Country Group). Commodities are listed numerically on the CCL by Export Control Commodity Number (ECCN).

COMMUNIST COUNTRIES

The Export Administration Act states that U.S. export policy toward an individual country is not to be determined solely on the basis of that country's Communist or non-Communist status. However, the term "Communist Countries" is often used to describe the group of countries to which U.S. exports are restricted. (Country Groups P, Q, S, W, Y, and Z.)

COUNTRY GROUPS

For export control purposes, every country except Canada is administratively classified in one of the following country groups:

P—People's Republic of China.

Q—Romania.

S—Libya.

T—All Western Hemisphere countries except Cuba and Canada.

V—All other countries except Canada.

W—Hungary and Poland.

Y—U.S.S.R., Albania, Bulgaria, Czechoslovakia, East Germany, Estonia, Laos, Latvia, Lithuania, and the Mongolian People's Republic.

Z—Cuba, Kampuchea, North Korea, and Vietnam.

Canada is not included in any country group since exports to that country are normally not controlled.

EAA

Export Administration Act of 1979. Establishes authority for the U.S. Government to control exports. Administered by the Department of Commerce. A few types of exports are controlled through the use of other statutes, such as the Arms Export Control Act which governs munitions exports.

EARS

Export Administration Regulations. Based on Export Administration Act and administered by Office of Export Administration in the Department of Commerce.

EAST-WEST TRADE

Trade between the U.S. (or one of its allies) and a Communist country.

EASTERN BLOC

An informal term usually used to refer to the U.S.S.R., its Warsaw Pact allies, and other communist countries in Eastern Europe. U.S. exports are restricted to these countries.

ECCN

Export Control Commodity Number. The ECCN consists of a four-digit number and is followed by a code letter. Commodities are listed numerically on the Commodity Control List by their ECCN. The code letter is not part of the ECCN but indicates the country groups for which a Validated License is required for that particular commodity.

EMBEDDED MICROPROCESSOR

A microprocessor (chip, integrated circuit) which is built into a product to perform one or more specific operations. A microprocessor can be either reprogrammable or non-reprogrammable. The ECCN for instruments containing embedded microprocessors is 4529B.

END USE STATEMENTS

Statements by the ultimate consignee and purchaser named in an application for a Validated License certifying to certain facts relating to the proposed transaction.

EXPORT DENIAL LIST

A list of names of persons or firms which are subject to denial or probation orders of the Office of Export Administration. Any person who contravenes or violates any law, order, regulation, license or other authorization relating to export control is subject to revocation of Validated Licenses and/or general denial of export privileges.

EXTRATERRITORIALITY

For foreign policy purposes, the President may prohibit or curtail the export of any goods or technologies subject to U.S. jurisdiction or exported by any person subject to U.S. jurisdiction. Thus, in some cases, the authority can extend to products produced in a foreign country by a foreign firm which is exporting to another foreign country.

FOREIGN AVAILABILITY

Foreign availability exists when a good or technology is available to a particular destination from sources outside the U.S. in sufficient quantity and of sufficient quality so that U.S. export controls would be ineffective. (This is the definition of the term in the current Export Administration Act; other definitions have been suggested.) Foreign availability is one factor that must be considered in license decisions under the Export Administration Act.

FOREIGN POLICY CONTROLS

The Export Administration Act authorizes three types of export controls. Foreign policy controls are imposed to further significantly the foreign policy of the United States or to fulfill its declared international obligations. Foreign policy controls were used in the pipeline sanctions against the U.S.S.R. and Poland. (See also: National Security Controls and Short Supply Controls.)

FREE WORLD

An informal term used to describe the non-Communist countries of the world. (Country Groups T and V and Canada.) There are few restrictions on most exports to these countries.

ITAR

International Trade in Arms Regulations. Based on Arms Export Control Act and administered by State Department. It is the munitions counterpart to the commercial sector EARs.

KEYSTONE EQUIPMENT

Equipment required for effective application of technical information or know-how. Generally includes manufacturing, inspection, or test equipment. (See Militarily Critical Technologies.)

KNOW-HOW

Services, processes, procedures, specifications, design data and criteria, and testing techniques needed to achieve a significant development, production or utilization purpose. (See Militarily Critical Technologies.)

LICENSEE

The U.S. individual or firm receiving a license to export a good and/or technology.

LICENSES

The Export Administration Act permits the Secretary of Commerce to require the following types of licenses in order to control exports:

VALIDATED

Authorizes the export of commodities and/or technical data within the special limitation set forth in the license document. It is issued only upon the basis of a formal application.

QUALIFIED GENERAL

Authorizes multiple exports of commodities and/or technical data. It is issued upon the basis of a formal application and is used for exports to Eastern Bloc nations. This type of license was first authorized by the 1979 amendments to the Export Act. It has seen very little use.

GENERAL

No specific application needs to be made and no document is issued for shipments made under an established General License authorization. There are different types of General Licenses including:

G-DEST

Applicable to the export of any commodity listed on the Commodity Control List to any destination for which the list indicates a Validated License is not required.

GLV

Applicable to selected commodities but then only to shipments of limited value and to free-world destinations.

GTDA

Authorizes free dissemination of: (i) data generally available to the public; (ii) scientific and education data not significantly related to design, production or utilization of industrial processes; and (iii) patent application soon to be published in the U.S.

GTDR

Authorizes the export of certain types of technical data which may not be exported under GTDA. Both the types of data which may be exported and its destinations are limited. Written assurances against reexport are generally required.

SPECIAL LICENSES

The Secretary of Commerce may establish other types of licenses as appropriate. Some of these licenses are:

DISTRIBUTION

Authorizes exports during one year (renewable for two) of specified commodities to specified consignees in specified countries. The consignees must have been approved in advance as foreign distributors or users.

SERVICE SUPPLY

Authorizes the export of spare replacement parts. Enables firms to provide prompt service for equipment exported from the U.S.

PROJECT

Authorizes exports during one year of all commodities requiring Validated Licenses that are needed for certain large-scale operations such as construction projects. Various conditions are attached to project licenses.

COMPREHENSIVE OPERATIONS LICENSE

This type of license does not exist at the present time but is proposed in current legislation to amend the Export Administration Act. It would govern the export of goods and technology (particularly items on the MCTL) between a domestic concern and that concern's approved foreign subsidiaries, affiliates, and consignees.

MCTL

See Militarily Critical Technologies List.

MILITARILY CRITICAL TECHNOLOGIES

Technologies which are not possessed by potential adversary countries and which, if exported, would permit a significant advance in a military system of any such country. Primary emphasis is on: (i) arrays of design and manufacturing know-how; (ii) keystone manufacturing, inspection, and test equipment; and (iii) goods accompanied by sophisticated operation, application, or maintenance know-how.

MILITARILY CRITICAL TECHNOLOGIES LIST

Defense Department list of militarily critical technologies. Is classified but guides decisions on export licensing. Consists of 620 to 700 technologies depending on how they are counted. Technologies on list might in future be placed under ITAR or Validated License controls.

MULTILATERAL CONTROLS

The U.S. and the other member countries of COCOM cooperatively control the export of 100–150 categories of items. The U.S. also controls some items unilaterally.

MUNITIONS

Arms, ammunition, implements of war, and the equipment and technical data related to their use, design and production.

MUNITIONS LIST

A list showing licensing requirements for the export of munitions. Maintained by the State Department under authority of the Arms Export Control Act of 1976. Similar to the Commodity Control List except that the CCL applies to commercial products.

NATIONAL SECURITY CONTROLS

The Export Administration Act authorizes three types of export controls. National security controls are imposed to restrict the export of goods and technologies which would make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States. (See also: Foreign Policy Controls and Short Supply Controls.)

NATO

North Atlantic Treaty Organization. Members are Belgium, Canada, Denmark, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Turkey, the United Kingdom, the United States, and West Germany.

OEA

Office of Export Administration. Located within the Department of Commerce. Has general responsibility for administering the Export Administration Act.

OPERATION EXODUS

EXODUS is a large-scale U.S. Customs enforcement program designed to stop the illegal export of strategic technology. The program began in late 1981.

PRC

People's Republic of China.

REEXPORT

The transfer of a good and/or technology of United States origin from one foreign country to another.

RELIABILITY

Reliability, along with price and quality, is one of the factors considered by some customers in choosing a supplier. Industry groups claim that changes in U.S. export policy cause U.S. firms to be perceived as unreliable suppliers by foreign customers.

REVERSE ENGINEERING

A process starting from the finished product and going backward to its design and construction methods. Products differ greatly in their susceptibility to reverse engineering.

SANCTITY OF CONTRACTS

A sanctity of contracts provision in the Export Administration Act would prohibit Foreign Policy Controls from affecting any contract entered into before the date on which such controls are imposed. There is no such provision in the Act at the present time. (Sanctity proposals authored by different Members of Congress differ in some respects.)

SHORT SUPPLY CONTROLS

The Export Administration Act authorizes three types of export controls. Short supply controls are imposed to protect the domestic economy from the excessive drain of scarce materials and to reduce the serious inflationary impact of foreign demand. (See also: National Security Controls and Foreign Policy Controls.)

TECHNICAL ADVISORY COMMITTEES

The Export Administration Act provides for the formation of Technical Advisory Committees (TACs) wherever goods and/or technologies are difficult to evaluate with respect to technical matters, foreign availability, licensing procedures, or the actual utilization of production and technology. The Committees are composed of government and industry members.

TECHNICAL DATA

Technology. Information of any kind that can be used, or adapted for use, in the design, production, manufacture, utilization, or reconstruction of articles or materials. The data may take tangible form, such as a model, prototype, blueprint, or an operating manual; or they may take intangible form such as technical services.

TECHNOLOGY

The know-how, process steps, and ability to convert scientific theory into products and practice. Includes technical data.

TECHNOLOGY TRANSFER

The transfer of technology from one country to another. May be accomplished directly or via a third country through licenses, sales or theft of technology, turnkey plants, hardware sales or theft, joint ventures, contract bids, patents, publications, textbooks, sales brochures, visits, conferences and sumposia, training and education, public policy debates, immigration, espionage, and capture of weapons. Successful transfer requires a capacity on the receiving end to work with the technology and adapt it to local conditions.

UNILATERAL CONTROLS

Export controls imposed by the U.S. but not by other countries capable of supplying the relevant good or technology. In addition to the categories of items controlled in cooperation with COCOM, the United States also controls the export of an additional 30 categories of commercial items.

WARSAW PACT

Also known as the Warsaw Treaty Organization (WTO). Includes the U.S.S.R., Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, and Romania. Communist countries in East Europe which do not belong to the Warsaw Pact are Albania and Yugoslavia.

WEST-WEST TRADE

Trade between Free World countries.●

HISPANIC HERITAGE WEEK

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. BIAGGI. Mr. Speaker, our Nation just observed the annual celebration known as Hispanic Heritage Week. On this occasion we look back and look ahead at what invaluable contributions Hispanics have made to our Nation and the prospects of a far greater contribution in the future.

The demographic data compiled by the 1980 census tells us a great deal about our Nation today. Perhaps one of the most dramatic of all data has to do with the growth of the Hispanic community. In 1970, the total population of the Hispanic community was 9.1 million. By the year 1980, it rose to 14.6 million and today the level is at 15.9 million.

A further breakdown of the various Hispanic ethnic groups shows the Mexican-American population has increased by 93 percent—the Puerto Rican population by 41 percent and for those of Cuban background the increase is 47 percent. The increase for all others who fall into the Hispanic category rose by 19 percent.

My home State of New York has one of the higher concentrations of Hispanics constituting 11 percent of our population, up from 7 percent in 1970.

These numbers translate into a dramatic growth pattern for Hispanics in our Nation and in so doing the Hispanic community gains in importance in many areas of our society.

Yet there are two sides to every statistic. While it is evident that the numbers of Hispanics is increasing, it is also apparent that the quality of life is actually eroding for the Hispanic community in our Nation. Consider the fact that the poverty rate among Hispanics is a unacceptable 30 percent. The unemployment rate has almost doubled from 6 to 11 percent since 1979. The numbers are even more graphic when one considers unemployment among minority youth including Hispanic is two and even three times higher.

It seems evident to me that after 2 years of the present administration and its economic program—the casualties it has claimed have come disproportionately from the Hispanic community. It is therefore incumbent upon any economic recovery plan that it benefit all those groups most affected by the recession. If we are to develop such a program its centerpiece must be employment. We must be aggressive in putting people back to work in this Nation especially in those communities where unemployment has been more rampant and chronic. We cannot abdicate our responsibility at the Federal level by substituting training for jobs. There are too many people in this Nation who are being trained with Federal funds for jobs which may not even exist. I propose that we adopt legislation such as H.R. 1036 which I have cosponsored and combine employment and training under one roof.

We must adopt improved policies to aid women especially those vested with the responsibilities of heads of household. In the Hispanic community this problem is far more significant. Households headed by women are at a rate of 23 percent in Hispanic families as compared to just 15 percent among the rest of our Nation's racial and ethnic groups. We must make sure that there is truly economic equity in our programs and policies for women.

We must improve our educational system and make it more responsive to the changing demographics of this Nation. While the number of Hispanics attending college has increased in the past decade we still must improve the quality of education at the elementary and secondary school level to combat underachievements in math and science.

On this occasion we salute those from the Hispanic community who have enhanced our Nation through their work. Whether the profession be medicine or music—sports or government—we find constant leadership among men and women of Hispanic heritage. This will only increase in the future and as a nation we should be proud of the growth in size and stature of the Hispanic community. These are Americans who have a proud heritage but who have goals to make our Nation better.●

RABBI ARTHUR CHIEL

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. MORRISON of Connecticut. Mr. Speaker, the greater New Haven area mourns the death of Rabbi Arthur Chiel, a spiritual leader of the largest conservative synagogue in southern Connecticut and a distinguished community leader. Over 2,000

men, women, and children of all backgrounds participated in the farewell tribute to Rabbi Chiel at his synagogue, an event which I found very moving.

Our hearts go out to the Congregation B'nai Jacob in Woodbridge, who had to celebrate the Jewish high holy days this year—Rosh Hashonah and Yom Kippur—without its rabbi of 20 years. Rabbi Chiel always encouraged lay leadership of this congregation, and supported and approved a woman as its president. He leaves as his legacy a congregation that is involved, committed, and flourishing.

Dr. Chiel was a man of enormous spiritual, social, and intellectual commitment. He served as a founding member of the New Haven Commission on Equal Opportunities during the turbulent 1960's and developed strong and productive associations with minority residents. In 1978, Dr. Chiel was honored by the Anti-Defamation League of B'nai B'rith and received the Torch of Liberty Award for his distinguished contributions in furthering intergroup relations in the community.

He was a scholar of both American colonial and New Haven Jewish history. He served as a fellow of Ezra Stiles, one of Yale University's undergraduate colleges, and was a guest lecturer at the Yale Divinity School and at Fairfield University. Just this May, Dr. Chiel was honored as the keynote speaker at the rededication of the Touro Synagogue in Newport, R.I. His community lectures on local Jewish history have always been very well attended, and his weekly column in the Jewish Ledger was so widely read that it was eventually released for wider circulation.

But more than this, Rabbi Arthur Chiel loved and was loved by many. Those with whom I spoke at the funeral felt that they had lost not just a spiritual and community leader but also a personal friend. He was an extraordinary person, and I feel privileged to have known and to have been with him on several occasions this past year. The Third Congressional District has lost a powerful and dynamic man. I offer my sincerest condolences to his widow, Kenneret, and to their four children.●

INTRODUCTION OF THE HOMEOWNER ASSISTANCE ACT OF 1983

HON. RICHARD H. LEHMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. LEHMAN of California. Mr. Speaker, the unusually heavy winter rains this year created many pressing problems for residents of my congressional district, as well as throughout the State of California. Floodwaters destroyed crops, made thousands of acres of cropland unworkable, and made life difficult for thousands of the San Joaquin Valley's residents.

One unfortunate side effect of the heavy rains was the delay it caused in the construction of hundreds of homes that would otherwise have been completed. These delays hurt the builders, the construction workers, and the prospective buyers of these homes. Especially hard hit by the winter rains will be those people participating in the Department of Housing and Urban Development's section 235 housing assistance program.

The section 235 program provides a helping hand to those families who could not afford to own their own homes without Federal assistance. Unfortunately, the Reagan administration has targeted the section 235 program for expiration at the end of 1983 fiscal year, September 30. This action by the administration would deny almost 200 families in the San Joaquin Valley the Federal assistance that had been promised them, and that they are depending on to help them buy their first home. HUD estimates that somewhere between 12,000 and 14,000 families nationwide face similar circumstances.

Because of rain-induced delays, the homes which these families would have moved into by now are as yet unfinished. However, because the 1983 funding which would assist them with purchasing these homes expires on September 30, the Government will renege on its promise to assist them in buying a home. The Reagan administration has refused to recognize the commitment it has made to these families, and administration officials continue to insist that any savings from the program at year's end be returned to the Federal budget.

Today, I am introducing legislation to correct this injustice. H.R. 3934, the Homeowner Assistance Act of 1983, will extend the authorization of the HUD section 235 program for 1 year. This extension will allow those families across the country who have been victimized by unforeseen construction delays to receive the mortgage assistance that the Federal Government has promised them.

I would like to urge my colleagues to support the extension of this worthwhile program so that we can honor the commitment we have made to assist these families in purchasing their homes.●

HEARINGS ON KAL 007

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. DENNY SMITH. Mr. Speaker, I had the opportunity on September 16 to take part in the hearings conducted by the Republican Study Committee on the downing of Korean Air Lines flight No. 007. One of the witnesses at these most effective hearings was the distinguished scholar and former intelligence official, Dr. Ray S. Cline, of the Center for Strategic and International Studies at Georgetown University. Dr. Cline, a recognized authority on strategic matters, especially in view of his experience as an official of the Central Intelligence Agency and the Department of State, made a distinct contribution to the content of the hearing.

I am having Dr. Cline's statement reprinted for the edification of my colleagues:

MASSACRE OF 269 PASSENGERS ON KOREAN AIRLINER 007

I appreciate the opportunity to testify on the tragic destruction of Korean Airliner 007 by Soviet missile fire over the Sea of Japan. It is very real to me because I was in Seoul that night waiting for Congressman Larry McDonald and several other members of the United States Congress to arrive for a Conference on Security in Northeast Asia, where he was to speak on the morning of 1 September, about eight hours after his untimely death on 007.

Needless to say, the sad incident made our words meaningful at the subsequent sessions of the conference, which had been convened under the sponsorship of the Asiatic Research Center, Korea University, to commemorate the Thirtieth anniversary of the signing of the United States-Korean Defense Treaty, one of the main strategic strong points in support of American interests in the Northwest Pacific and Northeast Asia.

A South Korean airliner, a KAL Boeing 747, with 269 civilian passengers en route from New York to Seoul was shot down near the Soviet island of Sakhalin by a heat-seeking missile fired by a Soviet jet fighter, (Sukhoi) Su-15, in the early morning of September 1, 1983. Among the passengers were 61 Americans, including Congressman Lawrence P. McDonald (Democrat of Georgia).

The regularly scheduled passenger aircraft had strayed off course and passed through Soviet airspace over Kamchatka Peninsula and then over Sakhalin Island. The Korean pilot, apparently unaware of any navigational error, reported to Tokyo at 0323 Korean time that he was proceeding on the planned flight pattern northeast of Hokkaido, Japan.

After more than two hours of radar tracking of this aircraft and a near approach to it by a Soviet jet fighter from Sakhalin, Soviet authorities gave instructions to fire a missile at the Korean plane as it was approaching the Sea of Japan. The Soviet pilot reported at 0326 Korean time, according to intercepted voice transmissions, "The target

is destroyed. I am breaking off attack." Obviously, everyone aboard was killed in the plane's plunge to the sea.

At the European Security Conference in Madrid on September 7, Soviet Foreign Minister Andrei Gromyko, insinuating that the South Korean airliner was on a preplanned intelligence mission, warned that any future violations of Soviet "sacred borders" would receive the full brunt of Soviet retaliation.

On September 9 Marshal Nikolai V. Ogarkov, Chief of the Soviet General staff, in an unprecedented Moscow press conference, charged the entire flight pattern was the result of a U.S. intelligence "special mission" and that the destruction of the aircraft was fully justified. He said, "Termination of the flight . . . was not an error," and confirmed that, "In the general staff we were all informed."

The most devastating comment at the press conference came from Deputy Foreign Minister Georgi Kornienko, indicating no admission of error and suggesting a similar incident in the future would be dealt with in the same way. He said, "Protection of the sacred inviolable borders of our country and our political system [is] worth to us, as you know very well, many, many million lives."

This statement implies that military response at the expense of civilian lives in the case of a single civilian aircraft is as justifiable as repelling Hitler's invasion of Russian territory in World War II. It reveals a narrow rigidity of thinking and a truculence in foreign relations that bodes ill for the several complex arms limitation negotiations as well as other international agreements under discussion between Washington and Moscow.

About the only solace to be drawn from the Korean airliner tragedy is that Japan, the Republic of Korea, and the United States, as well as some of the other American allies, drew noticeably closer together in handling the diplomatic crisis. There appears for now at least a new readiness in Japan under the leadership of Prime Minister Nakasone to face up to the harsh facts of the menacing Soviet military buildup of armed forces in the Pacific Northwest region, where they threaten normal lanes of air and sea communication along the Kuriles linking Japan and the United States. The vital strategic value of the Pacific offshore and littoral triangle of Japan, Taiwan, and the Korean Peninsula facing the narrow sea-passage choke-points of the East China, Japan, and Okhotsk seas was illuminated by the stubborn Soviet military hard line in justifying its shooting down of the Korean airliner. The Soviet leaders, in both words and actions, are resolutely defying world opinion to claim their right to act in the same way in the future, come what may.

President Reagan condemned the "Korean airline massacre" as the kind of violence citizens in the West find hard to believe. "I speak for all Americans and for people everywhere who cherish civilized values," he said. "Words can scarcely express our revulsion at this horrifying act of violence." Foreign Minister Gromyko and General Staff Chief Ogarkov have put the Soviet Union on record as rejecting these American values and defending such acts of violence.

I would like to make two quick final comments:

The Soviet lie about American responsibility for the tragedy, arguing that KAL 007 was on an "intelligence mission", is ridiculous. There is nothing a civilian airliner could observe in that part of the world that could not much more effectively be learned from U.S. satellite sensors or from U.S. peripheral military reconnaissance flights over international waters.

The KAL airliner was on an innocent civilian, regularly scheduled commercial flight, and it is criminal for the Soviet Union to have massacred its 269 passengers on any pretext whatsoever. There is no excuse for such barbarity. We should never forget this callousness. The voting in the United Nations Security Council on a very mild resolution deploring the loss of KAL 007 shows an extraordinary clash of moral values. One group of nations reflected real concern for the lives of individual human beings. The contrast was stark in comparison with totalitarian values of nations insisting on the absolute priority of defense of the political and military power of the state. The United States vigorously sought support for the resolution stating the Security Council "deeply deplores the destruction of the Korean airliner" and that "such use of armed force against international civil aviation is incompatible with the norms governing international behavior and elementary considerations of humanity." Eight nations joined in voting for the resolution, Great Britain, France, the Netherlands, Pakistan, Jordan, Zaire, Togo, and Malta. Poland voted against the resolution, and the Soviet Union predictably vetoed it. Shockingly, the People's Republic of China, Guyana, Nicaragua, and Zimbabwe abstained. The conflict of cultures thus relected is seldom seen so clearly as in this vote of the nine versus the two nays and the four abstentions.●

TRIBUTE TO JOHN ANSON FORD

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. ROYBAL. Mr. Speaker, on September 29 of this year Los Angeles' most distinguished citizen, John Anson Ford, will celebrate his 100th birthday. I would like to take this opportunity to recognize a lifetime of achievements by this extraordinary individual.

John Anson Ford served on the Los Angeles County Board of Supervisors for 24 years. During his service, he established a reputation for honesty, integrity, and genuine concern that was reflected in all operations and activities of the board. The projects he supported, his proudest accomplishments, all bear witness to his keen sensitivity for the needs and feelings of his fellow human beings.

In addition to his overriding concern for the rights of others, particularly the poor, the sick, and the elderly, John Anson Ford worked in a number of ways for the betterment of the human condition. He was particularly interested in the enhancement of the arts, in the preservation of the cultures unique to Los Angeles, and in the development of industry. Among his many achievements he can number the revitalization of the Hollywood Bowl, and the restoration of the Los Angeles Plaza where the history of our great city began. Thanks in large part to his efforts, Olvera Street has been changed from a dusty old alley into a cultural and historical treasure.

These achievements were of great benefit to the community as a whole, but John Anson Ford never lost sight of his concern for the individuals who make up that community. He established the department of senior citizens' affairs almost 40 years before the Congress of the United States established a committee to address the problems of the elderly population of this Nation. He also worked for those at the other end of the age spectrum, establishing the first toy loan program in the county and working to improve postnatal care.

As he carried out all his responsibilities, as he spent his considerable energies on many important projects, John Anson Ford saw to it that Los Angeles County's great institutions operated with due regard for human rights and the dignity of others. During his years of service, there was definite improvement in the operation and treatment of persons at the general hospital, juvenile hall and health departments throughout the county.

It is difficult to sum up an entire century of achievement and dedication. However, the common thread of concern for others that runs through the career of John Anson Ford makes it clear that he has been a true and successful champion of human rights and dignity. We in the House of Representatives wish him a very happy birthday and express to him our gratitude for his unflagging efforts to improve the human conditions.●

INABEL B. LINDSAY: 1900-83

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. PEPPER. Mr. Speaker, the field of aging has suffered a serious loss because of the death of Inabel B. Lindsay, who was nationally and internationally know in gerontology and social work.

Dr. Lindsay was respected by her colleagues and friends as a top flight professional and gracious individual.

She held numerous positions in the field of aging, serving as a board member for the National Caucus and Center on Black Aged and the National Council on the Aging, a consultant for the Senate Committee on Aging, a member of the National Advisory Committee for the 1971 White House Conference on Aging, and a member of the President's Task Force on Aging.

Dr. Lindsay served with distinction and conviction in all these capacities. In addition, she wrote extensively on aging-related subjects. Her working

paper for the Senate Committee on Aging on the "Multiple Hazards of Age and Race" was considered one of the foremost authoritative studies on the economic situation of aged blacks.

In 1945, Dr. Lindsay became the first dean of the School of Social Work at Howard University. Because of her leadership and dedication, it became one of the most respected schools of social work in the Nation.

Dr. Lindsay received numerous awards and honorary degrees throughout her illustrious career, including:

Howard University's Distinguished Post-Graduate Award in 1961;

A Distinguished Alumna Award from the University of Pittsburgh School of Social Work in 1970;

The Alumni Medal by the School of Social Service Administration from the University of Chicago in 1974;

Social Worker of the Year Award from the Metropolitan Washington, D.C., Chapter of the National Association of Social Workers in 1974; and

An Honorary Degree of Doctor of Humane Letters from Howard University in 1982.

I extend my heartfelt sympathy to her family and relatives.

Mr. Speaker, I insert in the RECORD a brief description of her life and accomplishments:

INABEL BURNS LINDSAY: 1900-83, DEAN EMERITA, SCHOOL OF SOCIAL WORK, HOWARD UNIVERSITY

Inabel Burns Lindsay was born in St. Joseph, Missouri, and became nationally and internationally known through her contributions in social welfare services and social work education.

She received a Bachelor of Arts degree *(cum laude)* from Howard University in 1920 and then entered the New York School of Social Work with an Urban League Fellowship earned on a nationwide competitive basis. She received a Master of Arts in Social Work from the University of Chicago, and the Doctor of Social Work from the University of Pittsburgh.

Before joining the faculty of Social Work at Howard University in 1937, Dr. Lindsay served as a public schoolteacher in Kansas City, Missouri; for a number of years she worked as a social worker in St. Louis, where she attained the position of public welfare administrator. She held the rank of assistant professor and then acting director of the Division of Social Work in Howard's Graduate School. In 1945, she became the first dean of Howard's newly established School of Social Work. Under her leadership it became one of the outstanding social work schools in the nation and was early utilized by the Department of Health, Education, and Welfare in the training of United Nations fellows and in the training of foreign scholars.

When Dr. Lindsay retired in 1967 she remained actively involved in current issues in social work, making numerous contributions through writings, speeches, and participation in professional proceedings. In addition, she served as Social Services Advisor to the Assistant Secretary for Community and Field Services, Department of Health, Education, and Welfare from October 1967 to April 1970; Lecturer, School of Social Work, University of Maryland; Lecturer, School of Social Service, the National Catholic University of America; and as consultant for the National Urban League in 1969.

In addition to the policy and educational implications of her doctoral dissertation, "The Participation of Negroes in the Establishment of Welfare Services, 1865-1900, with Special Reference to the District of Columbia, Maryland and Virginia," Dr. Lindsay wrote and consulted extensively on international social walfare issues. Among her publications is the 1959 article "Adapting American Social Work Education to the Needs of African Students." She had similar concerns for social work education in the Caribbean, the Middle East and other parts of the world.

Dr. Lindsay's professional participation, with emphasis on aging, included the National Council on Aging, National Advisory Committee for the White House Conference on Aging, the President's Task Force on Aging, and Special Consultant for the Special Committee on Aging of the U.S. Senate, where she prepared a Working Paper on "Multiple Hazards of Age and Race." Her memberships included: Chairman, Committee on Social Walfare, National Urban League; Board of Directors, Edwin Gould Foundation and Edwin Gould Services to Children; Lois and Samuel Silberman Fund, Grant Committee, among others.

In 1961, Dr. Lindsay received Howard University's Distinguished Post-Graduate Award; in 1970 she was honored by the University of Pittsburgh School of Social Work with a Distinguished Alumna Award, and in 1974 she was awarded the Alumni Medal by the School of Social Service Administration, University of Chicago. Also in 1974, she was named "Social Worker of the Year" by Metropolitan Washington, D.C., Chapter of the National Association of Social Workers. In 1982, Howard University bestowed upon Dr. Lindsay the Honorary degree of Doctor of Humane Letters, which she regarded as a fitting climax to an educational and service career that began with her entering Howard University in 1916 at the age of sixteen.

Dr. Lindsay will always to remembered as a distinguished professor, administrator, and pioneer in the development of social welfare in the Americas and around the world.●

NOW, TELL THE TRUTH: WHAT DOES OCS MEAN?

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. FIELDS. Mr. Speaker, I am submitting for the RECORD today an excellent article written by Mr. David C. Russell who is the Acting Director of the Minerals Management Service of the Department of Interior.

In this article, Mr. Russell accurately portrays the overwhelming need for an orderly and systematic development of our vast energy resources on the Outer Continental Shelf.

While Americans may no longer find themselves waiting in gas lines, our energy problems are far from being over and I believe we must move forward in an environmentally safe manner to lease, explore, develop, and produce these vital OCS resources.

I would highly recommend that every Member of this legislative body review this insightful article closely and join with me in opposing any attempt to restrict or prohibit activity on the Outer Continental Shelf.

The text of the article follows:

NOW, TELL THE TRUTH: WHAT'S OCS MEAN?

(By David Russell)

Most Americans know as much about the Department of the Interior's offshore oil and gas leasing program as they know about Chad. Yet, when it comes to energy, the program is probably America's most important.

Now, tell the truth; did you know that our Outer Continental Shelf (OCS) may contain over one-half of this nation's future petroleum production—worth over $2 trillion at today's prices? Or that the oil could replace 25 years' worth of imports at 1982 rates, and the offshore natural gas could heat 23 million homes for 50 years?

After the recess, Congress will again be asked to amend the Interior Department's appropriations bill to include language to prohibit leasing off certain coastal areas. If successful, this action would undermine the offshore leasing program and balkanize the U.S. into separate and competing energy-producing and consuming states. This language, already passed by the House, represents parochial excisions, a misuse of the appropriations process, and an attempt to relitigate arguments rejected by the Courts June 9 in *California vs. Watt.* It would allow regions which can find vocal sponsors in Congress to avoid their responsibility to make a contribution to America's energy needs.

This is a disturbing trend. Obviously, if every member of Congress from a coastal district were to say, "Sorry, not off my beaches," that would be the end of offshore leasing and production. If inland states were to take the same attitude toward coal, oil shale, oil and gas, we could write off our nation's future.

Offshore oil resources provide significant energy without the need for government subsidies. In fact, offshore oil and gas development could generate billions of dollars, provide jobs and ensure increased supplies of domestic energy.

Recent lease offerings underscore this potential: $2.1 billion for drilling rights in Alaska's Diapir Field, in September 1982; a record $3.4 billion at the May 1983 Central Gulf of Mexico offering; and $1.4 billion for Western Gulf of Mexico tracts offered just a few weeks ago. Since Secretary Watt took office, the offshore leasing program has generated nearly $8.5 billion in lease bonuses alone. Leases have been issued for a little over 2,000 tracts covering about 11 million acres.

Recent discoveries indicate that many of these tracts will be very productive. In fact, a record bid for a single lease in the Santa Maria Basin off California was followed less than 18 months later by the discovery of what could be a billion-barrel oil field—the biggest discovery in North America since Prudhoe Bay. Discoveries like these make all the lawsuits, criticisms and delays well worth the hassle.

Previous administrations pursued policies which leased only 22 million acres—2.5 percent of the OCS—in 26 years, compared to 123 million acres leased by Canada. Those

policies were largely responsible for the disastrous 34 percent decline in offshore oil production between 1970 and 1980.

The new program is intended to reverse this decline and respond to the Outer Continental Shelf Lands Act, which requires "expeditious and orderly" exploration and development, to reduce dependency on foreign sources and ensure stable and adequate supplies of reasonably priced energy when the leases come into production in the next decade.

This act also requires "an equitable sharing of developmental benefits and environmental risks among the various regions" of the United States. Prior to Secretary Watt's program, however, nearly 85 percent of the federal leasing and drilling had been in the Gulf of Mexico.

America cannot keep its energy resources in limbo until use; long exploration and production lead times dictate that, if we want energy tomorrow, we must issue our leases today. Nor can we base energy policies on parochial special interests masquerading as moral principles.

Clearly the most vocal opposition comes from the groups that have a long tradition of opposing even the timid leasing programs of previous administrations. Ironically, vocal criticism is also coming from regions which have the most consumers, use the most energy, and have complained the loudest about high energy prices, past shortages and high unemployment. They seem to be under the false impression that it is a choice between offshore development and other uses of the ocean.

From the day a lease is issued to the day the first oil or gas is pipelined to consumers can take up to 10 years. It is essential, then, that the federal government begin to promote an orderly inventory of these resources. Of course the law and sound public policy dictate that any program balance these needs for energy with the need to protect the human, marine and coastal environments. *California vs. Watt* held that the Secretary's five-year offshore leasing program achieves this proper balance and assures the receipt of fair market value. It will not lease the entire Outer Continental Shelf. It will merely consider broad regions of the OCS for possible leasing.

Environmental and other values are protected throughout the exploration, development and production process. The risks are kept at a minimum through the use of modern technology, tough regulations, and constant vigilence. To date, over $320 million has been spent on environmental and socioeconomic studies which cover every stage of the offshore leasing, drilling and production process. In addition, each OCS facility is inspected by the Minerals Management Service on both a scheduled and an unscheduled basis.

The Santa Barbara spill of 1969 is the only blowout in the course of drilling 30,000 U.S. offshore wells which resulted in a significant amount of oil reaching shore. According to marine biologists it caused no lasting ecological damage. Following the spill, the Interior Department implemented new regulations, and since then we have produced more than four billion barrels of oil from the Outer Continental Shelf, while losing a total of only 791 barrels due to blowouts.

Of all the oil pollution resulting from tankers, natural seeps and offshore operations in the past 12 years, only 3 percent came from oil and gas operations; of these, 85 percent came from tankers, and 12 percent from natural oil seeps. America's rivers dump more oil into our oceans every year—from roads, driveways and other sources—than do tankers, natural seeps and OCS operations combined.

Of approximately 4,000 wells that have been drilled off the California coast since 1894, nearly 3,300 have been in state waters—under leases and permits issued by the state. From 1975 to 1982, while some vigorously protested drilling in federal waters off the California coast, the State of California issued 575 drilling permits in state waters much closer to shore.

Because fair market value has become almost an incantation against the supposed evils of leasing, misinformation and emotional statements concerning it have been widely disseminated. It is time to set the record straight.

Fair market value means getting a fair or reasonable price, as determined in a marketplace, assuring the receipt of fair market value does not mean assuring the highest possible bonus bid. A leasing policy based on maximising bonuses would cast the U.S. in the role of a classic energy monopolist, manipulating supplies and prices at the expense of the consumer. It would stand in diametric opposition to the goals of the OCS Lands Act.

The bonus paid to get a lease reflects the experts' estimate of the value of the rights and opportunities conveyed by the lease, to explore, develop, produce and sell whatever resources might be present in a particular tract. It does not represent fair market value of the resources.

Annual rents of $3 per acre must also be paid, until there is production on the lease. The government keeps these bonus and rental payments, even if no oil or gas is found. If resources are found and produced (something that happens on less than 2 percent of all leases) federal law requires that the lessee pay royalties—customarily set at 16.7 percent—and taxes on the profits. The fair market values of the resources must therefore, be viewed as the sum of the bonus, rent, royalty and tax payments received by the government over the life of the lease.

The lease bonus is expected to account for only 30 percent of all future offshore leasing revenues. The other 70 percent is expected to come from rents, royalties and taxes collected after a lease is issued. Obviously, if we limit the amount available for lease, in an effort to increase bonuses a little, we give up or delay these other revenues.

Neither a centralized government planning office nor a single energy firm should make all the decisions about which tracts have the highest potential and should be offered for lease. What makes the offshore leasing programs—and the American economy—work is the opportunity it gives individual companies to take risks, test their theories and prove that they were right (and their competitors wrong) about where to look. Each of them will have a different opinion about how much will be found in a particular tract, what it will cost to develop and transport the energy, and what oil prices will be when the resources are actually produced.

No one has a corner on this knowledge. One tract in the May 1983 Gulf of Mexico lease offering went for $92 million. The next highest bid was less than $1 million. Other companies did not bid at all, because they viewed the tract as unpromising. This is not uncommon. Obviously there are very divergent views about what a tract's value is, and only drilling will ultimately determine who is right about its potental. But even the most optimistic companies get what they pay for—a chance to test their exploration theories—and for that they pay fair market value in the form of a lease bonus.

The coming together of these different viewpoints determines the fair market value of a tract. If the government determines that the high bid assures the receipt of fair market value, it accepts the bid and issues the lease. If not, the bid is rejected.

The oil companies invest billions of dollars just to get these leases. They cannot afford to sit on them, so will spend billions more to evaluate and get them into production. These expenditures have already begun to generate jobs for Americans, increase U.S. oil and gas supplies and help keep prices stable.

Lower energy prices and adequate supplies—far from being undesirable, on the grounds that they depress bonus bids—should be a primary goal of any leasing program. Indeed, it is hard to understand why critics of the program talk as if there were something wrong with leasing to keep prices and supplies at a reasonable level.

Among America's greatest attributes are its sense of equity and fair play, combined with a collective wisdom that, sooner or later, cuts through the fears, misconceptions and rhetoric. Given the facts, Americans generally make the right choices. Let us hope that the offshore leasing program will not prove an exception.

The leasing program deserves the support of all Americans—in the Congress, media, courts and general public. It must not fall victim to parochial interests, unsupported emotional charges, and the rhetoric of politicians.●

DOWN FROM THE MOUNT

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. LAGOMARSINO. Mr. Speaker, I wish to bring the following op-ed piece from the August 12, 1983, Wall Street Journal, to the attention of my colleagues.

The recently completed Sixth Assembly of the World Council of Churches provides cause for alarm.

DOWN FROM THE MOUNT

The World Council of Churches has just descended from a mountain in Vancouver with a stone tablet saying that the focus of evil in the world today is the United States.

The U.S. is trying to "contain the aspirations of Central American people," the council said at its just completed Sixth Assembly. It accused the Reagan administration of trying to "destabilize the Nicaraguan government, renew international support for Guatemala's violent military regimes, resist the forces of historic change in El Salvador and militarize Honduras."

The assembly opposed "any type of military intervention by the United States, covert or overt, or by any other government." It didn't see fit, however, to name any other names.

Indeed, the assembly rejected a proposal calling for an immediate Soviet withdrawal from Afghanistan, in favor of a resolution allowing Russian troops to remain in Afghanistan until an "overall political settlement" is reached, i.e., when the freedom fighters are crushed. Just to make sure, American delegates at the assembly voted with their Soviet and East bloc counterparts for a call for a cutoff of arms supplies to Afghan freedom fighters.

Moreover, the council refused to hear two appeals from Christians in Russia begging for a "helping hand to the persecuted faithful." One letter was circulated from the Christian Committee for the Defense of Believers' Rights in the U.S.S.R. accusing Soviet authorities of "implementing a policy of genocide against believers." It said that 33 Christian believers are currently in prison, labor camps or special psychiatric institutions and that 20,000 others are seeking to emigrate so they can practice their faith. The letter also charged authorities with harsh discrimination in jobs, education and housing.

Deacon Vladimir Rusak of Moscow also wrote to the council asking for help against religious persecution. He said he has been prevented from writing a history of the Russian Orthodox Church after the 1917 revolution by the church's own hierarchy and the KGB, which confiscated his archives in January. "I believe in the Lord, I love my church, feel concern for her future and wish to serve her—but not by a compromise of conscience, that price which is exacted from our church leadership and which I am being urged to pay," he said.

The council didn't take up the appeals because that would have intervened in the "internal situation" of a member of the WCC, of which the Russian church is a part, said WCC executive Ninan Koshy. The appeals recall a similar letter sent to the previous WCC assembly, in 1975 in Nairobi, by Father Gleb Yakunin of the Russian Orthodox Church, who accused Moscow of persecuting Christians. After sending the letter, Father Yakunin was convicted of "anti-state activities" and is now serving a five-year sentence in a Soviet labor camp.

All of this may come as a surprise to many of the approximately 500 million members of the more than 300 Protestant, Orthodox, Anglican and independent churches represented at the World Council. But it shouldn't. The council has long supported many of the same leftist revolutionary causes aided and abetted by the Kremlin and its proxies. There have even been charges that offerings from collection plates have been handed over by the council to guerrillas, possibly for arms purchases. An exposé on the WCC and the U.S. National Council of Churches earlier this year by CBS's "60 Minutes" concluded that "whether it is by design or mischance or deliberate manipulation from outside the churches, church money and the churches themselves are found to be supporting highly political movements."

The World Council is supported by the mainline U.S. Protestant denominations. After its Vancouver revelations, it would seem to us, its supporters have some explaining to do. A good time to start would be with Sunday's sermons.●

REAGAN: MOVING BACKWARDS ON BILINGUAL EDUCATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. GARCIA. Mr. Speaker, for years I have been pointing out that limited English proficient students have been humiliated and penalized for using their native language in school; they have been left to sink or swim in classrooms with teachers who cannot communicate and texts which are unintelligible.

The Supreme Court, in Lau against Nichols was very clear in observing:

We know that those who do not understand English are certain to find their classroom experience wholly incomprehensible and in no way meaningful.

The Court also noted that to impose English as a requirement before a child has acquired basic skills in the language, is to make a mockery of public education.

The following letter to the editor of the New York Times points out these truths and emphasizes that if the Reagan initiative becomes law, it is predictable that too many who could have succeeded if taught bilingually will fall by the wayside.

The material follows:

[From the New York Times, Sept. 20, 1983]

ON BILINGUAL EDUCATION, REAGAN IS MOVING BACKWARD

To the Editor:

Your enthusiastic editorial support [Sept. 13] of the Administration's legislative proposals on bilingual education puzzles us. On other civil rights issues, you have been swift to label the Reagan freedom-of-choice approach as a meretricious gambit that in fact heralds a retreat from this nation's historic commitments.

Bilingual education has been declared a matter of equal opportunity by Congress. To allow localities to choose whether to afford an equal opportunity to language minorities is effectively to wipe that congressional policy declaration off the books.

As private legal practitioners who collectively have spent more than a dozen years litigating bilingual education cases throughout the country, we admit to a point of view but believe we have gained some fundamental insights.

Local option is fine where demographics and political realities permit educational decisions to be made on educational grounds. But that is not the case everywhere, e.g., where Spanish-speaking people are considered a growing, particularly threatening part of a community in which teaching jobs are scarce. Wisely, Federal law does not mandate that children in such areas languish educationally because of considerations having nothing to do with their abilities.

Likewise, a sink-or-swim philosophy (represented by so-called "immersion" programs) is always praised by those who managed to stay afloat. But many do not, and Federal law wisely mandates that those who would otherwise sink must be given alternatives for learning. And the virtue of bilingual education, as numerous studies have shown, is that it works educationally for some children for whom other, more traditional approaches do not work.

What is the defect in today's statutes that the proposed law would remedy? "[I]t would stop requiring that youngsters be taught in their native tongue," according to the editorial. But there is no such requirement that all language minority children who lack proficiency in English be taught bilingually. School districts are free to use other pedagogic methods if they can demonstrate that these are equally effective. Furthermore, parents can opt not to put their children into bilingual programs if they so desire. That, in our view, allows meaningful local freedom of choice.

Unfortunately, what the Reagan Administration has in mind is turning the clock back a decade to a time, before Congress and the Supreme Court spoke, when many school districts, exercising their prized and unfettered discretion, chose to do nothing for children who lacked English-language proficiency. Many school districts in those days decided, under the freedom-of-choice rubric, simply to maintain the status quo in terms of school personnel and budgets.

Sad to say, we fear that once again there will be districts where bilingual education will not be offered to any students. How does that increase students' or parents' freedom to choose an appropriate education?

If the Reagan initiative becomes law, it is predictable that some, perhaps many students who could have blossomed if taught bilingually will fall by the wayside. Your callousness about that inevitable outcome troubles us.●

A TRIBUTE TO DR. ROBERT E. "BOB" WEINTRAUB

HON. PARREN J. MITCHELL

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. MITCHELL. Mr. Speaker, it is with profound sorrow that I report the death last Monday, September 19, 1983, of Robert E. Weintraub, senior economist with the Joint Economic Committee, and for many years, the leading expert on monetary policy on Capitol Hill.

Bob was a distinguished professional in his own right. He was, as all know, the firmest advocate of monetarist economic principles, and a man who pursued his convictions with clarity, determination, and force. He was a major figure in alerting Congress to the importance of monetary policy oversight into the careful, regular reviews that are conducted today. Moreover, he was a force on other issues in his long career, from the financial rehabilitation of New York City, to the reform of banking regulation, to foreign exchange rate policy, to the international debt crisis.

Bob worked with both parties and in both Houses. Among members and past members of our Joint Economic Committee, Senator PROXMIRE, former chairman Reuss, John Rousselot, and

current chairman JEPSEN all had the pleasure at one time or another of employing Bob and benefiting from his wisdom, judgment, and indefatigable energy. He has many other friends in this body as well, where he served for years on the staff of the Committee on Banking.

All who knew Bob recognized in him a man who took public life and public service seriously. He loved the Congress, and maintained his faith in our willingness to learn, our ability to do good, and in our mandate, as the people's representatives, to exercise the powers with which we have been vested. There are not many men of Bob's age and talents—he was 58—who would devote their professional lives, as he did, to helping us with our tasks. For Bob, this was an evident joy.

I know I join with many others, including Bob's friends in Congress and on the staff, in recording my deep sorrow at his death, and my sympathy for his wife, Sue, and their children, and for the rest of his family.●

DR. KARL-HEINZ MADER

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. McDADE. Mr. Speaker, on Friday, September 23, 1983, the management and employees of Schott Glass Technologies, Inc., will be honoring a very special man, Dr. Karl-Heinz Mader who is currently their vice president in charge of research and development.

Unable to attend this gathering due to a long-term commitment, I would like to take this opportunity to ask Congress to join me along with Dr. Mader's many friends and colleagues in expressing our deep appreciation and gratitude for his many contributions both to the scientific industry and his community.

Dr. Mader is solely responsible for Schott Optical Glass, Inc.'s development of laser glass for the U.S. Department of Energy's laser fusion experiments. During his stay at the Duryea based firm, Dr. Mader has been responsible for the supervision of research and development activities related to the U.S. market, expanded customer technical service capabilities and improvement of Schott Optical's scientific market capabilities. He has headed up the DOE laser program, including the production of BK-7, an extremely high quality glass which is also used in the Energy Department's fusion system. The DOE experiments are currently being carried out at Lawrence Livermore Laboratories outside of San Francisco, Calif.

A native of Pyritz, Pomerania, in which is now East Germany, Dr. Mader first joined Schott Optical's German parent company, the Schott Group in 1969. He served as a senior scientist with the group's Deutsche Spezialglas AG subsidiary.

Recognized worldwide for his scientific contributions, Dr. Mader holds a master of science degree from Humboldt University in Berlin and a doctorate in natural science/physical chemistry from the University of Hamburg. Dr. Mader has published numerous articles in scientific journals.

Dr. Mader will be returning to Germany this fall to continue his research. Although we deeply regret losing such a valuable individual, we take this opportunity to wish him and his family good health and good fortune.●

UNITED STATES STRIVES FOR MORE EQUITABLE DEFENSE SHARING ARRANGEMENT WITH JAPAN

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Ms. KAPTUR. Mr. Speaker, today, I am introducing a House concurrent resolution on the defense burden sharing efforts of the United States and Japan. This resolution states that it is the sense of the Congress that Japan should increase its defense expenditures to insure a more equitable defense burden sharing arrangement with the United States than presently exists. The defense of Japan and the western Pacific region has been a vital part of the U.S. defense posture since World War II. The United States has contributed a significant portion of its defense expenditures for the protection of this area.

Times have changed since the adoption of our immediate post-war policy seeking a "completely disarmed and demilitarized" Japan. Unfortunately, Japan's military expenditures have not risen accordingly. American attitudes toward Japan's defense spending began changing in the Nixon years. The implication of the Nixon Doctrine, for example, was that Japan would have to assume more of the burden of securing Western interests in Asia. However, neither the Nixon administration nor the Ford administration made Japanese defense efforts a central focus of U.S. policy. The Carter administration, in its initial plans, included a continuation of the reduction of the United States presence in Asia and a reduction of the cost of supporting U.S. forces in Japan. After the events in Afghanistan and Iran, the Carter administration began putting even more pressure on the Japanese to increase defense spending. The Carter administration had hoped that the pressure would result in at least a 9.7 percent increase in the fiscal year 1981 defense budget, but it resulted in only a 7.6-percent increase. (Japan's defense expenditures have increased on the average of 7 percent per year in real terms over the last decade.)

We all know that defense spending is a very sensitive political topic in Japan, and that Japanese leaders create a good deal of grief for themselves by mentioning the possibility of increasing defense expenditures. While I believe that the United States should not meddle in the political affairs of other countries, I do believe that it is quite reasonable for the United States to encourage Japan, at the minimum, to implement the modest defense spending goals it has set for itself. Japan has not realized the goals in its second 5-year plan (fiscal year 1983—fiscal year 1987). In the first year of the plan (fiscal year 1983), Japan ended up with a 5-percent increase in real terms, which is inadequate if Japan's defense goals are to be met. For fiscal year 1984, Prime Minister Nakasone announced a defense spending ceiling of 6.9 percent, although officials of the Japanese Defense Agency sought an 8.9-percent increase, and stated that Japan must increase defense spending by 7-9 percent over the coming years in order to meet the goals of the 5-year defense plan.

With Japan's trade surplus with the United States increasing each year, it is time for the Congress to send Japan a signal that we must develop a more equitable defense burden sharing arrangement. In 1982, Japan's trade surplus with the United States hit $16.8 billion, in 1983 it is expected to reach $22 billion, and analysts are predicting that in 1984 the trade surplus will hit $27 billion. Meanwhile, we are not seeing much change in Japan's defense spending levels. Even with an historical perspective on the causes for Japan's low defense spending and the internal Japanese political problems associated with increasing defense expenditures, it seems wise, in these times, to express the sense of the Congress that Japan should increase its defense expenditures to insure a more equitable defense burden sharing arrangement with the United States than presently exists. This is precisely what my resolution does.

The resolution follows:

Whereas, the defense of Japan and the Western Pacific has been a vital part of the defense posture of the United States since World War II;

Whereas, the United States, since World War II, has had a significant portion of its defense expenditures consumed in the defense of Japan and the Western Pacific region;

Whereas, Japan is the number one economic partner and ally of the United States in the Western Pacific region;

Whereas, Japan is a major economic power in the non-Communist world;

Whereas, Japan's trade surplus with the United States is expected to hit a record high in 1983;

Whereas, military spending accounts for 6.6 percent of the gross national product of the United States, and below 1 percent of the gross national product of Japan;

Whereas, Japan has pledged to strengthen its military capabilities in order to develop a self-defense capability to enable Japan to defend the home islands in conjunction with the United States;

Whereas, Japan adopted its second five-year defense plan for the years 1983-1987 with specific goals for increasing Japanese defense capabilities;

Whereas, the Japanese defense budget for the first year of the five-year plan was inadequate to meet the initial procurement goals set in the plan;

Whereas, officials of the Japanese Defense Agency sought an 8.9 percent increase in real terms for the second year of the five-year plan, but received only a 6.9 percent ceiling;

Whereas, officials of the Japanese Defense Agency have stated that Japan must increase defense spending by 7 to 9 percent in real terms, over the coming years, in order to meet the goals of the five-year defense plan on schedule; and

Whereas, it is the policy of the United States to encourage Japan to make steady and significant progress in its self-defense capabilities: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that Japan should increase its defense expenditures to ensure a more equitable defense burden sharing arrangement with the United States than presently exists.

SEC. 2. The Clerk of the House of Representatives shall transmit a copy of this resolution to the President with the request that the President transmit such copy to the Prime Minister of Japan and to the Japanese Diet.●

LETTER TO THE PRESIDENT

HON. CARROLL A. CAMPBELL, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. CAMPBELL. Mr. Speaker, last week, Senator STROM THURMOND received an honorary degree from Voorhees College in South Carolina. In his remarks, he addressed the subject of Martin Luther King, Jr. Day and discussed the need for legislation to deal with the rising costs of the Federal holiday system. As President pro tempore of the Senate and as chairman of the Senate Judiciary Committee, Senator THURMOND's concern should be translated into congressional action. Based on sincere efforts to deal with the cost factor, I wrote to President Reagan urging him to sign the legislation creating Martin Luther King, Jr. Day. The text of the letter, which I would like to share with my colleagues, follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., September 20, 1983.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing concerning congressional efforts to establish Dr. Martin Luther King, Jr. Day, a new national holiday to honor the Civil Rights movement. As you know, the House passed this legislation last month and the Senate is expected to follow suit in the near future.

The vote on Martin Luther King, Jr. Day was a difficult one for me. On the one hand, I share with most Americans respect and admiration for those who have worked so hard to advance the cause of Civil Rights. Indeed, I believe it is entirely appropriate to recognize the gains of Black Americans and other minorities through a day of commemoration and I have strongly and consistently supported the concept of creating a Sunday holiday.

On the other hand, however, I am deeply concerned about the cost of a new Federal holiday and the signal we would be sending if we shut down the productive machinery of this country for another day at a time when our economy is beginning to come around and productivity is on the rise.

On balance, I had to reject the spending priority embodied in H.R. 3706 and I voted against the bill. It was a tough call.

Now, however, it is my understanding that some congressional leaders are exploring options that would allow us to reduce the cost of the Federal holiday system. One possibility would be to require each Federal employee to work on one holiday of his or her choice, thereby allowing the government to remain in operation on most holidays. Surely there are reasonable approaches that would allow us to streamline and reduce the cost of the Federal holiday system. I should point out that no options of this kind were considered in the House. Indeed, they could not have been because of the strict rule under which this legislation was brought up.

Mr. President, given the fact that cost-cutting options are being seriously considered, I would urge you to sign the legislation creating Martin Luther King, Jr. Day. Based on sincere efforts to deal with the cost, should I have the opportunity through a conference report, I will now support this legislation. The Civil Rights movement has contributed much to the goal of human understanding and respect for all, which is basic to the American dream. This holiday will, in fact, appropriately honor the accomplishments and goals of the Civil Rights movement itself.

Respectfully,

CARROLL A. CAMPBELL, Jr.,
Member of Congress.●

RESPONSE TO "DEAR ABBY" COLUMN ABOUT SOCIAL SECURITY

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. LANTOS. Mr. Speaker, I have as have most of my colleagues, received hundreds of letters during the last few weeks from constituents who are concerned about a "Dear Abby" column printed on September 5, 1983, which refers to an alleged inequity in the social security retirement affecting those beneficiaries born between 1917 and 1921.

The facts in the column are not entirely accurate, and I have received several official but lengthy explanations about the situation. The best discussion I have seen to date, however, is in an article by Janet Reinka, a reporter for the Peninsula Times Tribune, a newspaper in my district. The article appeared in the September 16, 1983, edition of the paper, and I would like to share it with you.

"DEAR ABBY" HAS TO BACKTRACK ON COLUMN ABOUT SOCIAL SECURITY

(By Janet Reinka)

Say it ain't so: Abigail Van Buren, who writes the widely read "Dear Abby" advice column, was wrong.

In a column to appear in subscriber newspapers on Sept. 26, Abby will have to backtrack a bit on a letter she published recently alerting some Social Security recipients that they were being shortchanged on their benefits.

"Notch-Year Baby," as the letter was signed, invited Abby's fans who were born between the years 1917 and 1921 to write their congressmen to get "corrective" legislation passed so their benefits would be "restored."

The trouble was that Notch-Year Baby had it, if anything, backwards because recipients born during those years actually are getting a break over those born after 1921.

But, incredible as Abby faithful will find it, Notch-Year Baby's letter was followed up by a postscript from Abby herself, telling readers she had checked his information and he was right.

Readers apparently did just what Notch-Year Baby suggested and have swamped congressional and Social Security Administration offices with calls and letters.

To some congressional aides, Notch-Year Baby's name is mud.

"I didn't keep a count of how many people wrote and called," said Bob Woldow, a staff assistant in the Sunnyvale office of U.S. Rep. Ed Zschau, R-Los Altos. "Many people clipped the article and sent it in. I'd say at least three-fourths of the letters for the next few days after the letter appeared were about it."

Woldow said the trouble is that most people who read "Dear Abby" believe her.

"Even if she does write a retraction, by then nationwide millions of people have written to their congressmen."

Abby's editor at Universal Press Syndicate obviously was sick of hearing about Notch-Year Baby, too.

"We've heard from lots of Social Security offices and 20 congressmen," editor Alan McDermott said. "* * * Abby's trying to provide some amplification. I know she won't want to talk to you. Abby will respond in the column."

The column is to include at least part of a "Dear Abby" letter from the Social Security Administration, which was written in rebuttal to the first one, plus whatever Abby herself has to say about the whole affair. Whether it will be an outright retraction or just an explanation remains a mystery.

In his letter, Notch-Year Baby drew readers' attention to the "fact" that people drawing Social Security who were born

during the five-year "notch" were being "unjustly penalized by receiving lower benefits than those born prior to and after the above-mentioned years."

"For example," he said, "if you worked until you were 65 before starting to draw Social Security, you are receiving about $100 less in your monthly check than those born before 1917 and after 1921."

Notch-Year Baby said a bill to correct the "unfair situation" had died in committee but he urged readers to write their congressmen to get them to introduce a new bill.

In fact, the discrepancy Notch-Year Baby was describing arose because of a batch of changes that were made in 1977 as part of former President Carter's attempt to control the ballooning costs of the retirement system.

What got the publicity at the time were the tax increases Congress passed to "save" the system. Overlooking in the fine print were provisions to gradually scale back future benefits.

Because of a 1972 change in the benefit formula, recipients were, in effect, receiving benefits that were double-indexed for wages and inflation. In some cases, according to the Social Security Administration, retirees actually were receiving more in benefits than they did when they were working because of the inflation bonus that was being figured into the formula.

To keep from bankrupting the system, Congress "corrected" the formula to eliminate the inflation bonus, according to Hal Foss, San Mateo District manager for the Social Security Administration. (The formula is further complicated because benefits depend on how long a recipient worked and when he retired.)

Many people born during the five-year notch were nearing retirement and had been counting on the higher benefits. So, for them, Congress approved a two-tiered formula. Those recipients get less money than retirees born before 1917 but more than those born after the notch.

The reduction in future benefits amounts to up to 25 percent for those born after 1916, Foss said, but, because of the two-tiered formula, the full impact falls on those born after 1921. Notch-year babies who have held off retiring retain the right to the old formula computation. When they retire, they will automatically get the highest amount they are entitled to under either the new or the old formula, Foss said.

"There was an incredibly multiplying effect," Foss said of the old formula. "It's more of a windfall for the (notch-year and older) folks who the government refused to roll back."

One unintended result of Notch-Year Baby's letter was that it has belatedly called attention to Congress' sleight of hand in reducing benefits in 1977. The change was made deftly, compared to the senior citizen revolt President Reagan stirred up when he openly taked about cutting benefits.

Social Security recipients who have found out about the benefit reduction usually stumbled upon it by accident. Foss said, for example, that two neighbors in his San Mateo District were comparing checks and found that one was receiving $120 more a month than the other. They came down to the office and learned that the notch-year legislation was responsible.

"There was no real resolution of the problem because one was getting less than the other," Foss said. "But at least they knew why."

Foss said people should not feel cheated because of the scaling-back of benefits between 1977 and 1983.

"It's not that they are being treated unfairly," he said. "It's just that the other people (born before 1917) are being treated more than fairly."

Editor McDermott said he had issued an advisory to subscriber newspapers that Abby's response was scheduled for Sept. 26, but they can run it earlier.

Zschau's aide, Woldow, said most constituents who called to ask about the letter were satisfied with his explanation.

"When you explain it, they have said, 'I thought there must have been something wrong with it (the letter) if no one had noticed it in six years,'" Woldow said.

He would like an answer to something Abby herself may not know:

"I shouldn't speculate," Woldow said, "but I wonder who Notch-Year Baby was?"●

SIXTH DISTRICT OF ALABAMA RESPONDS ON THE ISSUES

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. ERDREICH. Mr. Speaker, this summer I sent to my constituents in the Sixth District of Alabama a questionnaire on some of the major problems and issues facing our Nation.

I am very appreciative of the many citizens in my district who returned their questionnaires. Their views are of great value and guidance to me, and I wanted to share with my colleagues the sentiments of the 7,776 Alabamians who answered my questionnaire.

The questions included in the questionnaire and response percentages follow:

CONGRESSMAN BEN ERDREICH'S CONGRESSIONAL QUESTIONNAIRE

	Percentage		Total number of respondents
	Yes	No	
BUDGET AND ECONOMY			
With the fiscal year 1982 budget deficit of $110.5 billion, the fiscal 1983 deficit of $207.7 billion, and the administration proposing a deficit of $188 billion for fiscal year 1984, to cut these staggering Federal deficits, would you favor:			
1. Across-the-board cuts in Federal Government spending	71	29	[1] 7,518
2. Cuts in defense spending	40	60	7,572
3. Cuts in domestic programs	74	26	7,533
4. A combination of restraint on Federal spending and revenue increases	78	22	7,456
5. Cuts in medicare by improved controls on health care providers	79	21	7,622
6. Cuts in medicare by reducing services provided to beneficiaries	27	73	7,521
7. President Reagan's proposal to impose a standby income tax surcharge and tax on oil in fiscal year 1986 should the deficit exceed 2½ percent of the gross national product	48	52	7,189
8. A constitutional amendment mandating a balanced Federal budget	72	28	7,488
To achieve economic recovery do you favor:			
9. Tight money policies by the Federal Reserve Board to reduce inflation	74	26	7,313
10. Measures to stop the dumping of subsidized imports on the U.S. market	80	20	7,524
11. The creation of a U.S. Department of Trade	33	67	7,215
12. Reducing paperwork and government regulations on U.S. business and industry	83	12	7,571

CONGRESSMAN BEN ERDREICH'S CONGRESSIONAL QUESTIONNAIRE—Continued

	Percentage		Total number of respondents
	Yes	No	
DEFENSE			
Do you favor defense policies which would:			
13. Appropriate funds for the MX missile	70	30	7,332
14. Fund the purchase of the B–1 bomber	67	33	7,240
15. Provide military assistance in El Salvador	54	46	7,307
16. Support covert activities to overthrow the Sandinistan government of Nicaragua	50	50	7,149
17. Send peacekeeping troops to Lebanon	44	56	7,313
18. Freeze at current levels the number of nuclear weapons each nation can build or store	53	47	7,324
19. Reduce the number of nuclear weapons each nation can build or store	70	30	7,338
20. Pursue arms control negotiations with the Soviet Union to bring about mutual and verifiable reductions	87	13	7,572
NATIONAL ISSUES			
Do you favor:			
21. Laws to limit abortions to cases where rape or incest are involved or where a physician has determined that the life or health of the mother is in danger	48	52	7,538
22. Prohibiting Federal funding of abortions under the Medicaid program and Federal employee insurance programs	61	39	7,610
23. A Constitutional amendment banning abortions and prohibiting them in all circumstances	15	85	7,553
24. Congress allowing the states to vote on ratification of the Equal Rights Amendment	52	48	7,478
25. Flat rate income tax proposals that would eliminate mortgage interest, medical and charitable deductions	44	56	7,421
26. Emergency basic medical care or medical insurace for unemployed workers and their families	65	35	7,473
27. Stricter immigration laws including penalties for employers of illegal aliens	90	10	7,618
28. A Constitutional amendment to allow a moment of silent prayer in our public schools	71	29	7,595
29. Tuition tax credits to aid parents whose children attend private schools	56	44	7,633
30. Federal programs to provide increased funding of basic education programs in the public schools	50	50	7,582
31. Abolishing the Department of Education	54	46	7,354
32. Merit pay for exceptional public school teachers	70	30	7,535

[1] The total number of respondents on each question varies, and is less than the 7,776 total received, because a small number of those answering did not respond to all of the questions.●

JIM HARPER

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. CLAY. Mr. Speaker, I wish to have entered into the CONGRESSIONAL RECORD this tribute to a great public servant, recently deceased, who served as administrative assistant to my good friend and colleague, Congressman LOUIS STOKES. His name was Jim Harper.

Jim Harper should be remembered for his courageous spirit, competence, and dedication as a public servant. Throughout the suffering of his last years, he overcame the discomforts of his chronic illness and projected his friendly, soft-spoken countenance to all who came his way. As dean of the congressional black caucus administrative assistants, his counsel was always readily available, freely offered, and very helpful. An inveterate practical joker and purveyor of humor, he was a

joy to all who knew him. This uncomplaining, dedicated civil servant should have his obituary entered for its inspirational value of a life lived well, with much meaning.

OBITUARY

James Curtis Harper was born and reared in Cleveland. Even though he spent the last 12 years of his life in the Nation's Capital, his heart, his thoughts and his energies never left the city of his birth. He worked tirelessly as the Administrative Aide to Congressman Louis Stokes, D-21 of Warrensville Hts., to better the lives of the people of Cleveland.

Mr. Harper died Friday, August 26, 1983 at his home in Silver Spring, Maryland surrounded by his wife of 31 years and his children. Even though Mr. Harper's health had been precarious for some time, due to a hypertensive condition, he continued to function in his professional capacity until the day before his death. Mr. Harper would have been 58 on August 28th.

James C. Harper was an erudite, softspoken man who will be remembered, in part, for his integrity, his dedication to his ideals, and his devotion to his wife and his children.

He was graduated from Western Reserve University with a double major in psychology and sociology. During his years at WRU James became a member of the Kappa Alpha Psi fraternity. Mr. Harper continued his education through graduate programs at WRU as well as Rutgers University.

From 1953 to 1954, Mr. Harper was a social worker at the Warrensville Workhouse. Ten years later, after a stint as county probation officer, Mr. Harper went back to the workhouse as assistant superintendent.

When the superintendent of the city prison resigned unexpectedly in 1966, Mr. Harper was appointed to the position. During his three years on the job, he developed a program permitting prisoners to leave the grounds for regular jobs during the day. Mr. Harper once said he regarded the program as just one in a campaign to change the workhouse from a place of detention to a place of rehabilitation.

In 1969 James Harper became the Commissioner of Manpower Development in Cleveland. While in this position Mr. Harper developed and implemented myriad programs to facilitate and encourage jobtraining programs. A year later he became the first Executive director of the Criminal Justice Coordinating Council. In that capacity he coordinated the distribution of federal and state funds to various criminal justice programs in Cuyahoga County.

In 1971 Mr. Harper left the CJCC to become the Administrative Aide to Congressman Louis Stokes in Washington, D.C. He remained in this position and lived in Silver Spring, Md., until his death.

James Curtis Harper is survived by his wife, Barbara, sons, James C. Harper II of New Orleans and Malcolm J. L. of Cleveland; daughters, Saundra L. and Kimberly A., both of Silver Spring, Md.; his mother Evelyn and sisters, Mrs. Dorris M. Hill of Shaker Heights, and Mrs. Mildred M. Pollard of Cleveland.

TRUE HAPPINESS

Happy are those who reject the advice of evil men,
who do not follow the example of sinners
or join those who have no use for God.
Instead, they find joy in obeying the Law of the Lord, and they study it day and night.
They are like trees that grow beside a stream, that bear fruit at the right time, and whose leaves do not dry up.
They succeed in everything they do.—Book 1 (Psalms 1-3)●

SPIRALING POPULATION CRIPPLES AFRICA

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. AuCOIN. Mr. Speaker, this is the second in a series of six recently published articles on sub-Saharan Africa written by Nicholas D. Kristof, a Rhodes scholar from Yamhill, Oreg.

[From the Oregonian, May 24, 1982]

SPIRALING POPULATION CRIPPLES AFRICA

(By Nicholas D. Kristof)

COTONOU, Benin.—Little Boka is a bright-eyed 9-year-old girl who plays and begs in the dust near the Hotel Babo. One of eight children, she is a victim of the size of her family: The numbers mean less money to go around, less food, less clothing and less space in the hut.

But Boka, herself perhaps only a few years from motherhood, shyly explained that she wanted eight more children for herself. And so one more baby factory will soon begin production, consigning more offspring to a thinner sliver of the economic pie.

Dizzying population growth is a primary reason for and result of poverty in Africa. Modest increases in the national income and food production are overtaken by surges in population, so that the amount of income and food per person is stagnant or falls.

Population in Africa is growing faster than anywhere else in the world—and the growth rate is accelerating. Annual population growth in the 1960s was 2.5 percent; in the 1970s, 2.7 percent; and the World Bank predicts that for the next 20 years, the population will grow by 3 percent per year. At that rate, the population will double every 24 years.

The snowball effect is dramatic. In Boka's homeland, poverty-stricken Benin, 4 million people eke out an existence in a country less than half the size of Oregon. The World Bank projects that when the population stops growing in the year 2110, Benin's population will be 16 million. Even that figure could be low.

Thomas Malthus' grim predictions of population growth outstripping food production are coming true in Africa. In the 1960s, the volume of agricultural production rose by an average of 2.3 percent per year, and in the 1970s, by 1.3 percent per year. But both figures were behind the rates of population growth, so Africa now produces less food per person than it did 20 years ago.

Furthermore, natural resources such as timber and oil are being increasingly swallowed up for domestic consumption, eroding the countries' limited export base. Nigeria has abandoned its agriculture and has come to depend on oil exports for survival. But the Nigerian population, now about 90 million, is shooting upward so quickly that by the year 2000 all its oil may be needed for domestic consumption—a formula for unimaginable disaster.

The cities are bearing the brunt of the new oceans of people. As everywhere in the developing world, people are fleeing the villages for the dazzling lights of the cities—only to sleep in the streets and slums. Urban populations are soaring by 6 percent per year in Africa, or 8.5 percent in 35 large capitals. At that rate, the population doubles every nine years.

The cities cannot absorb the influx, so the people live in the vast shantytowns of Lagos, Dakar, Cotonou and other cities. Pressed together amid the stench and filth, the streets their only toilets, they do anything to survive. Many become entrepreneurs, selling fruit, cigarettes, their own sisters.

The reason for the population boom is simple: Improved health care slashed death rates while birth rates remained constant or fell only slightly. For example, in Liberia, one of the fastest growing countries in the world, the birth rate dropped 4 percent from 1960 to 1979, but in the same period the mortality rate fell 33 percent. Now in Liberia, 48 babies are born each year per 1,000 people, while only 14 die.

The impulse in the West is to call for birth control strategies, but the obstacle is that parents frequently want very large families. When African women are surveyed and asked how many children they want, the national averages range from 5 to 10. And that is how many they get; the current average in Africa is 6.6 live births per woman.

Why do they want so many children? The answers often are quite rational. In societies without social security or pension plans, children are the parents' only guarantee that they will be cared for in old age. Sometimes, the parents believe the children will be able to bring in extra money, by hawking fruits or cigarettes.

Where disease or injury can strike anyone anytime, a child is the only insurance available. In Mali, river blindness is widespread, afflicting 10 percent of the population in some areas. The victims who have no children sit all day, all night, on the street, hands outstretched. The victims with children at least have a child to lead them to places where they can beg, buy food, escape from storms or simply relieve themselves.

So parents want a few children as insurance. But to get a few children, they must have many children because of high infant mortality and child mortality rates. In some rural areas, half the children die before the age of 5. Moreover, sons are much better insurance than daughters, so the parents really want a few sons. But this is an expensive insurance policy, exhausting for the mother and debilitating for the country.

Eventually, this mad roller-coaster ride will grind to a halt, for with urbanization and development comes a tempering of the desire for large families. Education is one brake: Schooling delays the point when a child becomes a benefit rather than a burden to the family, and studies also show that educated women have markedly fewer children than uneducated women. Some countries in Africa already are enjoying declines in population growth, and birth control programs can help significantly at this stage.

The World Bank predicts that between 2075 and 2140, all African countries for which data is available will reach zero population growth. But the stationary populations reached by then are daunting: 450 mil-

lion for Nigeria (compared to 90 million now); 109 million for Kenya (16 million now); 42 million for Zimbabwe (7 million now). Tiny Gambia will swarm with 3 million inhabitants (600,000 now), Zaire will rise from 28 million to 139 million.

This is the population bomb. It detonates not with a bang but with the whimpers of millions of newborn, hungry children. Defusing it is perhaps Africa's greatest challenge.●

LEBANON—LET'S LOOK BEFORE WE LEAP

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. SEIBERLING. Mr. Speaker, the Reagan administration, having dropped U.S. marines into the Lebanon quagmire, now wants Congress to ratify the action and sign a blank check for future commitments. Yet, couriously, the administration does not want to concede that Congress has any right to participate in the decisionmaking as to the terms and conditions of present or future troop commitments there.

This might not be so bad if the administration had pesented a definitive statement as to the policy it is pursuing in Lebanon, how the marines' presence there fits into the picture, how many personnel will ultimately be needed, what it will cost and how long it will take. But neither the Congress nor the American people have been given any such statement. One may be forgiven for wondering whether the administration itself has any clear policy or has any answers to these questions.

In any event, before Congress takes any action that would give its blessing to the continuation of U.S. Armed Forces in Lebanon, Congress should insist upon at least the following:

First, an acknowledgment by the administration that the War Powers Act was triggered when the marines became the objects of hostile fire in later August or early September.

Second, an explanation by the administration in precise and full detail as to the policy reasons for a continuing U.S. military presence in Lebanon.

Third, not only a policy but one that appears to have some chance of achieving a political solution that will restore peace and stability to Lebanon within a reasonable time.

Of course, the proposed policy itself should be thoroughly aired and tested in an informed debate in both Houses of Congress before any final military commitment is made. Some of the factors to be taken into account have already been brought out in the lively debate that has developed in the news media. For example, the Washington Post of September 4 contained an excellent article by L. Dean Brown, who was President Ford's special envoy to Lebanon. Mr. Brown points out that the American and other units of the multinational force are close to being regarded as allies of the central government under domination of the Maronite Christian Phalangist Party and its private militia. The trouble with that is that the Maronites are a minority in Lebanon and the Moslems fear a state dominated by them. As Mr. Brown points out:

Constant American repetition of a policy toward Lebanon of territorial integrity, independence and creation of a strong central government—without ever a word about political reforms or the need to recreate a national consensus based on power sharing—amplified the fears.

Brown goes on to outline the kind of change that is needed in American policy if it is to have any chance of success in Lebanon:

American policy toward Lebanon needs a dramatic change. It cannot rely on the premise that the Soviet Union and Syria are somehow behind all the troubles, that Syrian and Israeli withdrawal will somehow bring peace or that a Phalange-dominated government can prevent a renewed outbreak of guerrilla and urban war.

Instead of relying solely on President Gemayel, the United States should turn its energies toward the creation of a new national consensus. Once again—how often does it have to be said?—the United States needs to support widely shared aspirations rather than personalities.

In another excellent article, printed in the Akron Beacon Journal of September 16, the New York Times writer Anthony Lewis states the question in even stronger terms:

In this political tangle then, what is the mission of the Marines? Are they to be one more American military force dispatched without political understanding and diplomatic will, so that they become sitting ducks?

Or are the Marines really there to support the Gemayel government right or wrong, as the Reagan administration has seemed to be signaling lately? If so, that is folly built on ignorance. It will not impress the Syrians, or our partners in the multinational force. A policy without the political determination to move toward a more inclusive Lebanese system is a recipe for disaster: for Lebanon and the United States.

These comments give added force to the editorial in the Akron Beacon Journal of September 17, which points out that:

Unless Americans aims in the mess are clearer than they seem so far to much of the public and many in the Congress, we might be only stepping deeper into a quagmire without any clear notion of how we plan to pull ourselves out of it.

Today's Washington Post carries a story that a compromise has been worked out between the Senate leadership and the White House and that it is hoped that Speaker O'NEILL will agree. That is all very well, but the White House and the leadership ought to understand that an issue of this importance is not going to be resolved by a backroom deal. The Congress and the American people are entitled to a clear, detailed justification for continued American military presence in Lebanon. Failing that, the Marines should be withdrawn.

The complete text of the articles and editorial referred to follow these remarks:

[From the Washington Post, Sept. 4, 1983]

SAVING LEBANON

(By L. Dean Brown)

Since Lebanon's independence in 1943, its dream has been a carefully balanced coalition held together by a presumption of equal treatment for all religious communities. The fragile network of understanding has been shattered in the past, then patched up, and then shattered again.

Unfortunately, it is again on the path to disintegration. In 1958, American Marines and an astute political operator, the late ambassador Robert Murphy, were able to facilitate the patching process. Today, American Marines may be watching, or even participating in, a collapse.

What has happened? Malik Salam, a respected Moslem leader, says the Lebanese parliment elected Amin Gemayel as president of Lebanon, but it did not elect the Maronite Phalangist party and its private militia to take over power in the country.

Walid Jumblatt, leader of the Druze, believes there was a political deal with the Phalange before the Lebanese army went into Christian East Beirut, the Phalange's home territory, earlier this year. He insists he will not let that army into the mountainous Chouf area—where Druze have lived for centuries—until there is a far-reaching political understanding with the central government.

The type of understanding he and many Sunni and Shia Moslem leaders—seek is not clear; little is clear in Lebanon. It increasingly appears to be a demand for change in the political structure of the country that would permit a greater sharing of power. "Greater sharing" could lead to a denunciation of the decades-old unwritten National Covenant, which gives the powerful presidency, army command and parliamentary control to Maronites, or it could be the creation of a government of reconciliation to include leaders like Saeb Salaam, a respected Sunni, Nabih Berri of Amal, which is the Shia fighting force, and Druze leader Jumblatt.

In a powerful end-of-Ramadan address this summer, the leading Sunni religious figure, addressing tens of thousands of Moslems in the Sports Arena, said there can be no usurpation of power by one armed group, that political power must be shared through a revision of the National Covenant and that all private militias—not just some—have to be disbanded.

It is this last point that has precipitated the present crisis. On Aug. 16 Israeli Defense Minister Moshe Arens flew to Beirut where he met, first, with Sheik Pierre Gemayel, head of the Phalange political party and, second, with Fadi Frem, the commander of the Phalange militia. The minister said later he had urged "political accommodation between the Christian and Druze communities."

In Beirut, however, the meeting was viewed differently. Non-Maronite Christians and Moslems alike saw it as a blessing of the Phalange forces. It exacerbated their fear

that Amin Gemayel was not a president committed to protect all religious communities but the captive of the Phalange militia that had already flexed its muscles in Beirut, the Chouf and the south.

From fighting over turf in the Chouf between Maronite and Druze forces the conflict has spread to Beirut, involving not just Druze and their new enemy, the Lebanese army, but others. The Shia militia, Amal, is heavily armed and is driven by the demand for "social justice" that we saw in the struggle against the shah in Iran. It has entered the fray. So have the long-dormant Murabitoun, a leftist and originally pro-Nasser force.

Fighting now is as complicated and as difficult to understand as it was in 1976. The chief difference is that the PLO is not involved and that the multinational force can become the accidental—or perhaps, if fighting rages uncontrolled—the planned target. We are not yet at the latter stage. Much of the fighting is a form of political bargaining. The Druze and Moslem groups are saying: "We too have arms and power. If you refused to hear our pleas in former times of peace, we'll make them louder today with guns." This sort of political bargaining can quickly degenerate into chaos.

This is where the United States comes in Washington talks of sending in more troops or pulling them out. But it's not that simple. It is obvious that the nature of the game has changed. From unloaded rifles when they arrived a year ago, the Marines have moved to exchanging fire—often with unknown opponents. The hope that the presence of a multinational force would calm the situation and then lead to popular support of a strong central government whose army would control and disarm the multiple militias is gone. Instead, American, French, Italian and British troops are close to being regarded as allies of a central government under Phalange domination. This is a dangerous situation.

It was indeed former Israeli defense minister Ariel Sharon's desire to see a Maronite-dominated government in power, a government that could sign a peace treaty with Israel even if it meant cutting off Lebanon from the Arab world. Many Lebanese Moslems, who saw themselves no longer as unequal partners in a national consensus but as doomed to subservience in a one-party state, viewed American policy as supporting the Sharon line. Constant American repetition of a policy toward Lebanon of territorial integrity, independence and creation of a strong central government without ever a word about political reforms or the need to recreate a national consensus based on power sharing amplified the fears.

American policy toward Lebanon needs a dramatic change. It cannot rely on the premise that the Soviet Union and Syria are somehow behind all the troubles, that Syrian and Israeli withdrawal will somehow bring peace or that a Phalange-dominated government can prevent a renewed outbreak of guerrilla and urban warfare.

Instead of relying solely on President Gemayel, the United States should turn its energies toward the creation of a new national consensus. Once again—how often does it have to be said?—the United States needs to support widely shared aspirations rather than personalities.

In June 1982 Henry Kissinger wrote in The Post that the Israeli invasion of Lebanon "opens up extraordinary opportunities for dynamic American diplomacy in the Middle East." How pretentious that all seems today. How necessary it is to deal with the perverse realities.

[From the Akron Beacon Journal, Sept. 16, 1983]

A PROPER LEBANESE SYSTEM CANNOT EXCLUDE FACTIONS

(By Anthony Lewis)

BOSTON.—A Lebanese Moslem who prospered in the construction business, Rafiq Hariri, launched a charitable project near his home town of Sidon: a $300 million hospital and college. Last spring Phalangist Christian militiamen visited the site. At gunpoint they took bulldozers, tractors, trucks and other equipment. Phalangist leaders made clear that Hariri was suspect because of his religion and his business activities in Saudi Arabia.

Hariri stopped construction. He appealed to President Amin Gemayel, whose family runs the Phalange. But last month the Washington Post reported that most of the stolen equipment was still missing and the project stopped.

That small incident—small by the bloody standards of contemporary Lebanon—makes a point that Americans ought to understand as our military commitment in Lebanon deepens. It is that many elements in the Lebanese mosaic have legitimate fears about the way things are going under the Gemayel government: not just the Druse who are fighting now, but Sunni and Shia Moslems and some Christians.

In recent days, the White House has been sparring with congressional leaders about constitutional issues in the deployment of Marines in Lebanon. They are in substantial agreement now on a resolution authorizing the President to keep forces there for an extended period. The remaining question is whether President Reagan will accept language that recognizes Congress' authority in this area.

All that is very interesting to constitutional scholars, and important in the endless contest of power between our executive and legislature. But it has little to do with the problem in Lebanon. That is a political problem: the failure of the Gemayel government to build the national Lebanese consensus needed to govern a country divided by tribe and sect.

The real question about the Marines, in short, is what diplomatic and political strategy they are supposed to be supporting. The answer to that question is not clear. If the Reagan administration has an idea on how to piece together even a limpingly viable Lebanese policy, it is keeping the concept a secret. It has worked for a ceasefire, but does it have any longer-run political vision?

Gemayel took office with a lot of good will going for him. He won the support of some of the grand old feudal leaders of Labanon. Americans who care about the once beautiful country were rooting for him.

But today no realist can fail to see that much of the early hope for Gemayel has dissipated. Authoritative reports from Lebanon agree that a fundamental reason is the feeling of other communities that he has run, or at least tolerated, an excessively sectarian government.

Consider the situation in the Shouf Mountains, the region near Beirut that has been the scene of the recent heavy fighting. That is the heartland of the Lebanese Druse. Scattered among them are villages of Christian Maronites, mostly followers of Camille Chamoun, a Maronite warlord and former president of the country.

After the Israeli invasion last year the Phalangist militia, the private army of the Gemayel branch of the Maronites, moved 2,000 soldiers into the Chouf. The Druse are insistent that they must leave; Chamoun's Maronite followers also reportedly want them to go, feeling life would be more peaceful if it returned to the old way of local arrangements. But the Gemayel government, unwilling or unable to move the Phalangists out, proposed to send in on top of them a national army that the Druse distrust. Tension was inevitable.

Beyond the obscure hatreds of the Chouf, there are widespread feelings among the Moslem majority in Lebanon that its people are not getting a fair shake from the Gemayel government. Some bureaucratic jobs and ambassadorial posts that in the part had gone to them have now been given to Christians.

Gemayel may well have the best of intentions and simply lacked the power to carry them out. His degree of influence over the Phalange is uncertain. But in any event an internal solution, as a Western diplomat in Lebanon said the other day, will have to involve "the Phalange reducing its demands and tolerating more equal treatment for the Moslem segments of the community."

In this political tangle then, what is the mission of the Marines? Are they to be one more American military force dispatched without political understanding and diplomatic will, so that they become sitting ducks?

Or are the Marines really there to support the Gemayel government right or wrong, as the Reagan administration has seemed to be signaling lately? If so, that is folly built on ignorance. It will not impress the Syrians, or our partners in the multinational force. A policy without the political determination to move toward a more inclusive Lebanese system is a recipe for disaster: for Lebanon and the United States.

[From the Akron Beacon Journal, Sept. 17, 1983]

U.S. AIMS IN LEBANON NEED TO BE MADE CLEARER

The reason for this week's change in the orders to U.S. forces in and off Lebanon, it is reported, was that Secretary of State George Shultz—and then President Reagan—agreed with Mideast envoy Robert McFarlane's view that it will improve chances for a cease-fire and the start of a political rather than military resolution of Lebanon's problems.

Secretary of Defense Caspar Weinberger and the chiefs of staff, it is further reported, disagreed—but they lost the debate.

If it works, that's great. If it doesn't, unless American aims in the mess are clearer than they seem so far to much of the public and many in the Congress, we might be only stepping deeper into a quagmire without any clear notion of how we plan to pull ourselves out of it.

The change is a considerable lengthening of the leash on those on the scene in freedom action

It not only allows the Marine contingent onshore to call for U.S. air and naval artillery support when it is deemed needed for self-protection, but allows extension of that "umbrella" to other contingents of the multinational peacekeeping forces there and even to the Lebanese army under specified circumstances.

The order authorizes not only shooting back when shot at, but possible pre-emptive

strikes where they are judged necessary to protect the sheltered forces.

And where earlier any decision to use this kind of force had to be cleared through Washington, the naval task-force commander there will be free to make up his mind on the spot—shortening reaction time.

This, the Shultz-McFarlane school reasons, may cause Syrian-backed Druse forces to rethink the wisdom of continuing their foray toward Beirut, substantially changing their "cost-benefit" calculations.

That, in turn, could encourage a cease-fire and the start of an exchange of ideas rather than shells.

The change is a clear, if limited, strengthening of U.S. support for the struggling government of President Amin Gemayel; but that, after all, was a main point of the putting U.S. and other peacekeeping forces there.

Few in the Congress seem eager to demur—even among those arguing most strongly that under the War Powers Act congressional approval and advice should now be brought into play.

There appears to be a near-unanimity that it would be unwise to withdraw the U.S. forces involved, and this seems a logical extension: If they have to be there, they should somehow be made more effective.

But even Howard Baker, Mr. Reagan's team leader in the Senate, is underscoring a need for clarification of American aims so that the Congress and the public can better understand what is being done and why.

What is likely to be haunting at least some of them is the other possible reaction to broadening of American activity there.

The forces opposing the Gemayel government there, and their Syrian and ultimately Soviet backers, might decide to up the combat ante instead of talking. And the Gemayel government might prove unequal to dealing with it even with this stepped-up help.

Then we might face a long, costly and confused involvement. To cope with it we would need at the very least to be clear about what we are trying to do and how.●

PARRIS INTRODUCES FEDERAL EMPLOYEE PAY RAISE LEGISLATION

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. PARRIS. Mr. Speaker, I am introducing legislation today which calls for a 6.9-percent pay increase for Federal officers and employees, effective as of January 1, 1984.

For several years now, Government workers have received limited pay increases, have had substantial reductions in health benefits, and have been required to contribute to the medicare trust fund. To add insult to injury, these same employees will soon experience further reductions in their compensation and benefits.

Depending on how quickly the Congress acts, the new compensation formula will result in a pay reduction beginning next month or whenever Government workers get a pay increase. Unfortunately, any pay increase is going to be offset by new reductions in the Federal employees health benefits program.

While we do have legislation which would increase the Government's contribution to the health benefits program, its uncertain how quicky we will be able to win congressional approval for that proposal. It has been reported that increases in health insurance premiums could average between 18 to 25 percent in January, a 3.5- or 4-percent pay increase would be offset completly if this happens.

The President's own pay advisers have reported that Federal pay lags behind the private sector by about 20 percent. Labor Department surveys show that the average pay increases for U.S. workers in 1983 were between 4.2 and 9.7 percent, with most raises ranging in the 6.5- to 8.5-percent range.

After reductions are made in health benefits and the new pay formula is implemented, it will take at least a 6.9-percent pay increase to enable Government workers to just to break even. I urge my colleagues to support this bill and any other effort to preserve Federal employee pay and benefits from any further reductions.●

THE MEDICAID PRESCRIPTION DRUG COPAYMENT AMENDMENTS OF 1983

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. WAXMAN. Mr. Speaker, I am today introducing H.R. 3941, the Medicaid Prescription Drug Copayment Amendments of 1983. This bill would prohibit States from imposing copayments or any similar charges on medicaid beneficiaries with respect to prescription drugs.

Under current law, States are permitted to impose nominal copayments on medicaid recipients for a range of covered services. There are certain exceptions. States may not impose any copayments on pregnant women (for pregnancy-related services), on children, or on nursing home residents. In addition, States may not impose copayments on emergency services, family planning services and supplies, and services provided by an HMO.

Where a State chooses to impose copayments, the provider is generally responsible for collecting the required amount. States will commonly reduce reimbursement to participating providers by the amount of the required copayment. If the beneficiary cannot pay the required copayment, the provider must nonetheless deliver the service. Of course, the beneficiary remains liable to the provider for the copayment amount, and may be subject to Collection Action, Inc.

About 22 States and the District of Columbia now impose copayments on prescription drugs. These copayments range from 50 cents to $3 per prescription. They represent a reduction in the dispensing fee paid to pharmacists and drugstores by the States for processing the prescriptions of medicaid patients. This reduction varies from 8 percent to 73 percent of the fee.

The copayment requirements pose a special problem for pharmacists and drugstores. Many medicaid patients simply cannot afford to pay the copayments, particularly if they require multiple prescriptions. Moreover, it is virtually impossible, as a practical matter, for a pharmacist to determine whether a beneficiary is unable to pay. Efforts to collect these small amounts are extremely costly. Yet, in the aggregate, the loss in reimbursement for the pharmacists and drugstores can be large, particularly in those stores located in poor neighborhoods serving large numbers of medicaid patients. According to the National Association of Chain Drug Stores, the potential loss to pharmacies resulting from medicaid copayments in the States that now impose them could be as high as $43 million.

Whatever justification there might be for imposing copayments on the poor with regard to hospital care or physician services—and I do not believe there is any—there is none in the case of prescription drugs. The classic rationale for copayments is the reduction of unnecessary utilization of medical services. If patients are required to pay part of the cost of their care, they will use less.

This argument assumes, however, that the patient makes the decision about whether to use the service or not. Certainly, the patient generally decides whether to see a physician. However, it is the physician—not the patient—who decides whether a prescription is necessary. The patient can only decide not to fill the prescription that the physician has written, presumably because the drug is necessary for the patient's treatment. The pharmacist simply fills the prescription.

The current medicaid copayment policy penalizes both the patient and the pharmicist, neither of whom make the critical decision. If excess utilization of prescription drugs is a problem in State medicaid programs, then it should be dealt with directly by addressing physician prescribing practices, not by reducing the income of the poor or the reimbursement to pharmacies.

This legislation would eliminate an unnecessary and costly burden on pharmacists and patients alike. I would urge my colleagues to support it.●

PERSONAL EXPLANATION

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. CORCORAN. Mr. Speaker, due to previous commitments in Illinois yesterday, I was not present and voting during the consideration of H.R. 3222, State-Justice appropriations bill for fiscal year 1984. Had I been present, I would have voted against the motion that the Committee of the Whole rise and report the bill back to the House since there were several amendments relating to school busing and school prayer which were precluded from being offered by this motion. I was "paired against" final passage of this bill because it was grossly over budget.●

IN HONOR OF MILITARY RETIRED IN FEDERAL SERVICE

HON. ROBERT T. MATSUI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. MATSUI. Mr. Speaker, I would like to bring to the attention of my colleagues a group of constituents in my district of Sacramento, Calif., who have recently formed an organization to address the needs of retired military personnel working for the Federal Government. This organization, Military Retired in Federal Service, now has more than 500 active members in the Sacramento area, with plans to expand membership throughout California and the Nation. The aim is to work with the Congress and Federal agencies to insure fair and equitable treatment for former military personnel employed by the Federal Government. Membership by active-duty military personnel is also encouraged.

The impetus for developing Military Retired in Federal Service was the Omnibus Reconciliation Act of 1982, which, as you know, provided that civilian Federal salaries of military retirees would be reduced dollar for dollar by the amount of pay increase in retired military pay. Believing that this reduction constituted an unfair burden on military retirees, efforts were begun to organize a group that could speak for the interests of this special group of Federal workers.

The development of Military Retired in Federal Service is thus a fine example of the American political process in action. I commend the organization to my colleagues and look forward to working with its membership on issues of concern over the course of the congressional session.●

THE 101ST LABOR DAY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. CLAY. Mr. Speaker, currently, the House is considering a major jobs creation bill, the Community Renewal and Employment Act. For this reason, I would like to bring to the attention of my colleagues Congressman WILLIAM FORD'S very eloquent description of the unemployment crisis which cripples our Nation. Below is the text of Congressman FORD'S Labor Day address:

LABOR DAY ADDRESS BY CONGRESSMAN WILLIAM FORD, SEPTEMBER 3, 1983

This is Congressman Bill Ford of Michigan.

This weekend we observe our 101st Labor Day to honor America's working men and women.

This year we should pause to reflect on the plight of those millions of men and women who are unemployed. Approximately ten and a half million American wage earners can't find jobs. And more than a million and a half others have become so discouraged that they have quit looking.

Today President Reagan is taking credit for reducing the nation's unemployment rate. What could be more ironic? In effect he is saying he is reducing the suffering he caused in the first place.

In July of 1981, when President Reagan's economic program was put into place, the unemployment rate was 7.2 percent and the President said he would reduce it steadily.

Since then we have experienced the worst economic pain for workers since the Great Depression.

The record is clear. President Reagan's economic policy guaranteed both the recession and the high unemployment rate that followed. He pushed through the biggest tax cut in history for the rich and the largest peace time defense budget, while slamming on the monetary brakes.

Reaganomics, it turns out, was a dreadful miscalculation. And American workers and their families are paying for it. So are the families of the disadvantaged.

President Reagan promised that drastic cuts in social programs would pay for the tax cut and the defense buildup. He said the tax money saved by the wealthy would be turned into new plant and equipment and this would generate more than enough offsetting revenues.

Obviously it hasn't worked out this way. Instead many of the budget cuts have damaged our social fabric and pose a threat to our future.

Let's look at some of the results:

Spending on employment and training during 1982-85 has been reduced 60 percent at at time when Americans desperately need new skills for a new economic age. Job training programs have been cut 35 percent.

Despite convincing studies that the U.S. is falling behind in education, spending on almost every education program has been cut almost $4 billion in the last 3 years.

Child nutrition programs have been slashed 28 percent. A million lower income children have been cut from school feeding programs. Now the same President who dictated these cuts says that he is "perplexed and confused" by the growing problem of hunger in America.

I am especially disturbed by this President's lack of vision in terms of education. The enviable standard of living we enjoy in this country is a direct result of our commitment to educational opportunities.

Mr. Reagan is fond of reminding people that he was a union president thirty years ago. He has forgotten a lot in 30 years. Why else did he appoint an anti-union activist to head the agency that protects the right to join a union? Why did he cut the budget of the Occupational Safety and Health Administration? Why did a union have to sue Mr. Reagan's Secretary of Labor to get Trade Adjustment benefits for workers whose jobs were eliminated by imports?

I ask you to judge this President not by what he says, but by what he does and what he is not doing.

America urgently needs a coherent industrial policy, a program of aid to education, encouragement of basic science and applied research, financial aid to essential industries, trade restrictions and tax policies that stimulate innovation and production instead of mergers and plant closings.

We need credit policies that favor productive investment in basic industries and growth in the supply of basic needs such as housing.

Mr. Reagan has undermined each element that should be part of this policy. He opposed the Chrysler loan guarantee. He opposes reasonable trade legislation such as the domestic content bill. He supports tight money policies, and has artificially overvalued the dollar, making it difficult for American companies to sell products abroad.

Worst of all, Mr. Reagan has ignored the needs of workers hurt by his policies.

Between May of 1982 and May 1983, 6.8 million Americans exhausted their unemployment benefits. Mr. Reagan's response was to cut food stamps, to oppose legislation to provide health care and jobs for the unemployed.

President Reagan's record is one of broken promises for America's working men and women. And his policies pose a threat to their future.●

DEDICATED PUBLIC SERVICE

HON. WILLIAM R. RATCHFORD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. RATCHFORD. Mr. Speaker, I rise today in recognition of Gertrude Quist Walker, the Republican town clerk of the town of Weston for 38 years. Ms. Walker's life in public service has certainly been a distinguished one. She was first elected town clerk in 1945, the post she still occupies today. In addition to her fine service as town clerk, Ms. Walker also served as secretary to the planning and zoning commission and other zoning board of appeals. All of us in public service will miss her daily presence in town hall and thank her for her fine record of outstanding service. Thank you, Mr. Speaker.●

ONE SOLUTION TO THE DRUNK DRIVING EPIDEMIC: STATES RAISING THE DRINKING AGE TO 21

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. GOODLING. Mr. Speaker, in the last year, I have become very active in Congress, in some of the States, and with private organizations in promoting legislation addressing a very serious problem in this country: teenage drunk driving.

Do you know what I have learned? Although drunk driving is a problem that pervades all age groups of our licensed population, it is especially severe for teenagers. The combination of learning to drive, youthful risk taking, and drinking makes auto accidents the No. 1 killer of teenagers in this country.

I have made a real effort to draw attention to this problem, and to persuade the Congress to make a strong statement in support of a uniform national policy, enacted individually by the States, because 23 years in the education field has taught me a valuable lesson—that the youth of this country are valuable to this country beyond description.

Most of the ones so tragically affected by teenage drunk driving are just beginning to understand who they are and what they want out of life. They have parents. They have interesting, and chances are, innocent faces. They listen to stereos. They play video games. They compete on athletic fields and in the classroom. They talk for hours on the telephone. And all too many of them can only be remembered now—remembered by the high school graduation picture hanging on the living room wall of a family that will never be the same. Remembered for who they were, and sadly, for whom they might have been.

Consider these tragic facts: Our teens make up only 8 percent of the population, drive only 6 percent of the highway miles, yet they are involved in 15 percent of fatal alcohol related accidents.

Of the 25,000 persons who die each year in drunk driving accidents 5,000 are teenagers and almost 35 percent are between the ages of 16 and 24.

In fact, 14 teenagers die each day in drunk driving accidents.

On the other hand, many innocent persons driving within the limits of the law are also affected by teenage drunk drivers. All too often, we forget about the teenager who caused someone in the other car to lose his or her life, and then was forced to live with that stigma and terrible nightmare long afterward.

In response to this, I have introduced House Concurrent Resolution 23, a resolution expressing the sense of the Congress that the minimum age for drinking and purchasing alcoholic beverages should be raised to 21.

This resolution reflects one of the key recommendations of the Presidential Commission On Drunk Driving. Senator ARLEN SPECTER has introduced the companion resolution, and so far 15 U.S. Senators and 78 Members of Congress have cosponsored the measure. It has received endorsements from Cabinet Members Elizabeth Dole, the Secretary of Transportation, and Margaret Heckler, the Secretary of Health and Human Services. In addition, numerous organizations and affiliations have endorsed 21 nationwide, led by the National Transportation Safety Board, the National Safety Council, and Mothers Against Drunk Drivers (MADD).

I hope we see passage of House Concurrent Resolution 23 in this session of Congress, for I really do believe this is an issue which all the State legislatures should take up in their respective chambers—particularly at a time when many of the States are reviewing their educational systems. If we really are in pursuit of excellence in education, then we cannot overlook teaching our teens as well as our youngsters about the problems of alcohol abuse, and the dangers posed by drinking and driving.

Recently, I received the following letters of support for this idea, which I commend to my colleagues' attention, from: The American College of Preventive Medicine, Public Citizen, the Motor Vehicle Manufacturers Association, the Nurses Association of the American College of Obstetricians and Gynecologists (NAACOG), and the National Extension Homemakers Council, Inc.

The letters follow:

AMERICAN COLLEGE OF PREVENTIVE MEDICINE
Washington, D.C., July 28, 1983.

Hon. WILLIAM GOODLING,
Cannon House Office Building,
Washington, D.C.

DEAR CONGRESSMAN GOODLING: On behalf of the American College of Preventive Medicine, I am writing to indicate endorsement of H. Con. Res. 23, now pending in the House Committee on Judiciary and on Public Works and Transportation.

As I am sure you are aware, the College has been quite active in the area of automotive safety and is particularly supportive of measures that would lessen the severe toll of automobile accidents on our nation's youth. We therefore congratulate you on your introduction of H. Con. Res. 23 and are pleased to lend our support to it.

Sincerely,

JEFFERSON C. DAVIS, M.D.,
President.

PUBLIC CITIZEN,
Washington, D.C., August 2, 1983.

Representative BILL GOODLING,
2263 RHOB,
Washington, D.C.

DEAR REPRESENTATIVE GOODLING: Thank you for your letter of June 28. I agree with you that teenage drunk driving is a severe problem which should be more actively addressed than it is now. I will be happy to support your efforts to ameliorate the problem. Please accept my endorsement of House Concurrent Resolution 23.

Sincerely,

JOAN CLAYBROOK,
President.

MOTOR VEHICLE MANUFACTURERS ASSOCIATION,
Washington, D.C., August 9, 1983.

Hon. BILL GOODLING,
House of Representatives,
Washington, D.C.

DEAR MR. GOODLING: I am pleased to assure you that, as a member of the Presidential Commission on Drunk Driving, I endorse and support your efforts to raise to 21 the minimum age for purchasing and drinking alcoholic beverages in those states which now permit drinking below the age of 21.

At the regional hearings of the Commission, officials and citizens discussed the drinking and driving problem in their states and communities. These hearings convinced me that the overinvolvement of young drivers in fatal crashes justifies intensive nationwide action to reduce the extraordinary social and economic losses from alcohol-related accidents. Your resolution is a vital part of that action.

Very truly yours,

V. J. ADDUCI.

AUGUST 11, 1983.

Hon. BILL GOODLING,
House of Representatives,
Washington, D.C.

DEAR MR. GOODLING: The Nurses Association of the American College of Obstetricians and Gynecologists supports the intent of House Concurrent Resolution 23 to raise the drinking age to 21. We agree with the concept that we should have a national standard with the legal minimum age of 21 to purchase alcoholic beverages.

Sincerely yours,

EILEEN C. LEAPHART, RNC, MN,
President.

NATIONAL EXTENSION HOMEMAKERS COUNCIL, INC.,
Vale, Oreg., September 9, 1983.

Representative BILL GOODLING,
Cannon Office Building
Washington, D.C.

DEAR REPRESENTATIVE GOODLING: At our recent Conference, the representatives of our 500,000+ membership voted to support your efforts to raise the legal age for drinking to 21. Extension Homemakers have long been active supporters of traffic safety with extensive programs in ridding the highways of drunk drivers and supporters of use of seat belts and infant restraints.

Our organization has an excellent communications network already in place, with contracts from our national chairmen to state chairmen to county chairmen and the local club member. We are ready to put your message into the hands of these club members if this is what you wish.

Our National Safety chairman is Mrs. Mabel Givens, 713 Market Street, George-

town, Del. 19947, phone (302) 856-3498. You may contact her if you wish us to share your concerns of the "21" law with our members. We have state councils in 44 states, Puerto Rico and the U.S. Virgin Islands.

We will be looking forward to hearing from you as to what programs we can offer to assist in making this into a law.

Sincerely,

MARJORIE GRIFFIN,
President.●

LEO POLK—SELFLESS CITIZEN

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. SMITH of Florida. Mr. Speaker, on September 25, 1983, Mr. Leo Polk of Dania, Fla., will donate blood for the 320th time. At age 75, Mr. Polk is our country's most generous blood donor. His donation this coming Sunday will bring his donations to the 40-gallon mark. This is particularly noteworthy in this day and age when many are still relunctant to donate blood.

Mr. Polk's life has been one of giving. He fled Czarist Russia with his parents and began giving blood as a way to serve his adopted Nation when a medical condition kept him out of the military. Not only did Leo Polk give blood, but he assisted in the organization of hundreds of blood drives.

Mr. Polk will be honored on the 25th of this month at the dedication of the new Broward Community Blood Center. His consistent and continued donation of blood is an act which should not go unnoticed. Attaining the status of the Nation's top volunteer blood donor is a symbol of his unselfishness and is a very personal expression of public service to his community and Nation.

The importance of donating blood cannot be overemphasized. Mr. Polk has continued to donate at a time when many would have considered that they had contributed enough to their community.

There is no way to know how many lives Mr. Polk has saved and will continue to save through this invaluable service.

I want to thank Leo Polk for his service and hope that others will follow his example. His valuable service cannot be replaced.●

THANK YOU MR. WILLIAM BURKHART

HON. LYLE WILLIAMS

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mr. WILLIAMS of Ohio. Mr. Speaker, I would like to take this opportunity to honor a man who began his savings and loan career as a messenger boy 47 years ago. This man, Mr. William Burkhart, is now being recognized by his employees, friends, and family as he retires from the position that for many years he dreamed of holding—president of a savings and loan association, specifically the First Federal Savings & Loan Association in Warren, Ohio.

Mr. Burkhart joined the First Federal Savings & Loan Association of Warren in 1946 as an accountant. He became managing officer in 1962, president in 1965, and chairman of the board in 1975. The career advance that can be so neatly summarized in writing are the direct result of Mr. Burkhart's hard work, loyalty, and perseverence.

While achieving a succession of advances within his career, Mr. Burkhart also found time to share his talents and and skills with his community and his church. The community formally thanked Mr. Burkhart by naming him "Man of the Year" in 1969, in recognition of his professional and civic achievements.

Mr. Burkhart has continued his community service over the years acting as the chairman of the local United Way Campaign in 1975, and through serving on the board of directors of the Trumbull County Chapter of the American Red Cross.

Currently Mr. Burkhart is a member of the board of trustees of Trumbull Memorial Hospital, and president of the Congregation of Emmanuel Lutheran Church. He will also continue to serve as the chairman of the board at the First Federal Savings & Loan Association of Warren.

Mr. Burkhart, through his quiet and low-key manner, has gained an honorable reputation throughout the business community as a man who gets the job done. His employees, friends, and family are proud to honor him on his retirement. On behalf of the many grateful residents of the 17th Congressional District of Ohio, I simply say to Mr. Burkhart—thank you for a job well done.●

A TRIBUTE TO MR. NICK NICHOLS

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 20, 1983

● Mrs. BOXER. Mr. Speaker, I rise to mark the occasion of the 65th birthday of an individual who has been dedicated for over four decades to both the public service and to the rights of his fellow workers. That man, who deserves our praise and thanks, is Mr. Nich Nichols of San Francisco, Calif.

From 1940 until his retirement in 1973, Mr. Nichols built a superlative record as an employee of the Internal Revenue Service. Through hard work and commitment, he rose from the position of a GS-4 Deputy Collector to an IRS Assistant Branch Chief. In his capacity as a Government worker, Mr. Nichols saved the taxpayers thousands of dollars by uncovering fraud and abuse.

Clearly, whenever Nick Nichols has seen injustice, he has committed himself to right the wrong. That quality led him to become active in the union that represents IRS workers, the National Treasury Employees Union.

As a union activist, Mr. Nichols has unselfishly worked to improve the quality of work life of IRS employees in San Francisco. Even though he retired in 1974, Mr. Nichols has been consistently elected by his fellow workers to serve as the union chapter president.

Mr. Speaker, I submit that our great Nation has prospered because of the tireless efforts of people who simply "give a dam" about their fellow citizens. Nick Nichols is such a person and we wish him a happy birthday.●

SENATE—*Wednesday, September 21, 1983*

(Legislative day of Monday, September 19, 1983)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

God of all comfort, we remember those of our Senate family who are in need. We pray for those who are ill in hospital or home. May this time be for them the school of the spirit when they learn what can be learned in no other way. We pray for their speedy recovery and return to us.

We pray for families where there is alienation between spouses or parents and children. Dissolve pride, teach humility and the ability to say "I am sorry" and to forgive. Bring peace to the home of every person who is a partner in the work of the Senate.

For those with financial difficulty, remind them that Thou art the "giver of every good and perfect gift," and that Thou art concerned for their need and want to help them in these most practical matters.

For those who grieve, or are discouraged or frustrated or ready to quit—for those who are lonely or feel rejected—we pray Thy spirit to comfort, encourage, and embrace in the fatherly love of God. In the name of Him who is incarnate love. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, we have an extensive unanimous-consent agreement for the further consideration of the Interior appropriations bill. However, it is still my hope and my intention, to the extent that the Senate will permit it, that we finish this bill today. So Senators should be on notice of the possibility that we will be in session a little longer than ordinary today. I hope not, but in looking over this agreement, it looks likely we will be pretty lucky if we finish all of this by the usual adjournment hour of 6 p.m. So Senators should know that we, if the managers wish, may stay a little longer in order to finish the bill.

I think we need to do that because we need to try to reach the revenue-sharing authorization bill after this. We have got other matters, including the Martin Luther King matter on Friday of this week. That has already been announced and it is my intention to try to stick with that.

So I must reluctantly, but nonetheless accurately, I am afraid, predict that we will be in past the hour of 6 p.m. this evening, if necessary, to complete this measure.

Mr. BYRD. Will the majority leader yield to me?

Mr. BAKER. Yes, I yield to the minority leader.

Mr. BYRD. On the matter respecting legislation concerning Martin Luther King's birthday, I have a Senator who is a Presidential candidate——

Mr. BAKER. The Senator has many Senators who are Presidential candidates.

Mr. BYRD. I accept that correction.

I have a Senator who is a Presidential candidate who has asked that the vote on the Martin Luther King resolution—and he supports it—occur not next week and not this week, unless it is today, but rather the week after next.

Would the majority leader be amenable to our seeking out in both of our Cloak Rooms the sentiments as to whether or not we could reach an agreement that a vote on final passage will occur one day, Tuesday or Wednesday whatever it is, the week after next at a certain hour?

Mr. BAKER. I have no objection to that, Mr. President. I must say, however, that I guess today is the fourth or fifth time I have announced to the Senate that it would be this week. I do not want to be in the position of any Member, or indeed any of those many people outside the Senate who are vitally interested in this matter, thinking that I am in any way receding from my commitments to try to get this matter up and get it up promptly.

But the answer to the Senator's question is if there is a general consensus of views that another time would be more convenient and if those who are interested in this matter who are not Members of the Senate concur in that, I would feel then released from the voluntary commitment I made to take this matter up shortly after we returned from the August recess, which is the reason I am trying to get it up this week.

So I will be glad to talk to the minority leader further about this, and if we can satisfy those conditions, we will try to find a time that is more convenient.

But I made the commitment before we left for the August recess that it would come up shortly after we returned. This is the second week after the August recess and I feel my time under that statement is running out. So unless I can be relieved of that commitment I voluntarily took, I would be loath to postpone it. But if I can, and if there is a clear showing that that is agreeable to the parties involved, I will be glad to consider it.

Mr. BYRD. I thank the majority leader. I respect his position that he has to keep a commitment. The only thing that I am proposing here is that we check with the parties on both sides, and those outside the Senate, if the majority leader feels a need to do that, as to whether or not we could agree that there will be a final vote—I think that is the important thing—there will be a final vote on a given day of the week after next or on tomorrow. I think earlier I said today, but tomorrow.

Certainly, this is no feeling of mine. We can have the vote today or tomorrow, as far as the majority leader and I are personally concerned. But if we could just explore that; we may end up at the dead end.

Mr. BAKER. Maybe, but I will be glad to explore it.

Mr. BYRD. Mr. President, I ask unanimous consent that I may yield my time to the majority leader, with the understanding that if I have a statement later today it appear in the RECORD immediately following the majority leader's remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I yield now to the distinguished Senator from Maine.

Mr. COHEN. I thank the majority leader for yielding.

U.S. POLICY TOWARD CENTRAL AMERICA

Mr. COHEN. Mr. President, because of my personal interest in U.S. policy toward Central America, I joined recently with my Senate Armed Services Committee colleague, Senator GARY HART in urging the committee's chairman, Senator JOHN TOWER to devote greater oversight to this important question.

As a member of the Senate Select Committee on Intelligence, I have had

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the opportunity to participate in this critical oversight responsibility. It was my view, however, that the Armed Services Committee also needed to become involved in this effort, particularly in light of the U.S. military exercises now taking place in the region.

Just recently, Senator HART and I had the opportunity to visit three Central American countries, Nicaragua, Honduras, and El Salvador, on behalf of the Armed Services Committee. Our trip gave us firsthand glimpses of the situation, politically, economically and militarily, in the region.

NICARAGUA

I found the visit to Nicaragua particularly instructive. We landed in Managua on the day that members of the rebel group headed by Eden Pastora—the famed "Commander Zero" who was a hero of the Sandinista revolution against Anastosio Samoza, but who broke with the Sandinistas and is now fighting for their overthrow—bombed the airport. In fact, we received word about 1 hour out of Managua that we would have to divert our plane to Tegucigalpa, Honduras, because of the attack. We were told about 1 hour after our arrival in Honduras that the Sandinistas wanted us to come despite the incident, and we arrived in Managua later that morning.

The Sandinistas clearly wanted us to see the damage which had been done. We were shown the charred and shattered plane, the damaged control tower, and the virtually destroyed protocol lounge—which, by the way, they had intended as a site for a press conference for us on arrival, had the attack not taken place.

The message of the Sandinistas was clear. We were to see the damage done by Contras and, by extension, they suggested, the United States. That Eden Pastora has repeatedly publicy refused U.S. assistance and that it was doubtful U.S. officials would approve a mission of this sort—if for no other reason, because of its infeasibility—it just does not make sense to fly a Cessna with a couple of bombs strapped onto it into a heavily fortified airfield—was of little consequence.

Both Senator HART and I stated that we did not support actions of that sort which are, in my view, only counterproductive and will only serve to drive the Sandinistas further into the Soviet camp.

Having said this, I should add that I concluded from my talks with the Sandinistas that they are, indeed, committed Marxist/Leninists. While they treated us cordially, they also lectured us repeatedly about interventions of the United States in Nicaragua earlier in this century.

There were other signs of their ideological firmness. Representatives of the private sector, many of them early supporters of the Sandinistas who welcomed their overthrow of Samoza, told us of censorship, political repression and intolerance of dissent, anti-Semitism, indoctrination in schools, and intimidation by the Government. Press coverage of the Soviet shoot down of the Korean airliner followed the Tass line. La Prensa, the newspaper which first gained fame for its criticism of the Samoza regime and the death of whose editor fueled his overthrow, had, we were told, been closed down a number of times by the Sandinistas because it was also critical of their government and was targeted for permanent closing.

The Sandinistas defended these actions, saying they need more time and blaming the United States for forcing their repression through its aid to forces opposing the Government. Yet, they had no explanation for the fact that their aid to the rebels in El Salvador came long before the Contras or the U.S. fleet arrived. And they refused to commit to a date certain for the holding of elections.

It was clear from our meetings with Government officials, the private sector representatives, and members of opposition parties that there are no simple solutions. I also came away with the clear conclusion that we should not seek a military solution.

The problem is how to reach a peaceful resolution when we have some within the present administration who see only military answers and when the top leadership in Nicaragua is dominated by those who want a Marxist government, denying the basic rights of the citizenry and seeking to export revolution to neighboring countries.

The challenge is to fashion a policy which will buy time for those in our country who believe in diplomatic and economic approaches and for those in the Nicaraguan Government, the second echelon leaders, who are young and not yet irretrievable ideologues and who see the wisdom of moving toward democratic nationalism.

We must seek increased dialog with the Sandinistas, maintaining diplomatic relations and full, open communications. At the same time, I believe we should continue our assistance to the Contras on a covert basis as a means of pressuring the Sandinistas to negotiate in good faith and to cease their support of guerrillas in other Central American countries. I will not, however, support covert aid aimed at overthrowing the Sandinistas.

We must reject ill-considered actions such as the airport bombing. And we must push for democratic reforms and a lifting of repression within Nicaragua. Our policies must be geared to the individuals within the Sandinistas who are less strident.

For Nicaragua—for all of Central America—we must make economic levers the key to our efforts. As long as poverty exists, the cause of revolution will be with us.

EL SALVADOR

Economic assistance is particularly important for El Salvador. The activities of the guerrillas over the past several years have severely hampered what had once been, by Central American standards, a relatively promising economy. A nation whose agricultural production had once been one of its bright spots, El Salvador now finds itself forced to import foodstuffs to meet the needs of its people.

So much attention is given to the level of military aid provided by the United States to Central America that the economic aid we do provide is sometimes ignored. In fact, 77 cents of every dollar sent to the region is for economic assistance.

Yet, more needs to be done. This was clear in the visit Senator HART and I took to the village of San Lorenzo, not far from San Vicente. We saw the devastation caused by the anti-Government forces.

On entering the village, we saw the shell of a building, now covered with revolutionary slogans, which we were told had been the mayor's office until destroyed by the rebels a couple of months earlier. Our delegation visited a bakery, operated in the dark by means of a gasoline-powered generator because the guerrillas had cut all the power lines, leaving the community without electricity.

Both Senator HART and I bought blankets, for the amazing price of $3.50, made on a hand loom which had been reconstructed after its destruction by rebel hands. Why had the looms been destroyed? They had provided a major source of income for the people of the village.

Though we were in San Lorenzo only a short time, the images we saw there will remain etched in my mind for a long, long time: The children, spilling out of houses, growing from a handful when we arrived to hundreds by the time we left; A church full of bullet holes, reduced to rubble by a rebel attack; dirt floors, no electricity, animals living in houses; Young men—15 years old—dressed in combat fatigues, M-16 rifles on their shoulders, eyes alert, remembering the last attack that destroyed the looms; Again, the children, their smiles bright—amazingly happy and full of life considering the deprivation and war with which they have lived for most of their short lives. These images one cannot forget.

They are also ones from which we can and must learn. The answer to the desperate problems faced by the people of San Lorenzo is not to increase the armaments sent into Central America, nor is it to abandon these people to domination and intimi-

dation by Communist-backed insurgents. Neither approach will provide a safe, secure, and promising life for the many children who clung to us in our short visit.

We also cannot satisfy ourselves simply by sending down money and supplies. What we must provide are the resources they require to develop the ability to meet their own needs.

The willingness to do this was evident in the spirit and performance of the people of San Lorenzo and the Government forces assisting them. They had rebuilt the looms and were again producing blankets. The bakery was operating under the most extreme of circumstances. A medical facility, whose personnel had inoculated the many children we saw that day, had been put in place. Schools were being reopened. And a new community center was being built. All this was taking place under the watchful eye of the young soldiers sent in by the Government to encourage families to return to the village—and to discourage the guerrillas from once again disrupting their lives.

The lesson I drew from this is that we must devote ourselves to helping them in this critical effort. One obvious source of help would be Peace Corps volunteers. Unfortunately, after having been withdrawn from El Salvador because of the danger they faced as a result of the country's internal turmoil, they have not yet returned. The situation must be stabilized so that they can once again provide the assistance which has made the Peace Corps program one of the best and most effective efforts ever undertaken as a part of U.S. foreign policy.

The Agency for International Development should also play an increasing role in U.S. policy toward El Salvador. AID can provide a wide range of services which, in conjunction with the Government and private sector, can be of immeasurable benefit to the people of El Salvador.

The U.S. Department of Agriculture should be called on to give the agricultural sector of El Salvador the assistance it needs to once again meet the country's food needs. This must be done within the framework of the land reform program and can only be successful if the security situation within the country remains stable. My belief, though, is that it should serve as a cornerstone of our commitment to El Salvador's economy.

The security situation, of course, is intricately intertwined with the effort to achieve economic improvements in El Salvador. Despite the recent guerrilla attack on San Michel, the nation's third largest city, I came away with the conclusion that the military is now in excellent hands under the guidance of Defense Minister Vides Casanova and that the defense forces are keeping the rebels off balance. Their improved performance appears to be, in large part, attributable to the training they have received from the American advisers.

While still perilously short of basic supplies like batteries, radios, and ponchos, the El Salvadoran Army is, by all accounts keeping the guerrillas on the run. The shortage of medevac helicopters and medical supplies has caused a higher than expected death rate and an inordinate amount of amputations a problem which must be addressed. Morale, however, appears to be high.

There remain other problems. The death squads persist, though unexplained deaths are down. Senator HART and I expressed in the strongest terms the abhorrence of the people of the United States to the activities of the death squads. We made it clear that continued support by our country will almost certainly be contingent on continued efforts to bring to justice those involved in the death squads.

In our meetings with President Magana and with the heads of the nation's defense forces, we emphasized that there must be continued progress in the area of human rights. We pressed President Magana on the trial of the national guardsmen charged with the deaths of four American women and of the individuals charged with killing the two American labor advisers in the San Salvador Sheraton. President Magana told us the national guardsmen should be coming to trial before the end of the year.

The meeting with President Magana, an impressive man who is providing effective leadership to his troubled country, also provided an opportunity to touch on some points not often given attention in the United States. He pointed out that there are positive elements all too often overlooked when the United States looks at El Salvador.

El Salvador has held open elections and plans further national elections within the year. It has established an amnesty program, is developing a constitution, and has started a serious land reform effort. The nation has a free press and is rebuilding its infrastructure. It is building an educated officer corps in the military.

In Managua, every trend is just the opposite. Yet, in the eyes of many, El Salvador carries the mark of Cain, Nicaragua the stamp of romantic idealists. While the United States must always strive to promote institutions which reflect our democratic ideals and values, we must remain mindful that we not impose a double standard. We rightfully condemn death squads, political persecutions, and the absence of a judicial system to punish law breakers. Yet in our own midst, organized crime continues to flourish, motorcycle gangs roam our highways and our judicial system creaks and groans under the weight of criminal justice procedures that are in need of reform.

I do not share the notion that the government of El Salvador should be asked to share power, and bring into the armed forces the guerrillas, with those who are destroying their economy, supported by the Soviets, Cuba, and Nicaragua, while those in Nicaragua flatly refuse to entertain any consideration of sharing power with anyone who is not a part of the Marxist revolution. That is not the answer for El Salvador or the region.

Continued military aid to El Salvador is required as long as it is the target of outside intervention by those intent on the overthrow of its Government. But military aid alone will not insure a safe, democratic El Salvador. That can only be achieved through economic and humanitarian aid.

Our goals will best be served if we give the nations of Central America the tools they need to achieve selfsufficiency. With poverty breeding revolution and revolution breeding even greater poverty, the situation for the people of Central America grows only more desperate.

What they need is to live in peace, with the freedom to choose their own leaders and form of government. Our efforts must be focused toward this essential goal.

Mr. BAKER. Mr. President, the minority leader kindly yielded to me his time remaining under the standing order. I have no need for that time and I am searching the Chamber to see if any other Senator is seeking additional time.

I know the Senator from Missouri (Mr. EAGLETON) has a special order.

Could I ask the Senator from Missouri if the 15 minutes he has will be adequate?

Mr. EAGLETON. That will be fine.

LEAVE OF ABSENCE

Mr. BAKER. Mr. President, I have one further request and then I will yield back my remaining time under the standing order.

On behalf of the distinguished Senator from Arizona (Mr. GOLDWATER) I make the following request:

On behalf of Senator GOLDWATER, I ask unanimous consent that he may absent himself from the Senate for the remainder of this week to attend his 49th wedding anniversary with his wife in Arizona.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I yield back my remaining time.

ORDER OF PROCEDURE

Mr. DOMENICI. Mr. President, might I ask the distinguished majority leader, do we have a time certain when

the Interior appropriations bill will be resumed?

Mr. BAKER. The Senate will resume consideration of H.R. 3363 under the order entered last evening at 1 p.m.

Mr. DOMENICI. Am I correct that the amendment of the Senator from New Mexico will be the pending business?

Mr. BAKER. The Domenici-Bingaman amendment numbered 2168 will be the pending business.

Mr. DOMENICI. And there is 1½ hours equally divided?

Mr. BAKER. The Senator is correct.

Mr. President, I now yield back my remaining time under the standing order.

RECOGNITION OF SENATOR EAGLETON

The PRESIDENT pro tempore. Under the previous order, the Senator from Missouri (Mr. EAGLETON) is recognized for not to exceed 15 minutes.

The Senator from Missouri.

THEY ALSO SERVE WHO SIT AND TAKE IT

Mr. EAGLETON. Mr. President, the President, the Speaker of the House, and the Senate Majority Leader have agreed to a resolution to authorize the continued presence of American troops in Lebanon for an additional 18 months.

Just as the President misjudged the role of the Marines when he first dispatched them to Lebanon, so too may he now be misjudging the role of and the danger to the Marines as they sit in Lebanon for the next 18 months.

On August 24, 1982, President Reagan told Congress:

> I want to emphasize that there is no intention or expectation that U.S. Armed Forces will become involved in hostilities.

Then again on September 29, 1982, President Reagan told Congress:

> In carrying out this mission, the American force will not engage in combat . . . our agreement with the Government of Lebanon makes clear that they will be needed only for a limited period to meet the urgent requirements posed by the current situation . . . there is no intention or expectation that U.S. Armed Forces will become involved in hostilities.

We now know that the President's hopes for a benign American military presence in Lebanon have been dashed. There is a bloody civil war raging in Lebanon and we are a part of it. Four dead and 28 wounded marines attest to this bloody fact. We are partners with the Gemayel government. The smoking guns of our warships off Beirut attest to that. "Biggest Blitz Since Vietnam" headlined the New York Post of September 20, 1983. We have linked our destiny in Lebanon, and, in a sense, in the Middle East, to the Gemayel government.

The Gemayel government represents but one segment of the Lebanese community, the Falange. When Lebanon was created in 1943, it may have been good enough for the Christian community with its then narrow population majority to dominate the political, social, and economic life of Lebanon with the crumbs going to the Moslem minority. But the old civil war in 1958 and the raging new civil war since 1975 force us to recognize that the old style Falange dominance simply will not work anymore. If there is to be peace in Lebanon—and one has to wonder whether true peace can ever come—it must be a peace in which all elements of Lebanon—Christian, Sunni, Shiite, and Druze—share equitably in the fruits of the country. A Gemayel-Falange imposed peace at the butt of American rifles cannot endure. It cannot be in America's broader Middle East interests to join in bloody conflict against the Moslem majority.

So now we are about to consider authorizing the continued presence of American Marines in Lebanon for 18 months, a period of time equal to American involvement in World War I. Our troops will sit at the Beirut airport, perhaps as inspiration for a new American battle slogan: They Also Serve Who Sit and Take It. Our warships will bombard Moslem strongholds in support of the beleaguered Lebanese Government. Some day our air power may be unleashed. All of this in the name of bringing peace to Lebanon.

In the scheme of the Lebanese conflict, 18 months can be an eternity. This date was selected to put it past the 1984 Presidential election. It was selected for political convenience. This is a cynical, political act.

I would not precipitiously withdraw the Marines. To do so would heap new chaos upon existing chaos. Picking any length of time is admittedly arbitrary. But I could settle for 6 months provided that during that time, the U.S. would bludgeon the Gemayel government into broadening its political and negotiating base to include all indigenous Moslem elements in Lebanon. If as we approach the sixth month, it appears that under the then existing facts and circumstances that some additional time is necessary, then we could consider same and act in a timely and informed way.

If Congress authorizes 18 months at this time, it is giving, in essence, a blank check to the President. Congress would be washing its hands of Lebanon. Admittedly, that may be the shrewd and politically safe thing for Congress to do, but it will not win Congress a profile in courage.

Congress, through the War Powers Act, declared that it wanted no more creeping disasters like Vietnam. It insisted on its proper and legitimate role in deciding how, when, why, and where our country goes to war. With this 18 month resolution, we would abdicate that responsibility. With this resolution, we would engage in an act in which we can take no pride.

Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 1 p.m., with statements therein limited to 2 minutes each.

WHY THE NUCLEAR FREEZE OFFERS THE BEST CHANGE OF SURVIVAL

Mr. PROXMIRE. Mr. President, the supreme military irony of our time is that this country pours out tens of billions of dollars a year to prevent a nuclear war by building a deterrent that will only deter the least likely cause of a nuclear catastrophe. There are a whole series of scenarios that could provide a nuclear holocaust. What is the least likely scenario? One of the least likely is that the Soviet Union would execute a planned, premeditated strike against the United States. Indeed, the prime reason such a scenario is unlikely is precisely that we have produced and deployed a nuclear arsenal, much of it invulnerable, that would render a first strike by the Soviet Union an act of suicide for the Soviet Union and, therefore, make such a strike very unlikely. So our nuclear deterrent does constitute a prerequisite to the prevention of nuclear war, but it does nothing to prevent a series of possible developments that are now more likely causes of nuclear war.

The focus of our attention on preventing a deliberate Soviet nuclear strike has absorbed virtually all of our strategic military budget. In doing so, it has distracted us from the far more threatening causes of a nuclear holocaust. It has prevented us from even devoting any significant consideration or congressional debate to policies we should adopt to stop such more likely causes of nuclear war as:

First. The proliferation of nuclear weapons to more and more countries;

Second. The steady improvement in nuclear weapons to make them smaller and lighter, more accurate, more reliable, cheaper, and therefore more readily available;

Third. The ever more confrontational behavior of countries in South America, the Middle East, Southeast Asia, and elsewhere and the persistent attempts by these countries to develop at least rudimentary nuclear arsenals;

Fourth. The breakdown of the United Nations as a vehicle for the settlement of disputes between nations;

Fifth. The increasing hostility between the world's two great nuclear superpowers and their alliances—NATO and the Warsaw Pact; and

Sixth. The increasing dependence on hair-trigger alerts and computer-based warning systems that can make a fatal error that could lead to blundering into a nuclear war.

What an irony. Every one of these most likely causes of nuclear war is aggravated by the arms race, and especially by the continued testing of nuclear devices to make them more readily available to nations that may be light in resources but heavy in hostility for prospective enemies.

Let us consider the efficacy of three different policies in meeting these likely causes of nuclear war:

First. Prime reliance on full speed ahead with nuclear research, testing, production, and deployment;

Second. Limited arms control, relying on specific areas of arms reduction such as reducing the number of warheads or the location of intermediate range missiles in Europe; and

Third. A comprehensive, mutual, and verifiable nuclear freeze.

Obviously, a prime reliance on winning the nuclear arms race might provide a deterrent to what is already the least likely instigation of a nuclear war, that is, a premeditated nuclear strike on the United States by the Soviet Union. But it would provide no safeguard against any of the more likely causes of nuclear war. In fact, it would actually aggravate them. It would encourage nuclear proliferation. It would "improve" nuclear weapons and make them cheaper, smaller, and therefore more accessible for other countries. It would aggravate confrontational behavior. It would make the United Nations even less useful. It would increase the hostility between the two superpowers. And it would increase the hair trigger, mistake prone makeup of nuclear arsenals.

Limited arms control—the second alternative—would also continue to make nuclear weapons increasingly more dangerous and subject to proliferation. And it would do little to reduce danger of a nuclear war coming from any of the other likely causes.

On the other hand, a comprehensive mutual, verifiable nuclear freeze would diminish the likelihood of nuclear war from any cause. Because it would stop testing and greatly reduce the efficacy of research, it would end the abandonment of our survival to reliance on wherever the arms race would take us, which is very likely to a nuclear holocaust. To be effective, the freeze would require the toughest kind of verification procedures, and far more vigorous antiproliferation enforcement than we and other nuclear powers practice now. The nuclear freeze offers far and away our best chance of survival.

A HAVEN REEXAMINED

Mr. PROXMIRE. Mr. President, Ruth Gruber recently published a book that details a little-known piece of American history. Ms. Gruber's book, entitled "Haven," provides a firsthand account of 982 World War II refugees who were granted temporary sanctuary in the United States after they promised in writing to return to Europe when the war ended. These refugees were fleeing Nazi oppression—seeking to escape history's most terrible act of genocide.

In a review of Ms. Gruber's book, the New York Times describes this gesture as:

> . . . a token of humanity, no more than a token by the United States, which, while warring against oppressors in World War II, had refused to admit refugees by other than normal, and restrictive, immigration laws.

At a time when Adolf Hitler was systematically trying to eliminate an entire race, our Nation saw fit to provide safe haven for a handful.

Mr. President, there are several aspects of this situation that are as pertinent today as they were in 1944. First, it is reassuring to note that then, as now, the people of America recognized the genocidal slaughter of any group as a barbaric and unspeakable act. Then, as now, our people recognized the existence of certain minimum standards of humanity that every nation should be obligated to meet. Ms. Gruber describes the kind and genorous reception these 982 refugees received from the people of our country. They saw the blatant violation of a people's basic human rights, and were willing to respond. We must remember, however, that America provided refuge for only a few of the victims.

This highlights a second compelling point—we could have done more. Now, I am not saying that we could have prevented the Holocaust, or even that we can protect mankind from future persecution. Then, however, we could have provided a haven for more refugees; today, we can declare to the world our belief that genocide is a crime against all humanity. It should not and cannot be tolerated. We can bring the pressure of world opinion to bear on any government that attempts to violate the most basic of human rights.

For too long our failure to ratify the Genocide Convention has provided an avenue of escape for those who would seek to avoid censure. How, they ask, can the United States condemn others while, at the same time, refusing to ratify the treaty they helped create?

Over the past 35 years, we seem to have forgotten that the Genocide Treaty was drafted to create safeguards against the Holocaust ever recurring. It is essential, Mr. President, that we demonstrate our resolve by ratifying the Genocide Convention. Otherwise, one day in the future, we may have to face the sickening realization that we could have done more to prevent another Holocaust.

THE DEATH OF SENATOR HENRY M. JACKSON

Mr. RUDMAN. Mr. President, today I would like to join the millions world wide who have noted with sorrow the passing of Henry M. "Scoop" Jackson. It is fitting that we pay tribute to one who has meant so many things to so many people. Perhaps only upon his passing can one appreciate the full measure of the man's worth. In tributes already made, we find that Scoop Jackson was a loving husband and father, an environmentalist of some considerable vision, a staunch defender of the civil rights of all mankind, a skillful politician, a consummate statesman, and a patriot second to none. Perhaps more importantly, Scoop Jackson was a symbol to a world existing under the cloud of atomic uncertainty of the greater grace and spirit which is mankind's hope for peace on Earth.

Of course, I "knew" Scoop Jackson long before I first met him in 1981. I knew him as millions did, as a larger-than-life congressional leader, a deus ex machina if you will, capable of influencing with the constancy of his conviction and purpose the ebb and flow of American political thought. How surprised I was, as I am sure many were before me, when I first had the opportunity to speak and work with him, to find a warm and compassionate man whose capacity to offer friendship and counsel seemed limitless. Scoop Jackson was the embodiment of Thoreau's definition of a friend: "One who incessantly pays us the compliment of expecting from us all the virtues, and who can appreciate them in us." Fortunate to have been touched by one with such qualities, we will all be poorer for his passing.

DRUGS IN THE WORKPLACE

Mrs. HAWKINS. Mr. President, what I have learned from my research on the problem of drug abuse in the workplace gives a whole new meaning to the afternoon coffee break. It also gives a very good reason for the steady decline in American productivity and presents a unique and challenging problem for employers. One expert on the subject goes so far as to suggest that a major reason that the U.S. industrial leadership has declined is that the American work force is stoned most of the time.

The use of illegal drugs on the job is quickly replacing alcoholism as a major problem in the workplace. The cost of employee drug abuse to employers is estimated at billions of dollars a year in decreased productivity, accidents, insurance claims, and absenteeism. A survey by the American Management Association of New York found that 1 in 10 workers use illegal drugs while on the job, and younger, well paid employees are the most frequent users. Marihuana breaks are as common as coffee breaks. And even worse, the drug users are most likely buying the stuff from dealers within the company.

Abuse of marihuana, cocaine, PCP, percodan, diluadid, quaaludes, or amphetamines on the job makes for a sloppy American product and even poorer service—whether it is a pair of slacks, an automobile, a train ride, a court case, or a $20 million stock deal. It frightens me to think that drug abusers are filling positions as air-traffic controllers, train engineers, nuclear plant workers, and especially our Armed Forces.

What is the problem? Drug abuse invades all professions and vocations—nurses, teachers, salespeople, stockbrokers, lawyers, secretaries, dentists, data processors, construction workers, and so forth, get high on the job. Surely these jobs are not so boring or unsatisfying or stressful as to turn 1 out of 10 people to drugs. Research on the subject of employee drug abuse is sketchy and incomplete, but it seems to suggest that drug abuse is related to high-pressure, machine-oriented work environments. According to Dr. Carl Chambers and Richard Heckman in their book "Employee Drug Abuse—"

Drug use is a by-product of today's highly impersonal work environments which promote boredom and stress on all levels of work, and virtually eliminate feelings of personal achievement and importance—truly satisfying rewards for the individual.

Mr. President, if we are to compete with other countries—especially Japan—for the world marketplace, we must keep our employees active, productive, and clear thinking. We cannot let our world leadership go up in smoke.

I would like to insert in the RECORD at this point a recent article from the August 22, 1983, issue of Newsweek, entitled "Drugs on the Job."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Newsweek, Aug. 22, 1983]

DRUGS ON THE JOB

A forklift operator at a small Long Island business smokes a joint in the parking lot at lunchtime, assures the boss he's fine—and then runs his cargo into a door. A Houston pharmaceutical company throws out a huge batch of contaminated products because the quality-control inspector was stoned. A high-tech Silicon Valley company intentionally overproduces because it knows much of its output will be spoiled by spaced-out employees who snort their lines of coke from microscope slides. And a Wall Street securities trader continues to do cocaine at work—even though he's still shaking his head over the $18 million trade he doesn't remember.

Joint by joint, line by line, pill by pill, the use of illegal drugs on the job has become a crisis for American business. Football players do it, Hollywood stars do it, doctors do it—but you knew that. The more frightening development is that drugs have moved into airline hangars and chemical plants, textile mills and construction sites, boardrooms, courtrooms, newsrooms and nuclear plants: last week the Nuclear Regulatory Commission announced that 21 guards at the San Onofre nuclear facility in California had been suspended for suspected drug use. Companies of all sizes all around the country—General Motors in Detroit, Compugraphic in Wilmington, Mass., Humphrey & Associates electrical contractors in Dallas—are being jolted by a dramatic amount of drug use among perfectly respectable, well-dressed people.

Morning Toot: Most of them are not addicts but executives who take a toot of cocaine in the morning, secretaries who share a joint at lunchtime and night-shift workers who swallow amphetamines to keep going. "Drug use has spread to every occupation," says Thomas Keough, superintendent of Metropolitan Police in Boston. "In the old days you had to use a hippie-type cop for undercover work with drugs. Now I can send a guy out in a three-piece suit that looks like he just stepped out of the Brooks Brothers window."

The cost to the American economy is enormous: nearly $26 billion—including $16.6 billion in lost productivity alone—according to one authoritative study. But others put the figure much higher. Employees who use drugs on the job are one-third less productive than straight workers, three times as likely to be injured and absent far more often. The indirect cost to the economy is impossible to measure. Stoned, strung-out and coked-up employees affect the morale in the office, scare away customers and hurt the quality of the shirts you wear, the car you drive and the building you work in. Some experts even suggest that one reason the United States is losing its industrial leadership to Japan is that America's work force is so stoned. "I can't even estimate what drug use has cost this company," said Lew Sacks, National Car Rental's personnel director, in the July issue of the company's in-house magazine. "I think it's the biggest problem in industry today. Nothing else is even in second place compared to it."

There is no mystery why: the drug-epidemic generation of 1965–78 is growing older and taking its life-style with it into the workplace. Employees are using a pharmacopeia of illegal drugs like marijuana, cocaine and PCP; abused prescription drugs like Percodan, Dilaudid and Quaaludes, and look-alike drugs like over-the-counter diet pills passed off as "Black Mollies"—amphetamines. Alcohol is still the most abused drug, and its impact on industry cannot be minimized, but American business long ago recognized that problem and began taking steps to deal with it. The new explosion of illegal drugs caught industry unprepared. Many supervisors who downed a couple of martinis at lunch were hesitant to discipline an employee for smoking a joint instead. Bosses who knew how a drunk worker acted had no idea how to identify a pill-popper.

And the illegality of the drugs only made things worse: the drug-using employees were more secretive, making the problem harder to identify, and even employers who sensed that something was wrong were reluctant to admit that crime was taking place on their property. As a result, says Joseph H. Lodge, a former Drug Enforcement Administration official who now runs a consulting firm in Miami, "today drug use at the workplace is as common as the coffee break."

Expert Help: Business is finally waking up to the problem. The Department of Transportation is writing a job description for an expert in drug and alcohol abuse to help control what it calls "one of the most significant problems" facing the country's railroads. The American Society for Industrial Security will hold a conference in Washington next December called Substance Abuse in the Workplace. The lead story in the National Law Journal on Aug. 8 was bannered: DRUGS: CRISIS FOR THE BAR? USERS AND DEALERS ABOUND IN THE LEGAL PROFESSION. And even the Harvard Business Review has run an article titled simply: "Drugs in the Workplace." "The problem of drugs in industry is just beginning to surface," the author of the article, former DEA administrator Peter Bensinger, said last week. "They're just beginning to take it seriously."

And they're beginning a counteroffensive. Some, like the Boston branch of Blue Cross-Blue Shield, have requested undercover police investigations. Others, like Mobay Chemical Corp. of Baytown, Texas, use drug-sniffing dogs to search work areas or even cars in the parking lots. Sunkist Products Group of Ontario, Calif., requires all new nonsalaried employees and any strange-acting workers to take urine tests. Humphrey & Associates, the Dallas electrical firm, gives blood tests to anyone who has an accident on the job. Thousands of companies and public agencies, from ITT to the Chicago fire department, have established employee-assistance programs—they're so common now they have their own acronym, EAP—or expanded them to include drug abuse. The reason is strickly bottom line. "It costs us less to rehabilitate an employee than to hire and train a new one," says Tamara Cagney, who runs the EAP for Crowley Maritime in San Francisco.

Such efforts to fight drug abuse at the workplace have their fair share of critics. They point out that most EAP's are still geared more toward alcohol abuse than drug problems, and drug detection on the job raises some serious legal questions (page 60). But the antidrug campaign already has spawned a mini-industry of its own: a growing number of drug "consultants" are running educational seminars for employees and employers, conducting searches and undercover operations and setting up treatment programs. There are free-lancers like Charles Pendleton of Midland, Texas, who found the drug-seminar business so good that he quit his law practice to travel around the country, as well as high-powered firms like Bensinger DuPont and Associates of Chicago, formed by former DEA chief Bensinger and Dr. Robert DuPont, former director of the National Institute of Drug Abuse. Mead CompuChem of Research Triangle Park, N.C., used to perform environmental tests; earlier this year it started using the same technology to test urine samples for drugs. When Syntex Corp. of Palo Alto, Calif., last year unveiled a new machine to analyze urine specimens for drugs, it was so flooded with inquiries that

it formed its own drug-consulting firm, Performance Diagnostics.

Some of these consultants' warnings about American industry nodding off on drugs should obviously be taken with a grain of salt: they make their living from scared companies. But there is no question about the validity of their basic point—drugs are costing American business in many ways. The most dramatic problems are accidents, big and small. A petrochemical plant in Louisiana exploded some years ago, killing four men and causing millions of dollars in damage. According to a toxicologist and drug consultant who worked with the company, the men had been zooming on amphetamines, and when the emergency alarm went off they did nothing but laugh.

Mark West, 29, used to shoot cocaine in his taxi until he wrecked it while wired up one night. A man named Carlos, 35, of Los Angeles, surreptitiously shot heroin twice a day in the bathroom of the chemical plant where he worked; one day he caused a big sulfur explosion that burned him horribly. Carlos sued his employer—and won $5,000. Most of the money went to his doctors, he says, but "I spent all that was left on heroin." It could have been worse: before getting the job at the chemical plant, Carlos had worked at a bomb factory.

Large construction projects seem to have more than their share of drug-related accidents. A construction worker in Houston fell eight stories off a building; the autopsy showed he had been smoking pot. A master welder who had worked for another Houston contruction company for 10 years popped some pills for lunch, then drilled a hole through his hand. Austin Commercial Inc., one of Dallas's largest contractors, figured it had a drug problem when it began suffering a high number of accidents on its jobs. The company tightened security, hired a private investigator and, according to the Associated General Contractors, secretly photographed drug transactions at the work site. The suspects were fired—and the number of accidents dropped. "I've been on jobs where the foreman actually passes out stuff to make sure the work gets done," says John E. Neece, a building union leader in California. "Sometimes 90 percent of the crew's been doing uppers. I just leave the jobs when the guys are dopers. Would you want to work on a 14-story building knowing the guy with the blowtorch next to you is doing drugs?"

Ground Crews: Other accidents are just waiting to happen. An airline ground-crew employee and a drug consultant both said last week that some ground workers regularly use drugs on the job. Machinists-union representative Duane Schrieber of Miami says he has "no way of knowing" if that's true, but added: "The only comment you can make about drug use is that whatever the percentage is in the country, it's probably the same in the airlines." The National Transportation Safety Board says it has never found drugs to be a factor in an air-carrier accident. In the nuclear power industry, a spokesman for the Nuclear Regulatory Commission in San Francisco said last week that the number of nuclear-plant workers arrested or fired because of drug abuse or trafficking had risen dramatically in the past five years. Last May a contract laborer slipped into the Rancho Seco nuclear plant in California with a quarter gram of cocaine. The spokesman said most of the cases involved employees selling marijuana in the parking lots, people carrying cocaine into a plant or security guards smoking marijuana on patrol. "You name it," he said, "we see it."

Loss of productivity and declining quality are harder to see and harder to measure, but they are every bit as real. One Denver attorney, who used to snort cocaine from his desk drawer through a hollowed-out ballpoint pen, says he was so wasted by the afternoon that he would stop his calls and either cancel his appointments or rush his clients out the door. The former vice president of a major Hollywood movie studio says he used to leave meetings two or three times for a toot of cocaine, then he might concede a major negotiating point just to get the meeting over. Steven Soriano, 25, of Alhambra, Calif., smoked PCP and sniffed cocaine while working as a sign painter. "After a while," he says, "I'd spend all day on one or two signs. I'd fall asleep every day on the job, standing up. The next morning my work from yesterday would look like I had done it with my left hand—or my feet."

Few areas of the work force—public and private—are untouched. Bensinger, the former DEA chief, claims that "in the '70s the cost of cars rose and the quality of the product was poor because of [drugs]." The problem, he adds, affects big companies and small equally. "It can be the small office with a bookkeeper who forgets to mail checks or enters the wrong figure on a ledger," he says. "Or the guy who works in a shirt factory who is high." It could be a postal worker: last week 10 Chicago mail handlers and clerks were arrested for selling our possessing drugs on the job; 19 others had been arrested earlier this month. Or it could be a police officer. Last week the District of Columbia police department announced that 35 recruits had been fired and 10 veterans, all of whom had served on the force for more than five years, had been suspended for using marijuana, cocaine or PCP in the past six months. "I can't think of any business where you can say with certainty that it doesn't have drug users," says Superintendent Keough of Boston. "And I include police departments in that."

By the Ton: The high-tech industry is especially hard hit because employees on drugs can so easily cause quality-control problems. Prof. Mike Lauderdale of the University of Texas at Austin, who recently surveyed 60 top Texas firms about drug problems, found most of them concerned, but none more than the electronics businesses. Two companies told him that they would leave the United States unless they could curb the problem. In Silicon Valley, "drugs are the No. 1 problem," according to Dick Hesenflow, a drug consultant who works with companies there. "A ton of cocaine a year is consumed in the Silicon Valley," he says. "Some of the small electronics companies are going under because of drugs. I know of one president whose company had such a serious drug problem that he closed up and moved back East." Hesneflow's associate, Reggie Kamakele, adds: "We have companies that don't allow their executives to make decisions after lunch." Jess Barba, the Sunnyvale public-safety director, agreed with the consultants about the situation, but said he has been unable to get companies in the valley to admit they have a problem. The companies refused to comment.

Barba believes that most theft in Silicon Valley is drug-related; cocaine is often the impetus and the preferred form of payment of stolen products. There is clearly a relationship between crime and serious drug use in the office. Virginia Kilker started taking a gram of cocaine a day while working at a lumber company outside Aspen, Colo., then embezzled more than $7,000 to pay for it. Lloyd Vaughn, a Beverly Hills lawyer, took $75,000 from one of his actor clients, the late Bob Crane, half of which paid for the cocaine that was destroying his practice. Liz, 19, stole $70 to $80 a day from the cash register to buy heroin and PCP when she worked as a cashier at a hardware store in Los Angeles; then she got a job in the office of a trucking company, where she stole payroll checks until she was caught.

Kickbacks: But much of the theft is more discrete. ITT discovered one executive's drug problem because of his unusually high expense account. And the operations manager of a Wall Street trading firm says many traders occasionally give an overly favorable rate to the buyer or seller of securities in return for a cocaine kickback. "If you're as especially hot trader," he says, "you can always justify a few bad trades by saying you're building business."

Drug abusers also cost businesses millions in medical expenses. Even a casual user of drugs on the job is likely to use his health insurance more, because he is more likely to be involved in an accident. Serious abusers of drugs and alcohol tend to be the biggest users of a company's health plan. In addition, their families are more likely to use the employee's health benefits. "The instability that surrounds a drug user is going to trigger the family unit to be unstable as well," says John DeLuca, medical director for Equitable Life. "They are having more medical problems, and they are sicker more frequently because they are under enormous family stress."

All of the drug-related costs are hitting American business just when it can least afford them. One reason Japanese industry caught up with the United States was that American productivity rose at an average rate of only six-tenths of 1 percent from 1973 through 1981. Now, finally, productivity is rising again, at an annual rate of 4.3 percent in the private nonfarm business sector. Industry needs to continue those gains to compete internationally and to increase profit margins and real earnings without causing inflationary pressures. But drugs on the job are a serious obstacle to increased productivity. "Today, if you're going to maintain your leadership, you need clear-thinking people," says Dr. Carlton Turner, Ronald Reagan's adviser on drug abuse. Noting that employees who use drugs perform at only 67 percent of their normal ability, he added: "In order for American industry to remain competitive, you've got more than that out of your workers."

Craig Zabala, an economist for the Census Bureau, credits industry's belated acknowledgement of its drug problem to "competing with the successes of Japan." Whatever the reason, companies finally are trying to find the drug users in their midst—and do something about them. Pendleton, the drug consultant from Texas, tells his audience to look for things like lip-balm containers that are really cocaine vials. He also tells them to look for 47 telltale signs of drug use: "often a chain smoker, but seldom uses filter tips . . . musty odor . . . constant licking of lips." But many experts say such lists are hogwash. "We tell our people to look for job-performance problems," says Eugene R. Gaeta, director of AT&T's employee-assistance program. "We are not talking about leaky nasal passages."

Lodge, the Miami-based drug consultant, says his first step is to look through a company's personnel records to try to identify

drug users. By analyzing the drug programs of a dozen major American corporations, Lodge says, he has come up with a computer profile of a "typical recreational drug user in today's work force." He or she was born between 1948 and 1965, is late three times more often than fellow employees, requests early dismissal or time off during work 2.2 times more often, has 2.5 times as many absences of eight days or more, uses three times the normal level of sick benefits, is five times more likely to file a workmen's compensation claim and is involved in accidents 3.6 times more often than other employees.

Anyone who fits that kind of profile—or is just acting strange—is increasingly likely to have to undergo a blood or urine test. When the Kaiser steel plant in Fontana, Calif., was operating at full capacity, the company used to take a few urine samples a day of employees who behaved oddly. Anyone who flunked got five days off without pay while discussing treatment with the company. Sunkist immediately fires anyone who fails its urine test, although an employee who admits a drug problem before the test is administered gets a leave to seek treatment. The Dallas chapter of the Associated General Contractors, which represents 500 construction firms, plans to start blood and urine tests within a year.

War: The Navy tests 1.8 million urine samples a year. Six of the 14 sailors and Marines killed in the crash aboard the aircraft carrier Nimitz in 1981 had marijuana in their systems, although the Pentagon claimed that drugs were unrelated to the accident. A congressional study that same year reported that two-thirds of the sailors aboard the aircraft carrier Forrestal regularly used marijuana and amphetamines. Now the Navy has a $24 million antidrug program. Its watchwords, which are posted on barracks and office walls and printed on sailors' T shirts: "Not on my watch, not on my ship, not in my Navy." "It is a war," says Capt. Leo Cangianelli, head of the Navy's substance-abuse program. "And the enemy is drugs."

The Navy also uses drug-sniffing dogs, and so do a growing number of businesses. Bruce Wilkinson of Louisiana General Services, a New Orleans-based drug-consulting firm, says his trained Labrador retrievers can sniff out 14 kinds of drugs, including alcohol. One out of every eight employees he searches has some kind of contraband, Wilkinson says. Dogs are used extensively on offshore oil rigs, and their use in offices is growing. At Rockwell International's plant in Palmdale, Calif., dogs were even used to sniff employees' cars in the company parking lot. "Our employees like the dogs," says Paul Franklin, personnel manager for Mobay Chemical Corp. of Baytown, Texas. "We got into this because our employees requested we use some very visible drug deterrent."

Other companies are just calling the cops. That was taboo in the business world for many years for fear of bad publicity. But now businesses feel they have no choice. "We want employees to believe Compugraphic is a good place to work," says Vincent Kaseta, vice president of the Massachusetts company. "That's not going to happen if you permit drugs on the work force." In 1980 Compugraphic, like a rapidly growing number of companies, paid for undercover agents' drug purchases, travel expenses and overtime pay during a lengthy investigation that resulted in the arrest of 13 employees. In many cases, investigations are spurred by employees who complain the fellow workers are using drugs on the job. "The best police force in the world are the other workers," says Charles Housman, treasurer of Armatron International Inc. of Melrose, Mass., where six employees were arrested. "They want to be safe and comfortable. They won't put up with it." Housman says productivity increased noticeably since the arrests, although he will not reveal figures.

Many companies are still trying to avoid the problem: when Kingsley Barham, a former San Francisco stockbroker and reformed cocaine abuser, organized a basketball marathon last May to raise funds for cocaine-recovery programs, very few businesses wanted to get involved. But some companies, like National Car Rental, have started big drug-awareness programs for their employees. And more than 4,500 companies including most of the 500 biggest, have established employee-assistance programs for drug and alcohol abusers. Some run in-house programs while others contract with companies like Brownlee Dolan Stein Association of New York, which runs EAP's for about 25 corporations around the country with a total of 250,000 employees. An employee, referred by his supervisor or enrolling on his own, talks to the EAP office and works out a treatment program. His participation is kept secret. GM's program is the best known: it was set up for alcohol abuse in 1972, expanded to include other drugs in 1975 and has spread to every GM installation in the United States and 12 in Canada. About 10,000 to 15,000 GM employees are under treatment at any time.

"An employer today in this country cannot afford not to have an employee-assistance program," says GM's Dr. Robert G. Wiencek. "Consider the impact on productivity and safety." For every $1 invested in treatment, GM can identify $3 in return for full-time employees who recover fully. Phillips Petroleum Co. says its EAP saves more than $8 million a year in fewer accidents, less sick leave and higher productivity. And some program directors say recovered employees are often among their most productive workers. "When you're able to help an employee save his life," says Frankie Rice, head of Owens-Illinois's program in Atlanta, "there's a dedication that dollars and cents can't buy."

Every effort to combat drugs on the job, including EAP's, has plenty of critics. Dog searches are more than a little intrusive, undercover investigations breed employee distrust and there is considerable controversy over the reliability of blood and urine tests. "What makes drug screens so scary is that they show traces of marijuana as much as a month after use," according to Dick Stanford, executive director of the Workers Assistance Program in Texas. "And they can pick up traces in people who might just have been in a room where marijuana was being smoked."

Bensinger, the former DEA chief, says that half of the employee-assistance programs still offer help only to alcoholics. Many of the rest, critics charge, are run by former alcoholics who are ill equipped and poorly trained to deal with drug abusers. EAP's "are a marvelous step forward, but are only one tiny step," says DuPont, the former head of NIDA. "They identify people very late and rely too much on voluntary compliance." Others are much more critical of EAP's, claiming that they too often allow an expensive revolving-door type of treatment in which individual employees constantly return for more help while being protected from dismissal because they're in the program.

In any case, almost everyone involved with the drug issue agrees that the most important long-term solution is for American industry and labor to address the work-related problems that often lie at the root of drug abuse: many jobs are simply too boring or stressful. "I don't know if you've had the opportunity to stand in a pit and turn a screwdriver over your head hour after hour, but I have," says Dr. Douglas Talbott, president of the American Academy of Addictionology. "It's almost like torture. These people bring mind-altering drugs to ease the boredom, the tension and the stress of doing their job."

Alienation: Talbott and others say American business should emulate the Japanese, who have addressed the stress problem with tension-relieving breaks. "They have exercise breaks, they have education breaks, they have breaks with training in non-chemical coping techniques for relief of boredom," Talbott says. The Census Bureau's Zabala, productivity expert who once spent four years on a GM assembly line, says there was a direct relationship between drug use and an employee's feelings of alienation. The more a worker felt he was an important part of the organization—because of a strong union, an important job or activity in a worker-management committee—the less likely he was to use drugs. Zabala's prescription for curbing drug abuse is simple: "worker input."

Even beyond that, the enormous cost of drugs on the job should give American business an ever-greater incentive to help the drug generation kick the habit altogether. In his survey of Texas businesses, Professor Lauderdale found that the top complaint among their employees was loneliness, which often led to drug abuse. "Employers are going to have to involve themselves in community and family functions to help their people cope with this loneliness without turning to drugs," he says. American industry will have to work throughout the '80s to try to cure a hangover from the '60s and '70s. The problem can be contained—although there will always be some drug abuse that is just impossible to stop. Two well-dressed young women, telephone operators for a major corporation, were spending their lunch hour one day last week smoking joints in the shadow of the Exxon building in midtown Manhattan. "We're celebrating," said one. "I have a job. This is my first day."

REPORT OF A DELEGATION OF EIGHT SENATORS TO THE SOVIET UNION

Mr. PELL. Mr. President, I send to the desk the report of the delegation which I led last month to the Soviet Union, and I ask that it be printed as a Senate document.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The PRESIDING OFFICER. Under the previous order, the hour of 1 p.m. having arrived, the Senate will now resume consideration of the unfinished business, H.R. 3363, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. BAKER. Madam President, there are time limitations provided for in the order entered last evening. All of the principals are not here who wish to participate in this debate at this moment.

Rather than charging it against the time provided for debate on the Domenici amendment, I ask unanimous consent that I may now suggest the absence of a quorum without the time being charged to any party.

The PRESIDING OFFICER. Is there objection? Hearing no objection, it is so ordered.

Mr. BAKER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2168

Mr. DOMENICI. Madam President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. What is the pending business?

The PRESIDING OFFICER. The pending business is amendment No. 2168 by the Senator from New Mexico. The time on the amendment is 1½ hours equally divided between the Senator from New Mexico (Mr. DOMENICI) and the Senator from Montana (Mr. MELCHER). Who yields time?

Mr. DOMENICI. Madam President, I yield myself 1 minute.

I might say to the Senate that I do not intend to use my entire 45 minutes. Unless something untoward occurs, we certainly will vote sooner than an hour and a half from now, which would have been contemplated under the order.

Some of my good friends in the Senate have asked me if this up to $450,000, which will be in the control of the Attorney General to be used for the purposes stated in the amendment, could be used to defer the expenses of other entities or institutions other than individual property owners. I want to clarify that and say that, clearly, the amendment is intended to be a resource only for individual property owners affected in the Aamodt case as described in the legislation and in the debate yesterday.

It cannot be used and is not intended to be used by the State of New Mexico, for instance, as an entity, or for any public entity or quasi-public entity, such as a city, a utility, or the like.

That clearly is the case. I make that statement unequivocally, and I believe that is what the amendment says.

I state that because some Senators, through their staff, have asked that question.

I yield the floor at this point.

The PRESIDING OFFICER. Who yields time? If neither side yields time, time runs equally against both sides.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Will the Senator from New Mexico yield?

Mr. DOMENICI. I have yielded the floor. As I understand it, the Senator from Montana has 45 minutes and I have what is left of my 45 minutes.

Mr. MELCHER. Will the Senator from New Mexico yield for a question?

Mr. DOMENICI. I would be pleased to respond to a question on the Senator's time.

Mr. MELCHER. Yes, on my time.

Mr. DOMENICI. Yes.

Mr. MELCHER. Will my colleague and friend tell me if in the disposition of the $450,000, there are three principal attorneys involved and from three different law firms?

Mr. DOMENICI. If the Senator is asking me if at this point in the private litigant category are there three attorneys representing different groups, the answer is yes.

Mr. MELCHER. I thank the Senator.

If my friend will yield further, just to bring it in to sharp focus, this case was brought by the State of New Mexico. Is it true that the State offered settlement or suggested a settlement of a certain amount of water for each defendant in the suit and for those who accepted the offer, the State would represent the defendants rights as against Indian claims to the same water?

Mr. DOMENICI. I do not understand the question.

Mr. MELCHER. It is true that the State of New Mexico brought the suit against these four Pueblos?

Mr. DOMENICI. The original Aamodt case, which, as I indicated yesterday, has been going on for about 17 years, was brought by the State of New Mexico through its water engineer and attorney general. It has changed in complexion in that there are counterclaims, countersuits, and of late the individual property owners have all been served with process as a result of Indian claims so that there is an upfront confrontation between the Indians and the individuals as if they were plaintiffs and defendants.

Mr. MELCHER. Is the second part of my question accurate? For those defendants in the suit who accepted the suggested settlement by the State of New Mexico, the State will represent their rights as against those of the Federal Government? In other words, the State will represent them. Is that true?

Mr. DOMENICI. I do not know of any settlement.

Mr. MELCHER. Madam President, I am advised that that is exactly the case, that the State of New Mexico is bringing the suit. I thank my friend from New Mexico for yielding.

The State of New Mexico, in bringing the suit, should not forget that they are servants of the people of New Mexico. They brought the suit against these four Pueblos, these four groups of Indians. In doing so, for those plaintiffs who are not Indians and who agree with the State's proposal, the State will represent them. We are advised that that is the case. That is what the Bureau of Indian Affairs thinks is going on down there. That is what attorneys think is going on down there.

But that really does not get to the point. We have had similar circumstances in Montana, as I described yesterday and have described numerous times to my colleagues when we visit about Indian water rights and water rights of non-Indians. We have to work out a formula that will establish policy that will have to be of some assistance to both sides in order to expedite procedures. We have not done that yet.

When a suit is brought in Montana, the State of Montana does represent the non-Indian residents, non-Indian property owners, non-Indian landowners who have filed with the State of Montana their water rights, their claim for water. For those who have done that, the State of Montana is engaged in defending those rights. The real issue here, Madam President, is whether, on a floor amendment, in a very casual way, we want to upset the procedures that have been followed

and the laws that have evolved over more than 150 years of the trust responsibility of the United States for Indian tribes. That is the real issue.

I said yesterday, Madam President, that I did not know what the tribes or Indian leaders throughout the country thought about a matter such as this. That was yesterday. I know now. The tribes and Indian leaders are shocked and greatly puzzled by this amendment. They are puzzled because they have been told for 150 years that the trust responsibility of the United States is an obligation that will protect their property rights. They have been told that the treaties signed by the Indian tribes were those first documents to guarantee protection of that trust responsibility.

The property involved may be land which is held in trust by the United States on behalf of the individual tribes or individual Indian, but other property that is covered by the trust responsibility includes, but is not limited to, minerals, hunting and fishing rights, and, of course, water rights. That is just a partial list.

The trust is a fiduciary obligation of the U.S. Government and it covers all of that property that evolved from the treaties and from the laws enacted by Congress where the ownership resides in either a tribe or an individual Indian. Consequently, the funding of the opposing side of a lawsuit in a suit brought against an Indian tribe is a breach of that fiduciary obligation. In that case, the Federal Government is financing what, in effect, is lawsuit brought against the United States, brought against their obligation, their fiduciary obligation. It places the Government in the contradictory stance of being on both sides of the lawsuit, at least to the extent of funding.

The action we are taking here, on the floor of the Senate, in consideration of this amendment cannot avoid being political. I use the term political not to denigrate the motives of the Senators presenting the amendment, for I well understand and respect their concern for their non-Indian constituents. But the political implications, in fact, the results that are certain to follow if this amendment should be agreed to by the Senate, effectually and with certainty will create a further divisive attitude to increase between Indians and non-Indians.

Above all, those of us in Indian country where these tribes are located and where their interests are—I am speaking now of property interests—above all, we seek to be fair. We base that fairness on what has evolved and is before us today—a series of treaties, a series of acts of Congress involving Indian tribes, and over 150 years of court cases. That is what we are dealing with today. While many of us would like to see a different arrangement, a better understanding, a more expeditious handling of suits—while we would like to see improvement on that score, we attempt to be fair and we attempt during the interim to uphold those policies until we adopt better policies. This amendment upsets that.

The reason that this creates a further divisiveness between the tribes or Indian people and the Government and the non-Indian people is that there is not sufficient reason for the Federal Government to finance this private or State lawsuit because, as I first queried of the senior Senator from New Mexico a few moments ago, the State of New Mexico initiated a lawsuit in cooperation with the non-Indian plaintiffs. I am not at all critical of that procedure. The State of New Mexico is doing its job, doing what it should.

But we could ask, why does not the State of New Mexico, which does not have the same kind of fiduciary responsibility to Indian tribes as the U.S. Government, and that includes us—that fiduciary responsibility of the U.S. Government includes the Senate—why do they not finance the legal fees of the $450,000 that the amendment would extract from the Federal Treasury? We have been advised that the State has already agreed to represent those plaintiffs who have made at least a beginning agreement for the amount of water that the State has suggested; they will be represented by the State, we are advised.

There is no authorization, no Federal statute, no comparable step undertaken by Congress, and no precedent that would permit the U.S. Government to violate its fiduciary obligation to Indian tribes as it would by adopting this amendment.

This is a pretty big precedent. I want to go into it in a little bit of detail, Madam President.

Passage of the amendment could open floodgates, invite further litigation, prolong litigation, and entice other constituents of ours to expect the same kind of consideration and treatment for a variety of lawsuits including but not limited to fishing and hunting rights, mineral rights, easements, and numerous other property rights that have resulted from the treaties and statutes favoring Indian tribes or individual Indians with the express fiduciary obligation—trust responsibility—of the U.S. Government.

So we are a part of that Government and in a position of highest responsibility here in the Senate. There are numerous Indian treaties and numerous statutes affecting the Indians and Indian tribes. I shall cite three cases which appear to me to clearly trace the evolvement of that fiduciary obligation of the United States. As a matter of fact and as a matter of logic, the evolvement of the fiduciary obligation was based and still is based on the greater strength of the Government compared to the much weaker position of the Indian tribes.

Of these three cases, the first was in 1831 in Cherokee against Georgia where the lines of reasoning was first established by the Supreme Court that there was a fiduciary obligation—a trust responsibility—involving the Cherokee Tribe. That trust responsibility and fiduciary obligation rests with the United States, and stemmed from the treaty with the Cherokees. The Court found that Congress is limited in its power to abrogate the Cherokee Treaty without justification. The Court found that circumstances could arise that would justify the abrogation of portions of the treaty or the treaty itself if Congress was clearly acting for the good of the country, including the good of the Indians themselves.

So in 1831, the Supreme Court found in favor of the Cherokees and began, by that action, to interpret and establish the clear fiduciary obligation that evolved from Indian treaties.

This amendment before us today could not qualify because it abrogates a clear trust responsibility. How many of my colleagues would approve of a situation where a law firm representing an estate as executors or trustees or both would take funds from that estate to pay for legal representation for those seeking a portion of the estate.

I might further ask my colleagues if any court or bar association would allow or approve a lawyer, as trustee, to pay for the legal expenses of any party against the trust beneficiary

Many Senators have come to me, yesterday and since then, to say to me privately that they feel the precedent that would be established by adoption of this amendment is unwarranted and that it would be a very dangerous precedent.

It is not that I should be the one speaking of the evolvement of legal philosophy and legal doctrine over the course of 150 years. Ordinarily I would defer to my colleagues that are attorneys. But for lack of better explanation and for lack of better description of what this amendment does, I shall attempt to continue to describe how our policy of trust responsibility for the tribes evolved.

I believe the answer to both of the rhetorical questions I posed concerning the obligation of a trustee is that there should not be a breach of the fiduciary obligation. But in the case of Indian tribes, the U.S. Government has even more clearly a stronger fiduciary responsibility, and particularly Congress itself has more than the usual fiduciary responsibility than that which is involved in the general responsibility of a trustee.

That higher responsibility has evolved because of the acts of Congress itself. In interpreting these acts of Congress, the Supreme Court said in 1942 in Seminole against United States:

> Congress through its own action has charged itself with moral obligation of the highest responsibility and trust. Its conduct as disclosed through the acts of its representatives in its dealings with Indians should, therefore, be judged by the most exacting fiduciary standards.

It seems to me that it is very clear, taking both of the two cases I have cited, Cherokee against Georgia in 1831 and Seminole against United States in 1942, two cases 110 years apart, both the treaties and acts of Congress clearly establish the demanding fiduciary obligation that falls upon us. But you might say that what happened 150 years ago and even 41 years ago can be changed by acts of Congress. If that thought has occurred to anyone, let me also cite the last case of the three which I mentioned.

This case was a Federal court ruling in 1973 concerning the Manchester Band of Pomo Indians against United States which applied to agencies of the Federal Government. The court found that in fiduciary obligation involving this band of Indians:

> The normal standard of care is that of a man with ordinary prudence, but if a particular trustee has a greater degree of skill than a man with ordinary prudence, then he must use that skill. While the normal is a man of ordinary prudence, if a particular trustee has a greater degree of skill he will be held liable for the loss resulting from not using such skill as he has.

What it says to us is that we are to use all the skill and the knowledge that we have at hand in carrying out our trust responsibility and fiduciary obligation to the Indian tribes.

As I said earlier, the court first ruled in 1831 that abrogation of a portion of a treaty or a treaty itself with an Indian tribe could be undertaken by Congress if it was found by Congress that such abrogation was for the common good of all the people including the Indians. Such action by Congress has not occurred to diminish its fiduciary obligations. Lacking such action, Congress must continue to fully exercise its trust responsibility on behalf of the tribe.

Now, the merits of this amendment are based upon the need to pay the legal fees for three lawfirms in Albuquerque in a water rights lawsuit. Part of the complaint involves four Indian pueblos in New Mexico. That is the amendment before us, yet Congress has not acted deliberately to establish by statute the authorization that would cover the circumstances involved in this amendment. Before such a precedent of breach of fiduciary responsibility of the U.S. Government is undertaken, I think that we should consider the high standards of trust responsibility that fall upon us. And as the Court mentioned in 1972 in the Manchester Band of Pomo Indians, our standard of fiduciary responsibility is a high standard. It is higher than ordinary because we must exercise a prudence that matches our knowledge of the situation and our understanding of the trust responsibility gained over the last 150 years.

It would not be fair to be critical of the amendment just because it involves one suit, though I find it unusual to make an appropriation for a particular purpose or just for one specific matter.

The fact is that we have to view what this amendment does in its totality. What it does in its totality is set the precedent that we need not be zealous over the trust responsibility we have as part of the U.S. Government but that we are free to ignore it from time to time if we happen to like a certain proposal. The precedent that the adoption of this amendment would set is that an abrogation of rights for individual bands, the Pueblos or tribes of Indians, and could be accomplished by a floor amendment offered at any time.

One might say that that goes too far, that we are not going to abrogate the rights. As I stated earlier, we are not in the position of making the choice. We are trustees for the Indian side of it. We cannot be on both sides of the issue.

We might find a reason to establish as general policy that it would be for the common good of all the people, including the tribes, if we adopted a procedure or a type of mechanism whereby we could accomplish what this amendment seeks to accomplish. We might do that, but we have not done it. So we are still in the status of having to uphold the special and very important and very significant trust responsibility for the tribes. We cannot abrogate that. We cannot change it at this time.

Those Indian property rights that have evolved from treaty, statute, or case law, if we followed this precedent, could be arbitrarily set aside time and time again by similar amendments. If we agree to pay legal fees for these law firms, others could gain the sympathy of individual Senators or Members of the House. That is what this leads to.

While the facts in the lawsuit involved in this amendment are not identical with the cases I have cited, the principles established by treaty, statute, and case law are the same. That principle is not just for this amendment but for a host of others to which it could apply and which could well arise if we adopt this and breach that trust responsibility.

That would be chaos. The time to halt chaos is before it starts. This amendment is clearly an improper procedure, a back-door method, to have the United States pay for both sides of a lawsuit. If the amendment is adopted, it is an invitation for numerous others like it to be advocated by others.

This amendment by itself, without hearings and without support from this administration or previous administrations, could contradict the treaties and statutes affecting Indian tribes as interpreted by the courts. It falls flat and should be held in ill-repute in this body as being a private relief bill for three law firms representing the non-Indians in this lawsuit against the four Pueblos of Indian people in New Mexico.

Surely, it must be true that if there is sufficient merit to pay these three law firms in this particular suit, should not there be, under the equal protection clause, the same right and expectation of funding out of the Treasury for legal fees for other law firms throughout the United States, in Indian country, where there are suits pending? It would apply to the fees of non-Indian parties against Indian tribes in all those 52 water cases that are now pending in Federal courts and scores of similar lawsuits involved with easements or fishing or hunting rights or boundary disputes that are now pending or will arise in the future.

Permit me to conclude my opening statement today by stating that Congress may indeed find, after hearings and deliberation, that it would be meritorious in certain instances, under certain circumstances, to provide legal assistance of such quality as is represented by these three law firms for non-Indians involved in cases where property rights of Indian tribes or individual Indians are also at issue. It is true that we may find, after hearings and deliberation, that such a procedure should be adopted and should be the policy of Congress. That constitutes authorization. It constitutes a modification of the procedures of Congress as agreed to, and the limitations would be established in that regard on the fiduciary responsibility by Congress itself. It would be done on the basis of being for the general good of all people, including the Indian people.

I can understand that if that would expedite lawsuits and the settlement of these claims, it would be meritorious. But that has not been done. I hope it is done.

We are now preparing for the introduction of a bill that I propose will undergo hearings in the Senate Indian Affairs Committee which will create a type of commission to look at Indian water rights and to establish some guidelines and some method of expediting procedures through the courts.

We have done that before, in the judgment suits that have settled questions of the taking of lands of various tribes. We have set up that procedure for other claims of Indian tribes or individual Indians. So perhaps we will be successful in Congress in adopting some sort of procedure such as the bill we are now trying to get drafted for introduction.

Surely, Congress has the right to abrogate or change or modify a treaty, if it can be demonstrated that it is for the common good of all the people and for the Indian tribes themselves. If we meet that test and pass authorizing legislation, I am all for it. We will have to wait to see whether, after the hearing process, we will be able to accomplish that objective. Until we do that, I think we had better be very restrictive in how we take up an amendment such as this.

This amendment clearly is $450,000 out of the Treasury to pay certain law firms in Santa Fe. Those lawyers are not legal aid novices. Those lawyers are very astute, well-recognized authorities on water rights and property rights in general. That is to their credit, and that is to the credit of the parties who have engaged them for that purpose. It is to the credit of the State of New Mexico that they are trying to assist in their representation of those non-Indians who are parties to this suit. But as of this moment in time, Congress simply has not taken that step, that necessary step, to authorize payment of attorney fees under these circumstances, involving trust responsibility.

Madam President, while the Senate voted overwhelmingly last evening that this amendment is germane. It is a judgment of the Senate, whether you want to make germane an amendment that otherwise would be out of order. All of us have voted for amendments that would not be germane under our rules and voted them germane to keep them in the bill. I am not critical of that method at all.

But I do ask my colleagues in the Senate to exercise caution and prudence in the vote that is coming up. In the vote that is coming up, if this amendment is accepted by a majority vote, it will establish what appears to me to be an undue and unnecessary precedent, a very dangerous precedent.

I believe that the amendment should and must be defeated.

Madam President, I yield the floor.

Mr. DOMENICI. Madam President, I yield myself 5 minutes.

I wish to say to the Senate that I do not think this Senator would take a back seat to any Senator in this body with reference to an understanding of the fiduciary relationship that our National Government has to, with, and for our Indian people. I understand it. I am not timid about it. As a matter of fact, I have gone to this very area of the State and explained it in detail to those who are party litigant who cannot understand how the Federal Government is involved with Department of Justice lawyers and $2.9 million for private attorneys, for separate law firms representing the Indian litigants' water claims, and I have done that publicly and explained to them it is a trust responsibility.

Second, I do not think that I want to take a back seat to anyone in terms of being close to an understanding of the Indian problems in my State, and I think I might say without fear of being presumptuous that I am considered to be their friend. I came to this body 11 years ago and said that publicly and I have tried ever since, even though it is a minority and a very difficult one to represent because of the very different relationships that come about because of the U.S. Government's trust relationship in behalf of the Indian people.

Having said that, first, I am unaware of Indian opposition to this approach in my State, and I notice that my junior Senator is here. Shortly, I will ask him to comment.

I have told the Indian leaders involved maybe 2½ months ago, I said to my friends in the Senate, that I was going to have to do something like this because of the inequity and disparity that existed in this case in terms of an opportunity to get justice and fair play out of the courts or, at a minimum, the perception of fairness when there are four private sets of lawyers being paid for four Indian pueblos plus the Department of Justice, the finest experts in the world being hired plus a department of the U.S. Government lending its expertise to the Indian side of this case.

Third, I really cannot believe that anyone is going to challenge the propriety of the U.S. Government through an act of Congress helping in this particular case to dispense equity and justice by permitting the Attorney General of the United States to use up the $450,000 for the non-Indian private litigants. I mean, one can stand up and say that is a violation of a fiduciary relationship, but I really do not understand how it can be.

First of all, the Supreme Court has been pretty clear of late that we did not have to spend the $2.9 million which might have been thought at one point to be necessary for private lawyers because some thought the Department of Justice cannot wear two hats and cannot represent the Government and the Indians. The Supreme Court has recently said they can.

Nonetheless, this case is not typical. As a matter of fact, our researchers say, out of 52 water cases out there, only 5 with Indian litigants have private lawyers being paid for by the Government, and we are 1 of the 5.

So, I do not know where the breach of fiduciary duty comes because we chose to say, let us make sure that our courts are given the right facts and be fair and appear fair in cases of this magnitude and this import to literally hundreds and hundreds of people in my State with repercussions elsewhere in the Southwest and in those States that have water rights doctrines like ours.

With reference to Bureau of Indian Affairs in New Mexico telling my good friend from Montana such things as the State of New Mexico and the attorney general are representing the non-Indian litigants, or they offered to, and they said, "If you will take some certain compromise, we will represent you," and therefore this is some kind of a backdoor approach to pay, in spite of an offer for assistance and attorneys' representation through that office, let me just say while I have just told the Senate of my respect for the Indian people, the Bureau of Indian Affairs also knows that I do not have the same respect for them, and that is pretty obvious when it comes to my dealing with them. I do not think they represent the Indians very well, and I have not been a staunch advocate of giving them more authority. Rather, the contrary.

Having said that, let me say I will put in the RECORD a letter from the attorney general. I ask unanimous consent to have printed in the RECORD a letter from the attorney general of the State of New Mexico, dated July 22, 1983.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ATTORNEY GENERAL,
DEPARTMENT OF JUSTICE,
Santa Fe, N. Mex., July 22, 1983.

Hon. PETE V. DOMENICI,
U.S. Senator, Dirksen Senate Office Building, Washington, D.C.

DEAR PETE: Thank you for your letter of June 27, 1983, expressing your concern about the disparity in resources available to the litigants in water rights cases.

I share your concern. The federal government has provided millions of dollars for litigation on behalf of Indian water rights. The State and private parties have only a small fraction of that amount available for litigating these very significant issues.

As you know, the State in water rights cases represents the interests of all of its citizens, both Indian and non-Indian; to that extent, all water users obtain some benefits from the State participation. The private parties, however, present their own case.

In the *Aamodt* case, you mention in your letter, private parties have asked me if the Attorney General could provide money from the Attorney General's budget for attorneys and experts to present their part of the case. I have told them that I could not and that our Constitution prohibits the donation of State money for private purposes. Art. IX, § 14; Art. IV, § 31. I am looking into alternative sources of funds but have no as-

sistance to offer at this time, and trial in the case is coming up in three months.

Perhaps the solution to this recurring problem is the allocation of federal funds to reduce the funding disparities. A just resolution of these water rights issues is of national importance.

I remain hopeful that you will be able to identify federal funds that could be made available timely to the litigants in *Aamodt*. I in turn will continue to explore the possibility of finding State funds for those private litigants.

Sincerely,

PAUL BARDACKE,
Attorney General.

Mr. DOMENICI. Madam President, he was asked by this Senator about putting this case into a commission framework maybe to be settled by arbitration. What can we do, said I.

He wrote back and, among other things, said, "One of the things you could consider is some money for the non-Indian litigants, because we do not know any way to get them representation other than that."

That is the attorney general of the State.

Madam President, I ask unanimous consent to have printed in the RECORD a letter dated August 17, 1983, from the Governor.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

STATE OF NEW MEXICO,
OFFICE OF THE GOVERNOR,
Santa Fe, N. Mex., August 12, 1983.

Hon. PETE DOMENICI,
U.S. Senator, Room SD 434
Washington, D.C.

DEAR SENATOR DOMENICI: Thank you for your letter of July 26, 1983. We share your concern about the divisive effects of the Aamodt litigation. Water rights litigation in the water-short Western states has caused and will undoubtedly continue to cause such divisive effects.

This State administration has been committed through both the Governor and the Attorney General to a redefinition of the relationship between the state and our Indian citizens. We have made great strides in a few short months; and, as never before we will attempt to solve disputes between our Indian and non-Indian citizens out of court in a nonadversary context. We will go out of our way to negotiate rather than litigate.

In the Aamodt case we stand ready to participate in negotiation, mediation, arbitration or any other effort to resolve our citizens' disputes by accommodation and agreement. We are advised, however, that arbitration may not be a viable option. First, we understand that the Indian parties, who are satisfied with the progress of the suit, have no interest in arbitration and would not agree to it. In addition, the Department of the Interior might not be viewed by any of the parties as an acceptable forum for arbitration. Furthermore, we fear pursuit of this option could have the effect of prolonging the time to the necessary, ultimate determinations.

Negotiation and mediation of the sort provided in the *Papago* case you mention might be more acceptable to the parties involved; but here, too, we are not hopeful because the prospects for settlement are not good where there is no unappropriated water and no money with which to negotiate.

As your letter points out, New Mexico's circumstances are not unique. Because the problem of the priority, nature and extent of Indian water rights, which has initiated a westwide avalanche of litigation, arises out of federal law, the United States may find it both prudent and equitable to commit federal funds to the implementation of negotiated settlements.

With warm personal regards.

Sincerely,

TONEY ANAYA,
Governor.
PAUL BARDACKE,
Attorney General.
S. E. REYNOLDS,
State Engineer.

Mr. DOMENICI. Madam President, the Governor of the State of New Mexico was asked the same question and remarked on a variety of subjects to the Senator from New Mexico but also indicated he did not think the State could pay attorney fees because of a constitutional prohibition against using State money for situations such as this.

I am not sure that is right, but the final bottom line is there is no source unless it comes from the U.S. Senate.

Now, in terms of this particular case being typical of other bodies-of-rights problems that exist between the Indian people and individuals, either in water rights areas or others, let me state I do not know if it is the same, but I can tell you that this one has some very different characteristics than normal Indian water suits.

In about 1860 the Supreme Court of the United States declared that our Indian Pueblos were not even Indians under our national law. As a result, there were no fiduciary responsibilities. Various rights began to vest and divest and people began to acquire water and property and the like.

Thirty-five years later the Court reversed itself, after many of these rights had already been set in motion, because they had ruled they were not a part of the fiduciary body in the United States; 35 years later they reversed themselves and, as I indicated, these kinds of rights became confused.

In 1924 and 1933 Congress purported to cure these problems with a Pueblos Land Act of 1924. The questions being adjudicated in this court suit again are directly related to these various acts.

So it seems to me that we have a much different situation than exists in the typical fiduciary situation vis-a-vis the Indian people.

Last but not least, let me say that I have the greatest respect for my friend from Montana, and I am sorry that he might have tried in the past to get some assistance like this in his State. I frankly do not think it was the same situation. I think the situation, the facts were different, litigants were different, but nonetheless, I can tell him that I am willing to participate in his Indian Committee in an effort to establish some basic American law in this area. We need some, not only with reference to attorney fees but a lot of other things as it pertains to water adjudication where the fiduciary rights of our Indian people are involved.

In the meantime, however, I think the best thing the United States can do is give this thousand or so people up there, with the kind of rights I have described that are non-Indians, a glimmer of hope that we are going to get justice out of this case and at the same time do no harm to the Indians.

The lawyers involved for the Indians commented publicly about this approach with no animosity. None of them said, "Do not do it."

In fact, one said, "We will wait around and see. We are not so sure it will cause any problem. Let us just see."

I hope the Senate adopts this amendment. I think it is a fairplay amendment, an equity amendment. Without it, the United States is going to be perceived quite to the contrary, and justifiably, in the State of New Mexico.

Mr. BINGAMAN. Madam President, I wish to very briefly rise again to support the amendment that has been offered by the senior Senator from New Mexico and by myself and make just a few points relevant to the discussion that has taken place today on this amendment.

First of all, I agree that, as far as I know—and we made extensive inquiry on this point—there is no Indian opposition to the effort which is being made here in this amendment from our State. We have contacted the Indian leaders in our State and indicated that this seemed to us to be a fair approach and, without exception, we have not received opposition from them.

I would also say that, based on my 10 years in private practice where I handled some cases involving Indian rights and based on the 4 years I spent in the attorney general's office, I know of no legal argument for the proposition that providing these funds for representation of non-Indians in this litigation would violate any trust responsibility which this country has and this Government has to the Indian people.

I think that trust responsibility is well recognized in law. Certainly nothing that we are proposing to do here undercuts that responsibility or our carrying out that responsibility.

Third, I would make the point, which has also been made, that I think it is clear that the State of New Mexico does not represent the private litigants, the private individual litigants we are here trying to provide some representation for. It does not because it does not see that it can and still effectively pursue the position of

the State of New Mexico. That has been the position consistently since this case was filed 17 years ago. During the time I was attorney general, that was certainly the position that we took and it was well known to all parties in the litigation that the State could not effectively represent the non-Indians in the litigation.

The final point, which is the basic point that I think is the moving reason for this amendment, and that is simply that we do have a responsibility, I believe, in this country to insure some type of fairness in our dealings with any group of people. We have a situation here where a large group of individual private landowners are not plaintiffs in this litigation. I think there has been some confusion about that. These are not people who have brought this suit to challenge the rights of Indians or the rights of anyone else. These are people who have been sued, who are defendants in the litigation and who are defendants through no cause of their own.

They are trying to see to it that their position is adequately put forth in the court. I think that is essential if the decision of the court is to be given respect by all persons involved in the case.

I feel it is essential if we are going to have fairness in this case and maintain the appearance, which I believe needs to be a reality in this country, that the Government deals fairly with people from whatever group.

So I support the amendment. I again commend the senior Senator from New Mexico for offering this amendment, and I welcome the chance to cosponsor it.

(Mrs. HAWKINS assumed the chair.)

Mr. MELCHER. Madam President, I think there are one or two gaps in the presentation that has been made so far and I will try to fill those in. I appreciate the comments of my two colleagues from New Mexico. As I have stated before, I understand their concern and I applaud their concern. But I hasten to advise my two friends from New Mexico, as well as the rest of the Senate, that this amendment would indeed establish a precedent, a precedent that infringes upon the fiduciary obligation of the United States.

One of the gaps that has not been filled in yet is why this case has taken so long. I might point out one of the reasons why it took so long was because a lower court said, when the tribes sought to have independent counsel other than the Justice Department, the court ruled that that was impossible; that they were represented by the Justice Department and, therefore, the tribes could not hire their own counsel.

The lawyers for the tribes presented themselves and they said, "Well, after all, there is a conflict of interest involved in this particular case because the United States is also involved in water rights on this." I believe it is the San Carlos National Forest in the State of New Mexico. "How can you have the Justice Department just advising these Pueblos, and not look at the other side of it, where there might be an inherent conflict in the Federal Government, as between its own water rights in the national forest lands versus its fiduciary responsibilities to the tribe?"

Well that Federal judge was found to be in error in saying that the tribes could not hire their own attorneys. The appellate court, the 10th Circuit Court, ruled that indeed, of course, the Pueblos could have private representation. It was patent. The State of New Mexico should not have argued that the Pueblos could not hire separate attorneys. So that is one of the reasons this case has taken so long.

But where this $2.9 million is coming from that has been thrown around here, bandied about regarding this amendment as Federal expenditures, as fees for attorneys for the Indians, I do not know. It is not that. The actual fee that may be paid to these attorneys is about $1.5 million. And that is plenty. But it is about half of $2.9 million.

Why was it paid? I repeat, the fiduciary responsibility of the Federal Government that evolved from the treaties with Indian tribes, from the statutes passed by Congress, and from the court interpretations, clearly beyond doubt, established that fiduciary relationship.

Now, I repeat, if a lawyer is protecting the trust for the rights of a beneficiary, also takes from that trust that he is protecting, and pays the fees of other lawyers that are trying to get at the trust on behalf of somebody else, nobody argues that lawyer would be violating his legal trust responsibilities and would be punished by any bar in the United States. He cannot ignore the proprietory and trust responsibilities that he incurs when he accepts that responsibility.

Yes, the tribes vehemently do oppose this matter. I can say to you very sincerely and very conscientiously, just as the Senators from New Mexico have said, that if I said to tribes in Montana: "Would it be OK if we could find some money to pay for part of the legal fees of people on the other side of the lawsuit?" they would say, "Yes, that's OK."

They are not assuming that we would be violating the trust responsibility, that we would be starting a chain reaction by passing a bill—an act of Congress—that starts to unravel that trust responsibility. No, they are not approving that. They are just approving the practicality. If we can find some money without doing that, they would agree, go ahead and find it.

An Indian tribe in my State, I am sure, would tell me the same thing. They do not want this trust responsibility unraveled in this way. They are sensible enough to recognize that if the trust responsibility is going to be changed, it will be changed by policy established through an act of Congress based on that test which I earlier described in Cherokee against State of Georgia established in 1831.

Madam President, how much time have I remaining?

The PRESIDING OFFICER. Three minutes remain to the Senator from Montana.

Mr. MELCHER. Madam President, I reserve the remainder of my time.

I ask my colleague from New Mexico if it is his understanding that some of our colleagues are expecting this vote to occur at 2:30.

Mr. DOMENICI. I do not think so. The Senator may know of some. Basically, when we started, I suggested that I was not going to use all of my time and, therefore, we might vote earlier than 1½ hours after we started. I still feel they are aware of that. We could ask the leadership representation about it. I think the answer is we are ready to vote any time the Senator is ready. I am ready to yield back but I will not yield back until we get an answer.

Madam President, I suggest the absence of a quorum.

Mr. MELCHER. Since I have only 3 minutes, may I ask my colleague that this quorum call be charged against his time?

Mr. DOMENICI. Yes.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. EXON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. Who yields time?

Mr. DOMENICI. I yield time to the distinguished Senator. I understand he has a question.

Mr. EXON. I would like to pose a question and possibly get an answer from both of the sponsoring Senators from New Mexico on the matter before us.

Let me see if I understand the issue. We are authorizing the expenditure of $450,000 basically for attorney fees, as I understand it. Is that correct?

Mr. DOMENICI. I believe it is attorney fees and/or expert fees.

Mr. EXON. As I understand it, this is a dispute between certain American Indians and their water rights and claims and they are being represented, the Indian interests are being represented, at Government expense at this time. Is that correct?

Mr. DOMENICI. There are four Indian Pueblos each of whom have private legal counsel. We are paying them and their experts pursuant to existing law, and the Department of Justice represents the Indian interests with Federal lawyers in addition thereto.

Mr. EXON. So the claim that the Indians are making is against land that is held by private non-Indian landowners, is that correct?

Mr. DOMENICI. No. It is water, not land.

Mr. EXON. If this legislation passes, are we not going to find ourselves in a situation where the taxpayers are financing both sides of a lawsuit?

Mr. DOMENICI. The Senator is correct. I would remind the Senator, however, of a major bill in the Senate called equal access to justice. I think 94 Senators voted for it. In that situation, we did the same thing, where we found if it was necessary in the interest of justice we paid the attorney fees of private litigants who had defeated the Federal Government in various types of litigation.

The Senator is correct, we will have paid part of the non-Indian private individual attorney fees and court costs and all of the Indians' private representation and public lawyers.

Mr. EXON. I thank my friend from New Mexico. I recognize the situation that he and his colleague from New Mexico find themselves in at this particular juncture.

I guess I am wondering whether or not we are setting a rather important precedent with this legislation, or have we done things of this nature previously?

Mr. DOMENICI. Let me answer that question as best I can. I answered it yesterday for the distinguished Senator from Louisiana. In the meantime I have dug up some additional information that perhaps can answer it slightly better at this point. Nonetheless, I want the Senator to know I have not researched the whole area of American Government involvement in lawsuits as to how precedent setting this is or is not.

I can tell the Senator this: There are 52 suits in the country involving Indian claims. However, of the 52, 5 involve situations where the Federal Government is paying private lawyers. We are one of the five, where we have paid $2.9 million to four sets of lawyers for their fees and experts.

I assume we might say that as to that kind of lawsuit, if it is in the interest of fairness and seeing that there is an opportunity to present the other side, we may be setting that kind of precedent, that maybe those additional ones might come before us. On the other hand, I am not sure the Federal Government is going to continue to pay private lawyers, the Department of Justice, Interior lawyers, and Federal experts. This is a very different and peculiar case, the one that we have before us, in that regard.

Mr. EXON. I thank my friend. Is there not some way, with all of the lawyers that we have in the various departments of the Government of the United States—the Justice Department, the Interior Department, and every other department you can think of—is there no way we can ethically have a lawyer we are already paying to do possibly an unnecessary job to go in and assist these people who may need some help, if I understand the case the Senator is trying to make?

Mr. McCLURE. Will the Senator yield?

Mr. DOMENICI. I am pleased to yield to the Senator.

Mr. McCLURE. One thing that has not yet been brought out in this discussion has been touched on by the Senator from Nebraska. I think it is a good and thoughtful question. The regulations require that the Federal Government not fund private attorneys or counsel in litigation on behalf of Indians unless there is a certification both by the Assistant Secretary and the Department of Justice that neither the Solicitor of the Department of the Interior nor the Department of Justice can adequately represent the Indians in their trust responsibilities.

The Pueblos had asked for private representation and it was turned down, as was mentioned by the Senator from Montana. They bitterly protested that they needed independent counsel to represent them independently of the matters that were being argued on their behalf by the Solicitor and by the Department of Justice. Rather than argue that point any further, the Federal Government agreed to make that certification that they could not adequately represent their trust responsibilities toward the Indians in this kind of litigation, thereby officially setting in motion the recognition that this litigation was somewhat different than normal litigation and that the normal relationships between the Department of the Interior and the Solicitor in the Department and the representation of the Department of Justice was not adequate to meet the needs of the Pueblos in this litigation.

Mr. EXON. So who is representing the Pueblos?

Mr. McCLURE. Both the Department of Justice and the Solicitor in the Department of the Interior, and the attorneys paid by the Federal Government.

Mr. EXON. Three different groups of attorneys?

Mr. McCLURE. Yes.

Mr. EXON. How many groups of attorneys will the $450,000 fund?

Mr. McCLURE. I shall have to allow the Senator from New Mexico to respond to that.

Mr. DOMENICI. Before I do that, since we have plenty of time and we are not going to vote for a while, could I ask Senator BINGAMAN, who was there and was attorney general for part of this, to answer the last question with reference to the Indian representation?

Mr. BINGAMAN. I thank the senior Senator from New Mexico.

To the Senator from Nebraska, in answer to his first question whether there is a group of Government lawyers today who could take on this representation that we are here trying to provide funds for, let me say I do not know of any such lawyers who have that as part of their statutory responsibility or who could be legitimately designated to do that job. That is one reason why I think the amendment is essential.

On the question of representation of the Indian tribes and Pueblos, I believe the position is accurately stated that the primary representation is now being provided by private attorneys paid for with Federal Government funds as a result of this determination or decision that some conflict existed and it was improper for the Department of Justice to go ahead with it.

Mr. EXON. Does the Senator from New Mexico worry at all about the precedent that it seems to me is being set here or does he not?

Mr. BINGAMAN. Well, Madam President, I think the senior Senator from New Mexico responded well to that. I think an argument could be made as to the four other cases that exist where private attorneys are being provided in addition to Government attorneys with the use of Federal funds, that there as well, some type of resources should be made available to the non-Indian litigants. I do not know the circumstances of those cases.

Here we have a great many small, private landowners who have water rights who are not filing these suits, who are, themselves, being sued and having their rights challenged. I do not know if the other four cases that were referred to involve a great many private small water rights holders or not. I think that is, to my mind, a major factor in justifying this action by the Senate.

We do have here a large group of people who really are not capable of anteing up anything like the resources that would be required to defend effectively their right to their water and to see to it that the Federal court has a balanced presentation of the facts and the law in this case.

Mr. EXON. I thank my friend. Let me ask one more question.

To what committee was this matter referred? What was the action in the committee and what was the vote?

Mr. BINGAMAN. I think I would refer that to the senior Senator from New Mexico.

Mr. DOMENICI. Madam President, it was not referred to any committee, to my knowledge, at least in the context of the language that is before the Senate. For a long time—years—the Special Committee on Indians and the Energy Committee and the Public Works Committee have all looked for some way to address the issue of water rights—reserved Indian water rights and other rights out there, principally in the Rocky Mountain west and the West. We have not been able to find a solution and the courts have been kind of handling it in their own way, one case at a time, ad hoc, waiting for the U.S. Supreme Court decision in other areas.

I say to the Senator from Nebraska, I have been working on this for about 3 years. I tried to get assistance through legal aid, for instance. I think at one point, we tried to put some extra money in legal aid for the kind of litigants my distinguished junior colleague was talking about. It does not work. This is just not the kind of litigation legal aid has in mind. It is a collective right. It is not one on one. Yet they have a little piece of property so they do not qualify, but they do not have the kind of resources to hire great water experts, which is the kind of thing they are talking about, anthropologists of world renown.

I have just gotten to the point where it is boiling, the decision is going to be made in the next few years, and I thought, let us be fair and fight it right here. That is why we are here.

Mr. EXON. I thank my friend, the senior Senator from New Mexico, and my friend, the junior Senator from New Mexico. They are friends of mine. I vote with them frequently. I cannot be with the senior Senator on this one. I do appreciate the fact that he has been forthright and up front about it. He has made a case but, unfortunately, not to this Senator because of the precedent I think is being set. I thank him for his frankness.

Mr. McCLURE. Will the Senator from New Mexico yield to me so I may answer some questions from the Senator from Montana?

Mr. DOMENICI. Yes, Madam President. I yield for that purpose.

Mr. McCLURE. I thank my good friend, the Senator from Nebraska, for having been candid about his concerns and the reason for his judgment. I do not quarrel with that at all. I understand fully. I had not expected to take part in this debate today. But I think the Senator from Montana raised questions that are also deserving of comment.

I have served on the Interior Committee in the other body as well as the Committee on Energy and Natural Resources in this body since 1967. I think it is fair to say that, before I arrived here, the question of Indian water rights was a question. It has been a question during all of those years. I know several of the participants in the discussion here today have been very much involved and will continue to be involved as to how to solve that particular problem.

When the Senate reorganized its committee structure in 1977, we changed the committee structure dealing with these issues. Before that time, there had been an Indian Affairs Subcommittee of the Committee on Interior and Insular Affairs. The recommendation was that the subcommittee be abolished.

The Senate Committee on the Interior and Insular Affairs was given revised jurisdiction and a different name—to be known as the Energy and Natural Resources Committee. Those who desired that the focal point of a subcommittee dealing with Indian affairs should not be lost asked that a select committee be established in lieu of the subcommittee. That was the action that the Senate took at that time and that is the way it evolved.

Since then, we have had a division of jurisdiction. That division of jurisdiction has exposed to a more open view what was the case before that and remains the case in the executive branch.

The Senator from Montana has said: How can you possibly have the Federal Government representing two different entities at the same time, two different participants in the litigation? Well, as a matter of fact, the Department of the Interior has two different statutory responsibilities.

Mr. MELCHER. Will the Senator yield?

Mr. McCLURE. Just a moment and I will try to, if I have time.

The Department is given the responsibility of administering the trust responsibility of the Federal Government with respect to the rights the Indian peoples have under treaties with the United States. The Department of the Interior also has a more general responsibility with respect to several issue areas, and other departments of Government also have general responsibility with different issue areas.

Therefore, the Federal Government must necessarily have some ambivalence with respect to contests between groups in our society, some of whom claim rights because of their status as members of Indian nations within this country that have treaty rights and other direct rights between themselves and the U.S. Government.

One of the dilemmas that the Department has faced over the years is how to discharge both responsibilities simultaneously, and sometimes they go one way, sometimes they go the other. They have been seeking a means by which they can balance those two different responsibilities. The debate has been nearly endless. Certainly it has not ended.

Both Secretary Andrus in particular and Secretary Watt have said: "Why doesn't Congress address this question and help us resolve this duality, this apparent conflict? Congress debates it but does not resolve it."

And so here we have a situation in which the Pueblos themselves asserted: "This is a special case. This is not the ordinary case. You cannot represent us properly." The Department of Justice initially said: "Oh, yes, we can." And the Department of the Interior originally said: "Oh, yes, we can." And over a period of time they finally said: "Maybe we can't. In fairness to them, we will recognize this as a special case and we will grant the payment of attorney fees."

The PRESIDING OFFICER. The time of the Senator from Idaho has expired.

Mr. McCLURE. Will the Senator yield 2 more minutes?

Mr. DOMENICI. I yield 2 minutes.

Mr. McCLURE. I thank the Senator for yielding.

The litigants on the other side are saying: "Hey, wait a minute. Now you are ganging up on us. It was bad enough with the Department of the Interior representing them. It was bad enough with the Department of Justice representing them. Now you are going to give them a lot of money to go out and hire private attorneys and they are going to gang up on us, too."

What they have in effect said here is, "Be fair about it, fellows. If you are going to give them a few rocks to throw at us, give us some rocks to throw back."

Maybe that is not a good analogy, but if you are going to arm one side, then arm the other side.

I think if we are looking at what litigation really is about, and I am an attorney—I believe in the system we have. It is a system by which we arm both sides to marshal their best arguments, to come before an impartial tribunal, and to allow that impartial tribunal to sort out the arguments on both sides and make a judgment. It is an adversarial system. But if that adversarial system is to function correctly, it must have some equality of opportunity on both sides. It should not be the Federal Government arming one side disproportionately against another.

The people in New Mexico, represented very ably by their Senators, have said, while the Congress is trying to debate that other question of how do you balance trust responsibilities

against general responsibilities, "Hey, don't let us get caught in the vacuum. We are caught in the cracks between this lack of resolution and we need some help."

So, yes, maybe this is precedential. I understand what the Senator from Nebraska is saying. But maybe the precedent was established when we decided to treat this as a unique case, justifying the investment of Federal funds for private counsel on the side of the Pueblos. Maybe that is where the precedent was established and maybe now we need to respond to that by making sure that we are not unjust to the people on the other side of that controversy.

Mr. EXON. I thank my friend from Idaho. One short statement of 10 seconds. I hope that this exemption or this unique case does not become the rule, as we have had similar situations face us in the past.

I thank the Senator for the explanation.

Mr. DOMENICI. Madam President, parliamentary inquiry. How much time do I have remaining?

The PRESIDING OFFICER. The Senator has 6 minutes and 20 seconds.

Mr. DOMENICI. And the distinguished Senator from Montana?

The PRESIDING OFFICER. Three minutes 30 seconds.

Mr. McCLURE. Mr. President, will the Senator yield 1 additional minute to the Senator from Idaho? The Senator from Montana asked if I might yield, and I told him I would if I had time.

Mr. DOMENICI. I yield 2 minutes to my friend from Idaho.

Mr. McCLURE. Did the Senator from Montana wish to address a question to the Senator from Idaho?

Mr. MELCHER. I thank my friend for yielding. Yes.

My only question was, did not the able Senator from Idaho, the chairman of the Energy Committee and the manager of this bill, understand my statements to mean that there had never been an instance where, exercising its trust responsibility and fiduciary obligation that is inherent on the U.S. Government has never financed the other side of a lawsuit that it is defending on the basis of that fiduciary obligation to the Indian tribes?

Mr. McCLURE. Let me suggest to the Senator from Montana that I know of no other instance in which they poured $2.9 million into one side by the private counsel in this kind of litigation. As a matter of fact, the Federal Register would indicate in the revision of the existing rule with respect to the granting of fees that they specifically said that this was a relatively small amount of money that would ever be involved, never would it exceed $750,000, and typically would not exceed $80,000. Yet, in spite of that history, we see that there is almost $3 million that has been poured in and the estimates are it will exceed $4 million on one side before this litigation is completed.

Now, that is an exceptional circumstance.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MELCHER. Yes, indeed, there are other instances where the Federal Government has paid for the private attorney fees for tribes in water cases where there is both the fiduciary responsibility of the United States and a direct conflict of interest between the Government and tribes as to water rights. These are ongoing cases right now just like this is an ongoing case in New Mexico.

But, Madam President, there never has been one instance where the United States has paid both sides in a case that involves the fiduciary responsibility, of the U.S. Government.

Now, we are part of that trust responsibility. We are part of the Government. This is the Senate.

The three cases that I earlier outlined clearly demonstrated, for over 150 years, through the treaties themselves, the acts of Congress, and the court cases, that that special obligation exists, and it is the law of the land. It cannot be violated legally in this instance. Perhaps $450,000 will never be challenged in court. If it were, I believe it would be struck down as unconstitutional. We are a government that acts under the law, and under the law the State of New Mexico could well take up the representation in court of these parties.

I do not know why they have not. Other parties have asked the State of New Mexico to represent them, just as my State of Montana has defended the interests of non-Indians in similar water suits.

But this amendment goes well beyond water. That is the point. We are just talking about water here, to pay these legal fees, but the precedent itself where the United States will pay both sides of a lawsuit, where the United States must defend the Indian tribes, in this case Pueblos, because it is our fiduciary responsibility, what does it go to? Well the precedent, goes to any trust responsibility that the United States holds for the Indian tribes.

Madam President, that is why I recommend so vigorously that we pass authorizing legislation in this Congress to establish the framework, to establish the guidelines, to establish the method if it is found to be desirable, that conforms with the requirement outlined by the Supreme Court as early as 1831. In that earlier case that I mentioned involving the Cherokees and the State of Georgia, the Court found that Congress could abrogate or modify treaties if it was found to be in the common interest, the public welfare of both the people of this country and the Indian people.

I am not against lawyers. One of my five children is a practicing attorney, and our eldest daughter—lo and behold—is a first-year student in law school, and I wish them well. I am not against their taking the cases they can get and getting paid for it. But I am against the precedent that establishes that on any trust responsibility—and this is precedent setting, water and everything else involved—we would find the United States paying both sides. It is precedent and a dangerous, far-reaching precedent.

I hope the amendment is rejected.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMENICI. I yield myself 1 minute.

Madam President, I repeat the great respect I have for the distinguished Senator from Montana, but I think it is absolutely misleading to say that it would be unconstitutional for the U.S. Congress to do this.

I ask this, hypothetically: We have the Legal Services Act in our country. What if we were to find that the criteria for the use of Federal funds to pay for litigants fit 500 of the constituents of mine and my good friend Senator BINGAMAN in New Mexico, and they each received $1,000 in legal services, paid for by the Federal Government, to fight a case such as this?

Mr. MELCHER. Madam President, will the Senator yield?

Clearly, that has been authorized. Congress has acted upon legal services, legal aid. This amendment is not legal aid.

Mr. DOMENICI. The argument has nothing to do with what is authorized. The Senator is suggesting that if we pass something, it is unconstitutional because we are fighting the trust responsibility. I do not think that argument makes any sense.

Mr. MELCHER. Madam President, this is all about what has been authorized and what has not been authorized by Congress. This is clearly a violation of authorized law.

The PRESIDING OFFICER. All time has expired.

Mr. MELCHER. I ask for the yeas and nays, Madam President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLD-

WATER), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Mississippi (Mr. STENNIS), are necessarily absent.

The PRESIDING OFFICER (Mr. DURENBERGER). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 69, nays 25, as follows:

[Rollcall Vote No. 257 Leg.]

YEAS—69

Abdnor	Grassley	Moynihan

NOT VOTING—6

Goldwater	Hollings	Stennis
Hatfield	Mathias	Tower

So Mr. DOMENICI's amendment (No. 2168) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 2178

(Purpose: To delete funding for the Washington Opera Society)

Mr. NICKLES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma (Mr. NICKLES), for himself, Mr. ZORINSKY, and Mr. RANDOLPH proposes an amendment numbered 2178.

Mr. NICKLES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 12, line 25, strike "608,302,000" and insert in lieu thereof "607,652,000".

On page 13, strike the colon on line 15 through the word "Colombia" on line 18.

PURPOSE

This section of H.R. 3363 provides funding for "Operation of the National Park System." Specifically, the amendment would delete $650,000 in funding for the Washington Opera.

EXPLANATION

At a time when the Federal Government faces a $200,000,000,000 deficit and an accumulated debt of over $1,000,000,000,000, the Congress cannot afford to take such an active role in subsidizing cultural activities. The $650,000 earmarked for the Washington Opera is a new budget expenditure.

Although this amendment does not remotely pretend to balance the Federal budget, it will help us hold the line on discretionary spending for cultural activities.

Mr. NICKLES. Mr. President, this Senator will only take a moment on the next amendment.

Mr. President, quite simply this amendment strikes out $650,000 which is presently in the Interior appropriations bill for the Park Service, and more specifically for the Washington Opera.

According to the research I have done, the Washington Opera has never received any Federal money before, certainly not as a line item in this bill. This would be a first-time expenditure and I think would set a very bad precedent. Not only will it cost $650,000, but it is money, as everyone in this Chamber is well aware, that we do not have. It means the Federal Government would have to borrow that money. At present rates, we will be paying about $60,000 a year in interest alone, to give the Washington Opera this money. I think that is a mistake. I do not think our country can afford it with $200 billion deficits. I think we do need to make more cuts in spending. Really, I think there are a lot more that are called for. This is just a starting point.

The Washington Opera is one area which has not received Federal funding before. We have funded the National Symphony and a few other things, but not the Washington Opera. We are looking at $650,000 which I think is better not spent. We do not need to increase the deficit by that amount. I hope the Senate will join me and delete this new spending.

Mr. STEVENS. Let me respond, Mr. President, to my good friend from Oklahoma, because I feel very strongly about this amendment. Let me also remind my colleagues that, earlier this week, the Senate passed a resolution designating October 22 as National Metropolitan Opera Day—certainly a clear indication of this body's support for the art of opera.

The resident opera company of Washington, the Washington Opera Society, has shown substantial growth in the last 3 years. It has gone from 16 performances in the 1979–80 season to 63 performances in the 1982–83 season. It has, in fact, become a totally national opera. It represents a renaissance in the whole area of performing arts for the United States.

In this city—and it may be strange for me to be expressing these points of view since I have expressed my own point of view about the city in other matters—in this city, the Federal Government is the major business. If you examine other areas, local and Federal support for opera companies in other areas receive 9 percent of their budget from local and Federal sources, but the Washington Opera receives only 3 percent of their budget from these sources. In terms of corporate support in other portions of the Nation, other opera companies average 11 percent of their budget from corporate support, but the Washington Opera Society receives 6 percent.

We have provided assistance to other collateral organizations in the Nation's Capital through the Interior appropriations bill. The Nation's National Symphony has in the recent past been funded over $1 million. The Folger Shakespeare Theater and the Cochran Art Gallery have been funded at about $300,000 a year for the past few years. The Washington Opera now has proven itself to be an integral part of our national Capital's cultural scene. As the premier opera company in the Nations Capital, the Washington Opera has become a part of the international opera scene, ranked among the major cosmopolitan opera companies of the world. The high quality of the Washington Opera's performance is particularly noteworthy because of the international visitors who come here primarily because this is the Nation's Capital.

We feel that this city is America's showcase, and that there is, as I said before, a total renaissance in terms of the performing arts. The Washington Opera Society is representative of the entire Nation in their increased performances and overall growth in the past few years.

Again, Mr. President, there has been almost a fivefold increase in the number of performances in a period of 3 years. It shows the increasing demand for high culture, for opera, like that presented by the Washington Opera.

Incidentally, during the past few years, private donations to support the opera have increased 77 percent; ticket sales have increased by 161 percent, and yet the Washington Opera Society requires this assistance in order to

maintain the growth schedule it has started on. For instance, the costs of operating out of the Kennedy Center are extraordinarily high.

I believe it is important to assist and maintain the opera in this area and I hope the Senate will not accede to my good friend's request. It is a selective request. Again I want to point out to the Senate this does not happen every year. We do select the items in the cultural sphere of the Washington metropolitan area that need assistance on a year-by-year and a case-by-case basis. This is a one-shot support item for this year at the level that has been described as $650,000.

Incidentally, this funding will go into the operational budget of the Washington Opera. This means that we are also indirectly assisting the Kennedy Center as we assist the Washington Opera Society because of the opera's residency in the Kennedy Center.

Mr. JOHNSTON. Mr. President, this is a very modest amount indeed for a very worthy cause. As a percentage of the Federal deficit, it is less than one two-hundred-thousandths. I think maybe one four-hundred-thousandths is the proper proportion.

As the Senator from Alaska has said, it is a one-shot deal to help a very worthy cause and we support it.

Mr. NICKLES. Mr. President, if the Senator will yield, I am interested in this one-shot approach. Is the Senator saying that if the $650,000 goes through this year, it will not be in the bill next year or the following year?

Mr. STEVENS. All I can point out is that we funded the National Symphony as high as $1 million in 1 year and it is down to $350,000 this year. We have money in the bill to assist Wolf Trap and some of the other cultural institutions in the area. I cannot say that we will never be back for assistance to the Washington Opera Society, but it is not something that will be a recurring expense at this same level every year. It may be up or it may be down. It depends on the situation and how much is needed. Again, I point out to my friend that the demand for this activity has expanded at an extraordinary rate and it is a very successful operation. But the Washington Opera Society needs help to maintain its level of performance.

Mr. NICKLES. I appreciate the Senator's comments. I am interested because, Mr. President, I think that if this passes at $650,000 this year we might well be back here again for a similar amount next year. Again, I think that once you start funding some of these programs, it is very difficult to stop them. I took a look at a lot of other programs in this bill, and I chose not to attack all of them. But if you took many of them nationwide, they would certainly be questionable as to whether or not they should have Federal support. I see $450,000 for Wolf Trap stage hands, and so on.

I will not go through the whole bill, but I will echo the Senator's comments that, yes, there is a lot of support for the opera and, yes, they have been able to carry on quite well in the past with private funds. If they do have this much support, I think those persons who actually attend the opera should be the ones paying the bulk of the bill.

I would also hope that we would realize that our Nation's Capital also happens to be one of the richest areas in the world. It is one of the richest cities, and the surrounding counties are among the richest counties. There are more fundraisers held in Washington, D.C., every night than are probably held in any other major city of the world. We have a lot of lobbyists who make a lot of money here.

I think a lot of private groups can and would be willing to support the Washington Opera. I personally have nothing against the opera, but I do have something against the citizens of Oklahoma being required to subsidize an opera which, in all likelihood, they will never hear or see. Yet, we will be taking their dollars to pay for something they will probably never be able to enjoy.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), would vote "nay."

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Mississippi (Mr. STENNIS), are necesarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 40, nays 53, as follows:

[Rollcall Vote No. 258 Leg.]

YEAS—40

Hatfield	Stennis	

So the amendment (No. 2178) was rejected.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, is the manager of the bill ready with respect to my amendment or does he wish me to withhold?

Mr. McCLURE. Mr. President, the Senate is not in order, and I apologize; I could not hear the Senator from Ohio.

Mr. METZENBAUM. First, may we get the Senate in order?

The PRESIDING OFFICER. The point of the Senator is well taken. The Senate is not in order. The Senator from Ohio has an inquiry and he has the floor. The Senate will be in order.

Mr. METZENBAUM. Mr. President, I inquired of the Senator from Idaho, the manager of the bill, whether or not he wished me to proceed at this point with my amendment.

Mr. McCLURE. Yes.

AMENDMENT NO. 2179

(Purpose: To impose certain restrictions on timber contract extensions)

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an amendment numbered 2179.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further

reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 51, between lines 2 and 3, insert the following:

No funds appropriated to the Forest Service, the Department of Agriculture, the Department of the Interior, or the Bureau of Land Management shall be obligated or expended to extend any contract to purchase National Forest timber on an interest-free basis as authorized by section 14(c) of the National Forest Management Act of 1976 (Public Law 94-588; 16 U.S.C. 472a.(c)) or terminate such contracts as authorized by this paragraph until the Secretary of Agriculture and the Secretary of the Interior, with the concurrence of the Comptroller General, develop and promulgate a financial need test which establishes a standard of eligibility for interest free contract extensions and terminations. The standard of eligibility established pursuant to the preceding sentence shall be based on a finding that—

(1) the firm seeking extension or termination has sustained operating losses for two of the last three years;

(2) the ratio of liabilities to assets of such firm has increased in the last fiscal year to .75 or more; and

(3) the United States would not recover the contract value from such firm if it defaulted on the contract.

No firm may receive extension or termination unless it meets the standards established pursuant to this paragraph. No contract entered into after January 1, 1981 may be extended or terminated. The authority granted by this paragraph to terminate contracts shall be available only for fiscal year 1984.

Mr. METZENBAUM. Mr. President, this amendment would limit the Reagan administration's bailout of Federal timber contract holders to those firms and only to those firms able to meet a modest financial needs test. Its intent is simple, to target meaningful relief to the needy while denying a bailout to the greedy. Before discussing the substance of the amendment, a little background is in order.

In the late seventies and eighties, timber companies anticipating a bullish economy engaged in a wildly speculative bidding binge that drove up the prices paid for Federal timber to 400 percent or more above its appraised value. Nobody forced them to bid such ridiculous prices, 400 percent above appraised value, but they made a conscious business decision that the timber was worth $300 to $400 per thousand board feet.

Soon thereafter, though, the economy went into a nosedive and the companies that had made the speculative bids found themselves with unmarketable timber. But instead of being honest enough to accept the consequences of their own management decisions, they took a different tack. They came to Uncle Sam for bailout.

Now, I have stood on this floor and I have been in committee meetings day in and day out and heard the business community tell the American people and tell the Congress to keep their nose out of their business. Let business do it on their own. Business does not need any Government intervention. Let the private sector do it.

But let the business corporations get in trouble, and to whom do they run? They run to Government. In this instance, they found the red carpet out and the Rose Garden open and all the offices of the White House ready, willing, and able to help them.

President Reagan—that great champion of the free market, that great opponent of Government intrusion into private business affairs—said: "Well, it's a little different with these fellows. These are my buddies."

It seems that President Reagan's principles are not so principled if the beneficiary is big business and if some of the people in that big business crowd are some of his buddies.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order. Conversations on the floor of the Senate will cease while the Senator is speaking.

Mr. METZENBAUM. In late July, the President agreed to allow timber firms to extend their contracts with the United States for 5 years. OK, I can understand that. It does not make good sense. Nobody else in the private sector would do it. But I can understand at least the concept, at least the consideration. Maybe there is some logic—not much. But maybe there would be some argument. I do not know if there is any logic at all.

Then he went further, and this is the unbelievable part. He excused them from paying interest on the uncut volume.

Frankly, I do not know where the President of the United States gets the authority to excuse somebody who has a debt to the U.S. Government from paying that which it owes the Government. But the President of the United States, the champion of free enterprise, the champion of living up to your contracts, excused them from paying interest and extended their contracts for 5 years.

Can you believe that? Not only are the companies excused from their irresponsible behavior; they do not even have to pay the customary interest charges.

Who pays the bill? Who pays the interest on the money that is not being paid in? You know who pays it: The American taxpayer pays it. It is he or she who always foots the bill.

Is it any wonder that this administration has the indisputable title of being that administration which has been more unfair to the people of this country, to average people, than any other administration in the history of this Nation?

For 2 years, I have heard the President and his men excoriate the poor and the elderly who receive benefits from human service programs. It has forced these people to endure the humiliating indignity of exhaustive financial audits just to determine if they can receive $50 or $60 in food stamps or medical benefits. But when Reagan's big business friends come to town, when those guys with the political money and muscle show up at the White House door, the President offers them the key to the Treasury and says, "Take what you need. No financial needs test, whether you need it or not. You don't have to pay any interest. We will give you 5 years on these contracts, a blank check."

Frankly, I question the legal authority of the President of the United States to give away the taxpayers' dollar.

The Department of Agriculture said that the timber eligible for interest-free extension is valued at $4.5 billion. The Office of Management and Budget, in a letter to me dated September 15, said that the Government would receive $234 million less over the 5-year period than if no relief were granted.

I say to Mr. Stockman, who sent those figures down, "I don't believe your figures."

If you owe $4.5 billion, and the Government interest rate today approximates 10 percent, and you delay it for 5 years, you do not need one of those little computers to figure out that it is a lot more than $234 million.

The administration justified its bailout on the grounds that it is necessary to save hundreds of sawmills from default on their contracts and subsequent bankruptcy. Well, I looked into the claim that a bailout is needed to stave off imminent disaster in the industry, and let me tell you what I found, because the facts do not justify the actions, and the facts do not accord with those assertions.

First, I discovered that, to date, not one, single timber company has gone out of business in the period from 1980 to the present. Not one, single timber company has gone out of business in the period from 1980 to the present. This is the period when prices were most depressed. Today, prices are on the rise again, and in some instances are at or approaching levels that prevailed when the speculative bidding occurred.

In fact, the National Forest Products Association reported that the prices for Douglas fir products have returned to the levels they hit prior to the 1980-81 high bid era. Furthermore, the data show that timber companies seeking relief continued to make inflated bids even after the prices had

already started to fall. The story for southern pine is similar.

The administration also said that the bailout is required to help small timber firms caught in a vicious, uncontrollable cycle.

I looked into that, also. The administration refused to identify the major beneficiaries. Finally, at my insistence, they delivered the names of the big winners. It is no surprise that no small, struggling sawmills are on that list. In fact, the big winners will be the Nation's largest, most well-heeled timber firms.

Heading the list is the Roseberg Lumber Co., owned by one of the wealthiest men in America, according to a list published recently by Fortune magazine with $312 million worth of Federal timber contracts. Roseberg is followed by Sierra Pacific with $253 million; Louisiana Pacific, with $212.5 million; Boise Cascade, with $186.4 million; Southwest Forest Industries, with $184.8 million. Elsewhere in the top 20 are Champion International, Willamette Industries, Crown Zellerbach, the Potlatch Corp., Pope & Talbot, and Diamond International.

In fact, the top 20 firms hold nearly half of the timber contracts elegible for extension, when measured in terms of contract value.

Mr. President, we are not talking about tiny struggling firms. We are talking about the giants of the timber industry.

Boise Cascade reported first quarter income doubling to $11.1 million, with net income up 100 percent.

Crown Zellerbach reported an increase in profits from $5.6 million to $20.4 million, and a 264-percent jump in net income.

Champion International went from break even to an $8 million profit, with an 1,238-percent rise in net income.

Louisiana Pacific reported first-half sales up 27 percent, with $16 million in profits, compared to an annual loss of $16 million a year ago.

But the President of the United States has welfare relief for the giants of the timber industry.

In short, the relief proposed by this administration would flow mainly to profitable firms showing ever-improving balance sheets and ever-improving profit sheets. They do not need relief, based on their own statements to shareholders.

Here is Boise Cascade, with net income up 100 percent in the first quarter, with growing profitability, pleading to be excused from simply paying interest on the uncut volume.

Mr. President, that is greed, greed, greed at its most obnoxious. Not only does it want the Government to bail them out from their own ineptitude; it wants to be excused of its obligation to pay interest. Would it go to its bankers and say that? Would it go to its insurance company, from which it had borrowed money, and say that? Would it go to the private people who held debentures from the company and ask to be excused from the debentures? No.

But it comes to the United States, to Uncle Sam, and says, "Uncle Sam, give me this relief, will you, buddy?" And the President of the United States, without using one of his Saturday radio broadcasts, without an announcement, without a press conference in the Rose Garden, without any hoopla at all, gives away the taxpayers' dollars.

I do not mean to single out Boise. The rest of the bunch is just as bad—Louisiana Pacific, Sierra Pacific, Southwest Forest Products, Champion International, Willamette Industries.

What is particularly outrageous is the fact that many of these companies told their shareholders in their annual reports that, if necessary, they could operate these contracts without hurting overall profitability. I submit that either they are lying to their shareholders and should be charged with fraud under the securities law, or they are lying to the Congress and the American people. And to the President of the United States.

So let us be clear about one fact: the administration's bailout bill is designed for only one group—the wealthy timber firms; not the little sawmills up in the Northwest part of the country.

In fact, the administration's plan does almost nothing for the truly distressed small sawmills. We have been in touch with the representatives of those small sawmills. We have actually talked with some of the owners of those small sawmills. The Forest Industry Affairs newsletter quoted Don Lee Davidson, president of Davidson Industries as saying, "for those who really need relief, this is not going to be very helpful."

My amendment is a far more responsible approach to relief. It establishes a modest financial needs test which any firm truly facing distress can readily meet.

The amendment recognizes that there are some firms that need help. And, as I said in the Energy Committee last year, and as I have said publicly on a number of occasions, I am willing to help the small firms, or even the large ones that need help. But you have to balance that need with the legitimate interest of government to limit relief only to those firms that need it. The needs test is simple:

First, it requires a firm to show that it has had an operating loss for 2 of the last 3 years. Obviously, this is to prevent profitable companies from receiving relief. If the company is making a profit and meets its obligations, why should the interest be forgiven?

Second, it would require that a contract holder show that its ratio of liabilities to assets as a measure of its leverage has increased in the last 2 fiscal years to at least .75. Generally, if a firm's ratio of liabilities to assets is under .50, it will be able to borrow at the prime rate. This test, then, is meant to show that a company is indeed distressed.

Finally, the test requires a showing that the Government will not collect on the value of the contract if default occurs. This is the most basic of the three tests, because it means that relief would only make sense if the Government would actually lose money if it insists on fulfillment of the contract. Quite simply, if a firm could meet the terms of the contract, it simply should not get relief.

I have tried to fashion an amendment that targets meaningful relief to needy firms while protecting the Government against the unnecessary loss of revenues to which it is entitled under contracts that were freely entered into.

I claim no great pride of authorship about the manner in which we have attempted to determine which ones are needy and which ones are not. If someone has a better formulation, I am perfectly willing to consider that.

But the fact is we have to make a distinction between providing relief to those who are in need and just giving away the taxpayers' dollars to those who are not in need.

If we must engage in private sector bailouts, if we must bail out firms guilty of unsound business decisions, then let us do so only upon a showing of extraordinary need.

Mr. McCLURE. Mr. President, I understand the concern of the Senator from Ohio. I am not going to attempt to debate the entire issue here this afternoon. He and I, and he with others over the last several months, have engaged in that debate from time to time. I am not sure that it does any good to try to repeat all of that rhetoric here today.

Certainly, the Senator from Ohio is entitled to his viewpoint and he expresses his concern eloquently.

My understanding is that Senator HATFIELD is unable to be on the floor at this particular hour, but he has had the opportunity to review and to draft a statement for the RECORD with respect to the Metzenbaum timber amendment. It is my understanding that the Senator from Ohio would rather those remarks be delivered on the floor. Because it is, obviously, impossible for the Senator from Oregon to do that at this hour because of his necessary absence, it would be my ordinary practice simply to ask unanimous consent that his remarks be printed in the RECORD. However, they are not lengthy and I will, on his

behalf, read them and ask that the RECORD make suitable reference to the fact that these are his remarks and not mine. His remarks are as follows.

STATEMENT BY SENATOR HATFIELD

The Senator from Ohio raises a number of issues which I will address in a moment. I want to emphasize at the outset, however, the most significant point presented by my colleague, that being the imposition of a "need test" on timber contract extensions and termination. On that issue I am in philosophical agreement with him and believe that his position is a meritorious one and worthy of continued discussion. I believe that those who are granted timber contract relief through extensions or termination must truely be in need, regardless of the size of the company. Assistance should not be granted to companies who are able to weather the on-going storm in the timber and home building industries. At the same time, however, I believe that an effective and effective and equitable "need test" will require discussion between our staffs, industry and the affected government agencies. I have promised my cooperation on this negotiation with my colleague and pledge my support to reach an agreement on this important issue.

I must be candid, however, in expressing my determination to secure real relief for those companies and individuals who suffer from the enormous burden of high priced federal timber contracts. As many of you in this chamber know, I have been working for almost two years, in the Congress and with the Executive Branch, to bring relief to an industry vital to this nation's future but which is suffering from recession pressures and excessive interest rates.

My original proposal was to roll back the price of BLM contracts in western Oregon to current market prices. That proposal met with a great deal of opposition from other timber producing regions. It was at that time that members of the timber industry joined together to form the structure of S. 916, of which there are 20 co-sponsors. A similar bill was reported from the Senate Energy and Natural Resources Committee last year and I continue to believe that some form of timber contract termination is necessary to overcome the great problems faced by Oregon's timber industry.

In July the Administration came forward with a five year interest free extension program that, while not perfect, is a step in the right direction. More recently, the Senator from Ohio has proposed to modify the Administration's five year extension to limit benefits to those most needy companies. Again, while I do not disagree with the intent of my colleague, I believe that the criteria for determining who should and should not receive benefits is in need of further discussion. To that end, I repeat my commitment to work with the Senator from Ohio in developing a mutually acceptable determination of "need."

In conclusion, Mr. President, I wish the record to show that my colleague from Ohio and I are in philosophical agreement on a "needs test" and that we are undertaking active negotiations to seek an agreement as to a effective and equitable determination.

My colleague from Ohio has indicated his desire to push for action on this bill because the regulations providing interest-free timber relief have already become effective.

It is our hope to reach an agreement before consideration of the continuing resolution or, in the absence of an agreement, vote on the Senator's proposed amendment which he is withdrawing today.

Should Senator METZENBAUM wish to pursue his amendment during consideration of the continuing resolution, I have agreed to assist him in obtaining a vote on its merits and will oppose any effort to deny such a vote on procedural grounds.

It is my intent to pursue timber relief, with or without such a provision, on any legislative vehicle, including the Oregon Wilderness bill which may be forthcoming later this Congressional session.

Mr. President, that is the conclusion and the whole of the remarks prepared for and authorized by the Senator from Oregon (Mr. HATFIELD) who is also the chairman of the Appropriations Committee.

I want to, for myself, make a slightly different statement, because I recognize the concerns of the Senator from Ohio and I recognize the sincerity with which my colleague from Oregon is moving to attempt to meet those concerns.

As is often the case, different people look at situations differently, and, accordingly, view different problems associated with the situation. The Senator from Ohio looks at an industry which operates not only in the West but also in other areas in our public land States, but fails to distinguish between the difference of those operations in nonpublic land areas and those that occur in public land areas.

The operations in my State are different than they are in the State of Washington. The State of Washington is only owned by the Federal Government to the extent of 43 percent. The Federal Government owns 64 percent of my State. The State of Washington owns large tracts of timberlands within the State of Washington and their relationship with the State land department in the State of Washington is much different than it can be in the State of Idaho where we have much more restricted State ownership.

The Senator is correct that there was sometimes almost what appeared to be wild bidding, or what many have charged to be speculative bidding, with respect to the timber that was made available upon the public lands in those States.

What the Senator fails to recognize, however, is whether the company is large or small it has no alternative but to engage in the bidding. If there is indeed speculation in an area, it may be done by old line companies, it may be done by new entities, it may be by stable, integrated companies that have been in there for years, or it may be by a new entry into the marketplace. It may indeed be simply a speculator seeking to get some contracts on timber so that he can benefit from the resale of contracts to those who would have use for the timber.

There are a whole variety of different reasons why people may be bidding, but whatever the mix of bidders may be, a large company or a small company must continue to operate in that market regardless of those forces, or be excluded completely.

Something has been said about the volumes that are under contract. Yes, indeed, a company that hopes to be in business next year and the year after and the following year must have enough timber under contract so that he knows he will have operations within that area. If not, he will be even harder pressed by speculative forces at the time the next sale comes up. They must bid forward for 2 or 3 years or find themselves in the most untenable of all positions of having to bid whatever the price might be on a given sale. They simply have no choice. The only other option to buying that contract is to close down.

We are under pressure in the Northwest and along the western coast for those people who are exporting round logs from the United States. The real source of the speculative bidding in the Northwest, whether it be on the western coast of Washington and Oregon or farther inland in eastern Washington and eastern Oregon, or Idaho, the area with which I am most familiar, is that there is not enough timber to meet all of the demands. The reason we do not have enough timber to meet all the demands is founded in the failure of public land policy to recognize the need for available timber. We do not recognize the fact there is more sawmill capacity than there is available timber. That is exacerbated by what has been nearly a 20-year study on wilderness designation of roadless areas in the public lands, whether it be the Forest Service lands that are one-third of my State or lands under the administration of the Bureau of Land Management, which is another one-third of my State.

So, we have a shortage situation in which the Federal Government is the near monopolist creating the shortage and then complaining about competition for what is made available.

Yes; the companies are involved and, yes; the companies are caught in a bind. But it is not just the companies that are involved and it is not just the successful or the large or the small that are involved. It affects them all.

And when the bill that Senator HATFIELD, and I, and others cosponsored, which has been reported, was introduced, we introduced at that time a list of the people who were in support of that legislation. While you can say that the National Forest Products Association is an organization representing large companies, it also represents small companies. They support the legislation. The Northwest Pine Association is not totally dominated by large companies. It also has small ones, and they support it. The National Homebuilders has no direct interest

in these timber contracts. They have an indirect interest in the availability of the timber and they support the legislation.

The Western Resource Alliance, which is not solely those who use this resource directly but those who are affected by it, support the legislation.

The California and Oregon counties—in California, Plumas and Sacramento Counties, and in Oregon Roseburg and Linn Counties—support the legislation, not because they own the companies, not because they hold the contracts, but because they are affected and their people are affected by the activities.

I could go on and list some of the others that are individual interests, such as the Willamette Industries and the Summit Timber Co. The Western Bank in Coos Bay, Oreg., which does not own a timber company that operates, which does not hold any of the contracts, registered their support.

There is a number of others who have supported it as well, large and small. I think the Senator from Ohio knows that the United Brotherhood of Carpenters & Joiners, on behalf of their members, came in and said: "We support this legislation as something that is necessary to protect the men and women who work in this industry."

One of the difficulties that I have with respect to a needs test is that it measures corporate performance; it does not measure impact upon people.

I happen to have in my State a number of small timber-dependent communities. Those communities are not really concerned about whether it is a small, independent company that has contracts with the Federal Government, or whether it is a large, integrated corporation that has contracts with the Government; they are concerned about whether that sawmill in that community continues to operate. The large integrated corporation may well make some money from its paper operation, or fiberboard operation, or container operation but may be losing their shirt on the operation of an individual sawmill because of the effects of the contract. They may, in fact, close down that sawmill because of the effects of the contract. Regardless of what the arguments may be about the profit-and-loss statement for that company, the people who live in that community are concerned about what happens to the sawmill.

So there are people who are involved in this equation, too, and that makes it more difficult.

If, indeed, the needs test which might be developed would look at the needs of these men and women whose livelihood is entirely bound up in that community, then indeed the needs test might well be something we could look at. If, however, the needs test ignores the needs of the people whose whole lives are bound up in that community, then that needs test must be deficient. If it ignores the impact upon the employment opportunities in areas of very high unemployment in the Northwest, the public land States, then indeed a needs test would be deficient because it would miss one of the major concerns that we have.

While I understand what the Senator from Ohio is saying, I understand the needs of that industry quite well. While I understand the desire of the Senator from Oregon to accommodate the Senator from Ohio by developing a needs test, I will be very interested in seeing whether that needs test really accurately measures all the needs that must be evaluated before we make a determination of whether or not we will or will not grant relief in the economic impact on this area.

As I said at the outset, Mr. President, it is not my intention to debate all of the issues. I do not mean to indicate that what I have said here is these few brief minutes begins to elevate this debate to a full exposition of all of the issues and all of the arguments on the several sides of all of those issues. Nevertheless, as we are looking at this amendment and the statements of the Senators from Ohio and Oregon with respect to the pending amendment and how it might be resolved, the Senator from Idaho would be derelict in his duty to the people he has the honor to represent if I did not indicate my concern, my very deep concern, not for the shareholders of Boise Cascade that may live in Ohio, but for the workers for Boise Cascade who work in Idaho. I will continue to express that concern.

Mr. President, I hope this matter can be resolved, and I hope that when we get around to the consideration of it we will have the friendly dialog as well as the pointed dialog that sometimes accompanies these debates.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I was indeed impressed by my colleague's remarks. In fact, I was so impressed that I think I am going to search them out in the CONGRESSIONAL RECORD when it is printed and the next time we have a matter having to do with unemployed workers in Ohio or Michigan, I am going to ask him to support that legislation because of its impact on people. And when we have legislation having to do with cutting back on food stamp funds, I am going to read back to him his words pertaining to the impact on people.

Mr. McCLURE. Will the Senator yield at that point?

Mr. METZENBAUM. I had just got going. I yield.

Mr. McCLURE. I would say to my friend that when it comes to the impact upon people, I think the Senator will find me right there and I think the Senator will find that I voted for a number of the things to which he has made reference. At the same time, just as the Senator is concerned about whether or not there is a needs test in the contract termination question, I may read back to the Senator from Ohio some of his comments when we get around to looking at food stamps and unemployment benefits.

Mr. METZENBAUM. I think that here we are just talking about a question of equity. The Senator from Ohio is perfectly willing to be equitable, fair, considerate with respect to that part of the industry that finds itself in economic trouble. But where a multimillion dollar and in some instances multibillion-dollar company is in a position to meet its contractual obligations, then I do not think that Ronald Reagan or the Congress of the United States ought to give away taxpayers' dollars to them.

I think they ought to live up to their contracts.

Having said that, Mr. President, I very much note the remarks of the chairman of the Committee on Appropriations that the manager of the bill was kind enough to read into the RECORD as a response. Senator HATFIELD happens to be a prime mover in connection with the matter of timber and I think that the essence of that simply was that we will make every effort to come up with a solution to this problem in the immediate future and that, absent that, I shall bring the issue back to the floor at the time the continuing resolution is brought to the floor.

Having said that, Mr. President, I now withdraw the amendment.

The amendment (No. 2179) was withdrawn.

Mr. McCLURE. Mr. President, the Senator from Ohio was granted yesterday the right to offer three amendments today. My understanding would be that this colloquy and discussion held on the floor and the discussions that have been held off the floor satisfy the concerns of the Senator for at least this time in this bill.

Mr. METZENBAUM. Mr. President, the Senator from Idaho is correct. I have no amendments to offer, and if he is prepared to go forward with disposition of the bill, I shall certainly not stand in his way.

Mr. McCLURE. Mr. President, I know of no further amendments to the bill.

Mr. President, it has recently come to my attention that on July 7, 1983, the National Capital Planning Commission approved the revised design for construction of a restaurant on the Mall immediately adjacent to the National Sculpture Garden, and that on July 13, 1983, the Commission of Fine

Arts also approved the design. This restaurant was originally included in the 1966 master plan governing construction and development on the Mall, based on the need at that time for food services and comfort facilities for the thousands of visitors to the Mall area. That 1966 master plan has not been updated.

Without objection, I ask unanimous consent to have printed in the RECORD at this point a briefing statement prepared by the National Park Service that traces the history of this project.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

NATIONAL PARK SERVICE—BRIEFING STATEMENT

Subject: National Sculpture Gardens.

Issue: Completion of Original Design and Construction of the Restaurant.

With the Smithsonian Buildings, the National Memorials, and other Federal buildings surrounding the Mall, there has always been a great need for food services and comfort facilities for the thousands who visit this area each year. The Mall Master Plan, completed in 1966, designated the National Sculpture Garden and the adjacent portions of the Mall to include such visitor accommodations.

COOPERATIVE AGREEMENT

On May 2, 1966, the Secretary of the Interior and the National Gallery of Art entered into a Cooperative Agreement whereby the National Sculpture Garden would be developed in collaboration with the Gallery. The National Park Service would be responsible for construction of the facility.

Following this agreement a verbal understanding between the NPS and the Mellon Foundation contemplated matching funds from the Foundation for construction of walks, walls, seating areas, landscaping, etc., related to the Sculpture Gardens; exclusive of the pool and restaurant pavilion. Programming and design proceeded on that basis until July 1971, when Mr. J. Carter Brown informed Director Hartzog by telephone that the Mellon Foundation could not participate in the project.

COMMISSION APPROVALS

On May 14, 1967, the preliminary design of the Sculpture Garden, including the restaurant, was presented to the NPS and the Board of Trustees of the National Gallery of Art and was approved.

On July 21, 1967, the preliminary design plan was presented to the Commission of Fine Arts and approved on the condition that the terrace sight levels at the interior corners be studied.

On September 14, 1967, the preliminary design plan was approved by the National Capital Planning Commission. Two recommendations were included in their approval. One had to do with the "cross axis vista" and the other with the possible future construction of the pedestrian bridge.

On July 7, 1983, the National Capital Planning Commission approved the revised design concepts and requested that certain details be addressed in the next submission to the Commission. On July 12, the Commission of Fine Arts also approved the design of the building.

CONGRESSIONAL APPROVAL

The House Subcommittee on Department of Interior and Related Agencies Appropriations first approved the project in 1966. A total of $868,000 was appropriated for the project in fiscal year 1966–1968. However, in fiscal year 1969 these funds had not been obligated and were rescinded as part of a major cutback to reduce government-wide expenditures during the Vietnam War.

Subsequently, Congress appropriated $1.1 million in fiscal year 1970–1972 for the project which included funds for construction of the basement of the restaurant which would also house mechanical equipment for the skating rink, and in fiscal year 1974, $200,000 was appropriated for refrigerating equipment.

NEED FOR FOOD SERVICES

The majority of the visitors to the Mall area are museum patrons. The concept of visitor services in this area is to ensure that basic human needs are met within a reasonable proximity; thus, the visitors are not forced to take the time to leave their areas of interest to satisfy these needs for food and comfort facilities. Out of town and international visitors are constrained by a limited amount of time which has been allotted to their visit to the Nation's Capital. Although the major museums offer food and related services, the demand considerably exceeds the supply and patrons must wait to be served. This is evidenced by the long lines at the museum restaurants and the growing food sales from the existing temporary food units operated by GSI on the Mall.

By construction of the Sculpture Garden Restaurant and relocation of the permanent food facility at the Washington Monument Lodge, non-essential food service elements operated by GSI on the Mall can be eliminated.

CONSTRUCTION BY GSI

GSI has been operating the ice skating facility with minimum food service since the winter of 1974–75. The current contract with GSI grants a preferential right to provide food services at this location. It is contemplated that funding for the completion of the restaurant will be provided by GSI with construction in the near future.

Mr. McCLURE. Mr. President, the Park Service's current plan is for the Guest Services, Inc. (GSI) company to finance all aspects of the facility, including landscaping, and administer the restaurant as a concession's operation. However, we understand that all of the details of this arrangement have not yet been agreed to between the Service and GSI.

I have asked the Park Service for an estimated schedule of events regarding the construction of this facility and I have also asked several other questions. Those questions are:

First. What is the current level of demand and the current supply of food services and comfort facilities on the Mall, and including adjacent facilities such as the Pavilion in the Old Post Office Building, compared to the 1966 levels?

Second. What will be the nature of the concession's arrangement between GSI and the Park Service?

Third. What are the potential other uses for this space and how do those potential uses compare to the current need for food and comfort facilities on the Mall? and

Fourth. What is the overall need to update the 1966 master plan governing Mall development?

Until such time as the committee has had an opportunity to review this information in more detail, we are requesting the Park Service to permit no land disturbing activities to be initiated. I do this not because we are opposed to this project. In fact, the committee has generally been supportive of increasing the investment of private dollars to provide needed facilities and services on park system lands. In this instance, however, the committee needs to be sure that changing conditions have been considered and that this project is still well justified. After all, remaining undeveloped space on the Mall is at a premium and should be allocated to the highest demand utilization.

THE IMPORTANCE OF INTEGRATING COAL PYROLYSIS TECHNOLOGY WITH COAL-FIRED ELECTRIC POWER GENERATION

● Mr. BINGAMAN. Mr. President, it has come to my attention that one of my constituents has just completed a study on the integration of coal pyrolysis technology with coal-fired electric power generation that offers great promise for reducing the acid rain problem, improving the economics of coal-producing States and States with coal-fired powerplants, strengthening our national security through the production of refinery feedstocks from our large domestic coal reserves, and improving our balance of trade with Japan.

The pyrolysis progress removes most of the volatile material in the coal before it is burned in powerplants and converts it to a crude oil suitable as a refinery feedstock. The remaining "char" is a high-quality powerplant fuel in that the sulfur and ash content can be reduced in the process. The production of char beyond powerplants requirements could then be formed into a slurry, with the coal liquids that are produced, and moved via pipelines and tanker to Japanese markets. This possibility offers the potential for United States coal to compete in the Japanese market with suppliers from South Africa, Australia, and China.

The realization of these benefits depends on rapid development of the concept. This development requires testing of the technology with a variety of coals at a scale that is large enough to provide the information needed to design commercial units. Fortunately, the U.S. Department of Energy owns a facility that can be modified for this purpose at a relatively low cost. This is the Bi-gas facility at Homer City, Pa. This pilot plant, with a replacement cost of approximately $100 million, is now being mothballed by the Department of Energy.

My question for the senior Senator from New Mexico concerns the appropriations for the fossil energy research and development activities of the Department of Energy.

I note that these appropriations include funds for control technology to negate acid rain, advanced process development, indirect liquefaction, engineering evaluations, studies of combustion systems, coal gasification process development, systems engineering concepts, environmental and engineering analysis, and general plant projects for energy technology centers. During your deliberations on these matters in the committee, was there any discussion that would preclude the use of these funds for engineering studies of the conversion of this facility for testing pyrolysis technologies with a variety of United States coals?

Mr. DOMENICI. Let me say to Senator BINGAMAN, the potential benefits of the technology that you described are precisely those that we were trying to achieve in our recommendations for the fossil energy research and development program. I see no reason why these funds could not be used for this purpose. I am particularly impressed that this concept offers the opportunity to realize important benefits from past investments by the Department of Energy as well as addressing the critical problems of environmental quality, energy security, economic development, and balance of trade that are facing our Nation today.●

● Mr. JOHNSTON. Mr. President, I recently received a copy of a letter from the Assistant Controller of the Department of Energy describing a proposed reprograming within the Energy Information Administration that would remove funds from "data analysis and modeling activities" to pay such administrative support costs as space rental, guard services, and utilities. Apparently, there exists a $1.8 million deficiency in that account which needs to be paid by the end of the fiscal year. Is the chairman aware of this request?

Mr. HATFIELD. I am aware that DOE submitted the reprograming on August 29, 1983. The Appropriations Committee, however, has not yet acted on the request.

Mr. JOHNSTON. Without prejudicing the Appropriations Committee's decision, I am concerned that an effort may be underway within the Department of Energy to curb the role of the EIA in analyzing and maintaining a modeling capability with respect to energy issues. For example, I am reminded of the controversy within the Department over the EIA's analysis of various natural gas deregulation proposals. These anlayses did not always agree with the administration's own view of the situation.

Mr. HATFIELD. I share this concern with my colleague from Louisiana. I believe that EIA should maintain a strong analytic capability in order to provide DOE and the Congress important and timely information, regardless of the policy implications.

Mr. JOHNSTON. The point is that EIA is empowered to conduct such analyses, and they are to call things as they see them. Without an honest and objective analytical capability, the basic statistical function of the agency cannot remain relevant to the issues. I ask the chairman of the full committee and my colleague, Senator MCCLURE, chairman of both the energy authorizing and appropriating committees, to consider this important activity in EIA when you decide on the Department's request to reprogram $1.8 million away from EIA collection, production, and analysis. Moreover, I would encourage a close review of any changes DOE may want to make in its use of fiscal year 1984 appropriation for EIA analytical activities.

Mr. HATFIELD. Again, I concur with the Senator's views and want to assure him that regardless of the Appropriations Committee's decision on this request, it is not our intent to dissipate the analytical capability at EIA.

Mr. JOHNSTON. I thank the chairman. I ask that the letter to which I referred to be printed in the RECORD at this point.

The letter referred to follows:

DEPARTMENT OF ENERGY,
Washington, D.C., August 29, 1983.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This letter is to inform you of the proposed reprogramming of $1,796,000 within the Energy Information Administration (EIA) appropriation.

The proposed reprogramming is necessary because additional funds are required to cover administrative support costs for such items as space rental, guard services, communications, utlities, and management systems. Most of these support items are managed centrally by the Assistant Secretary for Management and Administration. This action is necessary to fund what are largely fixed administrative expenses incurred on behalf of the EIA on-going programs. Experience to date indicates that administrative support expenses will total $6,696,000 for the year rather than $4,900,000 that was estimated at the time of the FY 1983 appropriation.

EIA will fund these administrative support costs by using funds initially planned to be used for data analysis and modeling activities. For example, funds initially planned to be for international energy activities are available because of delays in developing the International Energy Data Base. Also, EIA will eliminate selected, less-critical analyses. Planned analyses involving changes to the use of fuel in the generation of electricity due to price changes will not be initiated. Analyses involving Common Market information and field-specific international oil reserves information will be terminated. EIA will continue to produce data on fuels used in the generation of electricity and on international energy characteristics.

Sincerely,

ELIZABETH E. SMEDLEY,
Assistant Controller.●

Mr. NICKLES. Mr. President, when this Interior appropriations bill came to us from the House it was almost $1.4 billion over the President's budget request for fiscal year 1984. The Senate Appropriations Committee did a little better—the committee bill was $930 million over the President's request.

Now, Mr. President, after we have amended this Interior appropriation, our version is $1.34 billion over what the President recommended on budget, and an additional $750 million off budget—a total of more than $2 billion over the President's budget.

Mr. President, this bill is simply too expensive. I urge my colleagues to vote against H.R. 3363. And if in the event it does pass today, I hope the President will veto it.

OUTER CONTINENTAL SHELF LEASING

● Mr. CHILES. Mr. President, the Senate Interior appropriations bill before us today does not include the prohibition on oil and gas leasing along the Outer Continental Shelf that is included in the House version of this legislation. I am particularly interested in the House language affecting the Department of the Interior's proposed leasing in the eastern Gulf of Mexico and would like to share some of my concerns with my colleagues in the Senate.

First, let me clarify and strongly emphasize that I support oil and gas exploration and development along our Outer Continental Shelf. When Congress established this program, however, we envisioned a working partnership between affected coastal States and the Department of the Interior. I am afraid we have seen too many cases where this partnership is not working. The House Interior appropriations bill addresses, in part, the Department's proposed lease sale No. 79, encompassing 59 million acres in the eastern gulf. In order to better understand my views with respect to this particular lease offering I think it is helpful if I review what my State experienced earlier this year when the Department of the Interior announced its scheduled lease offering in the South Atlantic, lease sale No. 78.

Once the proposed offering was announced, the State of Florida, along with the Defense Department and NASA, expressed concerns to the Department concerning some of the areas offered for leasing. The result of this negotiation? Nothing.

In so many words, the Department response was, "thanks for your comments, but we plan to offer all the suggested areas for leasing in July, 1983."

It was not until the House of Representatives included language in the fiscal year 1983 supplemental appropriations bill to prohibit leasing in the South Atlantic that the Department sat down again with NASA, DOD, and the State of Florida to work out areas of disagreement. Members of the Senate can see, therefore, why I do not have the strongest faith in the existing partnership between the State of Florida and the Department of the Interior. I must admit, however, that Secretary Watt has demonstrated in this particular lease sale, lease sale No. 79, a willingness to work out with the State of Florida their problems about certain areas offered in the eastern Gulf of Mexico. My concerns, and those of the State, are reflected in the House prohibition language. Areas set off limits to leasing include tracts containing environmentally sensitive seagrass beds and coral communities as well as areas which have not as yet been adequately studied to determine whether leasing should take place. In addition, a protective buffer zone along Florida's gulf coast has been designated to enhance protection of our State's beaches and commercial and sport fishing interests.

I, like many of my colleagues, would like to see the administrative process work and the lease offering made according to schedule. What I want to insure, however, is that the State of Florida has the opportunity to work with the Department of the Interior to address some of these problems.

As a member of the Senate Appropriations Committee I was able to bring to the committee's attention an alternative proposal to the House language dealing with leasing in the eastern Gulf of Mexico. When the committee was discussing the Interior appropriations bill I offered an amendment which covered the same areas as the House proposal on lease sale No. 79 but differed in two respects. First, my amendment did not make reference to a memorandum of agreement between the Department of Defense and the Department of the Interior. I am pleased the Departments have reached agreement with respect to military and defense-related needs in the gulf, so this language is no longer necessary. Second, my amendment included language not in the House bill which would allow leasing to take place if and when an agreement is entered into by the State of Florida and the Department of the Interior concerning this lease offering.

When it became obvious to me that my amendment would not be adopted by the Senate committee, I did not push for a vote on my proposal. I did, however, stress my hope that this alternative would be considered during conference discussions with the House of Representatives. That is still my hope. I believe this approach is reasonable. It addresses concerns of my State and infers support for the overall concept of offshore energy exploration and development. I hope the final agreement reached on oil and gas leasing during conference consideration of the Interior appropriations bill will reflect my views and the views of the State of Florida.●

Mr. McCLURE. Mr. President, I think we are ready for the vote on passage. Before that vote, there is one Senator whom I believe may wish to make some further comment. Pending his arrival, let me summarize what we have done on this bill.

The Senate has increased the Interior appropriations bill by $1,398,400,000 by actions taken on the floor to this time. This total includes $410,400,000 in new budget authority and $988,000,000 in off-budget strategic petroleum reserve spending authority. All but $40 million of that total is involved in the SPR issue.

The Senate bill now stands just $32 million below the House in new budget authority. Because of our new bill total of $8,049,000,000 and because we yesterday added almost $1 billion to fill the SPR, we have been informed we are now likely to face an OMB recommendation for a Presidential veto of this bill. Senators approaching the vote on this bill should be aware that they may well have the opportunity to vote on it a second time.

The Senate should be on notice that we shall have to trim at least $1 billion from the bill in conference if we expect it to be signed. Therefore, no program, no authorization, and no individual expenditure in this bill is immune from scrutiny as we take this bill from the floor of the Senate and go to conference with the House of Representatives. I expect it to be a very, very difficult conference.

The PRESIDING OFFICER. Are there further amendments?

Mr. McCLURE. Mr. President, I ask for the yeas and nays on the passage of the bill.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Are there further amendments to be proposed? If there be no further amendments to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), would vote "Yea.".

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 76, nays 18—as follows:

[Rollcall Vote No. 259 Leg.]

YEAS—76

Abdnor	Ford	Moynihan
Andrews	Garn	Murkowski
Baker	Glenn	Nunn
Baucus	Gorton	Packwood
Bentsen	Hart	Pell
Biden	Hatch	Percy
Bingaman	Hawkins	Pressler
Boren	Hecht	Pryor
Boschwitz	Heinz	Randolph
Bradley	Huddleston	Riegle
Bumpers	Inouye	Rudman
Burdick	Johnston	Sarbanes
Byrd	Kassebaum	Sasser
Chafee	Kasten	Simpson
Chiles	Kennedy	Specter
Cochran	Lautenberg	Stafford
Cohen	Laxalt	Stevens
D'Amato	Leahy	Symms
Danforth	Levin	Tsongas
DeConcini	Long	Wallop
Dixon	Lugar	Warner
Dodd	Matsunaga	Weicker
Domenici	McClure	Wilson
Durenberger	Melcher	Zorinsky
Evans	Metzenbaum	
Exon	Mitchell	

NAYS—18

Armstrong	Grassley	Nickles
Cranston	Heflin	Proxmire
Denton	Helms	Quayle
Dole	Humphrey	Roth
Eagleton	Jepsen	Thurmond
East	Mattingly	Trible

NOT VOTING—6

Goldwater	Hollings	Stennis
Hatfield	Mathias	Tower

So the bill (H.R. 3363), as amended, was passed.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make clerical and technical corrections in the engrossment of the Senate amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I move that the Senate insist upon its amendments and request a conference with the House of Representatives and

that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Messrs. McCLURE, STEVENS, LAXALT, GARN, COCHRAN, ANDREWS, RUDMAN, WEICKER, HATFIELD, BYRD, JOHNSTON, HUDDLESTON, LEAHY, DECONCINI, BURDICK, BUMPERS, and STENNIS conferees on the part of the Senate.

Mr. McCLURE. Mr. President, I know it is customary at these times to make what sometimes appears to be pro forma thanks to the ranking minority member for his great assistance and to the staffs on both sides of the aisle. I want to extend those thanks, and they are very real; they are not just pro forma.

Working with Senator JOHNSTON is always a pleasure, and working with the staff we have on both sides of the aisle on this subcommittee makes the job much more easy than it otherwise would be, and the work product shows it. I register that thanks to the staff members on both sides of the aisle and to the other members of the subcommittee.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. BYRD. Mr. President, I want to join the distinguished manager of the bill, Mr. McCLURE, in commending Mr. JOHNSTON, who is the acting ranking member, and in doing so, I also want to personally commend Mr. McCLURE, the chairman, on the dedication and skill and the fine workmanship they have demonstrated here in connection with this bill. They have worked hard. They have considered the amendments that were called up. They have done so, I think, in a way that has made the Senate proud.

Mr. JOHNSTON is off the floor at this moment, but I certainly share the manager's comments concerning Mr. JOHNSTON, and I want to add my own.

Mr. McCLURE. Mr. President, I thank the Senator from West Virginia for those comments.

I want to add what is known to all Members of the Senate, and that is that the Senator from West Virginia, as the former chairman of this subcommittee, set a very high standard for us to emulate. So we have been challenged. I appreciate his remarks.

Mr. BAKER. Mr. President, I would be derelict if I did not extend my congratulations to the distinguished chairman of the subcommittee and the distinguished designated minority manager, Mr. JOHNSTON, and to the Senators who participated in this bill, yet another of the regular appropriations bills.

We spent a little over 18 hours in consideration of this measure, and there were a number of amendments agreed to, a number rejected. It was a difficult bill to deal with, and it traditionally is.

I especially congratulate Mr. McCLURE for his effective handling of this measure.

Mr. BYRD. Mr. President, will the majority leader yield to me?

Mr. BAKER. I yield.

MARTIN LUTHER KING, JR., HOLIDAY

Mr. BYRD. Mr. President, in my experience around here, I have noted from time to time that there are a lot of unfounded rumors circulated, and one rumor that has been circulated today is to the effect that the Democrats are dragging their feet on the Martin Luther King, Jr., bill.

Now I think that rumor may have been stimulated by a question which I proposed to the distinguished majority leader earlier today or a statement that I made; namely, that we on our side would like to vote on the Martin Luther King measure either tomorrow or the week after next and that possibly we could work out an agreement which would set a date certain so that all Senators would be on notice. That date could be on any day of the week after next and at any particular time.

The reason I made the request is that one of the Presidential candidates on my side of the aisle—and it was not I—could not be here Friday this week, could not be here next week, and he was hopeful that he could be here when the matter was voted on. So he was suggesting that it be tomorrow or the week after next.

So I want to make the record clear that the Democrats are not attempting to drag their feet on this matter. We are ready to vote on tomorrow. As I have privately discussed with the distinguished majority leader, I think we are in a position to offer an agreement which would allow for 2 hours of debate on tomorrow and 1 hour on an amendment by Mr. RANDOLPH to be equally divided, and that the agreement be in the usual form.

(Mr. JEPSEN assumed the chair.)

Mr. BAKER. Mr. President, this morning when the Senate opened—I guess it was this morning, it seems like a long time ago—but this morning, the minority leader and I had a little colloquy about one of the Democratic Presidential candidates in the Senate—and I guess, with a lack of a seriousness, I said that there are several on the Democratic side, and it would be a little difficult to figure out which one—but that one of those Members would be absent on Friday, when I had announced that it was my intention to try to get the Martin Luther King vote.

I also explained to the minority leader, in our colloquy this morning during leader time, that I, long ago, before the August recess, said that I was going to try to take up that measure shortly after we returned from the August recess. And I am committed to that—indeed, I took the matter directly to the calendar in order to expedite that—and I want to perform on that commitment.

I have announced now for some several days we were going to do it on Friday and I expect that some of my Members on this side of the aisle have made their plans on that basis.

But, Mr. President, if the minority leaders wants to offer a time agreement and if he wants to do the measure on tomorrow, if he will give me a little time and I can run that through our traps and see, I will be glad to see if we can do it. But if we cannot do it, I must tell the minority leader in all candor that it is my intention to try to reach that bill on Friday of this week. I do not feel that I can postpone it for a week and a half.

Mr. BYRD. I certainly recognize the circumstances that would conspire to put the majority leader in the position that he is and I respect his position and certainly would not expect him to break any commitment and would respect him for keeping it. But if he is ready on tomorrow, we are ready on this side. I might have to add to the request that there be 1 hour on an amendment which might or might not be offered by Mr. NUNN.

Mr. BAKER. Very well, I will run that through our system and we will see.

Just to repeat it for the sake of clarity, I do feel a strong commitment to take the matter up this week. If we can do it tomorrow on a time agreement, that is fine with me. I will check our side to see if that works out. But if we cannot get that agreement, regardless of which side the objection might come from, I am committed to try to take up the measure on Friday.

Mr. BYRD. While the majority leader has the floor and is answering questions, would he also indicate whether or not there is going to be any more rollcall votes today?

Mr. BAKER. Yes. I thank the minority leader for asking.

It is 5 o'clock plus 4 minutes. I am told we can get to the revenue sharing reauthorization bill. That will not take more than an hour or so. I think we ought to do that. So I think we ought to go ahead with it and I would expect rollcall votes.

Mr. President, while we are trying to run our clearances on a time agreement on the Martin Luther King matter, I wonder if the minority leader is in a position to approve a unanimous-consent request that we now go to the revenue sharing reauthorization.

Mr. BYRD. Mr. President, the distinguished ranking member of the Finance Committee is here and he has

indicated that it is all right to go to it. But he does not think we ought to be in a long time today.

Mr. BAKER. I do not plan to be in a long time, I say to the minority leader and my friend from Louisiana. It is not my intention to ask the Senate to stay past 6:30 or 7 o'clock. I am hopeful we can finish by that time.

Later, the following occurred:
